Ground Support in Mining and Underground Construction

Edited by

Ernesto Villaescusa
Western Australian School of Mines, Kalgoorlie, Western Australia

Yves Potvin
Australian Centre for Geomechanics, Perth, Western Australia
# Table of Contents

Foreword XI
Organization XIII

## Keynote lectures

- The dynamic environment of ground support and reinforcement 3
  *E.T. Brown*
- A review of long, high capacity reinforcing systems used in rock engineering 17
  *C.R. Windsor*

## Case studies

1. The evolution of ground support practices at Mount Isa Mines 45
   *L.B. Neindorf*
2. A case study of ground support improvement at Perseverance Mine 53
   *D.B. Tyler & M. Werner*
3. A fall of ground case study – an improved understanding of the behaviour of a major fault and its interaction with ground support 65
   *I.G.T. Thin, B.J. Andrew & M.J. Beswick*
4. Field experiments on cable bolting for pre-reinforcement of rock masses – first application to an underground powerhouse in Japan 77
   *M. Kashiwayanagi, N. Shimizu, T. Hoshino & F. Ito*
5. Seismic and support behaviour, a case study: the April 22nd, 2003 Rockburst, Reservas Norte sector, El Teniente Mine, CODELCO Chile 91
   *E. Rojas, R. Dunlop, A. Bonani, E. Santander, S. Celis & A. Belmonte*
6. Integrated ground support design in very weak ground at Cayeli Mine 97
   *M. Yumlu & W.F. Bawden*

## Rock mass characterisation

1. Three-dimensional rock mass characterisation for the design of excavations and estimation of ground support requirements 115
   *P.M. Cepuritis*
2. Geotechnical block modelling at BHP Billiton Cannington Mine 129
   *D.A. Luke & A. Edwards*
3. The application of a rock mass rating system at Tau Lekoa Mine 139
   *M.J. Dunn & G. Hungwe*
Determination of rock mass behaviour as an integral part in rock mass characterisation using probabilistic methods  
*M. Pötsch, W. Schubert, A. Goricki & A. Steidl*

3 Modelling

Rock mass characterization for numerical modelling of ground stability control in mining  
*C. Wang*

Axial force distribution of friction-anchored rockbolts  
*T. Aoki, I. Otsuka, K. Shibata, Y. Adachi, S. Ogawa & T. Tanaka*

A case study on stochastic fracture geometry modeling in 3-D including validations for a tunneling site in USA  
*P.H.S.W. Kulatilake, J. Um, M. Wang, R.F. Escandon & J. Narvaez*

Modelling of rockbolt behavior around tunnels with emphasis on stress distribution on the rockbolt shank  
*A. Fahimifar & H. Soroush*

4 In situ and laboratory testing

Changing to the Posimix4 resin bolt for Jumbo and Quick-Chem™ at Mt Charlotte mine  
*P.A. Mikula*

Bolt surface profiles – an important parameter in load transfer capacity appraisal  
*N. Aziz*

Extent and mechanisms of gloving and unmixed resin in fully encapsulated roof bolts and a review of recent developments  
*R.J. Mould, R.N. Campbell & S.A. MacGregor*

The effect of rock strength on shear behaviour of fully grouted bolts  
*N. Aziz, J. Hossein & M.S.N. Hadi*

Research on new anchoring method by physical modelling and field testing  
*W. Zhu, Q. Liu & P. Wang*

5 Open pit

Highly flexible catch fences and high performance drape mesh systems for rockfall protection in open pit operations  
*R. Coates, G. Bull, F.J. Glisson & A. Roth*

Artificial rehabilitation and control of open pit slope crests and batters  
*A.G. Thompson, P.R. O'Bryan & C.M. Orr*

6 Dynamic testing

Dynamic capable ground support development and application  
*T. Li, E.T. Brown, J. Coxon & U. Singh*

Field performance of cone bolts at Big Bell Mine  
*J.R. Player*
Performance assessment of tendon support systems submitted to dynamic loading
D. Gaudreau, M. Aubertin & R. Simon

Performance of rockburst support systems in Canadian mines
V. Falmagne & B.P. Simser

