CONTENTS

COMBUSTION AND FUELS

GT2005-68060 ................................................................. 1
CFD Simulation of a Low NOx Oil Fired Boiler
C. Hochenauer and G. Brandstetter

GT2005-68070 ................................................................. 11
The Nature of NOx Formation Within an Industrial Gas Turbine Dry Low Emission Combustor
Khawar J. Syed and Eoghan Buchanan

GT2005-68072 ................................................................. 19
URANS Prediction of Flow Instabilities of a Novel Atomizer Combustor Configuration
P. Jochmann, A. Sinigersky, R. Koch, and H.-J. Bauer

GT2005-68077 ................................................................. 29
A CFD Model for Reacting Flows in an Aero-Engine Hot End Simulator
L. Ma, M. C. Pourkashanian, and C. W. Wilson

GT2005-68085 ................................................................. 41
Ejectors Design in the Rolls-Royce 1MW Hybrid System
Davide Bernardi, Michele Bozzolo, Francesco Marsano, Olivier Tarnowski, and Gerry Agnew

GT2005-68133 ................................................................. 51
A New Assumed PDF Turbulent Combustion Model for Multi-Step Chemistry
Baifang Zuo, David L. Black, and Clifford E. Smith

GT2005-68136 ................................................................. 67
Numerical Study of Thermo-Acoustic Waves Generation by a Swirling Flame Using a New Approach Based on Large Eddy Simulation
Christophe Duwig, Bogdan Gherman, Mihai Mihaescu, Mirko Salewski, and Laszlo Fuchs

GT2005-68150 ................................................................. 77
A Comparison of a Single- and Multiphase Jets in a Crossflow Using LES
Mirko Salewski, Dragan Stankovic, and Laszlo Fuchs

GT2005-68152 ................................................................. 87
An Investigation of the Effect of Swirl Vane Angle on Fuel Concentration and Velocity Fields in Gas Turbine Mixers
Louis J. Turek, Robert W. Dawson, Marcos Chaos, and Ruey-Hung Chen

GT2005-68160 ................................................................. 97
Analysis of Highly Swirled, Turbulent Flows in Dump Combustor With Exit Contraction
Daniel A. Nickolaus and Clifford E. Smith
Numerical Analysis of Combustion Instability and Its Suppression in Gas Turbine Combustor With Swirlers Modeled on EVPremix Burners
Chae Hoon Sohn and Han Chang Cho

Advancements in Gas Turbine Fuels From 1943 to 2005
Tim Edwards

Gas Turbine Fuel Injection Technology
Adel Mansour

Influence of the Swirler Design on the Flame Transfer Function of Premixed Flames

Experimental Studies of the Primary Zone Flow Field and Combustion Performance of a Triple Swirler Combustor
Yunhui Peng, Quanhong Xu, and Yuzhen Lin

Investigation of Combustion Performance of a Hybrid Airblast Atomizer Under Simulated Low Power Conditions
Jing Gong, Yuzhen Lin, Quanhong Xu, and Gaoen Liu

Investigation of Thermoacoustic Stability Limits of an Annular Gas Turbine Combustor Test-Rig With and Without Helmholtz-Resonators
Joachim Lepers, Werner Krebs, Bernd Prade, Patrick Flohr, Giacomo Pollarolo, and Antonio Ferrante

Development of Detailed Kinetic Mechanism to Study Low Temperature Ignition Phenomenon of Kerosene
P. Gokulakrishnan, M. S. Klassen, and R. J. Roby

25 Years of BBC/ABB/Alstom Lean Premix Combustion Technologies
Klaus Döbbeling, Jaan Hellat, and Hans Koch

Study of Infrared CO₂ Radiation From Liquid-Fueled Combustor
Y. Levy, M. Lev, and V. Ovcharenko

Fundamentals of Low-NOₓ Gas Turbine Adiabatic Combustor
Y. Levy, V. Sherbaum, and V. Erenburg

Antonio Andreini, Bruno Facchini, Luca Mangani, Antonio Asti, Gianni Ceccherini, and Roberto Modi

Influence of the Interaction of Equivalence Ratio and Mass Flow Fluctuations on Flame Dynamics

M. P. Auer, C. Hirsch, and T. Sattelmayer

Catalytic Combustion Systems for Micro-Scale Gas Turbine Engines

C. M. Spadaccini, J. Peck, and I. A. Waltz

Effect of Fuel System Impedance Mismatch on Combustion Dynamics

Geo A. Richards and Edward H. Robey

Thermoacoustic Analysis of Gas Turbine Combustion Systems Using Unsteady CFD

Bruno Schuermans, Holger Luebke, Denis Bajusz, and Peter Flohr

Turbulence Modeling in a Model Combustor

Leiy-Yng Jiang and Ian Campbell

Experimental Study and Modeling of Autoignition of Natural Gas/Air-Mixtures Under Gas Turbine Relevant Conditions

