Proceedings of the
18th International Symposium on
Space Flight Dynamics
11-15 October 2004 Munich, Germany

Jointly organised by
DLR’s German Space Operations Center
&
ESA’s European Space Operations Centre
CONTENTS

Session 1 - Attitude Determination & Control 1

Jason1: On-Ground Gyro-Magnetic Attitude Estimation in Case of Definitive Star Trackers Loss
J. Montel, Ph. Landiech & O. Dunogues

Compensation for Time-Dependent Star Tracker Thermal Deformation on the Aqua Spacecraft
J.A. Hashmall, G. Natanson, J. Glickman & J. Sedlak

The Flight Results of the New Onboard Attitude Determination of ADEOS-II
T.T. Tanamachi, Y. Kojima & T. Kurosaki

Assessment of AOCS In-Orbit Performance for Mars Express and Rosetta
M. Lauer, S. Kielbassa & U. Herfort

Attitude Control for GRACE: The First Low-Flying Satellite Formation
J. Herman, D. Presti, A. Codazzi & C. Belle

Session 2 - Formation Flying 1

New Methods for Spacecraft Formation Design
V.M. Guibout & D.J. Scheeres

Mission Analysis and Orbit Control of Interferometric Wheel Formation Flying
J. Fourcade

Close Formation Flight of Passive Receiving Micro-Satellites
H. Fiedler & G. Krieger

Hardware-in-the-Loop Testing of Continuous Control Algorithms for a Precision Formation Flying Demonstration Mission
B.J. Naasz, R.D. Burns, D. Gaylor & J. Higinbotham

THEONA Theory of Relative Satellite Motion Flying in the Formation
A. Golikov
Session 3 - Flight Dynamics Operations 1

Operational Experiences in Planning and Reconstructing Aqua Inclination Maneuvers
D. Rand, J. Reilly & C. Schiff 67

Impact of Orbit Prediction Accuracy on Low Earth Remote Sensing Flight Dynamics Operations
C. Arbinger & S. D'Amico 73

Eurostar 2000 Disposal in a Graveyard Orbit: Orbit Control Strategy and Operational Implementation
D. Mignon, F. Raballand, J-L. Gonnaud & S. Jallade 79

ATV Separation and Departure Strategy from Uncontrolled International Space Station
G. Bergez, O. Mongrard, C. Santini & R. Lainé 85

Microgravity Research aboard the Progress Vehicle in Autonomous Flight
N.A. Bryukhanov, V.V. Tsvetkov, M.Yu. Beliaev, E.V. Babkin, T.V. Matveeva & V.V. Sazonov 91

Session 4 - Guidance & Control

A NLP Based Reentry Flight Guidance Algorithm
M. Gräßlin & U. Schöttle 99

The Space Technology-7 Disturbance Reduction System
J.R. O'Donnell Jr., O.C. Hsu, J. Hanson & V. Hruby 105

The GNC Measurement System for the Automated Transfer Vehicle
Y. Roux & P. da Cunha 111

Dynamic and Static Deployment Motions of Spin Type Solar Sail
O. Mori, Y. Tsuda, M. Shida & J. Kawaguchi 117

Solar Sails as a Tool for Spacecraft Motion Control Near Solar-Terrestrial Libration Points
N.A. Eismont & R. Nazirov 123

Session 5 - Trajectory Design & Optimization

Optimal Control and Smoothing Techniques for Computing Minimum Fuel Orbital Transfers and Rendezvous
R. Epenoy & R. Bertrand 131

Generation of an Optimum Target Trajectory for the TerraSAR-X Repeat Observation Satellite
S. D'Amico, C. Arbinger, M. Kirschner & S. Campagnola 137
An Integrated Tool for Low Thrust Optimal Control Orbit Transfers in Interplanetary Trajectories
T. Dargent & V. Martinot

On Moon-to-Earth Trajectories with Gravitational Escape from the Moon Attraction
V. V. Ivashkin

Fuzzy Boundary Jupiter Moon Tour Trajectories Using the Bifurcation Method
M. Belló, J.A. González, M. Sánchez & G. Janin

Session 6 - Orbit Determination 1

Results of the Precise Orbit Determination Experiment with ADEOS-II
S. Nakamura, T. Uchimura, S. Katagiri, A. Suzuki, M. Sawabe & Y. Yamamoto

