PROCEEDINGS OF THE SECOND INTERNATIONAL CONFERENCE ON FLUVIAL HYDRAULICS, 23-25 JUNE 2004, NAPOLI, ITALY

River Flow 2004

Edited by
Massimo Greco, Armando Carravetta & Renata Della Morte
Federico II University of Napoli, Italy

VOLUME 1
Table of Contents

**Preface**

**Organization**

**Volume 1**

**Keynote speeches**

- Recent advances in scour hydraulics
  W.H. Hager, G. Oliveto, S. Pagliara & J. Unger
  
- Mixing and dispersion in rivers
  G.H. Jirka
  
- Debris flows and their modeling
  T. Takahashi

**A. Fluvial processes**

**A.1. Morphology and morphodynamics**

- The morphology, 3D flow structure and sediment dynamics of a large river confluence: the Rio Paraná and Rio Paraguay, NE Argentina
  D.R. Parsons, J.L. Best, S.N. Lane, R.J. Hardy, O. Orfeo & R. Kostaschuk
  
- Flow structures in meander bends with recirculation zones: implications for bend movements
  D.R. Parsons, R.I. Ferguson, S.N. Lane & R.J. Hardy
  
- Influence of geometrical constraints on the evolution of meandering rivers
  P. Perona & C. Camporeale
  
- Behaviour of small perturbations in 1D mobile-bed models
  G. Rosatti, L. Fracarollo & A. Armanini
  
- A new method for the assessment of river network fractal dimensions: introduction, computation and comparison
  S.G. De Bartolo, R. Gaudio, L. Primavera, S. Gabriele & M. Veltri
  
- 2D sediment transport study on Elbe River – Czech Republic
  P. Jirinec & J. Spatka
  
- Simulation and prediction of river morphologic changes using RubarBE
  K. El Kadi Abderrezzak & A. Paquier
  
- Gravel river widening by bank erosion in a straight stretch of river – investigations on a numerical model
  M. Schmautz
  
- Flow in meandering bends
  D. Termini

</tbody>
</table>
Effect of bed-load concentration on friction factor in narrow channels
F. Calomino, R. Gaudio & A. Miglio

Influence of macro-roughness arrangement on flow resistance
F. Canovaro, E. Paris & L. Solari

The effect of bed roughness on velocity profile in open channels
A. Mahdavi & M.H. Omid

3D turbulent flow over irregular bed surfaces
W. Czernuszenko & A. Rylov

Negative eddy viscosity in river bends
R. Booij

Turbulent flow over mobile and molded bedforms: a comparative field study
A. Sukhodolov, J. Fedele & B.L. Rhoads

A.3. Over-bank flow and vegetation

Depth-averaged modelling of overbank flow in meandering channels
P. Rameshwaran & K. Shiono

Influence of a mobile bed on the boundary shear in a compound channel
S. Atabay, D.W Knight & G. Seckin

Interaction processes in a straight compound channel with rigid and flexible emergent floodplain vegetation
I. Schnauder

Numerical evaluation of secondary flow effects on lateral momentum transfer in overbank flows
A. Tominaga & D.W Knight

Effect of lateral variation of roughness on flow conveyance within a trapezoidal channel cross-section
H.I. Mohamed

Boundary conditions between panels in depth-averaged flow models revisited
D.W. Knight, M. Omran & J.B. Abril

Effect of vegetation on boundary layer with turbulent free stream
P. Gualtieri, G. Pulci Doria & L. Taglialatela

Response of velocity to a sudden change of bed roughness in sub critical open channel flow
A. Carravetta & R. Della Morte

Velocity distribution in a V-shaped channel
M. Mohammadi

River roughness – the integration of diverse knowledge
C. McGahey & P.G. Samuels

Improving 1-D modelling of open channel flow in compound channels
J.P. Martin-Vide, S. López-Querol & P.M. Moreta

Coherent flow structures in a converging compound channel
D. Bousmar, B. Denis & Y. Zech

Variations and correlation of roughness indices of non-vertical non-rigid fully submerged vegetation in open channels
A.M. Negm

Recirculating flow behind groynes for compound-channel geometries
N. Rivière, S. Proust & A. Paquier

VII
Local velocity at bridge abutments on plain rivers
B. Gjunsburgs & R. Neilands

Performance of lateral velocity distribution models for compound channel sections
J.F. Weber & A.N. Menéndez

The conveyance capacity of compound channels with large scale floodplain roughness
A.R. Heanen, W.R.C. Myers & J.F. Lyness

A study of turbulent flow structure in a partly vegetated river reach
T. Sukhodolova, A. Sukhodolov & C. Engelhardt

Open channel turbulent data modeling using fractal geometry
A.N. Ziaei, A.R. Keshavarzi & H. Emdad

Expeditive methodology for river water discharge evaluation
M. Greco & D. Mirauda

Integrated approaches for modeling sediment transport
J.-M. Hervouet & C. Villaret

A.4. Interaction with structures

Riprap failure of bridge piers
J. Unger & W.H. Hager

Scour prediction using the Movability Number criteria for incipient motion
N. Armitage & C. McGahey

Scouring and flow structure around an attracting groin
T. Ishigaki, T. Ueno, M.M. Rahman & A.T.M. Khaleduzzaman

2-D Numerical analysis for flow around an oblique weir in compound open channels
M. Iwai, Y. Shimizu & Y. Kawahara

Study of sediment motion in a local scour hole through an image processing technique
S. Malavasi, A. Radice & F. Ballio

Computations of 3D turbulent flow structures around submerged spur dikes under various hydraulic conditions
I. Kimura, T. Hosoda, S. Onda & A. Tominaga

