KEYNOTE LECTURES

The James K. Mitchell Lecture: "In situ soil testing: from mechanics to interpretation" 3
H.S. Yu

Characterization of granite and the underground construction in Metro do Porto, Portugal 39
S. Babendererde, E. Hoek, P. Marinos & A. Silva Cardoso

In-situ test characterization of unusual geomaterials 49
F. Schnaid, B.M. Lehan & M. Fahey

Routine and advanced analysis of mechanical in-situ tests. 75
Results on saprolitic soils from granites more or less mixed in Portugal
A. Gomes Correia, A. Viana da Fonseca & M. Gambin

The contributions of in situ geophysical measurements to solving geotechnical engineering problems 97

Deformation properties of fine-grained soils from seismic tests 133
K.R. Massarsch

Advanced calibration chambers for cone penetration testing in cohesionless soils 147
A-B. Huang & H-H. Hsu

In-situ seismic survey in characterizing engineering properties of natural ground 167
S. Shibuya, S. Yamashita, Y. Watabe & D.C.F. Lo Presti

Characterization of the Venice lagoon silts from in-situ tests and the performance of a test embankment 187
P. Simonini

Characterization of soft sediments for offshore applications 209
M.F. Randolph

Evaluating soil liquefaction and post-earthquake deformations using the CPT 233
P.K. Robertson
## 1. Mechanical In-situ Testing Methods

General report: Mechanical in-situ testing methods  
*M. Devincenzi, J.J.M. Powell & N. Cruz*

Comparison between plate load test results and dilatometer test results - Case study, Seymareh dam and Szabon dam projects  
*A. Agharazi & M. Moradi*

Influence of vane size and equipment on the results of field vane tests  
*H. Åhnberg, R. Larsson & C. Berglund*

Determination of in-situ deformation moduli with a penetrometer and static loading test  
*H. Arbaoui, R. Gourvès, Ph. Bressolette & L. Bodé*

Characterization of soft marine clay using the flat dilatometer  
*A. Arulrajah, M.W. Bo & H. Nikraz*

Estimating the SPT penetration resistance from rod penetration based on instrumentation  
*E.H. Cavalcante, F.A.B. Danziger & B.R. Danziger*

Characterization of SPT grain size effects in gravels  
*C.R. Daniel, J.A. Howie, R.G. Campanella & A. Sy*

International and European standards on geotechnical investigation and testing for site characterization  
*V. Eitner, R. Katzenbach & F. Stölben*

CPTU site characterization: offshore peninsular and East Malaysia experience  
*S.M. Fairuz, J. Rohani & T. Lunne*

The repeatability in results of Mackintosh Probe test  
*A. Fakher & M. Khodaparast*

Application of the CPT to the characterization of a residual clay site  
*S.G. Fityus & L. Bates*

Energy ratio measurement of SPT equipment  
*D-S. Kim, W-S. Seo, E-S. Bang*

CPT-DMT interrelationships in Piedmont residuum  
*P.W. Mayne & T. Liao*

Energy measurements for standard penetration tests and the effects of the length of rods.  
*E. Odebrecht, F. Schnaid, M.M. Rocha & G.P. Bernardes*

SPT-T: test procedure and applications  
*A.S.P. Peixoto, D. de Carvalho & H.L. Giacheti*

Dynamic cone penetrometer to estimate subgrade resilient modulus for low volume roads design  
*A.M. Rahim & K.P. George*

Soil profile interpretation based on similarity concept for CPTU data  
*F. Saboya Jr & D.J.G. Balbi*

Centrifuge penetration tests in saturated layered sands  
*M.F. Silva & M.D. Bolton*

Sampling by drilling and excavations and groundwater measurements according to EN ISO 22475 for geotechnical investigations and site characterization  
*F. Stölben, V. Eitner & H. Hoffmann*

Undrained shear strength and OCR of marine clays from piezocone test results  
*F.A. Trevor & P.W. Mayne*

Results of a comparative study on cone resistance measurements  
*V. Whenham, N. Huybrechts, M. De Vos, J. Maertens, G. Simon & G. Van Alboom*
2. **Geophysical Methods Applied to Geotechnical Engineering**

General report: Geophysical methods applied to geotechnical engineering  
*S. Foti & A.P. Butcher*

ISC'2 experimental site investigation and characterization - Part 2: from SH waves high resolution shallow reflection to shallower GPR tests  
*F. Almeida, H. Hermosilha, J.M. Carvalho, A. Viana da Fonseca & R. Moura*

Quantitative resistivity methods for marine and fluvial site investigations  
*P. Brabers*

