</table>
The Effects of Speech Production and Speech Comprehension on Simulated Driving Performance
Tate T. Kubose, Kathryn Bock, Gary S. Dell, Susan M. Garnsey, Arthur F. Kramer, Jeffrey Mayhugh (University of Illinois, Urbana-Champaign) .......................................................... 74

The Effects of PC-Based Training on Novice Drivers' Risk Awareness in a Driving Simulator
Anuj K. Pradhan, Donald L. Fisher, Alexander Pollatsek (University of Massachusetts, Amherst) .................................................................................................................. 81

Effects of Lane Departure Warning on Drowsy Drivers' Performance and State in a Simulator
Maria Rimini-Doering, Tobias Altmueller, Ulrich Ladstaetter, Markus Rossmeier (Robert Bosch GmbH — Germany) ........................................................................................................ 88

Cognitive and Psychomotor Correlates of Self-Reported Driving Skills and Behavior
Nebi Sümer, H. Belgin Ayvasik (Middle East Technical University — Turkey), Nurhan Er (Ankara University — Turkey) .................................................................................................. 96

An Evaluation of Driving Ability in a Simulator: A Good Predictor of Driving Ability After Stroke?
Ann-Helen Patomella, Anders Kottorp (Karolinska Institutet — Sweden) .......... 104

Enhancing the Messages Displayed on Dynamic Message Signs
Chun-Ming Yang, Dusty Waters, Carmeris C. Cabrera, Jyh-Hone Wang, Charles E. Collyer (University of Rhode Island) ........ 111

Visual Field Defects and the Risk of Motor Vehicle Collisions Among Patients with Glaucoma
Gerald McGwin, Jr., Aiyuan Xie, Andrew Mays, Wade Joiner (University of Alabama at Birmingham), Dawn K. DeCarlo (Nova Southeastern University), Tyler Andrew Hall, Cynthia Owsley (University of Alabama at Birmingham) ............ 119

Verbal Collision Avoidance Messages of Varying Perceived Urgency Reduce Crashes in High Risk Scenarios
Carryl L. Baldwin, Jennifer F. May (Old Dominion University) .................................................. 128

Tracking Driver Eye Movements at Permissive Left-Turns
Michael A. Knodler, Jr. (University of Massachusetts, Amherst), David A. Noyce (University of Wisconsin, Madison) .......... 134

Age Related Decrements in Steering Control: The Effects of Landmark and Optical Flow Information
Rui Ni, George J. Andersen (University of California, Riverside), Sean McEvoy, Matthew Rizzo (University of Iowa) ........................................................................................................ 143

Psychophysiological Measures of Driver Distraction and Workload While Intoxicated
Michael E. Rakauskas, Nicholas J. Ward, Edward Bernat, Meredith Cadwallader, Christopher Patrick (University of Minnesota), Dick de Waard (University of Groningen — The Netherlands) .......... 150

Workload Changes in Teenaged Drivers Driving with Distractions
Renee F. Slick, Elizabeth T. Cady, Tuan Q. Tran (Kansas State University) ........................................ 158

Driver Assessment with Measures of Continuous Control Behavior
R. Wade Allen (Systems Technology, Inc.), Thomas D. Marcotte (University of California at San Diego), Theodore J. Rosenthal, Bimal L. Aponso (Systems Technology, Inc.) .......................................................... 165
Matching In-Car Voice with Driver State: Impact on Attitude and Driving Performance
Ing-Marie Jonsson (Toyota Information Technology Center), Clifford Nass (Stanford University), Helen Harris (Toyota Information Technology Center), Leila Takayama (Stanford University) ................................................................. 173

Assessing Driver Fitness to Participate in FHWA Field Experimentation at Night
John A. Molino (Science Applications International Corporation), Kenneth S. Opiela (Federal Highway Administration), Bryan J. Katz (Science Applications International Corporation), M. Joseph Moyer (Federal Highway Administration) ........................................................................ 181

The Impact of Cognitive Deficits and Spasticity on Driving Simulator Performance in Multiple Sclerosis
Thomas D. Marcotte (University of California, San Diego), Theodore J. Rosenthal (Systems Technology, Inc.), Jody Corey-Bloom, Erica Roberts, Sara Lampinen (University of California, San Diego), R. Wade Allen (Systems Technology, Inc.) .................................................................................. 188

Change Detection Performance Under Divided Attention with Dynamic Driving Scenarios
Yi-Ching Lee, John D. Lee, Linda Ng Boyle (University of Iowa) ........................................ 195

Driver Workload Management During Cell Phone Conversations
Chip Wood, Joshua Hurwitz (Motorola Labs) ........................................................................... 202

Simulator Performance vs. Neurophysiologic Monitoring: Which is More Relevant to Assess Driving Impairment?
Henry J. Moller, Leonid Kayumov, Eric L. Bulmash, Colin M. Shapiro, Sidney H. Kennedy (Toronto Western Hospital, University of Toronto — Canada) ............................................................................ 210

Assessment of a Driver Interface for Lateral Drift and Curve Speed Warning Systems: Mixed Results for Auditory and Haptic Warnings
Tina Brunetti Sayer (Visteon Corporation), James R. Sayer, Joel M.H. Devonshire (The University of Michigan Transportation Research Institute) ....................................................................................... 218