Numerical simulation of flow instabilities in steep, stepped channels
G. Premstaller, P. Rutschmann & M. Oberhuber

Activation of scour around bridge abutment
D. Capuano, A. Carravetta & U.M. Golia

Seepage and exit gradient under impervious structures with two sheetpiles on layer of infinite depth
G. De Martino, M. Giugni & N. Fontana

The effect of migrating bedforms on local scour around bridge piers
M. Bolla Pittaluga, M. Maffei & G. Seminara

Experimental study of the scour hole downstream of bed sills
M. Ben Meftah & M. Mossa

Influence of laterally placed side weirs on bed-load transport in a prismatic channel
B. Rosier, J.L. Boillat & A. Schleiss

PIV investigation of flow around submerged river bridge deck
S. Malavasi, S. Franzetti & G. Blois

Reduction of local scour around bridge abutments with collars
Ş.Y. Kayatürk, M.A. Kökpınar & M. Göğüş
Numerical and experimental investigation of local scour downstream of a sill
C. Adduce, G. Sciortino & M. Morganti

Flow patterns in local scour holes downstream of a sill caused by turbulent water jets
C. Adduce, M. La Rocca & P. Mele

Flow separation at 45 to 90 degree water intakes
A. Keshavarzi, L. Habibi & M.J.K. Parsi

Study on structure-induced flow and turbulence considering bed morphology
S. Giri, Y. Shimizu & B. Surajate

Observations concerning erosion in model of a mobile river bed
L. Ciaravino

A.5. Sediment supply, entrainment and transport

Interaction between particles and water in near-wall region of particle-laden open-channel flows
I. Nezu & R. Azuma

Development of a new Marker-in-Cell hydraulic and sediment transport model for braided river flow
R.E. Thomas, S.N. Lane & J.L. Best

A finite volume model of flow and sediment transport in the lagoon of Grado-Marano
S. Bosa & M. Petti

Field investigation on macro-roughness characterization in mountain rivers
F. Canovaro & M. Catella

Pressure fluctuations within subsurface gravel bed caused by turbulent open-channel flow

Simultaneous 3-D PTV and micro-pressure sensor equipment for flow analysis in a subsurface gravel layer

Bed load transport on arbitrarily sloping bed at low Shields stress: preliminary experimental observations
S. Francalanci, E. Paris & L. Solari

Particle-fluid interactions in a free surface turbulent flow
M. Righetti, G.P. Romano & A. Cenedese

Studies of sedimentation in a large-scale reservoir for power generation
T. Shinjo & Y. Fujita

Experimental study of sediment laden flow in a hydraulic jump
M.H. Omid & H. Nozari

Can an internal hydraulic jump be inferred from the depositional record of a turbidity current?
S. Kostic & G. Parker

Grain size analysis for coarse river beds using digital imagery processing
R. Weichert, M. Wickenhäuser, G.R. Bezzola & H.-E. Minor

Development of discrete subaqueous bed forms
H. Friedrich, S.E. Coleman, B.W. Melville & T.M. Clunie

Transport dynamics and morphology of a high mountain stream during the peak flow season: the Ürümqi River (Chinese Tian Shan)
F. Métivier, P. Meunier, M. Moreira, A. Crave, C. Chaduteau, B. Ye & G. Liu

Study of navigation problems in Nile River reach at Elbogdady
A.M. Negm, M.M. Elfiky, M.I. Attia & M.H. Nassar
A computational distributed gravel budget for the lower Fraser River, British Columbia  
S. Li & R.G. Millar

The influence of drainage network formation and characteristics on a catchment’s sediment yield  
E. Lykoudi & D. Zarris

Flow structure and bedload distribution at alluvial diversions  
A. de Heer & E. Mosselman

Three dimensional modeling of sediment transport in a channel bend  
N. Ruether & N.R.B. Olsen

Study on the channel development in a wide reservoir  
C.J. Sloff, H.R.A. Jagers & Y. Kitamura

Measuring the flow structures that initiate stone movement  
B. Hofland & R. Booij

Author Index

Volume 2

B. River hazards

B.1. Dam break and fast transients

Two dimensional modeling of rapidly varying flows by finite volume schemes  
F. Aureli, A. Maranzoni & P. Mignosa

Experimental modeling of rapidly varying flows on wet bed and in presence of submersible obstacles  
F. Aureli, A. Maranzoni & P. Mignosa

Velocity measurements in dam-break flow using imaging system  
A.H.N. Chegini, G. Pender, A. Slaouti & S.J. Tait

1D model of surface waves generated by a reservoir’s bank landslide: a case study  
P. Garcia-Navarro, G. Pérez, P. Brufau & M.E. Vázquez-Cendón

Numerical simulation for destruction process of rubble stones dam  
E. Harada, T. Hosoda & H. Gotoh

Effects of gradient pressure on resistance law in roll waves and effects of tension surface  
S. Longo

Mathematical simulation of the effects of bridges and structures on flood waves propagation  
L. Natale, G. Petaccia & F. Savi

Soil/water interaction during the breaching process of overtopped embankments  
G. Pickert, G.H. Jirka, A. Bieberstein & J. Brauns

Experiments of dam-break flow in the presence of obstacles  
S. Soares Frazão, B. Noël & Y. Zech

Sph simulation of dam-break flow in shallow water approximation  
M. Gallati & D. Sturla

Simulation of flooding caused by an embankment breaking by means of a 2D finite volume numerical model  
F. Aureli, A. Maranzoni & P. Mignosa

Dike-break induced flow: validation of numerical simulations and case study  
M. Harms, S. Briechle, J. Königter & D. Schwanenberg
