A Publication of EUROISIS

Printed in Ghent, Belgium
CONTENTS

Preface ................................................................. IX
Scientific Programme .............................................. 1
Author Listing ....................................................... 187

ORGANIZATION AND MANAGEMENT

Using Modified Concept Lattices for Organizational Structure Modeling and Analysis
Ivo Vondrak and Jan Kozusznik ........................................ 5

Formal Model of the Normatively Regulated Organizational Activities
Dzenana Donko ................................................................ 10

Development of an integrated Cost Model for Nuclear Plant Decommissioning
Rajkumar Roy and George Amos ........................................ 13

New Product Development in a Virtual Enterprise
Tero Haahtela, Jouko Karjalainen and Pekka Malinen .................. 21

WEBSCAN, an Internet Engine for Benchmarking
Hendrik Van Landeghem and Danielle De Vos ......................... 26

Lifecycle Oriented Design Model
Flavio Gesca Verissimo de Paula and Luis Gonzaga Trabasso ........ 31

Embedded Systems Design - from Mechatronics to Concurrent Engineering
Michael G. Salloker and Wolfgang Stocksreiter ......................... 37

Continuous Improvement in IT Project Management
Paul Stratil, Bettina Schwarzer and Peter Müller-Brühl ............... 40

SUPPORTING TECHNOLOGIES

System Dynamics Simulation Modelling of the Port Manager Planner
Ante Munitic, Luko Milic, Josko Dvornik ................................ 51

Integration of Virtual Reality and CAD Based on OMG'S CAD Services Interface
Matthias Vahl and Uwe von Lukas ........................................ 54

COLLABORATIVE CE-ENVIRONMENTS FOR VIRTUAL TEAMS

Modular Requirement Management in Product Development
G. Schuh, D. Assmus, L. Paulukuhn and P. Weber ................................................................. 135

PRACTICAL APPLICATIONS AND EXPERIENCES

Integration of Fault Tolerance and Energy Flow Treatment into the Simulation-based Development Process
Bernd Heintel and Jens Ruh ........................................................................................................... 141

Concurrent Engineering to enhance Communication and Collaboration in Design and Production
Teruaki Ito .................................................................................................................................... 149

Configuration Management in Concurrent Software Engineering – a Case Study
Roland Haas and Bharath Chandrasekaran .................................................................................. 153

Collaborative Working within the Aeronautical Supply Chain: the CASH Model
Jean-Claude Hochon ..................................................................................................................... 157

LATE PAPERS

Distributed Concurrent Engineering Modeling Framework
Aurelian Mihai Stanescu, Ioan Dumitrache, Simona Iuliana Caramihai and Dan Nițescu ................................................................. 165

Digital Process Planning applied to Product Engineering Integration
Marcilio Cenisio, Uwe Fritz Baake and Carlos de Sousa Belatto .................................................. 168

E-Business and E-Commerce Emerging Strategies
Mohammad Al Nsour .................................................................................................................... 171

International Cross Brand Collaboration in the Automotive Industry
Paul Stratil, Mike Chapman, and Adrian O. Mielke ................................................................. 177
