Joint proceedings of the Workshops on
**Multiparadigm Programming with Object-Oriented Languages (MPOOL'03)**

**Declarative Programming in the Context of Object-Oriented Languages (DP-COOL'03)**

organized by

John von Neumann Institute for Computing

in cooperation with the

Los Alamos National Laboratory, New Mexico, USA
# Table of Contents

A Static C++ Object-Oriented Programming (SCOOP) Paradigm Mixing
Benefits of Traditional OOP and Generic Programming .................. 1
Nicolas Burrus, Alexandre Duret-Lutz, Thierry Géraud, David Lesage,
Raphaël Pass

Object-Model Independence via Code Implants .......................... 35
Michał Cierniak, Neal Glew, Spyridon Triantafyllis, Marsha Eng, Brian
Lewis, James Stichnoth

The ConS/* Programming Languages ........................................ 49
Matthias M. Hölzl

Functional versusOO Programming: Conflict Without a Cause .......... 63
DeLesley Hutchins

An Analysis of Constrained Polymorphism for Generic Programming .... 87
Jaakko Järvi, Andrew Lumsdaine, Jeremy Siek, Jeremiah Willcock

Top-Down Decomposition in C++ ............................................. 109
Asher Sterkin, Avraham Poupko

SOUL and Smalltalk - Just Married ....................................... 125
Kris Gybels

Unifying Tables, Objects and Documents .................................. 139
Erik Meijer, Wolfram Schulte, Gavin Bierman

Syntax sugar for FC++: lambda, infix, monads, and more .............. 157
Brian McNamara and Yannis Smaragdakis

Importing alternative paradigms into modern object-oriented languages. 185
Andrey V. Stolyarov

Program Templates: ......................................................... 209
Francis Maes

JSetL: Declarative Programming in Java with Sets ....................... 229
Elisabetta Poleo and Gianfranco Rossi

SML2Java: A Source to Source Translator ................................ 251
Justin Koser, Haakon Larsen, Jeffrey A. Vaughan

Constraint Imperative Programming with C++ ............................. 263
Olaf Krzikalla
