Need for Accelerated Underground Construction-Issues and Challenges

14-17, December, 2004
New Delhi, India

"Why Go Underground in Urban Areas"
Keynote Address
by
Claude Berenguier
Secretary General
International Tunnelling Association
France

Patronage

International Tunnelling Association

Organiser by

Central Boards of Irrigation & Power
Adhering Committee of
International Tunnelling Association (India)
Contents

Foreword v

KEYNOTE ADDRESSES

1. The tunnels and the environment 1
   Harvey W. Parker
2. An engineering classification for rocks and rock masses 14
   T. Ramanurthy
3. Some aspects connected with fast-track construction of tunnels 26
   N. Raghavan
4. Ventilation of underground structures 41
   D.G. Diwale and Vinod Kumar
5. Dress methodology for tackling adverse geological conditions in head race tunnel of Tala Hydroelectric Project in Bhutan Himalayas 47
   D.P. Goyal and R.N. Khazanchi
6. Project and equipment financing in BOT projects 61
   D.G. Kadkade
7. Contract management - Constraints affecting the acceleration of hydroelectric project works 76
   S.K. Desai
8. Observational approach in NATM applications, geotechnical risk management 81
   Johann Golser
9. Numerical modeling and application in underground works 91
   K.G. Sharma
10. Design of tunnels and underground caverns 106
    R. Jeyaseelan
11. Tunnelling in complex geological settings 120
    K.N. Mathur and P.C. Nawani

PLANNING, INVESTIGATION AND DESIGN

12. State of stress in the Himalayas and its impact on the design of hydroelectric projects 1
13. Application of seismic tomography in the investigation of hydroelectric projects 11
    S. L. Kapil, S. Bhatnagar and Vipul Nagar
14. Study of in situ stresses in the rock mass at surge shaft of koyna H. E. project, stage -IV, Maharashtra 24
    K. R. Dhawan and S. Govindan
15. Assessment of large dia hydraulic tunnels – Baglihar hydroelectric project (450 MW), J&K
Mohd. J. Ahmed, U. S. Rajvanshi and V. Shrivastava

16. In-situ stress measurement techniques and its application in the hydroelectric projects
Nripendra Kumar, R.B. Shivali, K.C. Das and A.K. Dhawan

17. Decision making aspects of design methodology in tunnelling for Neelum Jhelum hydroelectric project
Zahid Majeed and Zaheer Hussain Butt

18. Planning design and construction of inclined cable shaft for an underground hydroelectric project
C. Purushothaman

ROCK MASS ANALYSIS
19. Characterisation of rock mass
T. Ramamurthy

20. Design of the technological procedure of building the driven tunnel by means of physical modelling
Weiglová Kamila and Procházka Petr

21. Three dimensional deformation monitoring of desilting chambers at Nathpa Jhakri Hydroelectric Project (NJHEP) using total station
R. Venugopala Rao, J. Sudhakar, G. D. Raju, and R N Gupta

22. Analysis of the results of the rock mass stressed-deformed state monitoring during underground excavation of the power house chamber at Deriner HEPP project, Turkey
V. Zhukov

HIGHWAYS TUNNELS AND UNDERGROUND STORAGE
23. The new unterinntal route connecting northern and southern Europe, Tunnel Stans-Terfens - NATM tunnelling in soft rock with very low overburden
Robert Galler

24. Twin-tube, single-track high-speed rail tunnels and consequences for aerodynamics, climate, equipment and ventilation
Peter Reinke and Stig Ravn

25. Analysis of underground cavern for LPG storage
Manish Gupta, R. Chitra and A.K. Dhawan

26. Guide for the lighting of road tunnels
Aditi Malik

METRO TUNNELLING
27. Construction of Chawri Bazaar station by NATM
Mangu Singh, Kamal Nayan and H. K. Sharma

28. Metro Delhi – Chawri bazar station – successful application of the new Austrian tunnelling method under difficult conditions
Johann Golser and Johann Brandl

