Snow Engineering V

Edited by

P. Bartelt
Swiss Federal Institute for Snow and Avalanche Research, SLF, Davos, Switzerland

E. Adams
Department of Civil Engineering, Montana State University, Bozeman MT, USA

M. Christen
Swiss Federal Institute for Snow and Avalanche Research, SLF, Davos, Switzerland

R. Sack
Department of Civil and Environmental Engineering, University of Nevada, Las Vegas, USA

A. Sato
Snow and Ice Research Group, Nagaoke Institute of Snow and Ice Studies, NISIS, Japan
Table of Contents

Preface IX
About the Authors XI

Transportation
Friction indicators for improving winter maintenance operations

Friction coefficients on winter road surfaces using Multi-Axial Sensing system vehicle
A. Fujimoto, T. Fukuhara, H. Watanabe, T. Takeshi & N. Miyazaki 15

Road ice prediction model in snowy areas using neural network
M. Horii 23

Consolidation process of snow on roads by vehicles
T. Kobayashi, K. Kosugi, T. Sato, S. Mochizuki & A. Sato 29

Thermal model for contaminated snow on pavement
B. Morstad, E.E. Adams, J.R. Bristow & L.R. McKittrick 33

Housing and residential planning
Snow distribution on complex roofs
I. Mackinlay & R.S. Flood 41

Housing design in the snowy regions of Japan ~ in case of Hokkaido
T. Noguchi, K. Sakurada & T. Tsukidate 47

Study on the influence of streetscape owing to snow in Aomori, Japan
T. Tsukidate, N. Takita & T. Noguchi 53

Sliding snow and ice on buildings: a balance of risk, cost and aesthetics
C.J. Williams, M. Carter, F. Hochstenbach & T. Lovlin 59

Snow loads
Reliability of structures under snow load in Ukraine
S. Pichugin & V. Severin 67

Field investigation of snow loads on a gable roof
M. Dufresne de Virel, P. Delpech, J.A. Żurański, A. Suchecki, S. Suchecki & M.K. Piekarski 73

Ground snow loads in Poland
J.A. Żurański & A. Sobolewski 77

A proposal for a new normative snow load map for the Italian territory
R. Del Corso & P. Formichi 85

Analysis of exceptional snow load values for long term observation series
R. Del Corso 95

New structural design method in snow countries
S. Kurita & M. Izumi 101
Time series analysis of winter meteorological variations in snowy and cold regions in Japan
T. Ito

Investigation of snow loads and wind actions on existing buildings in Norway
V. Melaysund, K.R. Liso, J. Stem & K. Apeland

Analytical evaluation of drift loads on roofs
M. O'Rourke & A. DeGaetano

Ground snow load estimation with Kriging
T. Takahashi, T. Shitara & B.R. Ellingwood

The use of deflectors to remove snowdrifts around buildings
T. Thiis, P. Delpech & M. Dufresne de Virel

Snow deposition around mountain hut – design optimization by CFD and scaled water channel model and realization of solutions
A. Schaelin, L. Ilg & M. Benesch

The new map of ground snow loads for Russian building code
V.A. Otstavnov & I.V. Lebedeva

Unifying ground snowloads for the Western United States
R.L. Sack, T.C. Piechota & A. Ebrahimpour

Wind tunnel investigation of snow accumulations on a single flat roof and a two-level flat roof using artificial snow
Part 1: Field survey of snow accumulations on real buildings by aerial photogrammetry and eye-measurements
O. Joh, S. Sakurai & O. Abe

Wind tunnel investigation of snow accumulations on a single flat roof and a two-level flat roof using artificial snow
Part 2: Wind tunnel model studies of snow accumulations on whole roof area
S. Sakurai, O. Abe & O. Joh

Numerical simulation of snow drift around an elevated structure
J.H.M. Beyers, T.M. Harms & P.A. Sundsbo

Measures of snow drift around a building
H. Mitsuhashi

Study of snow loads on roofs
H. Mitsuhashi, Y. Takahashi & Y. Tagawa

Ski mechanics

Analysing snowboard mechanics
M.-P. Buckingham & J.R. Blackford

Mechanical properties of snow during rapid impacts

Physical description of the snowmaking process using the jet technique and properties of the produced snow
M. Fauve & H. Rhyner

Hazard mitigation

Risk analysis on snow-related casualty cases in Niigata Prefecture, Japan
S. Kamimura
Quantification of winter severity for evacuation facility management and disaster prevention in cold regions
K. Hosokawa, S. Kawabata & T. Tomabechi

Construction of snow disaster forecasting system in Japan

Snow technology and science

Experimental study on open air storage of snow with simple insulation using agricultural wastes
Y. Nakamura, H. Sugiyama & S. Kamimura

Concept of electric power output control system for atomic power generation plant utilizing cool energy of stored snow
S. Kamimura & T. Toita

Activities of the Japan Society of Snow Engineering: past, present and future
H. Yoshino

Snow as a cohesive granular material: a new challenge in constitutive modelling
F. Nicot

Elution phenomena of acidic ions from granular snow and spherical ice
Y. Taguchi, T. Yamaguchi, Y. Zanma, J. Guo & K. Aoyama

A physically based constitutive model for single crystal ice
T. Zhang & J. Lee

Simulating snow settlement and shear creep using the CRREL Snow Deformation Model
J.B. Johnson & M.A. Hopkins

Flat dilatometer testing (DTM) in snow
M. Calabrese & M. Cordeschi

The main regularities of Spatial changes in structure – strength properties of the snow cover in Mountains of Central Asia
I.V. Severskiy

Review of SNOWPACK and ALPINE3D applications

Avalanche engineering

Reducing avalanche hazard to US Route 89/191 in Jackson, Wyoming using snow sails

Fuzzy parameters analysis of powder snow avalanches
F. Barpi

The Morgex avalanche – a comparative study
F. Barpi, E. Certiani, B.M. Chiaia & B. Frigo

Recalculation of the Galtuer avalanche with different simulation models – a comparison of the results
S. Sauermoser, A. Herbert, F. Hagen & R. Sailer

Practical experiences in planning and building avalanche barriers and deflecting dams
J. Plank & M. Granig

Back-analysis of 1999 avalanche damages on Taconnaz deflective walls
P. Berthet-Rambahd, P. Roenelle, S. Rigaud, A. Limam, L. Daudeville & J. Mazars
Anchoring of snowpack stabilizing in high mountain areas with excavator

Walter Gebhard

Granular flow experiments to investigate dynamic avalanche forces for snow shed design

K.M. Platzer, S. Margreth & P. Bartelt

Modeling and design of flexible snow supporting structures

B. Boutilier, F. Nicot, J. Meyssonier, O. Gagliardini & F. Darve

Author index
