Penetration Testing

Edited by
A. VERRUIJT
Delft University of Technology

F. L. BERINGEN
Fugro B.V., Leidschendam

E. H. DE LEEUW
Delft Soil Mechanics Laboratory

VOLUME ONE:
Standard penetration test
Dynamic probing / Swedish weight sounding
Table of contents

Introduction XI

Standard penetration test

Standard penetration test – State-of-the-art report 3
Ivan K. Nixon

SPT and the compressibility of cohesionless soils 25
A.G. Anagnostopoulos & B.P. Papadopoulos

Prediction of the bearing capacity of piles based exclusively on N values of the SPT 29
Luciano Decourt

Modulus of elasticity for sand determined by SPT and CPT 35
H. Denver

SPT blowcount variability correlated to the CPT 41
B.J. Douglas

New analytical correlations between SPT, overburden pressure and relative density 47
F. Giuliani & F.L. Giuliani Nicoll

The use and interpretation of SPT results for the determination of axial bearing capacities of piles driven into carbonate soils and coral 51
J. Hageman

Drill rod energy as a basis for correlation of SPT data 57
J.R. Hall

Experience on a standard penetration test 61
Huang Shi-ming

Correlation of N value with S-wave velocity and shear modulus 67
Tsuneo Imai & Keiji Tonouchi

Relationships between N value and dynamic soil properties 73
Tsuneo Imai & Koichiro Yokota

Prediction of liquefaction potential in Japan using N-values of SPT 79
Toshio Iwasaki, Susumu Yasuda, Fumio Tatsuoka & Ken-ichi Tokida

Correlation between SPT values and electrical resistivities of subsurface strata 85
J.M. Kate

SPT – CPT correlations 91
J. Kruijninga

Direct and indirect determination of alluvial sand deformability 95
E. Maranha das Neves

Comparison of the results from static and dynamic penetration tests, in situ plate tests and laboratory compressibility tests 101
A. Marcu, M. Popescu, T. Abramescu & C. Balacciu
Effects of rod diameter in the standard penetration test
Kazuaki Matsumoto & Mikio Matsubara
Validity of existing procedures for the interpretation of SPT and CPT results
T.K. Natarajan & D.S. Tolia
Mechanics base of standard penetration test values and its application to bearing capacity prediction
Y. Nishida, K. Yokoyama, H. Sekiguchi & T. Matsumoto
Relationships between N-value by SPT and LLT measurement results
Satoru Ohya, Tsuneo Imai & Mikio Matsubara
Assessment of indepth densification of sandfill due to compaction in a reclamation area by cone penetration resistance
S.D. Ramaswamy & K.Y. Yong
Pressuremeter correlations with standard penetration and cone penetration tests
S.D. Ramaswamy, I.U. Daulah & Z. Hasan
Pitfalls of the SPT
Guy Sanglerat & Thierry-Robert A. Sanglerat
Penetration tests for determination of characteristics of flood dike materials
Dz. Sarac & M. Popovic
Prediction of engineering behaviour of sands from standard penetration tests
K.R. Saxena & G.T. Srinivasulu
Application of N-value to design of foundations in Japan
Yukitake Shioi & Jiro Fukui
Wave propagation effects induced by standard penetration tests
J.H. Troncoso
Comparison between N-value and pressuremeter parameters
H. Tsuchiya & Y. Toyooka
On the standardization of the SPT and cone penetration test
Z.Q. Wang & W.X. Lu
Correlations of penetration test results with in-situ and laboratory test data
J.L. Withiam, T.J. Siller, R.M. Bort, A.J. Eggenberger, P.P. Christiano & U. Dayal

Dynamic probing / Swedish weight sounding

Dynamic penetration testing – State-of-the-art report
K.-J. Melzer & U. Smoltecyk
The weight sounding test (WST) – State-of-the-art report
B.B. Broms & U. Bergdahl
Two decades of dynamic cone penetration testing in India
V.S. Aggarwal
Pile driving, a dynamic penetration test?
F.B.J. Barends & H.L. Koning
Calculation of settlements on sands from field test results
U. Bergdahl & E. Ottosson
Statistical comparison between the results of dynamic and static penetrometers for Rhineland silt
B. Biedermann
Correlations between the results of sounding and laboratory tests for Rhineland silt and their use for calculations for foundation design
B. Biedermann
Pore water pressures generated during dynamic penetration testing
C.R.I. Clayton & S.S. Dikran
Comparative study of DPB and IS dynamic sounding test for Tapi alluvium
M.D. Desai & B.J. Mehta
A site investigation through penetration tests
M.U. Ergun
Various types of penetrometers, their correlations and field applicability
M.C. Goel
The use of a light percussion sounding apparatus in road engineering
A.de Henau

271

The application of a portable pavement dynamic cone penetrometer to determine in situ bearing properties of road pavement layers and subgrades in South Africa
E.G.Kley, J.H.Maree & P.F.Savage

277

Investigation of possibilities of sounding technique for division of soil massive layers
B.I.Kulachkin, V.P.Otrepiev, M.I.Smorodinov & A.Z.Ghister

283

Dynamic probing research for pile driving predictions in the Netherlands
W.van Leijden, H.M.A.Pachen & J.V.van den Berg

285

Estimation of the sensitivity of soft clays from static and weight sounding tests
B.Möller & U.Bergdahl

291

Comparative study of static and dynamic penetration tests currently in use in Japan
T.Murumachi & S.Kobayashi

297

Theory and practice of a soil hardness tester YH-62
Yasushi Nakayama

303

Classification of submerged sediments by dynamic penetrometers
Behnam Nikakhtar, Joseph N.Suhayda & Mehmet T.Tumay

309

Some aspects concerning the study of foundation soils, using cone penetration tests
M.Păunescu & Agneta Gruiu

317

Comparison of some dynamic, nondestructive test results for different geological conditions
Joanna Pinińska

323

Effect of velocity on penetrometer resistance
T.J.Poskitt & C.Leonard

331

Dynamic cone probing tests in gravelly soils
B.Govind Rao, D.R.Narahari & G.R.Balodhi

337

The use of dynamic soundings in evaluating settlements
L.H.Swann

345

Cone penetration tests (CPT) on clay and silt
M.Tammirinne & V.Leinonen

351

Dynamic probing and practice
E.Waschkowski

357

Dynamic probing and site investigation
E.Waschkowski

363

Correlation between cone penetration resistance, static and dynamic pipe pile response in clays
N.D.Wright, W.R.van Hooydonk & D.J.M.H.Pluijmgraaff

369

Influence of pore water pressure on dynamic and static penetration testings
N.Yagi, M.Enoki & R.Yatabe

375

Scale modelling of static and dynamic pile penetration
Amos Zelikson

381

Cone penetration test

The static cone penetration test - State-of-the-art report
J.de Ruiter

389

Investigation of strength and rheologic properties of weak water-saturated clayey soils by sounding
M.Y.Abelev

407

Photoelastic investigation of the stress distribution during penetration
H.G.B.Alersma

411

Pressio-penetrometer for geotechnical surveys on land and offshore
S.Amar, F.Baguelin & J.F.Jézéquel

419

Design parameters for sands from CPT
G.Baldi, R.Bellotti, V.Ghionna, M.Jamiolkowski & E.Pasqualini

425

Cone penetration tests, pile bearing capacity and the thesis of Rollberg
H.K.S.Ph.Begemann

433
