PAPER INDUSTRY TECHNICAL ASSOCIATION

2005
COATING CONFERENCE

OPTIMISING QUALITY AND COST IN COATED PAPERS

Organised by the
PITA Coating Working Group

CONFERENCE PROCEEDINGS

15th & 16th March 2005
SESSION 1: "HIGH EFFICIENCY EQUIPMENT AND CONTROL"

New Coating Concepts and Methods  
*Kari Sorsa* .......................................................... 9

Gravure Pre-metering Improving Runnability and Paper Quality  
*Per Emilsson and Susanne Öhman* ............................. 13

Curtain vs. Blade Coating: Experience in Board Application  
*Knut Helmer, Tiina Karppinen and Björn Lindqvist* .......... 17

Coating Consolidation Measurement & Control Reduces Variations & Costs  
*David Watson and Ross MacHattie* .......................... 23

SESSION 2: "THE IMPORTANCE OF THE BASE SHEET"

Optimising Base Sheet Properties to Improve Coater Runnability and Sheet Quality  
*Andrew White* ..................................................... 29

Frequencies and Amplitudes: Base Stock Structure and Product Quality  
*Nigel Jopson* ..................................................... 35

The Role of Base Paper in Controlling MSP and Spray LWC Paper Quality  
*Dr Anthony Hiorns, Dr Janet Preston and Robert Fogelholm* .... 47

SESSION 3: "STRUCTURE OF COATINGS – IMPACT OF BINDERS"

Optimisation of Latex Level to Control Water Interference Mottle of Coated Paperboard – A Mill Study  
*Dr Fred McConkey, Dr Janet Preston, Chris Parsons and Dr John Husband* .............................. 61

Optimisation of the Precoating Share and Binder Compositions of Double Coated Woodfree Papers to Improve Quality and Reduce Costs  
*Dr Detlev Glittenberg, Andreas Voigt and Dr Andreas Becker* ........ 71
SESSION 4

“STRUCTURE OF COATINGS – SPECIALTY DEVELOPMENTS”

Speciality PVOH in Ink Jet Coating Formulations

Koji Hara ................................................................. 77

Novel Kaolin Pigment for High Solids Ink Jet Coating

Prakash B. Malla and Siva Devisetti ................................. 81

Hyperbranched Polymers ‘Topbrane’ New Product Range in Paper Coating

Craig Samuels, Henk Van den Abbeelee and Eric Jönsson ........ 91

SESSION 5

“STRUCTURE OF COATINGS – THE ROLE OF PIGMENTS”

The Role of Pigments in Controlling Coating Structure

Chris Nutbeem, Dr. John Husband and Dr. Janet Preston ........ 97

Different Ground Calcium Carbonate Grades and Cost-effectiveness of Paper and Board Coating

Liudmila Makhotina, Svetlana Khvosticova, Andrey Nikandrov and Edouard Akim ................................................. 103

A New Coating Structure Strategy for Designed Absorption and Optimised Adsorption

Pat Gane and Cathy J. Ridgway ........................................ 109

Taking Advantage of Pigment Performance through Binder Flexibility

Kimmo Huhtala and Amy Dimmick .................................... 119

The Influence of Coating Binders and Base Paper to Printed Paper Attributes and Runnability of Matt LWC Grades in Cold Set Web Offset Printing

Elina Kalela and Daphné Desjumaux .................................. 123

Customer Service and Troubleshooting

Bruce Hertogs ............................................................ 133
