CONTENTS

Editors' Acknowledgements .................................................................................................................. Terry Healy 1
Preface .................................................................................................................................................... Terry Healy 2
Recurring Assemblages of Biogenic and Physical Sedimentary Structures in Modern and Ancient Extreme Macro-Tidal Estuaries .............................................................................................................. Allen W. Archer 4
Morphology and Sedimentation on Open-Coast Flats of the Changjiang Delta, China ........................................ Daidu Fan, Congxian Li, Dejie Wang, Ping Wang, Allen W. Archer, and Stephen F. Greb 23
The Coasts of China and Issues of Sea Level Rise .................................................................................. Congxian Li, Daidu Fan, Bing Deng, and Vlasilav Korotaev 36
Seasonal Variations of Textural Parameters and Distribution Pattern of Surface Sediments in Yeongkwang Intertidal and Subtidal Zones, West Coast of Korea .............................................................................. Yong Ahn Park, En Sun Park, Yong Shik Chu, and Hee Jun Lee 50
Influence of Water Temperature on Mud Particle Deposition – Laboratory Tests ........................................ Guojun Jiang, Hai Zhou, Wenjie Ruan, Shengchu Yao, Zhizhong Zhang, and Longbao Zhao 59
Spatial and Temporal Evolution of Eroding Coast in Hangzhou Bay, China ............................................... Liping Zhang and Miaoxian Zhang 67
Water Resource Capacity, Regulation, and Sustainable Utilization of the Changjiang River Delta .......... Ying Wang, Terry Healy, Wenrui Chen, Dong Wang, and Aimee Bishop 75
Maximum Entropy Spectral Analysis for Annual Maximum Tide Levels Time Series of the Changjiang River Estuary ......................................................... Dong Wang, Yuan-Fang Chen, Guo-Fang Li, and Ye-Hua Xu 101
Mass Balance of Sediments, Solutes and Nutrients: The Need for Greater Integration ............................... Olav Slaymaker 109
Hydrological Processes of an Anastomosing River System on the Zhujiang River Delta, China ......................... Suiji Wang, Jinren Ni, Guangqian Wang, Dongsheng Cheng, and Ouyang Zhang 124
Formation of Turbidity Maxima in the Yalu River Estuary, China ........................................................... Jiahua Gao, Shu Gao, Yan Cheng, Lixian Dong, and Jing Zhang 134
Nutrient Dynamics in the Macro-Tidal Yalujiang Estuary ......................................................................... S. M. Liu and J. Zhang 147
Persistant Organic Pollutants (POPs) in Intertidal Surface Sediments from the Yangtze Estuarine and Coastal Areas, China ............................................................... M. Liu, Y. Yang, S. Xu, L. Hou, Q. Liu, D. Ou, and H. Jiang 162
Heavy Metals in Coastal Waters from Sanya Bay, Hainan Island: Implication for Human Impact on the Estuarine Coastal Environments .......................................................... Jing-Hong Yang, Shao-Yong Jiang, Xiao-Rong Wang, and Ying Wang 171
Application of Ground-Penetrating Radar for Barrier Spit Stratigraphic Interpretation, Hainan Island, China ......................... Yong Yin, Dakui Zhu, I. Peter Martini, Wenwu Tang, and Yehua Xu 179
Coastal Bio-Geomorphic Zonation of Coral Reefs and Mangroves and Tide Level Control ...................... Qiaomin Zhang 202
A Bayhead Chenier, Chengwan Bay, South China ....................................................................................... W. Wang, P. Li, and H. Tan 212
A Spaceborne SAR Technique for Shallow Water Bathymetry Surveys ..................................................... Weigen Huang and Bin Fu 223
Integrated Coastal Zone Management for Sustainable Development—with comment on ICZM Applicability to Muddy Coasts ................................................................. Terry Healy and Ying Wang 229
Environmental Stress and Policy Guidelines for Environmental Management of the Sanya Coastal Zone, Hainan Island, China ................................................................. Xinqing Zou, Ying Wang, Xiaorong Wang, Chendong Ge, and Zhansheng Niu 243
A Geographical Information System for Marine Management and its Application to Xiamen Bay, China ............... Y. W. Jiang, O. W. H. Wai, H. S. Hong, and Y. S. Li 254