Comparison of GPS-based Orbit Determination Strategies
E. Gill & O. Montenbruck

Near Real-Time Precise Orbit Determination for Low Earth Orbiting Satellites
F. Sancho Rodríguez-Portugal, F. Martínez Fadrique, A. Águeda Maté & A. Damiano

Orbit Determination of the SMART-1 Mission
R. Mackenzie, D. Lazaro Salvador & D. Milligan

Session 7 - Mars Missions

Mars Express Navigation for Beagle 2 Separation and Mars Orbit Insertion
T. Morley, F. Budnik, R. Mackenzie & N. Faehling

Mars Express Interplanetary Navigation from Launch to Mars Orbit Insertion:
The JPL Experience
D. Han, D. Highsmith, M. Jah, D. Craig, J. Border & P. Kroger

Combined Control of the Operational Mars Express Orbit and the Spacecraft Angular Momentum
J.A. Pulido-Cobo & J. Schoenmaekers

Mars Atmospheric Variability above 250 km Altitude
D.E. Highsmith, A.S. Konopliv, D. Han, M. Jah & D.E. Craig

Reconstructed Beagle 2 Trajectory
R. Cramm, J.M. de Juana Gamo & R. Bauske
Session 8 - Mission Analysis & Design

CBERS-2 LEOP Orbit Analysis
V. Orlando, H.K. Kuga & J. Tominaga

Re-Design of the Rosetta Mission for Launch in 2004
J. Schoenmaekers & R. Bauske

An Orbit Design Method to Support Small Body Interior Radar Studies
L.A. Cangahuala & G. Minett

Study on the Characteristics of Two-burn Translunar Trajectory
Y. Kawakatsu

Review of Venus Express Mission Analysis
J.M. Sanchez Perez & J. Rodriguez Canabal

Session 9 - Orbit Determination 2

Precise Relative Orbit Estimation of INSAT Missions
N.V. Vighnesam & A. Sonney

Preliminary Evaluation of Radio Data Orbit Determination Capabilities of China’s First Lunar Orbiter
Y. Liu, Z. Yu & G. Dong

Improvement of Operational Orbit Determination by including Optical Measurements from a 1-metre Telescope
G. Ziegler

Radio-Interferometer for Geosynchronous Orbit Survey
S. Kawase

Differenced Doppler Applications for Mars Exploration Rover Navigation

Session 10 - Attitude Determination & Control 2

The Optimisation of Attitude Profiles for SMART-1: A Highly Constrained Problem
R. Rigger, J.J. Yde, M. Mueller & V. Companys

Attitude and Direction Sensor using GPS Carrier Phase Data
A. Dalla Torre, A. Caporali, N. Praticelli & C. Facchinetti

Uncontrolled Attitude Motion of the Orbital Station MIR in the Last Years of its Flight
M. Yu. Beliaev, V.M. Stuzhkov, E. V. Babkin & V.V. Sazonov
In-Flight Disturbance Torque Evaluation of the SMART-1 Plasma Thruster
E. Tremolizzo, H. Meier & D. Estublier 303

Kalman Filter Estimation of Spinning Spacecraft Attitude using Markley Variables
J.E. Sedlak 307

Session 11 - Orbit Control

Safe Switching of the GRACE Formation using an Eccentricity/Inclination Vector Separation
M. Kirschner, O. Montenbruck & S. D’Amico 315

Eurostar 3000 Inclined Orbit Mission: Lifetime Optimisation in Case of Injection with a Low Inclination
F. Raballand, J. De Lamarzelle, F. Bonaventure & A-H. Gicquel 321

Experiment of Autonomous Orbit Control on the DEMETER Satellite
A. Lamy, M.C. Charmeau, D. Laurichesse, M. Grondin & R. Bertrand 327

Precise Ground-in-the-Loop Orbit Control for Low Earth Observation Satellites
C. Arbinger, S. D’Amico & M. Eineder 333

Interplanetary Flight Control With Electric Engine In View Of Thrust Errors
E.L. Akim, G.S. Zaslavskiy, V.G. Zharov & A.V. Chernov 339

Session 12 - Atmospheric Entry

Emergency Scenarios of a Re-Entry Vehicle Due to Control Degradation
O. da Costa & G. Sachs 347

Nonlinear Adaptive Flight Control for the X-38 Vehicle
E.M. Wallner & K.H. Well 353