Andreas Koch, Clemens Naumann, Wolfgang Meier, and Manfred Aigner

Onset of Combustion Instabilities During Transition to Supercritical Fuel Injection in High Pressure Combustor

E. Lubarsky, D. Shcherbik, D. Scarborough, O. Bibik, and B. T. Zinn

Modelling and Control of Combustion Oscillations

Ann P. Dowling

Reacting Spray Structure of a Counter-Rotating Swirl Cup

Yongqiang Fu, Jun Cai, San-Mou Jeng, and Hukam Mongia

Evaluation of Emissions Performance of Existing Combustion Technologies for Syngas Combustion

Venkatraman Iyer, Joel Haynes, Patrick May, and Ashok Anand
GT2005-68517 ................................................................. 367
Ignition of Lean Methane-Based Fuel Blends at Gas Turbine Pressures
  Eric L. Petersen, Joel M. Hall, Schuyler D. Smith, Jaap de Vries, Anthony Amadio,
  and Mark W. Crofton

GT2005-68520 ................................................................. 381
Characterization and Reduction of Pollutant Emissions From a Landfill and Digester
  Gas Fired Mictroturbine Generator
  Mark Effinger, Josh Mauzey, and Vince McDonell

GT2005-68540 ................................................................. 389
Comparison of Combustion Properties Between a Synthetic Jet Fuel and Conventional
  Jet A1
  Fredrik Hermann, Per Hedemalm, Raik Orbay, Rolf Gabrielsson, and Jens Klingmann

GT2005-68561 ................................................................. 399
Emission, LBO and Combustion Dynamic Characterization of Several Alternative Fuels
  Khalid Oumejjoud, Peter Stuttaford, Steve Jennings, and John Henriquez

GT2005-68565 ................................................................. 405
Flame Characteristics and Turbulent Flame Speeds of Turbulent, High-Pressure, Lean
  Premixed Methane/Air Flames
  P. Griebel, R. Bombach, A. Inauen, R. Schären, S. Schenker, and P. Siewert

GT2005-68567 ................................................................. 415
Design and Development Test of a Gas Turbine Combustor for High Hydrogen Medium
  Heating Value Syngas Fuel
  Gang Xu, Yufeng Cui, Bin Yu, Yu Lei, Chaoqun Nie, Yun Han Xiao, and
  Weiguang Huang

GT2005-68586 ................................................................. 427
Lean Premixed Combustion of Carbon-Monoxide-Hydrogen-Methane Fuel Mixtures
  Using Porous Inert Media
  S. K. Alavandi and A. K. Agrawal

GT2005-68588 ................................................................. 435
Liquid Fuel Combustion Using Heat Re-Circulation Through Annular Porous Media
  E. R. Newburn and Ajay K. Agrawal

GT2005-68589 ................................................................. 443
Acoustic Based Rapid Blowout Mitigation in a Swirl Stabilized Combustor
  Shashvat Prakash, Suraj Nair, T. M. Muruganandam, Yedidia Neumeier, Tim Lieuwen,
  Jerry M. Seitzman, and Ben T. Zinn

GT2005-68605 ................................................................. 453
Passive Control of Dynamic Pressures in a Dry, Low NOx Combustion System Using
  Fuel Gas Circuit Impedance Optimization
  Jeffrey Goldmeer, Simon Sanderson, Geoff Myers, Jesse Stewart, and
  Michele D'Ercole
The Correlation of IR Microturbine Combustion Performance While Burning Diluted Gaseous Fuel Supplied by a Fuel Mixing Facility

Eric J. Dolak and Jeffrey P. Armstrong

Confinement Effects on the Swirling Flow of a Counter-Rotating Swirl Cup

Yongqiang Fu, Jun Cai, San-Mou Jeng, and Hukam Mongia

Validation of Next Generation Catalyst Design Incorporating Advanced Materials and Processing Technology

Sarento G. Nickolas, Philip B. Tuet, Jon G. McCarty, Suresh R. Vilayanur, Alberto E. Boleda, and Joseph C. Barry

Development of a Liquid-Fueled Dry Low Emissions Combustor for 300kW Class Recuperated Cycle Gas Turbine Engines

Hiroshi Fujiwara, Masamichi Koyama, Shigeru Hayashi, and Hideshi Yamada

Performance Demonstration of the Full-Size Multi-Cluster Combustor for DME Under Real Engine Conditions

Takeo Saitou, Keisuke Miura, Hiroshi Inoue, Nariyoshi Kobayashi, and Shin-ichi Suzuki

CFD Investigation of the Effects of Different Diluents on the Emissions in a Swirl Stabilized Premixed Combustion System

Ulf Engdar, Fredrik Hermann, Rolf Gabrielsson, and Jens Klingmann

Characteristics of the Swirling Flow Generated by an Axial Swirler

Yongqiang Fu, San-Mou Jeng, and Robert Tacina

The Measurement and Prediction of Gaseous Hydrocarbon Fuel Auto-Ignition Delay Time at Realistic Gas Turbine Operating Conditions

