## Table of Contents

**Recent Advances in Quiet & Vibration-less Steel Pile Installation** .......... 1  
R. K. Filip BEng, MSc, DIC, CEng, MICE, Dawson Construction Plant Ltd.

**Thirty Years of Experience with the Wave Equation Solution Based on the Method of Characteristics** ................................................................. 13  
Peter Middendorp, Profound BV; Gerald E.H. Verbeek, VMS-Profound

**Analysis of Laterally Loaded Free-Head Pile Groups in Sand** .......... 23  
Dr. Ashraf M. Eid, Housing and Building Research Center

**Underpinning Historic Museum for U-505 Submarine Relocation** .......... 39  
Mark R. Goudschaal, Schnabel Foundation Company

**Rehabilitation of an Existing Mechanically Stabilized Earth Wall Using Soil Nails** ................................................................. 49  

**Micro-Pile Foundations in Difficult Subsurface Conditions** .......... 57  
Ravi P. Malviya P.E., Christopher M. Reith P.E. and D. Dreher Whetstone P.E., Geo-Technology Associates; Paul M. Blakita, Hayward Baker Inc.

**Use of a Reinforced Jet Grout Excavation Support System for a Major Sewer Line Repair** ................................................................. 65  
Eric M. Klein P.E., Rummel, Klepper & Kahl, LLP; Kenneth B. Andromalos P.E., Brayman Environmental; Richard Brink P.E., KCI Technologies Inc.

**Principles and Soil Mixing Examples of Portland Cement-Based Solidification/Stabilization Treatment** ................................................................. 77  
Charles M. Wilk, Portland Cement Association

**Design and Construction of Specialty Foundation for the Historic Virginia State Capitol Building** ................................................................. 89  
Robert S. Thomas, Gilbane Building Company; Bernard M. Tarra/le, Soletanche Inc.; Nasser Massoudi, URS Corporation

**Practical Reuse of Foundations in High Rise Construction** .......... 99  

**Lateral Response of Large Diameter Drilled Shafts in Clay** .......... 115  
Ke Yang and Robert Liang, The University of Akron

**Tower Leg Foundation Assessments with Frequency Response and Impedance Profiling Techniques** ................................................................. 127  
Huw Williams, Testconsult Limited