Assessing the in-situ performance of ground support systems subjected to dynamic loading
D. Heal, M. Hudyma & Y. Potvin

Dynamic testing of rock reinforcement using the momentum transfer concept
J.R. Player, E. Villaescusa & A.G. Thompson

Simulation and analysis of dynamically loaded reinforcement systems
A.G. Thompson, J.R. Player & E. Villaescusa

7 Rockfalls and failure mechanisms

Controlling rockfall risks in Australian underground metal mines
Y. Potvin & P. Nedin

Failure modes and support of coal roofs
R.W. Seedsman

Rockfalls in Western Australian underground metalliferous mines
A.M. Lang & C.D. Stubley

Back analysis of block falls in underground excavations: The experience in panel caving at El Teniente Mine-Codelco Chile
A. Bonani, E. Rojas, F. Brunner M. & F. Fernández L.

Quality in ground support management
T. Szwedzicki

Support evaluation and quality assurance for AngloGold Ashanti Limited's SA region
M.J. Dunn

Ground support practices at Brunswick Mine, NB, Canada
D. Gaudreau

8 Civil engineering and tunnelling

100-year design life of rock bolts and shotcrete
R. Bertuzzi

Design and construction of water dams against 1000 m hydraulic pressure
H.-J. Benning, K.H. Hülsmann & H. Schorn

Thermo-chemo-mechanical assessment of support effectiveness during tunneling in squeezing conditions
D. Boldini, R. Lackner & H.A. Mung

Risk-based design using numerical modelling
T.R. Silverton, A.H. Thomas & D.B. Powell
Application of nondestructive stress measurement technique for safety assessment of underground structures

Support performance control in large underground caverns using instrumentation and field monitoring
M. Moosavi, A. Jafari & M. Pasha Nejati

Rock mass classification and complementary analyses of use in tunnel design
C. Laughton

9 Design

Rock reinforcement design for overstressed rock using three dimensional numerical modeling
T. Wiles, E. Villaescusa & C.R. Windsor

Issues in selection and design of ore pass support
J. Hadjigeorgiou, J.F. Lessard & F. Mercier-Langevin

Ground support – predicting when to change the pattern
P.M. Dight

10 Corrosion

Premature bolt failures in Australian coal mines due to stress corrosion cracking
B.K. Hebblewhite, M. Fabjanczyk, P. Gray & A. Crosky

The corrosion of rock bolts and cable bolts
I. Satola & J. Aromaa

Corrosion assessment of ground support systems
R. Hussell, E. Villaescusa, A.G. Thompson & B. Kinsella

11 Surface support

Hydro scaling and in-cycle shotcrete at Waroonga mine, Western Australia
P.A. Jenkins, J. Mitchell & B. Upton

Strength and stiffness of shotcrete-rock interface – a laboratory study
D. Saiang, L. Malmgren & E. Nordlund

Investigations into mechanisms of rock support provided by sprayed liners
T.R. Stacey & X. Yu

Large scale static laboratory tests of different support systems
M.L. Van Sint Jan & P. Cavieres

The use of cementitious linings to protect ore passes in the mining industry
D. Van Heerden

Performance assessment of high-tensile steel wire mesh for ground support under seismic conditions
A. Roth, C.R. Windsor, J. Caxon & R. deVries
12 Other support

Pillar replacement using pre-stressed timber props
A. Czerw & P.R. O'Bryan

A probabilistic approach to determining stable inter-pillar spans on Tau Lekoa Mine
M.J. Dunn

Backfill at Sons of Gwalia Mine
R. Varden & A. Henderson

Measurement and prediction of internal stresses in an underground opening
during its filling with cemented fill
T. Belem, A. Harvey, R. Simon & M. Aubertin

Mining and support of tunnels in minefill at BHP Billiton Cannington Mine
D.A. Luke

An overview of the use of paste backfill technology as a ground support method in
cut-and-fill mines
T. Belem & M. Benzaazoua

Raise climber – supporting method for stability of raise development
in Pongkor Gold Mine, Indonesia
A. Taufik & H. Sudarman