G.-J. M. Sims, A. R. Clague, R. W. Copplestone, K. R. Menzies, and M. A. MacQuisten

Development and Operation of a Pressurized Optically-Accessible Research Combustor for Simulation Validation and Fuel Variability Studies

Todd Sidwell, Kent H. Casleton, Douglas L. Straub, Daniel J. Maloney, Geo Richards, Peter Strakey, Donald H. Ferguson, and Stephen K. Beer

Engineering and Economic Analyses of a Coal-Fueled Solid Oxide Fuel Cell Hybrid Power Plant

A. D. Rao, A. Verma, and G. S. Samuelsen
Impact of Ethane, Propane, and Diluent Content in Natural Gas on the Performance of a Commercial Microturbine Generator
Richard L. Hack and Vincent G. McDonell

A NOx Reduction Project for a GT11 Type Gas Turbine
Lars O. Nord, David R. Schoemaker, and Helmer G. Andersen

Evaluation of Hydrogen Addition to Natural Gas on the Stability and Emissions Behavior of a Model Gas Turbine Combustor
Tomoshi Yoshimura, Vincent McDonell, and Scott Samuelsen

Thermoacoustic Stability Analysis of an Annular Combustion Chamber With Acoustic Low Order Modeling and Validation Against Experiment
Jan Kopitz, Andreas Huber, Thomas Sattelmayer, and Wolfgang Polifke

The GT24/26 Combustion Technology and High Hydrocarbon ("C2+") Fuels
Oliver Riccius, Richard Smith, Felix Güthe, and Peter Flohr

Detailed Chemical Kinetic Modeling of JP-8/Jet-A Ignition and Combustion
M. A. Mawid, T. W. Park, B. Sekar, and C. Arana

Field Test Validation of the DLN2.5H Combustion System on the 9H Gas Turbine at Baglan Bay Power Station
Markus Feigl, Fred Setzer, Rebecca Feigl-Varela, Geoff Myers, and Bryan Sweet

Low-NOx Emissions Over an Enlarged Range of Overall Equivalence Ratios by Staged Lean Premixed Tubular Flame Combustion
Hideshi Yamada, Hideyuki Takagi, and Shigeru Hayashi

Modification of the Reaction Zone Using a Smart Fuel Injector for Control of Instabilities in Liquid Fueled Combustors
T. Conrad, A. Bibik, D. Shcherbik, E. Lubarsky, and B. T. Zinn

Characterization of Fuel Composition Effects in H2/CO/CH4 Mixtures Upon Lean Blowout
Qingguo Zhang, David R. Noble, Andrew Meyers, Kunning Xu, and Tim Lieuwen

Comparative Evaluation of SOFC/Gas Turbine Hybrid System Options
Kevin P. Litzinger, Stephen E. Veyo, Larry A. Shockling, and Wayne L. Lundberg
Laminar Flame Speeds of Synthetic Gas Fuel Mixtures
J. Natarajan, S. Nandula, T. Lieuwen, and J. Seitzman

A CFD Based Off-Design Study of Micro-Gas Turbines Combustors
Maria Cristina Cameretti and Raffaele Tuccillo

Influence of Humid Air on Gaseous Combustion of Gas Turbines
Yue Wang, Gang Xu, Chaoqun Nie, Yunhan Xiao, Weiguang Huang, Zhedian Zhang, and Yufeng Cui

Experimental Analysis of the Two-Phase Unsteady Flow in an Aero-Engine LPP Burner
Mario Caruggi, Edward Canepa, Pasquale Di Martino, Alessandro Nilberto, Marina Ubaldi, and Pietro Zunino

Simulation of Scalar Mixing in Co-Axial Jet Flows Using an LES Method
M. Dianat, D. Jiang, Z. Yang, and J. J. McGuirk

A Study of Noise Generation by Turbulent Flow Instabilities in a Gas Turbine Model Combustor
Clemens Olbricht, Felix Flemming, Amsini Sadiki, Johannes Janicka, Friedrich Bake, Ulf Michel, and Ingo Röhle

Towards an Optimization of Turbulence Effects on Heat and Mass Transfer in Evaporating and Reacting Gas Turbine Sprays
A. Sadiki, M. R. Maneshkarimi, M. Chrigui, and J. Janicka

Analysis of Pressure Oscillation Data in Gas Turbine Annular Combustion Chamber Equipped With Passive Damper
M. Mastrovito, S. M. Camporeale, A. Forte, and B. Fortunato

Experimental Investigations on Isothermal Swirling Flows in a Reverse Flow Annular Gas Turbine Combusstor
K. Sudhakar Reddy, D. N. Reddy, and C. M. Vara Prasad

Engine Design and Operational Impacts on Particulate Matter Precursor Emissions

Post-Combustion Evolution of Soot Properties in an Aircraft Engine
