CONTENTS

Foreword
Organization and Boards
Acknowledgements

15 Years of Experience with Mechatronics Research and Education
   Job von Amerongen 1

3D Reference Structures for the Calibration of Confocal Microscopes
   Andreas H. Foitzik, Rainer Würslin, Harald Töpfer, Tilo Strobel, Wolfgang Kaese, Mechtilde Schäfer 19

Robust Intelligent Control of Small-Scale Mechatronic Devices
   M. Önder Efe, Lemi Daghan Acay, Pradeep K. Khosla 27

Pole Placement Controller with Learning Rate for Non-linear Dynamic Plants
   Muhammed Shafiq, Mohammed Haseebuddin 37

Near Minimum Time Optimal Track-to-track Seek Control of HDD by Continuous Proximate Time-Optimal Control
   Muammer Kalyon 45

Evolution Inverse Kinematics of an Artificial Hand
   Miguel Ángel Rodríguez Navarro, Ignacio Juárez Campos 59

A General Approach for Directionally Extended Workspace Analysis of a 6 DOF Parallel Mechanism
   Hüseyin Alp, Sait N. Yurt, İbrahim Özkol 71

Motion Determination and Error Analysis of 6-3 Stewart Platform Mechanism based on the Lengths of the Legs
   Sait N. Yurt, İbrahim Özkol, Hüseyin Alp 79

Using Input Shaping to Suppress Controller and Structural Oscillations
   Keith Hekman, William Singhose, Jason Lawrence 89

Independent Component Analysis for Enhancing Diesel Engine Air-Borne Acoustic Signal to Noise Ratio
   Alhussein Albarbar, Mohamed Rgeai, Mohamed Elhaj, Fengshou Gu, Andrew Ball 101

Conductive Fabrics for Heating Applications
   Akif Kaynak, Eva Hakansson, Saeid Nahavandhi 111

Case-Based Reasoning and Conflict Resolution in Support of the Design of Mechatronic Systems
   Samir A. El-Nakla David A. Bradley 123

Evaluation of Mechatronic Design Concepts with Special Consideration of Couplings between the Domains
   Peter Ichenberger, Klaus Zeman 131

Development of an Evaluation Measure for Genetic Approach to Functional Level Conceptual Design
   Serkan Gürüşlu, Abdulkadir Erden 139

Human Aspects at the Design of Mechatronic Systems
   Frid Kaljas, Rommi Kallo, Vello Reedik 147

Terrain Adaptability and Task Shapability in Multilegged Search and Rescue Robots
   Emre Karalarli, Aydan M. Erkmen, İsmet Erkmen 159

Origami Robotics: Swarm Robots that can Fold into Diverse Configurations
   Giovanni C. Pettinari, Alejandro Ramirez-Serrano 171
Compliant Cooperative Working of a Human and a Cartesian Manipulator for Positioning of a Cart on Frictionless Plane

A. Emre Çetin, M. Arif Adlı

Genetic Programming Approach for Autonomous Vehicles

Miha Kovacic, Miran Brezocnik, Joze Balic

Modelling and Adaptive Control of SMA Actuator

Hongyan Luo, Aric Abel, Alan Slade, Zhigang Wang

Stability Investigation and Semi Active Control of A Miniature Shape Memory Alloy Actuator

A. Alasty, E. Shameli, H. Salaarieh,

Vibration Control of Flexible Beams Using Nanotube Based Piezoelectric Materials

Arun Rama Ratanam, Nader Jalili

An Integrated Structural Modelling, Optimal Placement and Control Approach using Piezoelectric Transducers

Murat Güney, Oğuzhan Özgül, Eşref Eşkinat

Change Detection Algorithms for Vision Supported Navigation of AGVs

Leila Khammari, Leo J De Vin, Klas Hedenberg

Stereo Vision-based Collision Avoidance

Klas Hedenberg, Albert-Jan Baerveldt

Neuro-fuzzy Adaptive Internal Model Control using Adaptive Inverse Control Strategy

Muhammed Shafiq, Agus Rohmat Widodo

Fuzzy Step Size NLMS Algorithm for Adaptive Inverse Control

Muhammed Shafiq, Sohail Akhtar

Design and Manufacture of Feedback Control System for a Converted CNC Lathe

Nurul Absar Chowdhury, Ashfaque Ahmed Chowdhury

Development of a Generalized Dynamic Simulation Model of a Machine Tool Feed Drive

