Mixed convective flow and heat transfer of water in a horizontal pipe under supercritical pressure
F. Xu, L.J. Guo, B.F. Bai and X.J. Chen

Packed Beds, Porous Media

Numerical simulation of segregation in fluidized bed using discrete element method and the experimental verification
Z. Liu, T. Hirata, T. Kawaguchi, T. Tanaka and Y. Tsuji

Liquid phase mixing in the loop-type column reactor
B. Kawalec-Pietrenko

Comparison of CFD models for fluidized beds; particle models, solver and experimental validation
K. Johansson, B.G.M. van Wachem and A.E. Almstedt

Shear-thinning fluids flow in fixed and fluidised beds
L. Broniarz-Press, P. Agacinski and J. Rzanski

Analysis of the behaviour of the simulated moving bed reactor in the sucrose inversion process
E.A. Borges da Silva, D.P. Souza, A.A. Ulson de Souza and S.M.A. Guelli U. Souza

Application of time-frequency analysis to fluidization regimes recognition in circulating fluidized beds
Y.G. Chen, Z.P. Tian and Z.Q. Miao

Bubble Motion and Dynamics

Experimental study of the luminescence during the cavitation of a single bubble
M. Barbaglia and F. Bonetto

Free turbulence effects on bubble terminal velocity
F. Scargiali, R. Di Maggio and A. Brucato

Numerical prediction of bubble coalescence and breakage by the novel parallel parent and daughter classes technique (PPDC)
S. Bove, T. Solberg and B.H. Hjertager

The boiling bubble dynamics on the oxide metal accompanying radiation induced boiling enhancement phenomenon
Y. Imai, K. Okamoto, H. Madarame, T. Takamasa and M. Furuya

Modification of shear stress in Taylor-Couette flow containing bubbles
Y. Murai, H. Oiwa, Y. Takeda and F. Yamamoto

A simple method for evaluating fluctuating bubble velocity and its application to a hybrid bubble tracking method
A. Tomiyama, K. Sakoda, G.P. Celata and I. Zun
Bubble rise characteristics after the departure from a nucleation site in water saturated and subcooled flow boiling
T. Okawa, T. Ishida, I. Kataoka and M. Mori

A unified model considering force balances for departing vapour bubbles and population balance in subcooled boiling flow
G.H. Yeoh and J.Y. Tu

Dynamics of bubbles and bubble clouds: Structure formation in acoustic cavitation
S. Konovalova, K. Zakirov and I. Akhatov

Effect of different breakup and coalescence closures on bubble column CFD simulation
P. Chen, J. Sanyal and M.P. Dudukovic

A model of bubble departure from copper-graphite composite surfaces
N. Zhang, D.F. Chao and W.J. Yang

Break-up of bubbles and droplets in stagnant media
P. Budzynski and M. Dziubinski

Approximations to the drag coefficient on a bubble moving through power-law or carreau fluid
M. Dziubinski, M. Orczykowska and P. Budzynski

Analysis of air bubbles probability distribution functions in a large-size dropshaft
C. Gualtieri and H. Chanson

A single bubble impact on the wall in upward laminar bubbly flow
O.N. Kashinsky, L.S. Timkin, R.S. Gorelik and P.D. Lobanov

Dynamics of bubble media under vibration
V.S. Fedotovsky, T.N. Vereshchagina and L.V. Terenik

Flow Structure

Influence of the model bubble diameter on three-dimensional numerical simulations of thermal cavitation in pipe elbows
E. Laurien

Modeling of vertical annular and wispy-annular flow
A. Laforgia, L.Y. Lao, C.J. Lawrence and G.F. Hewitt

Bubble size distributions and three-dimensional flow pattern visualization in stationary and transient upward flashing flow
A. Manera, H.M. Prasser, D. Lucas and T.H.J.J. van der Hagen

Air-water flow in a vertical pipe with sudden changes of the superficial water velocity
H.M. Prasser and E. Krepper

Two-phase flow regime identification in a horizontal flow using dynamical clustering method
Z.H. Jia, G. Niu and J. Wang
Experimental and numerical studies of void fraction distribution in rectangular bubble columns
E. Krepper, B.N.R. Vanga, H.M. Prasser and M.A. Lopez de Bertodano IV-2153

The levitation force on the core in a stationary core annular flow through a horizontal pipe
P. Poesio and G. Ooms IV-2161

