Water–Rock Interaction

Edited by

Richard B. Wanty
U.S. Geological Survey, Denver, Colorado, USA

Robert R. Seal II
U.S. Geological Survey, Reston, Virginia, USA

Volume 1
Table of Contents

Preface XXIII
Organization XXV

Volume 1

Plenary presentations

The silicification of microorganisms: a comparison between \textit{in situ} experiments in the field and laboratory
\textit{L.G. Benning & B.W. Mountain} 3

Control of dilation and collapse during weathering and soil formation on Hawaiian basalts
\textit{O.A. Chadwick & R.D. Goldstein} 11

Chemical weathering in steady-state orogens -- examples from the Himalaya and Southern Alps
\textit{C.P. Chamberlain & J.R. Waldbauer} 17

Origin of the carbon dissolved in the groundwater and derivation of Earth diffuse emission of CO$_2$: the case of the Italian Peninsula
\textit{G. Chiodini, S. Caliro & C. Cardellini} 21

Chlorine stable isotopes in sedimentary systems: does size matter?
\textit{M. Coleman} 31

Arsenic mobilization from contaminated sediments: a full-scale experiment in progress
\textit{J.G. Hering, S. Dixit, K. Campbell & P.A. O'Day} 39

Polymeric silicate complexing in aqueous fluids at high pressure and temperature, and its implications for water–rock interaction
\textit{C.E. Manning} 45

\textit{Volcanic-geothermal water–rock interactions and degassing: a Symposium in memory of Donald White}

Keynote address:
Yellowstone Caldera inflation-deflation and hydrothermal Cl flux revisited
\textit{R.O. Fournier} 53

Keynote address:
Oxidation reactions for reduced Fe, As, and S in thermal outflows of Yellowstone National Park: biotic or abiotic?
\textit{D.K. Nordstrom, J.W. Ball & R.B. McCluskey} 59

Chemical aspects of exploration of the Theistareykir high-temperature geothermal area, N-E Iceland
\textit{H. Arnórsson} 63

The source and relative age of non-thermal and up to 90°C ground waters in the Skagafjördur tholeiite flood basalt province, N-Iceland
\textit{S. Arnórsson & A.E. Sveinbjörnsdóttir} 69

Modeling hydrothermal alteration in the Pinatubo Geothermal Field, Philippines
\textit{M.I.R.D. Balangue, M.G.B. Collantes & M.T. Mamitag} 75
Sulfur stable isotope ratios of the Mt. Apo geothermal fluid, Philippines
F.E.B. Bayon & B.M.G. Sambrano  

Diffuse CO2 degassing from summit areas on Mt. Hood, Oregon, USA
D. Bergfeld, J.F. Howie & M.E. Schmidt

Geochemical evolution of the young crater lake of Kelud volcano in Indonesia
A. Bernard & A. Mazot

Evidence of mantle derived fluid contributions to the thermal basins of Western Sicily: geotectonic and geodynamic implications
A. Caracausi, R. Favara, F. Italiano, A. Paonita, A. Rizzo & P.M. Nuccio

Experimentation of an automatic continuous monitoring station in a thermal well of Stromboli volcanic island (Italy)
M.L. Carapezza, R. Cioni, M. Guidi, A. Scozzari & L. Pruitti

Diffuse soil CO2 degassing at Salcheto (Tuscany) and Lipary (Sicily): a probabilistic approach to mapping and quantification of gas release

Chemical composition and formation of thermal waters in Kuril’s Islands (Far East Russia)

Major, trace, and rare earth elements in the surface waters of two areas of the Kuril Islands
V.A. Chudaeva, O.V. Chudaev, K. Sugimori, M. Matsuo & A. Kuno

Helium and carbon isotopic evidence for the relationship between outgassing and structure in the East African Rift System
W.G. Darling

A gas transfer study at Ojo Caliente, Yellowstone National Park, USA
B.R. Druschel, M.J. Borda & M.A.A. Schoonen

Transport of injected isobutane by thermal groundwater in Long Valley caldera, California, USA
W.C. Evans, T.D. Lorenson, M.L. Sorey & D. Bergfeld

Relationships between structural boundaries, fluid circulation and permeability changes during the 2002–2003 Stromboli eruptive crisis
A. Finizola & F. Sortino