Evolved Acceleration Guidance for Planetary Entry
K.D. Meaze, J.A. Leavitt & M. Ferch 361

Guidance Trade-off for Aerocapture Missions
P. Vernis, G. Gelly, E. Ferreira, R. da Costa & G. Ortega 365

Aero-Gravity Assist Manoeuvres within Preliminary Interplanetary Mission Design: A Multi-Objective Evolutive Algorithm Approach
A. Povoleri, M. Lavagna & A.E. Finzi 373
Session 13 - Flight Dynamics Operations 2

Operational Implementation of Mars Express Orbit and Attitude Control
V. Companys, J. Keil, E. Rivero, M. Mueller, S. Fuente & P. Perez 381

ESOC's System for Interplanetary Orbit Determination
F. Budnik, T.A. Morley & R. A. Mackenzie 387

Flight Dynamics Operations during SMART-1 Commissioning
U. Herfort & R. Rigger 393

Precise Emulation of Commands for ESA Interplanetary Missions
L. Tucci, J. Keil, V. Companys & S. De La Fuente 397

Optimisation of New 4 S/C Formations Considering Operational Constraints
of the Extended Cluster Mission
D. Sieg & J. Schoenmaekers 403

Session 14 - Formation Flying 2

Control of the Laser Interferometer Space Antenna
P.G. Maghami, T.T. Hyde & J. Kim 411

Formation Flying Transition Behavior to Localized and Decentralized Control Laws
J. Kawaguchi & T. Saiki 417

Linearizing Assumptions and Control Design for Spacecraft Formation Flying
Maneuvers
K.C. Kappagantula & J.L. Crassidis 423

Optimal Formation Flying Reconfiguration and Station Keeping Maneuvers
Using Low Thrust Propulsion
R. Armellin, M. Massari & A.E. Finzi 429

Relative Navigation Strategies for the Magnetospheric Multiscale Mission
C. Gramling, R. Carpenter, T. Lee & A. Long 435

Session 15 - Interplanetary Flight

Experiments on the Differential VLBI Measurements with the Former Russian
Deep Space Network
I.E. Molotov 443

Rosetta Lander Descending Phase on the Comet 67P/Churyumov-Gerasimenko
R. Bertrand, T. Ceolin & Ph. Gaudon 449

Optical Navigation for the STARDUST Wild 2 Encounter
S. Bhaskaran, N. Mastrodemos, J.E. Riedel & S.P. Synnott 455
Ballistics, Navigation and Motion Control of the S/C on Stages of the
Phobos Surface Approaching and Landing
E.L. Akim, E.G. Ruzskiy, V.A. Shishov, V.A. Stepaniants & A.G. Tuchin 461

Optical Navigation to a Near Earth Object
S. Delavault, J. Berthier & J. Foliard 467

Sun-Earth L1 Region Halo-to-Halo Orbit and Halo-to-Lissajous Orbit Transfers
C.E. Roberts 473

Session 16 - Low-Thrust Trajectories

Low-thrust Optimal Trajectories for Rendezvous with Near Earth Asteroids
R. Bertrand & J. Foliard 481

Low-Thrust Approach and Gravitational Capture at Mercury
R. Jehn, S. Campagnola, D. Garcia & S. Kemble 487

Preliminary Analysis of Low-Thrust Gravity Assist Trajectories by an Inverse Method and a Global Optimization Technique.
P. De Pascale, M. Vasile & S. Casotto 493

Optimum Trajectory for Low-thrust Multiple Trojan Asteroid Flybys
M. Matsumoto & J. Kawaguchi 499

Post-Launch Optimisation of the SMART-1 Low-thrust Trajectory to the Moon
J. Schoenmaekers 505

Poster Session

Dynamical Model of the MSG Attitude
O. Luengo 513

Attitude Propagation from Digital Images
R.V.F. Lopes, A.R. Silva & H.K. Kuga 519

Fuel-Optimum Near-Miss Avoidance Control for Clustered Satellites
H. Umehara & C.R. McInnes 525

On Formation Deployment for Spinning Tethered Formation Flying and Experimental Demonstration
K. Nakaya, M. Iai, O. Mori & S. Matunaga 531

Exchange of Standardized Flight Dynamics Data
T. Martin-Mur, D. Berry, F. Flores-Amaya, J. Foliard, R. Kiehling, M. Ogawa & S. Pallascke 537