Useful Field of View Impairment in Partial Epilepsy
Erik K. St. Louis, Sean McEvoy, Qian Chi Shi, Matthew Rizzo (University of Iowa) .................................................. 225

Comparison Between Visual and Tactile Signal Detection Tasks Applied to the Safety Assessment of In-Vehicle Information Systems
Johan Engström, Nina Åberg, Emma Johansson (Volvo Technology Corporation — Sweden), Jakob Hammarbäck (Uppsala — Sweden) ........ 232

Road-to-Lab: Validation of the Static Load Test for Predicting On-Road Driving Performance While Using Advanced In-Vehicle Information and Communication Devices
Richard Young, Bijaya Aryal, Marius Muresan, Xuru Ding, Steve Oja, S. Noel Simpson (General Motors Engineering) ............................................................................................... 240

Driver Distraction and Reliance: Adaptive Cruise Control in the Context of Sensor Reliability and Algorithm Limits
Bobbie D. Seppelt, Monica N. Lees, John D. Lee (University of Iowa) ................................................ 255

Driver Distraction: A Naturalistic Observation of Secondary Behaviors With the Use of Driver Assistance Systems
James R. Sayer, Mary Lynn Mefford, Kezia Shirkey, Jessica Lantz (University of Michigan Transportation Research Institute) ........................................................................................................ 262
Unsafe Rear-End Collision Avoidance in Alzheimer's Disease  
Ergun Y. Uc, Matthew Rizzo, Steven W. Anderson, Qian Shi, Jeffrey D. Dawson (University of Iowa) .........................................................269

Innovative Fatigue Management Approach in the Trucking Industry  
Anneke Heitmann, Rainer Guttkuhn (Circadian Technologies, Inc.), Dean Croke (FleetRisk Advisors, LLC), Martin Moore-Ede (Circadian Technologies, Inc.) .................................................................271

Quantifying the Benefits of Enhancing Medications on Driving Performance: Comparing OROS® MPH vs. se-AMPH ER® in Driving Safety of ADHD Teenagers as Case Example  
Frances P. Thorndike, Daniel J. Cox, Larry Merkel, Melissa Moore, Roger Burket, Carrie Muller, Boris Kovatchev (University of Virginia Health System) .................................................................278

Cognitive Abilities Related to Driving Performance in a Simulator and Crashing on the Road  
Steven W. Anderson, Matthew Rizzo, Qian Shi, Ergun Y. Uc, Jeffrey D. Dawson (University of Iowa) ..........................................................................................................................286

Examination of the Efficacy of Proximity Warning Devices for Young and Older Drivers  
Arthur F. Kramer, Nicholas D. Cassavaugh, William J. Horrey, Ensar Becic, Jeffery Mayhugh (University of Illinois) ..............................................................................................................293

Effect of Simulator Training on Driving After Stroke: A Randomized Controlled Trial  
Abiodun Emmanuel Akinwuntan, Willy De Weerdt, Hilde Feys, Jan Pauwels (Katholieke Universiteit Leuven — Belgium), Guido Baten, Patricia Arno (CARA, Belgian Road Safety Institute — Belgium), Carlotte Kiekens (Katholieke Universiteit Leuven— Belgium) ......................................................................................................................295

Can Sea Bands® Be Used to Mitigate Simulator Sickness?  
Amy D. Wesley (UGS Corporation), Tina Brunetti Sayer (Van Buren Township, Michigan), Steve Tengler (Nissan North America) .........................................................297

Gaze Behavior During Simulated Driving: Elements for a Visual Driving Aid  
Daniel R. Mestre (UMR Mouvement et Perception, CNRS/Universite de la Mediterranee — France), Franck Mars (Institut de Recherche en Communications et Cybernetique de Nantes — France), Sylvain Durand (UMR Mouvement et Perception, CNRS/Universite de la Mediterranee — France), Fabrice Vienne, Stéphane Espié (Modélisations, Simulations et Simulateurs de Conduite — France) ..................304

Performing E-mail Tasks While Driving: The Impact of Speech-Based Tasks on Visual Detection  
Joanne L. Harbluk, Simone Lalande (Transport Canada — Canada) .........................................................311

Road Environment and Driver Fatigue  
Tal Oran-Gilad, Peter A. Hancock (University of Central Florida) ..........................................................................................................................318

Toward a Driving Competency Assessment Encouraging Elderly's Automobility: A French Point of View  
Catherine Gabauae, Laurence Paire-Ficout (INRETS, LESCOT — France) .........................................................325

Driving Simulators for Commercial Truck Drivers — Humans in the Loop  
Talleah Allen, Ronald Tarr (University of Central Florida) ..........................................................................................................................335
The Concept of Cooperative Automation in Cars: Results from the Experiment “Overtaking on Highways”  
Lars Biester (Robert Bosch GmbH — Germany) .................................................. 342

What Drivers Don't Know: or Don't Care  
S. David Leonard (University of Georgia), G. William Hill IV, Jeffrey A. Overdorff (Kennesaw State University) .................................................. 349