Thermal springs at Colombian active volcanoes

A hydrologo-chemical model for the Troitsky crater lake, Maly Semyachik, Kamchatka
G.M. Gavrilenko & P.G. Gavrilenko

Nitrogen transformations in hot spring runoff, Yellowstone National Park, USA
J.M. Holloway, R.L. Smith & D.K. Nordstrom

The geochemistry of geothermal waters in the Alvord Basin, southeastern Oregon
A.K. Koski & S.A. Wood

The scaling relationship between self-potential and fluid flow on Masaya volcano, Nicaragua
J.L. Lewicki, G.E. Hilley & C. Connor

The feasibility of using yttria-stabilized ZrO2 sensors for pH measurements in geothermal field and industrial applications
M.F. Manna, D.E. Grandstaff, G.C. Ulmer & E.P. Vicenzi

Insight into the hydrothermal system of Papandayan volcano, Indonesia
A. Mazot & A. Bernard
Magmatic and fossil components of thermal and mineral waters in the Eger River continental rift (Bohemian massif, central Europe)  
T. Paces & V. Smejkal

167

Hydrothermal activity at Tacaná volcano, Mexico–Guatemala  
D. Rouwet, Y. Taran, S. Inguaggiato & N. Varley

173

Fluid geochemistry data processing for integrated assessment of Japanese geothermal resources using GIS: a case study for the Hohi area, Kyushu  
H. Shigeno

177

Transition metals distribution in the rocks from Sierra-Leone Fracture Zone (Central Atlantic)  
V.A. Simonov, Y.P. Kolmogorov, A.S. Lapukhov & G.A. Tretyakov

183

Kr-81 and water–rock interactions on a million-year time scale  

187

Evidence for metastable equilibrium between hydrocarbons in volcanic gases  
Y. Taran & W.F. Giggenbach

193

Intrusion, degassing and hydrothermal systems in submarine felsic volcanic centers  
B.E. Taylor, A. Timbal & G.J. Holk

197

Hydrochemical evolution of the Na-HCO3-type groundwater from northern Sikhote-Alin (Far East Russia)  
N.A. Tchepkaia, G.A. Chelnokov, O.V. Chudaev & V.A. Chudaeva

203

Chloride in hot springs of the Cascade volcanic arc – the source puzzle  
M.C. van Soest, W.C. Evans, R.H. Mariner & M.E. Schmidt

209

The magmato-hydrothermal system at Copahue volcano, Argentina  
J.C. Varekamp, A.P. Ouimette & R. Kreulen

215

Measurement of trace gas species at White Island volcano, New Zealand, using chemical traps  
L.J. Wardell, P.R. Kyle & D. Counce

219

Monitoring CO2 emissions at White Island volcano, New Zealand: evidence for total decreases in magmatic mass and heat output  
C. Werner, B.W. Christenson, B.J. Scott, K. Britten & G. Kilgour

223

Modeling study of WRI in the Bakki low-temperature geothermal field, south-west Iceland  
Z.S. Zhang, H. Ármannsson & H. Kristmannsdóttir

227

Stable chlorine isotopic composition of geothermal waters from Yellowstone National Park  

233

Experimental study of water–rock interaction in active geothermal fields: Los Azufres, Mexico  
W.B. Zhou, Z.S. Zhang & M.G. Li

237

Crustal fluid–rock interactions, mass transfer and cycling of volatiles

The isotopic heterogeneity of C in metamorphic complexes  
O.V. Avchenko, S.N. Lavrik, I.A. Alexandrov & T.A. Velievetskaya

243

Dating fluid infiltration using monazite  
J.C. Ayers, M. Loflin, C.F. Miller, M.D. Barton & C. Coath

247

High-precision isotopic analysis of nanomole quantities of silicate N  
G. Bebout, B. Idleman, L. Li & A. Hilkert

253

Mineral chemical records of prograde devolatilization in Alpine HP/UHP metasediments  
G. Bebout, R. King, P. Agard, K. Kobayashi & E. Nakamura

257
Geochemistry of quartz and calcite veins in a paleoaccretionary complex
Z. Berner, D. Stüben & E. Seidel

Modeling contact metamorphism of siliceous dolomite via kinetic control of overall reactions

Sulfur geochemistry of Paleozoic rocks, U.S. mid-continent: implications for large-scale fluid flow and ore genesis
M.B. Goldhaber