R134A flow patterns in small diameter tubes
L. Chen, Y S. Tian and T.G. Karayiannis IV-2167

**Falling Films**

Study of free falling liquid layer in inclined pipes: Effect of diameter and inclination angle
J.S. Lioumbas, O.J. Nydal and S.V. Paras IV-2177

Effect of the microscale wall topography on the thermocapillary convection within a heated liquid film
T. Gambaryan-Roisman, A. Alexeev and P. Stephan IV-2185

Performance of an air-cooled, falling film absorber of an ammonia-water absorption cooling machine
J. Castro, L. Leal, P. Pozo and A. Oliva IV-2193

The study of flow dynamics and heat transfer in falling intensively evaporating wave films of liquid
A.N. Pavlenko, A.M. Matsekh, I.P. Starodubtseva and A.V. Morozov IV-2201

Gas-driven disturbance waves on vertical liquid film
S.V. Alekseenko, V.A. Antipin, A.V. Cherdantsev, S.M. Kharlamov and D.M. Markovich IV-2209

**Waves**

Periodic travelling waves of finite amplitude in two-layer flow
A. Boudlal IV-2219

Studies on dynamic interaction between gas and liquid flows through interfacial waves in vertical upward annular flow
K. Yoshida, T. Matsumoto and I. Kataoka IV-2225

The analysis of interfacial waves

Numerical dissipation and simulation of Faraday waves with WCOBRA/TRAC thermal-hydraulic code
C. Frepoli and K. Ohkawa IV-2239

A study of two-body forces in fluidization
B.A. Kashiwa and R.M. Rauenzahn IV-2253

Pressure waves of moderate amplitude in gas-liquid medium with cluster structures
V.E. Dontsov and V.E. Nakoryakov IV-2265
Influence of subcooled boiling on out-of-phase oscillations in boiling water reactors
L. Munoz-Cobo, S. Chiva and A. Escrivè

Gas driven circulation enhancement in an adiabatic air-water loop
M. De Salve, M. Malandrone and B. Panella

Validation of Eulerian multiphase flow models for nuclear safety applications
Th. Frank, J.M. Shi and A.D. Burns

Nodalisation qualification in preparation of counterpart test analysis
M. Cherubini, F. D’Auria and G. Galassi

Experimental study on combined natural and gas-injection enhanced circulation
W. Ambrosini, G. Forasassi, N. Forgione, F. Oriolo and M. Tarantino

Demonstration of the heat removing capabilities of the EPR core catcher
M. Fischer, O. Herbst and H. Schmidt

Design, experiments and RELAP5 code calculations for the PERSEO facility
R. Ferri, A. Achilli, G. Cattadori, F. Bianchi and P. Meloni

Rewetting of a hot vertical surface by liquid sprays
M. Casamirra, F. Castiglia, M. Giardina, C. Lombardo, G.P. Celata, A. Mariani and L. Saraceno

Direct vessel vertical injection for advanced emergency core cooling system
S.H. Yoon, Y.H. Yu and K.Y. Suh

Analysis of the Peach Bottom BWR turbine trip pressure wave propagation and its effect on the kinetic core dynamic
A. Bousbia-Salah and F. D’Auria

Analysis of effect of noncondensable gases in horizontal steam generator with Relap5/Mod3.2
O.I. Melikhov, V.I. Melikhov, G.V. Bychkova and A.A. Belsky

Evaporation

Study about the flashing process through a metering expansion valve
M.A. Bahajji, J.M. Corberan, J. Urchueguia, J. Gonzalvez and J. Santiago

Transient and steady-state computations of the direct-contact evaporation of a two-phase drop
F. Dammel and P. Stephan

Evaporation modelling in fields with strong pressure gradient-critical flashing flows in nozzles
T. Skorek and P. Papadimitriou
A model for two phase flow with evaporation
R. Krahl, M. Adamov, M. Lozano Aviles and E. Bansch

Evaporation of falling water sheet on a horizontal cylinder: Modelling and experimentation
H. Louahlia-Gualous, L. El Omari, E. Artioukhine and P.K. Panday

Transient natural convection with surface evaporation in partially filled tanks
S. Prasanth Kumar, B.V.S.S.S. Prasad, G. Venkatarathnam, S. Srinivasamurthy and K. Ramamurthi

