A Collection of Technical Papers

23rd AIAA APPLIED AERODYNAMICS CONFERENCE

VOLUME 2

Toronto, Ontario, Canada
6–9 June 2005
AIAA-2005-4853  PIV and CFD Analyses of Vortical Flow over a Yawed LEX-Delta Wing Configuration
M. Sohn and H. Chung ................................................................. 652

AIAA-2005-4854  Vortex Filament Simulation of Trailing Vortex Merger
G. Anand and W. Graham ............................................................. 660

S. Woodson and T. Ghee ............................................................. 669

AIAA-2005-4960  Computational Investigation of the Effects of Gurney Flap on the Aerodynamic Performance of VR-12 Airfoil
G. Guzel, L. Sankar, and M. Rhee ............................................... 685

AIAA-2005-4961  Improved Characteristic-Velocity-Scale Algorithm for Preconditioned Upwind Schemes on Hybrid Grids
Z. Liu and S. Ramakrishnan ....................................................... 707

AIAA-2005-4962  Treatment of Forced Flap Motions for Aeroelastic Simulations of an Arrow Wing
A. Rampurawala and K. Badcock ................................................ 719

A. Jirasek .................................................................................. 735

AIAA-2005-4964  RANS Simulations of the Flow Past a Launcher Configuration in Motor-On Conditions
P. Catalano, M. Marini, A. Nicoli, and A. Pizzicaroli ...................... 750

W. Sang and F. Li ....................................................................... 763

AIAA-2005-4966  Optimized Guidance of a Supersonic Projectile Using Pin Based Actuators
K. Massey, K. Guthrie, and S. Silton ........................................... 778

P. Theerthamalai, S. Manisekaran, and M. Nagarathinam .............. 791

N. Hamel, D. Corriveau, F. Wong, and P. Rainville ....................... 799

AIAA-2005-4969  A Parameter Study and Comparison of Projectiles with Fins and Flares at Hypervelocities
S. Silton .................................................................................... 809

</table>
AIAA-2005-5080  High-Fidelity Multidisciplinary Design Optimization of Aerostructural Wing Shape for Regional Jet
K. Chiba, S. Obayashi, K. Nakahashi, and H. Morino ................................1012

AIAA-2005-5081  Reacting Navier-Stokes Nozzle Contour Design Optimization
F. Shope and K. Tatum .................................................................1036

AIAA-2005-5082  Robust Drag Minimization of Aerodynamic Shapes in Engineering Environment
B. Epstein and S. Peigin ..............................................................1047

P. Rostand ...........................................................................1069

AIAA-2005-5084  Unstructured Navier-Stokes High-Lift Computations on a Trapezoidal Wing
M. Chaffin and S. Pirzadeh .........................................................1078

AIAA-2005-5085  Dual Location Separation Control on a Semi-Span Wing
D. Greenblatt.................................................................1097

E. Abney and M. McDaniel.............................................1111

AIAA-2005-5087  Numerical Investigation of Leading Edge Flap on Cranked Arrow Wing
Z. Lei and D. Kwak ...............................................................1130

AIAA-2005-5088  Numerical Analysis of Control of Leading-Edge Vortex on Delta Wing with Blowing
S. Muramatsu, S. Okada, and K. Hiraoka ..................................1142

K. Abdol-Hamid and A. Elmiligui ........................................1150

R. Biedron, V. Vatsa, and H. Atkins .....................................1167

AIAA-2005-5094  Aerodynamics of Oscillating Wings and Performance as Wind Turbines
T. Kinsey and G. Dumas .....................................................1184

AIAA-2005-5095  Computational Aerodynamic Analyses of Different Configurations of a Very Large Optical Telescope
A. Tahi, A. Benmeddour, M. Mamou, M. Khalid, K. Cooper,
J. Fitzsimmons, D. Freed, and R. Sengupta ..........................1199
AIAA-2005-5096 Experimental and Numerical Study of Stall Flutter
D. Delamore-Sutcliffe, R. Whiting, and D. Greenwell..............1215

AIAA-2005-5097 Experimental and Numerical Study of Gust Loads on Stall
Flutter Initiation
R. Whiting, D. Delamore-Sutcliffe, and D. Greenwell..................1225

AIAA-2005-5098 An Investigation on Viscous Effects in Downwash Weighting
Methods for Transonic Aeroelastic Stability Analysis
R. Silva, O. Mello, and J. Azevedo........................................1233

AIAA-2005-5099 A New Reduced-Order Modeling Approach Based on Fluid
Eigenmodes and Boundary Element Method
M. Behbahani-Nejad, A. Nobari, H. Shahverdi, and H. Haddadpour1245

AIAA-2005-5216 A Conceptual Design Methodology for Predicting the
Aerodynamics of Upper Surface Blowing on Airfoils and Wings
E. Keen and W. Mason..........................................................1253

AIAA-2005-5217 Unstructured, Multiplex Rotor Source Model with Thrust and
Moment Trimming - Fluent's VBM Model
M. Ruith..........................................................1268

AIAA-2005-5218 Quad Tilt Rotor Aerodynamics in Ground Effect
A. Radhakrishnan and F. Schmitz..............................................1290

AIAA-2005-5221 Aerodynamic Effects of a Helicopter Fuselage on a Jettisoned
Missile with Forward Strakes
M. Vaughn, M. Thomas, and C. Roberts...............................1301

AIAA-2005-5222 JDAM-Store Separation from an F/A-18C - An Application of the
Multidisciplinary SimServer-System
U. Tremel, S. Hitzel, K. Sorensen, and N. Weatherill................1310

a CF-18 Wing Using Combined PSP and Schlieren Techniques
Y. Mebarki, M. Grenier, F. Ellis, J. Bureau, D. Orchard, and F. Tang1319

AIAA-2005-5224 Passive Control for Overexpanded Supersonic Jets
S. Clement and E. Rathakrishnan...........................................1333

AIAA-2005-5225 A Study of Spatial Discretization Schemes Applied to Cold Gas
Hypersonic Flow Simulations
F. Moreira and J. Azevedo..................................................1346

AIAA-2005-5226 LES of Impinging Jet Flows Relevant to Vertical Landing
Aircraft
G. Page, Q. Li, and J. McGuirk...........................................1365