About the role of water in the metamorphic alteration of ultrabasic rocks
A.A. Grigorian & S.B. Abovian

Contribution of fertilization practices to nitrate contamination of groundwater
H. Guo, G. Li, D. Zhang, F. Yan, X. Zhang & C. Lu

Mineralogy and mobility of chemical elements at water-basalt interaction, Hole 504B
V.B. Kurnosov, B.P. Zolotarev & A.V. Artamonov

Water–rock interaction responsible for the origin of high pH mineral waters (S. Portugal)

Role of water–rock interaction in the formation of La Azul fluorite deposit, southern Mexico
T. Pi, J. Solé, Y. Taran & P. Alfonso

Barite as an indicator of cross-formational fluid flow
D. Savage

Micropore-diffusion catalytic effect significance in water–rock interaction
L.I. Shabalin

Fluid–rock interactions within Paleoproterozoic Au mineralization of the Sakoli Group, India
A.S. Venkatesh, B. Jose & T. Srinivas

Influence of grain boundary energy on fluid distribution in deep-seated rocks
D.A. Wark & E.B. Watson

Kinetics study of silicate mineral dissolution in water at high temperatures near the critical point of water
R. Zhang, S. Hu, X. Zhang, C. Shi & J. Zhang

Water–rock interactions in groundwater systems and sedimentary basins

Geothermal potential of thermal waters of Manikaran, Himachal Pradesh, India
M.A. Alam, D. Chandrasekharan & A. Minissale

Geochemical and isotope features of brines of the Siberian platform
S.V. Alexeev, L.P. Alexeeva, O. Shouakar-Stash & S.K. Frape

Modeling of tracer behaviour and dominant reactions during the Pore Water Chemistry (PC) experiment in the Opalinus Clay, Switzerland
D. Arcos, L. Duro, T. Gimmi & H.N. Waber

Aspects of groundwater geochemistry from Middle Atlas and Saiss basin (Northern Morocco)

Processes affecting groundwater quality in a basalt aquifer system in southern Australia
D.A. Bennetts & J.A. Webb

Rapid growth of meter-scale calcite speleothems in the Mission Tunnel, Santa Barbara, CA
J.R. Boles
U transport at Itataia U-deposit, Brazil
D.M. Bonotto, R.C.S. Kesselring & J.R.L.V. Leal

Smectite-to-illite reaction vs. quartz kinetics in shale from the Haltenbanken area
M. Bruvoll, J.S. Jahren & P. Aagaard

Origin of brines from the Bachu Uplift, Tarim Basin, China: chemistry and 81B evidence
C. Cai, H. He, B. Mei & Y. Xiao

Use of a gel probe sampling device to examine porewater profiles and the effects of porewater composition on As sorption in sediments
K.M. Campbell, S. Dixit & J.G. Hering

14C and 36Cl as indicators of groundwater flow, Bland Catchment, NSW
E.A. Carrara, T.R. Weaver, I. Cartwright & R.G. Cresswell

Hydrogeology of the Goulburn Valley, Murray Basin, Australia
I. Cartwright & T.R. Weaver

Mobilization of F from rocks and soils in groundwater, Morel River basin, Rajasthan, India
H.T. Chaturvedi & D. Chandrasekharam

Geochemistry of groundwater in the Gharb plain aquifers (Northern-Morocco)
N. El Mahmouhi, M. El Wartiti, M. Zahraoui & R. Caboi

Hydrogeochemistry of the Lake Cooper region, Murray Basin
K. Hannam, I. Cartwright & T.R. Weaver

Origin of dolomites in the phosphatic Upper Cretaceous Duwi Formation, Eastern Desert, Egypt
H. Holail, M. Shaaban, M. El-Askary & M. Rashed

Groundwater age, chemistry and evolution in fractured granite, Uveghuta, Hungary
I. Horvath, T. Szocs & G. Toth

Geochemical characteristics in the coastal aquifer of the Mamora plain

Earthquakes influencing geothermal water–rock interaction in Iceland
H. Kristmannsdóttir & V. Hardardóttir

Fracture-related geochemical controls on As concentrations in ground-water
G. Lipfert & A. Reeve

Renewal of Fe used to remove TCE in simulated high alkalinity groundwater by ultrasound
F. Liu, R. Gillham & L. Gui

Processes controlling groundwater chemistry of a coastal area in SE Sardinia (Italy)
M. Lorrai, L. Fanfani, P. Lattanzi & R.B. Wanty