Experimental analysis of two-phase flow in evaporators with special emphasis on single phase - two-phase transitions zones
G. Raush, J. Rigola, S. Morales, C.D. Pérez-Segarra and A. Oliva

Experimental study of flash evaporation on enclosed water pool: Influence of characteristic parameters
D. Saury, S. Harmand and J. Ermel

On the possibility of the evaporator drastic scale reduction in a periodically operating two-phase thermosyphon
S. Filippeschi, E. Latrofa and G. Salvadori

Simulation of evaporative cooling of droplets in a mechanical draft cooling tower
S.P. Fisenko, A.A. Brin and A.I. Petruchik

Improvement of an evaporation drag model
X.Y. Li, Y.H. Yang and J.J. Xu

Enhancement of Heat Transfer

Enhancement of heat transfer in subcooled flow boiling with microbubble emission

Boiling heat transfer on enhanced carbon fibre reinforced microcoatings
T. Orzechowski

A dynamic model for pool boiling heat transfer on enhanced surfaces with sub-surface channels
Y.M. Chen, M. Groll and R. Mertz

Narmax identification for the prediction of the dynamics of the vapotron effect
C. Biserni, A. Fichera, I.D. Guglielmino, E. Lorenzini and A. Pagano

An experimental study of heat transfer between horizontal immersed tubes without and with annular fins of constant thickness in bubbling fluidized bed
S. Rasouli, M. Reza Golriz, A. Asghar Hamidi

Heat transfer enhancement in refrigerant R141b pool boiling with wire nets structures
A. Franco, E. Latrofa and V.V. Yagov
Vibration-induced two-phase cooling technologies for high power thermal management
S. Heffington, A. Glezer, S. Tillery and M. Smith IV-2485

Enhanced heat transfer using radial fins
R.N. Krikkis and P. Razelos IV-2495

Boiling heat transfer enhancement on fin arrays with extended micro surfaces
R. Pastuszko, M.E. Poniewski and P.J. Mroczek IV-2503

Effect of electric field on bubbles in two-phase system
W. Dong, R.Y. Li and H.L. Yu IV-2511

Atomization and Sprays

Coupling between instantaneous liquid flow rate and transient air entrainment for GDI sprays
G. Delay, R. Bazile, G. Charnay and H.J. Nuglish IV-2517

Dispersed phase measurements in sprays using optical probes
A. Cartellier and F. Ben Rayana IV-2525

Flashling liquid fragmentation: Is there a hindered mass?
J.P. Bigot, A. Touil, P. Bonnet and J.M. Lacome IV-2533

Characteristics of a two-phase flow inside the mixing chamber of an effervescent atomizer
J. Jedelsky and M. Jicha IV-2539

Analysis of single point particle time series for detection of droplet clustering in sprays
U. Fritsching and J. Heinlein IV-2547

A numerical study on the curvature effect on the behaviors of fuel sprays impinging on the concave surface
G.H. Ko and H.S. Ryou IV-2553

T-Junctions

Features of two-phase gas/liquid flow at a combining T-junction - Hold up profiles around the junction
B.J. Azzopardi, A. Belghazi, M. Fossa and P. Guglielmini IV-2561

Further investigations into the phase split at a larger diameter vertical T-junction

Compact gas-liquid phase separators for the use in solar-thermal power plants
T. Hirsch IV-2575
Effect of flow direction on flow distribution characteristics of two-phase refrigerant in T-junction
S.J. Tae and K. Cho IV-2583

Dividing two-phase flow in branching conduits with large diameter horizontal main pipes and lateral branches
M. Casamirra, F. Castiglia, M. Giardina, C. Lombardo and S. Molica Nardo IV-2591

Oil-Water Flow

Experimental analysis of water fluid dynamics in oil-water wavy-stratified regime
B. Pulvirenti and G. Sotgia IV-2599

Flow patterns and pressure gradient in horizontal, upward inclined and vertical heavy oil-water-gas flows: Experimental investigation and full-scale experiments
A.C. Bannwart, O.M.H. Rodriguez, F.E. Trevisan, F.F. Vieira and C.H.M. de Carvalho IV-2605

Measurement uncertainty applied to the main parameters in oil-water flows and related critical transitions
R. Marchesi, M.S. Mello and S. Menegozzi IV-2615

Nonlinear feature analysis and automatic pattern recognition of oil-gas-water multiphase flow
L.J. Guo, B.F. Bai and X.J. Chen IV-2621