Young Hun Jeong, Byung-Kwon Min, Dong-Woo Cho

Analysis of Defocus Aberration in Yarn Imaging

Y. A. Ozkaya, M. Acar, M.R. Jackson, M.P. Millman

Application of Machine Vision to the Inspection of Reflective Objects

Khalil Khalili, Phil Webb

Calibration of the World Coordinate System with Neural Networks

Matti Kutila

Interpolating Local Models of POD Using Fuzzy Decision Mechanisms

M. Önder Efe, Xin Yuan, Hitay Özbay, Mo Samimy

A Force Adaptive Fuzzy Control Strategy for End-Milling Process

Uros Zuperl, Edi Kiker, Franci Cus

Design of Fuzzy PSS to Damp Power System Oscillations using Global Signals

Abdulaziz Alshareef

The Use of Simulation and Modelling in the Design and Development of an Exoskeleton to Support Mobility

C Acosta-Marquez, David A. Bradley

An Exoskeletal Robot Manipulator for Lower Limbs Rehabilitation

Erhan Akdoğan, M. Arif Adlı
Design and Commissioning of a Mechatronic Orthopaedic Saw
Alfred Makoto Kabayama, Alan Peter Slade, James Robert Hewit, Luis Gonzaga Trabasso

Computer Vision Integrated Pick and Place System
Hayrettin Karci, Gökhan Göktuğ, M. Berke Başpınar

Mechatronics Testbed for Vision Based Navigation
M. Abderrahim, J. C. Díaz Cabrera, M. A. Salichs, F. Gandía, A. García Casas

Design of a Mechatronics Oriented Multi-port Vision Subsystem: KFUPMCAM
Onur Toker, Samer C. Nassif

Design of a 3D Laser Range Finder Prototype for Indoor Applications
Umut Fidan, Erhan Ilhan Konukseven, Tuna Balkan

Fault Detection and Classification in Knitted Structures using Fourier Analysis and Neural Networks
Serdal Çali, Şeniz Ertuğrul, Nuray Uçar

Fault Detection in Knitted Structures using Wavelet Analysis and Optimized Filter Design
Pınar Boyraz, Özgür Yılmaz, Nuray Uçar, Şeniz Ertuğrul

Downstream Mechanical Fault Detection Using Motor Current Signature Analysis (MCSA)
Mohamed Rgeai, Fengshou GU, Andrew Ball

Fuzzy System for Detection of Eccentricity in Induction Motors
A. Nasiri, F. Daneshvar, F. Taringoo, H. Moarefi

Experimental Investigation on the Effects of Random Signal on Micro-Step Control Positioning Accuracy
Ali Selk Ghafari, Mehdi Behzad, Ali Meghdari

Experimental Setup for the Study of Flutter Control
Arda Özkyanak, Burçak Özkök, Savvas Katemliadis, Uwe Weltin

Experimental Study of Fuzzy Supervisory PID Controller for Micro-Stepping Control of Hybrid Stepper Motors
A. Selk Ghafari, A. Alasty

Design of the Controller for the Steer-by-wire System
Seung-Kyu Oh, Woo-Je Sung, Chang-Soo Han, Seok-Chan Yun, Un-Koo Lee

A Neural Network Controller for the Robust Control of a Piezoelectric Actuator
Yıldırım Yıldız, Khalid Abidi, Asif Sabanovic

Robotic Aid to People with Disability By Means of an Innovative Communication Paradigm
Duygun Erol, Pramila Rani, Robert Brackin, Medha S. Sarkar, Nilanjan Sarkar

Sliding Mode Control of a Magnetically Levitated Spindle
Aria Alasty, Hassan Salarieh, Rasool Shabani

Mechatronic Design of a Toolbox for a Teleoperated Surgical Robot
Todor Neshkov, Pirin Malinov, Georgi Todorov, Emil Krastev, Kostadin Kostadinov

Optimal Design of a Tennis Robot Fabricated based on the Counter Rotating Wheels System (C.R.W)
A. Bagheri, R. Yousefi-Moghaddam, M. Alitavoli, Ali Chaibakhsh

Highly Programmable Surface
Michael Fielding, Saeid Nahavandi

Design of a Swimming Mini Robot
Şafakcan Tuncdemir, Burhanettin Koç, Abdulkadir Erden
Review of Remote Delivery of Healthcare using Pervasive Computing Technologies in the Home
Chi-Biu Wong, Seng Kwong Chong, Jun-Sheng Pu, Philip Moore