New method for porewater extraction from claystone and determination of transport properties with results for Opalinus Clay (Switzerland)
U.K. Mäder, H.N. Weber & A. Gautschi

13C enrichments in periglacial biogenic carbonates may be due to acetogenic processes instead of methanogenesis
M.E. Marschner & I.D. Clark

Why are recent groundwaters sea-tagged and fresh, whereas formation waters are brine-tagged and saline?
E. Mazor
Impact of Pleistocene glaciation on hydrogeochemistry of Devonian carbonate groundwaters, northern margin Michigan Basin
J.C. McIntosh & L.M. Walter

Incipient alteration of biotite by groundwater in fractured rock
J. McMurry

Hydrochemistry of groundwater on both sides of the Jordan – Dead Sea – Arava transform fault

U-series evidence of water–rock interaction at Yucca Mountain, Nevada, USA
J.B. Paces & L.A. Neymark

The evolution of groundwater in the Tyrrell region, south-central Murray Basin, Victoria, Australia
B. Petrides, I. Cartwright & T.R. Weaver

Geochemical and isotopic study of groundwaters in Cerro Prieto, BC, México
E. Portugal, G. Izquierdo & J. Alvarez

Chemical and isotopic characteristics and origin of high-pH thermal springs near Acapulco, State of Guerrero, México
A. Ramírez-Guzmán & Y. Taran

Two stages of cation exchange in the geochemical evolution of seawater intrusion into the coastal aquifer of Israel
O. Sivan, Y. Yechieli, B. Herut & B. Lazar

Experimental and numerical simulation of carbonate dissolution and porosity development by organic acids
I.-Y. Tseng, G.A. Otten, V. De Choudens-Sánchez & A.B. Herhold

Controls on REE during groundwater flow and mixing in fractured rock aquifers
S.O. Tweed, T.R. Weaver & I. Cartwright

The origin and age of groundwater in the Nubian Sandstone aquifer in the Negev, Israel

Geochemical characterization of a volcanic-sedimentary aquifer in Central Italy
R. Vivona, E. Preziosi, G. Giuliano, D. Mastroianni, F. Falconi & B. Madé

Models for development of dryland salinity, Murray Basin, Australia
T.R. Weaver, A. Bush, T. Singh, I. Cartwright & E. Irvine

Results from the Porewater Chemistry Experiment in Opalinus Clay at Mont Terri, Switzerland

Hydrochemistry of groundwaters in Quaternary aquifers: a case study at Taiyuan, China
S. Yan, Q. Guo, Y. Wang & R. Wang

Geochemistry and fluxes of strontium and barium in subsurface water in the central part of the Russian plate
V.P. Zverev, I.A. Kostikova & N.N. Bogdanova

Carbon dioxide and hydrogen sulfide sequestration

Investigations of dawsonite-forming reactions for geological CO\textsubscript{2} sequestration

The effect of CO\textsubscript{2}(aq), Al\textsubscript{(aq)} and temperature on feldspar dissolution
S.A. Carroll & K.G. Knauss
Geochemical monitoring of the Weyburn CO₂-injection EOR site, Saskatchewan, Canada
K. Durocher, I. Hutcheon, M. Shevaller, B. Mayer, W. Gunter & E. Perkins

Coupled carbonate mineral dissolution and growth: calcite and strontianite
K.G. Knauss, C.M. Eggleston, B. Greer & S.R. Higgins

Geochemical impact assessment of CO₂ storage in the North German Basin
F. May

Sequestration of CO₂ in redbeds: siderite precipitation from CO₂ and SO₂ waste gas
J.L. Palandri & Y.K. Kharaka

CO₂ geological sequestration in Italy: state of the art and potential sites
F. Quattrrocchi, R. Bencini, D. Cinti, G. Galli, L. Pizzino, N. Voltattorni & A. Navarra

An experiment frozen in time – cryo-SEM imaging of rapidly-formed CO₂ hydrate

Processed kimberlite-water interactions, Ekati diamond mine, NWT, Canada
H.A. Rollo & H.E. Jamieson

The kinetics of hydrogen sulfide sequestration in sandstones
M. Schoonen, Y. Xu & A. Carpenter

Preliminary experimental results of CO₂ sequestration with brine

Mineral alteration due to injection of CO₂, H₂S and SO₂ in deep arkosic formations
T. Xu, J.A. Apps & K. Pruess