ISC'2 experimental site investigation - Part 1: conventional and tomographic P and S waves refraction seismics vs. electrical resistivity  
*J.M. Carvalho, A. Viana da Fonseca, F. Almeida & H. Hermosilha*

The role of crosshole seismic tomography for site characterization and grout injection evaluation on Carmo convent foundations  
*M.J. Coelho, F.M. Salgado & L. Fialho Rodrigues*

Geophysical characterization for seepage potential assessment along the embankments of the Po River  
*C. Comina, S. Foti, L.V. Socco & C. Strobbia*

The use of multichannel analysis of surface waves in determining \(G_{max}\) for soft clay  
*S. Donohue, M. Long, K. Gavin & P. O'Connor*

The use of electrical resistivity for detection of leacheate plumes in waste disposal sites  
*V.R. Elis, G. Mondelli, H.L. Giacheti, A.S.P. Peixoto & J. Hamada*

Wavelets in surface wave cavity detection - theoretical background and implementation  
*N. Gucunski, P. Shokouhi & A. Maher*

Investigation of bridge foundation sites in karst terrane via multi-electrode electrical resistivity  
*D.R. Hiltunen & M.J.S. Roth*

Monitoring water saturation gradient in a silty sand site using geophysical techniques  
*E. Kalantarian & D. Doser*

Characterizing ground hazards induced by historic salt mining using ground-penetrating radar  
*B. Kulessa, A. Ruffell & D. Glynn*

Hydrogeological characterization by electrical resistivity surveys in granitic terrains  
*A.S. Lima & A.C.V. Oliveira*

Development of a TDR dielectric penetrometer  
*C-P. Lin, C-C. Chung & S-H. Tang*

Joint acquisition of SWM and other seismic techniques in the ISC’2 experimental site  
*I. Lopes, I. Moitinho, C. Strobbia, P. Teves-Costa, G.P. Deidda, M. Mendes & J.A. Santos*

Decomposed rock mass characterization with crosshole seismic tomography at the Heroísmo station site (Porto)  
*M. Oliveira & M.J. Coelho*

Shear velocity model appraisal in shallow surface wave inversion  
*A. O'Neill*

Full waveform reflectivity for inversion of surface wave dispersion in shallow site investigations  
*A. O'Neill*

Offshore geosciences for coastal infrastructure  
*J. Peuchen & W.M. NeSmith*

A framework for inversion of wavefield spectra in seismic non-destructive testing of pavements  
*N. Ryden, P. Ulrik sen & C.B. Park*
3. INNOVATIVE TECHNOLOGIES AND EQUIPMENT

General report: Innovative technologies and equipment
M. Long & K.K. Phoon

The use of microtremors for soil and site categorization in Thessaloniki city, Greece
P. Apostolidis, D. Raptakis, M. Manakou & K. Pitilakis

New de-coupled shear wave source for the SCPT test
L. Areias, W. Haegeman & W.F. Van Impe

Comparing 360° televising of drill hole walls with core logging

Developments of a full displacement pressuremeter for municipal solid waste site investigations in Brazil

Rock characterization using drilling parameters
J. Benoît, S.S. Sadkowski & W.A. Bothner

Penetration resistance in soft clay for different shaped penetrometers
S.F. Chung & M.F. Randolph

Evaluation of the undrained shear strength profile in soft layered clay using full-flow probes

Rapid site assessment with the electrical conductivity probe flexible approach for rapid and deep site investigation
M.P. Harkes, E.E. van der Hoek & J.J. van Meerten

A framework for using textured friction sleeves at sites traditionally problematic for CPT
G.L. Hebeler, J.D. Frost & J.D. Shinn II

Thin layer and interface characterization by VisCPT
R.D. Hryciw & S. Shin

Evaluation of shear wave velocity profile using SPT based uphole test
D-S. Kim, E-S. Bang, W-S. Seo
Suitability of using Iwasaki's $P_L$ in characterization of liquefaction damages during the 1999 Chi-Chi Earthquake, Taiwan  
C.P. Kuo, M. Chang, S.H. Shau & R.E. Hsu

T-bar testing in Irish soils  
M. Long & G.T. Gudjonsson

Site characterization and QA/QC of deep dynamic compaction using an instrumented dilatometer  
H.J. Miller, K.P. Stetson & J. Benoît

Soil-rock sounding with MWD – a modern technique to investigate hard soils and rocks  
B. Möller, U. Bergdahl & K. Elmgren

A new in-situ apparatus: the geomechameter  
J. Monnet & S.M. Senouci

Permeability of sand sediment soil determined by the pressure infiltrometer test  
T. Morii, Y. Takeshita & M. Inoue