Equipment Information Management in Connected Homes
Seng Kwong Chong, Philip Moore, Chi-Biu Wong, Jun-Sheng Pu, Wei Feng

An Open Distributed Systems Approach for Building Automation
Gladys Bastidas, Paulo Eligi Miyagi

An Innovative Solution for Product Service Systems for Consumer Products
Kevin Xiaoyu Yang, Philip Moore, Chi-Biu Wong, Jun-Sheng Pu

Design and Performance Evaluation of a Microscale Machining Center for Precision Manufacturing
Dan Cox, Glynn Newby, Hyung W. Park, Steven Y. Liang

About Motion of the Tool for Polygonal Holes Drilling in the Mechatronics Manufacturing Process
Miodrag Zlokolica, Worawut Wisutmethangoon, David Braun, Maja Cavic, Milan Kostic

Design and Implementation of a Mechatronics Systems Control Card: Piclaboard
Alpaslan Celiktepe, Cüneyt Oysu, H. Mevin Ertuğz

AS-i Experimental Setup for Mechatronics Laboratories
Erkan Kaplanoğlu, Ahmet Emin Kuzucuoğlu

Virtual Prototyping of Parallel Manipulators
Maciej Petko, Grzegorz Karpiel, Tadeusz Uhl, Daniel Prusak,

Soft Tissue Modelling for Haptic Rendering in Virtual Environments
James Mullins, Hieu Trinh, Saeid Nahavandi

Front-end Intelligence in Manufacturing Systems - Practical Considerations
David W. Russell, Robin G. Qiu, Patricia Feingold

An Approach to Exploit IEC 61131-3 for Component-based Control System Development
Xi Chen, Chi-Biu Wong, Jun-Sheng Pu, Philip Moore

Component-Handling System: A Platform to Promote Research in Automated Industrial Processes
Herman Vermaak, Gert Jordaan

'Delay Scheduling', An Unconventional Use of Time Delay as a Stabilizing Tool in Trajectory Tracking
Nejat Olgac, Rifat Sipahi, Ali Fuat Ergenc

Modelling and Analysis of Mechatronic Systems using Hybrid State Formulation
Mehmet Arif Adlı, Murat Doğruel

Design of a Measurement Extension for Tracking Control of a Hydraulic Elevator
Hajrudin Efendic, Luigi del Re

Linear Motor Usage in Active Suspension Systems
Jaroslav Hončur, Katerina Hyniova, Antonin Stříbrský, Martin Hlinovský

Design and Control of a Self-Parking Model Car
Utku Avgin, Tuna Balkan, Y. Samim Ünlüsoy

Automotive CAN Network Response Time Analysis with Variable Jitter
Paul Mason, Alan Wong, Saeid Nahavandi

Generic Mechatronic Control for Agile Manufacturing
Glen Bright, Olaf Diegel, Johan Potgieter, Jonathan Zyzalo
A Methodology for Modeling the Control of a Mechatronic Manufacturing Cell 803  
Eduardo A. P. Santos, Marco A. Busetti, Marcos R. Da Silveira

A System Architecture for Integrated Simulation-based Production Planning and Scheduling 815  
Michel Nilsson, Petter Solding, Leo J De Vin

Pragmatic Approach to the Estimation of Adaptivity of Industrial information systems 825  
Abdullayeva Rahila Abdulla kizi

Design Alternatives for a Novel Wood Moulder 833  
Yigit Tascioglu, Mike R. Jackson

A Novel Mechatronic Approach to High-Speed Textile Printing 841  
Duncan Borman, Abbas Dehghani

Design of a Sensory-based Control System for Compression Molding 853  
George K. Adam

Double Loop Current Mode Control Scheme for Single Phase UPS Inverter 861  
Emine Doğru Bolat, Yasar Bolat, H. Metin ırtuṇç

Experimental Investigations on a 3 DOF Linear Ultrasonic Motor 873  
Karima Rochdi, Soukalo Dembele

Modelling and Control of Servo Pneumatic Drives using on-off Valves at Exhaust Port 883  
Hongtao Pan, Jun-Sheng Pu, Chi-Biu Wong, P. R. Moore

Authors Index 945