Advances in spectroscopic and microscopic techniques for the study of water-rock interactions

Keynote address:
The role of synchrotron radiation in advancing the frontiers of water–rock interactions
D.L. Sparks

SEM-CL imaging of hydrothermal quartz – lessons and applications
G. Bignall, N. Hirano, B. Batkhishig, N. Tsuchiya, B. Rusk & K. Sekine

Raman spectroscopic method for quantitative analysis of binary aqueous organic solutions
I-M. Chou & R.C. Burruss

Synchrotron micro-tomography of porous media for modeling fluid flow
F. Enzmann, M. Kersten & M. Stampanoni

¹⁹F-NMR study Al-oxyhydroxide surfaces and reactions
B.L. Phillips, A. Lee & W.H. Casey

X-ray spectroscopic techniques to probe the microbial dissolution of basaltic glasses

Solid-phase As speciation in roaster-derived Au mine tailings
S.R. Walker, H.E. Jamieson, C.F. Andrade & A. Lanzirotti

Detection of a mass transport front in rocks by thermoluminescence technique
M. Yamamoto & N. Tsuchiya

Study of phosphate layers in Lake Baikal sediments by complex of local methods
Radionuclide interactions with minerals and microbes

Depleted U in sediments of Patroon Reservoir, Albany, NY, USA
J.G. Arnason & B.A. Fletcher

EXAFS study of uranyl adsorption on Wyoming montmorillonite

An experimental study of the dissolution rates of apatite and britholite as a function of solution composition and pH from 1 to 12
C. Chaïrat, E.H. Oelkers, S. Köhler, N. Harouiya & J.-E. Lartigue

Mineral formation and radionuclide sorption in waste-impacted Hanford sediments
J. Chorover, P. Rotenberg & R.J. Serne

Remobilization of precipitated and cell-associated uranium in brines
C.J. Dodge, J.B. Gillow & A.J. Francis

U adsorption onto Bacillus subtilis bacterial cell walls
D. Gorman-Lewis & J.B. Fein

Evaluation of SnIV sorption on Callovo-Oxfordian from equilibrated sedimentary waters
C. Latrille & J. Ly

Influence of humic acids on the migration of U(VI) in quartz sand
J. Mibus, S. Sachs, C. Nebelung & G. Bernhard

Interactions of the U mining waste pile isolate Bacillus sphaericus JG-A12 with U
J. Raff, M. Merroun, S. Selenska-Pobell, A. Rossberg, U. Soltmann & H. Böttcher

U, Th, Eu and colloid mobility in a granite fracture under near-natural flow conditions
T. Schäfer, H. Geckeis, M. Bouby & Th. Fanghänel

PuIV removal from solution by oxidation and adsorption onto manganese dioxide
S.A. Stout, S.D. Reilly, D.M. Smith & M.P. Neu

The role of secondary mineral precipitates on radionuclide sequestration at the Hanford Site

Complexity of mineral surfaces: experimental and theoretical studies

Etch pit morphology and Mg inhibition of calcite dissolution
R.S. Arvidson, K.J. Davis, M. Collier, A. Luttge & J.E. Amonette

Using time-lapse ATR-FTIR spectroscopy to investigate reactions at the water–rock interface
M.J. Borda, D.L. Sparks, M.A.A. Schoonen & D.R. Strongin

Galena dissolution in acidic pH at 25°C
J. Cama, P. Acero & C. Ayora

Influence of nanoscale porosity on fluid behavior

Coupled dissolution/precipitation rates in the system CaCO3-CdCO3
P. Cubillas, M. Prieto, S. Köhler & E.H. Oelkers

Interaction between galena surface and dissolved organic ligands: a chemical kinetic study
G. De Giudici, L. Fanfani & P. Lattanzi

New insights into the orthoclase dissolution mechanism with X-ray reflectivity
P. Fenter, C. Park, L. Cheng, Z. Zhang & N.C. Sturchio
Chemical alteration of feldspar: a comparative study using SIMS and HRTEM/EFTEM

Kinetics of elementary steps on cleaved dolomite surfaces in undersaturated alkaline aqueous solutions
S.R. Higgins, X. Hu & K.G. Knauss

Role of molecular oxygen in the dissolution of siderite and rhodochrosite
S.T. Martin & O.W. Duckworth