Adapted T-bar penetrometer versus CPT to determine undrained shear strengths of Dutch soft soils  
O. Oung, J.W.G. Van der Vegt, L. Tiggelman & H.E. Brassinga

Development of seismic site characterization method using harmonic wavelet analysis of wave (HWAW) method  
H-C. Park & D-S. Kim

Use of dilatometer and dual dilatometer test for soft soils and peats  
P.P. Rahardjo, Y. Halim & L. Sentosa

Field evaluation of the LCPC in-situ triaxial test  
Ph. Reiffsteck

CPTWD (Cone Penetration Test While Drilling) a new method for deep geotechnical surveys  
M. Sacchetto, A. Trevisan, K. Elmgren & K. Melander

Enhanced access penetration system: a direct push system for difficult site conditions  
J.D. Shinn II & J.W. Haas III

Use of a radioisotope cone to characterize a lumpy fill  
T.S. Tan, M. Karthikeyan, K.K. Phoon, G.R. Dasari & M. Mimura

Development of a carrier tool for a multi-method investigation of brownfield sites  
P. Wotschke & S. Friedel

4. NEW DEVELOPMENTS IN INTERPRETATION OF IN-SITU DATA

General report: New developments in the interpretation of in-situ test data  
B. Lehane & M. Fahey

Discussion report: Benefit of new developments in interpretation of in-situ data  
J. Peuchen

Calibration chamber size and boundary effects for CPT $q_c$ measurements  
M.M. Ahmadi & P.K. Robertson

State-space seismic cone minimum variance deconvolution  
E.J. Baziw

The effects of vibration on the penetration resistance and pore water pressure in sands  
J. Bonita, J.K. Mitchell & T.L. Brandon

In-situ testing and foundation engineering: recent contributions  
J-L. Briaud
Disturbance effects of field vane tests in a varved clay

A.B. Cerato & A.J. Lutenegger

Assessment of cyclic stability of cohesive deposits using cone penetration

R. Debasis

High resolution stratigraphic and sedimentological analysis of Llobregat delta nearby Barcelona from CPT & CPTU tests

M.J. Devincenzi, S. Colàs, J.L. Casamor, M. Canals, O. Falivene & P. Busquets

Fractal analysis of CPT data

J.A. Díaz-Rodríguez & P. Moreno-Carrizales

Neural networks in soil characterization

W. Ding & J.Q. Shang

Cylindrical cavity expansion modeling for interpretation of cone penetration tests

F. Elmi & J.L. Favre

Stratigraphic profiling by cluster analysis and fuzzy soil classification from mechanical cone penetration tests

J. Facciorusso & M. Uzielli

Site variability, risk, and beta

R.A. Failmezger, P.J. Bullock & R.L. Handy

A case study using in-situ testing to develop soil parameters for finite-element analyses

E. Farouz, J-Y. Chen & R.A. Failmezger

Using a non linear constitutive law to compare Menard PMT and PLT E-moduli

A. Gomes Correia, A. Antão & M. Gambin

Computational and physical basis for dynamic characterization using Love waves

B.B. Guzina, A.I. Madyarov & R.H. Osburn

Effect of ageing on shear wave velocity by seismic cone

J.A. Howie & A. Amini

Dissipation test evaluation with a point-symmetrical consolidation model

E. Imre & P. Rózsa

Feasibility of neural network application for determination of undrained shear strength of clay from piezocone measurements

Y-S. Kim

Measurement of in-situ deformability in hard rock

D. Labrie, B. Conlon, T. Anderson & R.F. Boyle

Estimation of shear strength increase beneath embankments by seismic cross-hole tomography

R. Larsson & H. Mattson

Statistical evaluation of the dependence of the liquidity index and undrained shear strength of CPTU parameters in cohesive soils

J. Liszkowski, M. Tschuschke, Z. Młynarek & W. Tschuschke

CPTU – replication test in post flotation sediments

Z. Młynarek, W. Tschuschke & T. Lunne

Evaluation of the coefficient of subgrade reaction for design of multipropelled diaphragm walls from DMT moduli

P. Monaco & S. Marchetti

Evaluation of SCPTU intra-correlations at sand sites in the Lower Mississippi River Valley, USA

J.A. Schneider, A.V. McGillivray & P.W. Mayne
Risk assessment for contaminated tropical soil
A.C. Strava Corrêa & N. Moreira de Souza

An examination of the engineering properties and the cone factor of soils from East Asia
M. Tanaka & H. Tanaka

The regional information system ‘Databank Ondergrond Vlaanderen - DOV’
I. Vergauwen, P. De Schrijver & G. Van Alboom
