# Table of Contents

Author Index ........................................................................................................................................... 960

Positioning Control of the Leg of the Humanoid Robot by Linear Visual Servoing ......................... 1
Yoshiyuki Yamamura, Noriaki Maru

Giulio Sandini, Giorgio Metta and David Vernon

URBI: Towards a Universal Robotic Body Interface ........................................................................... 33
Jean-Christophe Bailie

Dedicated Mechanisms for the Attention System in Humanoid Robots ........................................ 52
Markus S. Schlosser and Kristian Kroschel

Development of a Modular Anthropomorphic Robot Hand Using Servohydraulic Actuators .......... 64
Karsten Weiss and Heinz Woern

Design and Development Process of a Humanoid Robot Upper Body Through Experimentation .... 77
A. Alberts, S. Brudniok and W. Burger

Reaching through Learned Forward Model .................................................................................... 93
Ganghua Sun and Brian Scassellati

Three Additions to Passive Dynamic Walking; Actuation, an Upper Body, and 3D Stability ............. 113
M. Wisse

A Mobile Autonomous Humanoid Assistant .................................................................................. 133
M. A. Diftler, R. O. Ambrose, K. S. Tyree, S. M. Goza and E.L. Huber

Emotion-Sensitive Robots- A New Paradigm for Human-Robot Interaction ................................ 149
Pramila Rani, Nilanjan Sarkar

Building an Adaptive Spoken Language Interface for Perceptually Grounded Human-Robot Interaction ............................................................................................................................................. 168
Peter Ford Dominey, Jean-David Boucher and Toshio Inui

A Way Out of Dead End Situations in Dialogue Systems for Human-Robot Interaction .............. 184
Hartwig Holzapfel and Petra Gieselmann

Advanced Steps in Biped Robotics: Innovative Design and Intuitive Control Through Spring-Damper Actuator ......................................................................................................................... 196
Umberto Scarfogliero, Michele Folgheraiter and Giuseppina Gini

Imitation of Human Demonstration Using A Biologically Inspired Modular Optimal Control Scheme ........................................................................................................................................... 215
Gavin Simmons and Yiannis Demiris
On the development of the Emotion Expression Humanoid Robot WE-4RII with RCH-1 ..............235
Massimiliano Zecca, Stefano Roccella, Maria Chiara Carrozza, Hiroyasu Miwa, Kazuko Itoh, Giovanni Cappiello, John-John Cabibihan, Munemichi Matsumoto, Hideaki Takanobu, Paolo Dario and Atsuo Takanishi

Working Collaboratively with Humanoid Robots ........................................................................253
Cynthia Breazeal, Andrew Brooks, David Chilongo, Jesse Gray, Guy Hoffman, Cory Kidd, Hans Lee, Jeff Lieberman and Andrea Lockerd

Domo: A Force Sensing Humanoid Robot for Manipulation Research ........................................273
Aaron Edsinger-Gonzales and Jeff Weber

Development of Humanoid Robot Platform KHR-2 (KAIST Humanoid Robot - 2) .................292
Ill-Woo Park, Jung-Yup Kim, Seo-Wook Park and Jun-Ho Oh

Similarities and Varieties in Human Motion Trajectories of Predefined Grasping and Disposing Movements .................................................................311
V. Wank, A. Fischer, K. Bös, I. Boesnach, J. Moldenhauer and T. Beth

Navigation Among Movable Obstacles: Real-Time Reasoning in Complex Environments ........322
Mike Stillman and James Kuffner

Improvements on Action Parsing and Action Interpolation for Learning through Demonstration ........................................................................342
Jeff Lieberman and Cynthia Breazeal

An Experimental Investigation of Robotic Spacewalking ............................................................366
Fredrik Rehnmark, William Bluethmann, Ivan Spain, Michael Goza, Robert O. Ambrose, and Ken Alder

Biologically Inspired Joint Control for a Humanoid Robot ........................................................385
D. Kee, G. Wyeth and J. Roberts

Building an Autonomous Humanoid Tool User .........................................................................402
William Bluethmann, Robert Ambrose, Myron Distler, Eric Huber, Andy Fagg, Michael Rosenstein, Robert Platt, Roderic Grupen, Cynthia Breazeal, Andrew Brooks, Andrea Lockerd, R. Alan Peters II, O. Chad Jenkins, Maja Matarić and Magdalena Bugajska

A Tiered Planning Strategy for Biped Navigation .......................................................................422
Joel Chestnutt and James Kuffner

Paul M. Fitzpatrick and Eduardo R. Torres-Jara

Learning Behavior Selection Through Interaction Based on Emotionally Grounded Symbol Concept ......................................................................................450
Tsutomu Sawada, Tsuyoshi Takagi, Yukiko Hoshino and Masahiro Fujita

A Humanoid in Company with Children .....................................................................................470
Hideki Kozima, Cocoro Nakagawa, Nobuyuki Kawai, Daisuke Kosugi and Yoshio Yano

Zero Spin Angular Momentum Control: Definition and Applicability ....................................478
Marko Popovic, Andreas Hofmann and Hugh Herr