Cation sorption at the muscovite–water interface using X-ray reflectivity

Competitive arsenate and silicate sorption by thermal water scales
C.E. Tommaseo & M. Kersten

Temperature-effects and structure at the rutile-water interface

The surface chemistry of carbonates, a new approach
M. Wolthers, L. Charlet & P. Van Cappellen

Weathering studies at all space and time scales

Keynote address:
Cosmogenic nuclide methods for measuring long-term rates of physical erosion and chemical weathering
J.W. Kirchner, C.S. Riebe & R.C. Finkel

Laboratory study of chemical weathering of Middle Ordovician black shales
P.A. Abanda & R.E. Hannigan

Chemical weathering along a depositequence of glacial loess-derived soils in Alaska
S.P. Anderson, D.H. Mann & A.E. Blum

Geochemical and isotopic constraints on the sources of arsenic in groundwater from Coastal Maine, New England
R.A. Ayuso & N.K. Foley

Organic matter weathering and atmospheric oxygen: a field and modeling study of black shale oxidation
R.A. Berner, E.W. Bolton, R.A. Wildman & S.T. Petsch

Mineral weathering sources of calcium in northeastern USA forests
J.D. Blum, C.A. Nezat, R.D. Yanai, S.P. Hamburg & M.A. Arthur

Calcium stable isotope evidence for three soil calcium pools at a granitoid chronosequence
T.D. Bullen, J.A. Fitzpatrick, A.F. White, M.S. Schulz & D.V. Vivit

Mineral dissolution at the granite–waprolite interface
H.L. Buss, S.L. Branley, P.B. Sak & A.F. White

Chemical denudation in the western Indies: preliminary data indicate relatively low denudation rates
J. Gaillardet, S. Rad, P. Louvat & C. Allègre

Contributions of chemical weathering and physical erosion of soil to landscape lowering in a granitic terrain
E.G. Green, W.E. Dietrich, J.F. Banfield & S.A. Welch
Tracing silicate weathering and terrestrial silica cycling with Ge/Si ratios
A.C. Kurtz & L.A. Derry

Dissolution of Cr-containing muscovite under oxidizing and non-oxidizing conditions
G. Lee & J.G. Hering

Connecting the molecular- with the macro-scale: an integrated approach towards a quantitative understanding of crystal dissolution
A. Lüttge

Field vs. lab pH in remote wells, Konza Prairie LTER site, and implications for limestone weathering
G.L. Macpherson

Sphalerite weathering kinetics: effect of pH and particle size
M.E. Malmström & C. Collin

Processes controlling weathering rind advancement on Costa Rican basalt clasts
A.K. Navarre, S.L. Brantley & P.B. Sak

Origin and mixing of groundwaters from Lupin (Canada): Nd isotope evidence
P. Négrel, J. Casanova & R. Blomqvist

The significance of suspended material in the chemical transport in rivers of NE Iceland
E.H. Oelkers, S.R. Gislason, E.S. Eiriksdottir, S.O. Elefsen & J. Hardardottir

How potent is soil CO₂ as an acidification and weathering agent?
N.-H. Oh & D.D. Richter

Bound water as an accumulator of solar energy by weathering products
S.L. Shvartsev

Chemical weathering and CO₂ fluxes in the Canadian Cordillera
J.D. Spence & K.H. Telmer

Metal mobility, transport & fate during weathering of Devonian metalliferous black shale
M.L.W. Tuttle & G.N. Breit

Si cycling in a marine chronosequence demonstrated by pore-water Ge/Si ratios
D.V. Vivit, M.S. Schulz, A.F. White & S.P. Anderson

Hydrochemical evolution and contemporary weathering rates in a soil chronosequence, Merced, California, USA
A.F. White, M.S. Schulz, D. Vivit & A.E. Blum

Feldspar dissolution rates and clay precipitation in the Navajo aquifer at Black Mesa, Arizona, USA
C. Zhu, A. Blum & D. Veblen

Author index

Volume 2

Geochemical modeling from molecular to global scales

Keynote address:
Adsorption processes: at what spatial scale do we need to understand them?
L.J. Criscenti

Comparison of experimental and model data for the evaporation of a synthetic Topopah Spring Tuff pore water, Yucca Mountain, USA
M. Alai, M. Sutton & S.A. Carroll
