Styrian Noise, Vibration & Harshness Congress

Integrated Vehicle Acoustics and Comfort

October 22-23, 2001
Graz, Austria
Contents

From Noise to Refinement
M. F. Russell, Chief Research Engineer (retired), Delphi Diesel Systems, Kent, U.K.

Sound Engineering in the Vehicle Development Process
Dr.-Ing. Heinz-E. Meier, Dr.-Ing. Uwe Letens, DaimlerChrysler AG, Sindelfingen, Germany

Efficient Passenger Car Sound Engineering using new Development Tools
F. Brandl, W. Biermayer, S. Thomann, AVL List GmbH, Graz, Austria

Passive and Active Sound Design of Exhaust Systems
F. Lehringer, Faurecia Abgastechnik GmbH, Fürth, Germany

NVH Potentials with the Complete System of Interior Noise Development
Klaus Stricker, Magna Näher GmbH, Markgröningen, Germany

Powertrain Noise Allocation & Synthesis Model
Burkhard Wiesner, Ulrich Bernhard, Bernd Kessner, Adam Opel AG, Rüsselsheim, Germany, ITDC-N&V

Noise and vibration comfort of drivetrain and chassis - trouble shooting strategies at MAGNA STEYR Engineering Graz
K. Leiter, C. Fankhauser, H. Imler, B. Traussnigg, Dr. G. Polt, MAGNA STEYR Engineering, Graz, Austria

Recent advances in Diesel engine noise and its effect on whole vehicle noise
P. Scarth, Iveco Motorenforschung AG, Arbon, Switzerland

Noise when closing doors of vehicles
Dr.-Ing. Klaus Genuit, HEAD acoustics GmbH, Herzogenrath, Germany

Simulation of the tyre/road noise
Wolfgang Kropp, Krister Larsson, Frédéric Wullens, Patrik Andersson, Chalmers University of Technology, Sweden, François-Xavier Bécot Chalmers University of Technology, Sweden and Transport and Environment Laboratory LTE-INRETS, Bron, France
Thomas Beckenbauer, Müller BBM, Planneg, Germany
Numerical Simulation of Vehicle Interior Noise up to 250 Hz
Hans H. Priebsch, Irena Hauer, Herbert Fellner, Acoustic Competence Center GmbH, Graz, Austria
Gernot Polt, Magna Steyr Engineering, Steyr Daimler Puch Fahrzeugtechnik, AG & Co KG, Graz, Austria

The impact of cowlshake on drivers' subjective comfort and eye movements
H. Kolrep, Kolrep-Rometsch Human Factors Consultants, Berlin, Germany
C. Fankhauser, MAGNA STEYR Engineering, Graz, Austria

On the use of a wave based prediction technique for vehicle interior acoustics
P. Sas, W. Desmet, B. van Hal, B. Pluymers, Katholieke Universiteit Leuven, Heverlee, Belgium
Department of Mechanical Engineering

Airborne sound characterisation of automotive engines: Free field power on the slippery slope?
E.J.M. Nijman, Centro Ricerche Fiat, Engine NVH department, Orbassano (To), Italy
B.A.T. Petersson, Institut für Technische Akustik, Technische Universität Berlin, Germany

ACEA Proposal for a new Method to Measure the Noise emitted by a Car in Urban Driving Conditions
R. Le Salver, U. Tornar, E. Vivier, PSA PEUGEOT - CITROËN, La-Garenne, France

Characteristics and reduction potential of the tyre road noise
T. Beckenbauer, Müller-BBM GmbH, Planegg, Germany

Prediction of the Powertrain Noise Contribution to Truck Pass-by Noise, based on Powertrain Test Cell Measurements
Martin Pflueger, Nicholas Hargreaves, AVL List GmbH, Graz, Austria

The exterior noise of passenger cars in the area of conflict between legal requirements and customer expectations
Johann Tonhauser, BMW Group, Munich, Germany

EU Road Traffic Noise Policy and Research Activities
P. Mercier-Handisyde, European Commission, Research Directorate General