Do In-Vehicle Advance Signs Benefit Older and Younger Driver Intersection Performance?  
Susan L. Chisholm, Jeff K. Caird, Julie A. Lockhart, Natalie H. Vacha (University of Calgary — Canada), Christopher J. Edwards (Virginia Tech Transportation Institute) .................................................. 356

Gender Differences in Predicting Unsafe Driving Behaviors in Young Adults  
Nicole R. Skaar, John E. Williams (University of Northern Iowa) .................................................. 363

Driving Performance in a Simulator as a Function of Pavement and Shoulder Width, Edge Line Presence, and Oncoming Traffic  
Susan T. Chrysler, Alicia A. Williams (Texas A&M University System) .................................................. 370

Evaluating First-time and Infrequent Use of In-Car Navigation Devices  
Elliott Noel, Blair Nonnecke, Lana Trick (University of Guelph — Canada) .................................................. 376

Adaptation to a Motion-Based and Non-Motion-Based Simulator  
Renee F. Slick, Tuan Q. Tran, Elizabeth T. Cady (Kansas State University) .................................................. 383

Longitudinal Assessment of Older Drivers in a DMV Setting  
Karlene K. Ball (University of Alabama at Birmingham), Daniel L. Roenker (Western Kentucky University), Virginia G. Wadley (University of Alabama at Birmingham), Gayla Cissell, Melissa Mathews (Western Kentucky University), David Ball, David Vance, Martha Frankel, Kathy McConnell (University of Alabama at Birmingham) .................................................. 388

Traffic Violations and Errors: The Effects of Sensation Seeking and Attention  
H. Belgin Ayvaşık (Middle East Technical University — Turkey), Nurhan Er (Ankara University — Turkey), Nebi Sümer (Middle East Technical University — Turkey) .................................................. 395

The Spatial Extent of Attention During Driving  
George J. Andersen, Rui Ni (University of California, Riverside) .................................................. 403

Got Info? Examining the Consequences of Inaccurate Information Systems  
Ing-Marie Jonsson, Helen Harris (Toyota InfoTechnology Center), Clifford Nass, Leila Takayama (Stanford University) .................................................. 409

The Relation Between Speed-Lane Choice and Road Accidents in Jordan  
Lina Shbeebe, Wa'el Awad, Mohd. R. Suliman (Al Balqa' Applied University — Jordan), Jamil Mujahed (Jordan Traffic Institute — Jordan) .................................................. 416

Shut up I'm Driving! Is Talking to an Inconsiderate Passenger the Same as Talking on a Mobile Telephone?  
Natasha Merat, A. Hamish Jamson (University of Leeds — United Kingdom) .................................................. 426
Driver Performance Assessment with a Car Following Model  Erwin R. Boer (LUEBEC), Nicholas J. Ward, Michael P. Manser (University of Minnesota), Tomohiro Yamamura, Nobuyuki Kuge (Nissan Motor Co. Ltd. — Japan) ........................................... 433

Steering Entropy Changes as a Function of Microsleeps  Amit Paul, Linda Ng Boyle (University of Iowa), Erwin R. Boer (LUEBEC), Jon Tippin, Matthew Rizzo (University of Iowa) ........ 441

Evaluating the Safety Implications and Benefits of an In-Vehicle Data Recorder to Young Drivers  Tsippy Lotan (OR YAROK — Israel), Tomer Toledo (Israel Institute of Technology — Israel) ........................................................................................................ 448

The Use of a Driving Simulator to Assess Senior Driver Performance: Increasing Situational Awareness Through Post-Drive One-on-One Advisement  Matthew R.E. Romoser, Donald L. Fisher (University of Massachusetts, Amherst), Ronald Mourant (Northeastern University), Jerry Wachtel (The Veridian Group, Inc.), Konstantin Sizov (Drive Square LLC.) .......................... 456

The Development and Evaluation of a High-Fidelity Simulator Training Program for Snowplow Operators  David L. Strayer, Frank A. Drews (University of Utah), Stan Burns (Utah Department of Transportation) ........................................................................................................ 464

Can Novice Drivers Recognize Foreshadowing Risks as Easily as Experienced Drivers?  Lisandra Garay-Vega, Donald L. Fisher (University of Massachusetts, Amherst) ............. 471

A Meta-Analysis of Driving Performance and Crash Risk Associated with the Use of Cellular Telephones While Driving  Jeff K. Caird, Chip T. Scialfa (University of Calgary — Canada), Geoff Ho (Honeywell), Alison Smiley (Human Factors North — Canada) ................................................................. 478

Driver Performance While Interacting with the 511 Travel Information System in Urban and Rural Traffic  Laura M. Stanley, Michael J. Kelly, Suzanne Lassacher (Montana State University) ........................................................................................................ 486

Deciphering Psychological-Physiological Mappings While Driving and Performing a Secondary Memory Task  John K. Lenneman, Jonathon R. Shelley, Richard W. Backs (Central Michigan University) ........................................................................................................ 493

Deciding to be Distracted  Neil D. Lerner (Westat) ........................................................................................................ 499

Author Index ........................................................................................................................................ 507