**TUNNELLING IN COMPLEX GEOLOGICAL SETTINGS**

**SHOTCRETING AND MICRO TUNNELLING**

**SPECIAL TUNNELLING TECHNIQUES**

**Case history of a railway tunnel**

R. K. Goel, Anil Swarup, R. D. Dwivedi and Sanjay Mishra

‘NATM’ works for Chawri Bazar metro station

M. I. Singh Saini and Klaus Muenz

Tunnelling in weak rockmass conditions at Tala hydroelectric project in Bhutan Himalayas

Rajbal Singh, K. K. Bhandari, D. P. Goyal and R. N. Khazanchi

A case study of successful implementation of dress technique in tackling adverse geological occurrence in headrace tunnel of Tala hydroelectric project, Bhutan

S. D. Jeur and Sanjay Kumar

Execution of the tunnel in worst adverse geological strata including squeezing zones

S. K. Desai

Special tunnel blasting techniques – Few case studies

Tunnelling through firm rocks in Jammu area: A geotechnical evaluation

B. D. Mal Barna

Hurdles and achievements - Excavation of shafts at Dhauliganga hydroelectric project

B. M. Gupta, Rakesh Kumar, D. S. Bist and Anoop Balan

Stability of surrounding soil by using pipe jacking in using pipe roof method

Hideki Shimada, Saeid Khazaei, Gottfried Jan, Kikuo Matsui and Eiji Sakai

Microsilica for cost effective shotcrete

P. Kshemendra Nath and M. Dhyanendra Tripathi

Holistic approach to sprayed concrete

Ian Northcroft Degussa and Shailesh Kumar

Concrete lining of square junction crossing of tail race tunnel with surge gallery/access to bottom of pressure shafts in Nathpa Jhakri hydroelectric project \((6 \times 250 =1500 \text{ MW})\)

Kranti Kumar Gupta

The innovative use of construction chemicals in underground construction

Alan Pengelly

Steel forms for Purulia project

Eugenio Bertino

Dry shotcreting application techniques-guidelines

J.K. Sharma and Kranti Kumar Gupta

Construction problems encountered in the desanding chambers of Larji hydroelectric project in Himachal Pradesh

S. K. Mohanty and K. C. Mahalik
45. Tunnel boring by TBM: A case study
   A. K. Mondal

46. Power house excavation with glory hole method at Purulia pumped storage project
   S.R. Dutta, A.I. Benny and Nikhil Kumar

47. Water spout handling method in tunnel of Semnan water supply project
   Majid Toliat and Afshin Etemadi

48. Tunnel boring machine (TBM) for construction of Parbati Project Tunnel-
   Problems faced during commissioning and suggestions for future projects
   M. M. Madaan and Amresh Kumar

49. Boring by TBM of inclined pressureshaft planning and infrastructure
   R.D. Varangaonkar

50. Constructing tunnels in walled city, Delhi by TBM
   M. Singh, Kamal Nayan and V. K. Singh

51. Excavation of Ostour project diversion tunnel
   S. A. Sharif Vaghei and M. Akhavan Bulourchian

52. Development and trends of TBM operation in Switzerland
   James D. Broomfield

53. Application of single gripper TBMs in hard rock project descriptions and TBM
   developments
   Frederic Kuhorn and Nicolas Zuber

54. State of the art and latest development in mechanized hard rock tunnelling
   Manfred Voerckel

INNOVATIVE CONSTRUCTION METHODOLOGIES

55. Innovations in low cover pressure tunnel design - Maneri Bhali hydroelectric project
   stage II
   David B Powell, N. Visvanathan and Trevor R Silverton

56. New technologies extend the range of applications of roadheaders
   Josef Pichler and Uwe Restner

57. Construction of shafts in hydroelectric project
   H.K. Sharma and K.K. Gupta

58. Effective underground blasting- The underground bulk way
   Abhisek Roy and Vishwa Bhushan

CONTRACT MANAGEMENT AND FINANCING OF UNDERGROUND
CONSTRUCTION WORKS

59. Contract matters related to underground construction works : Case studies from
   tunnel works contracts on Jammu-Udhampur-Katra rail link projects in J&K state
   S. K. Sapra, Sudhir Singh and Rohit Sharma
