COAL PREP TECHNICAL SESSIONS

Technical Session I: Material Handling

Recovering Fine-Sized Coal in a Useable Form ................................................................. 1
D. Akers, G. Shirey and C. Raleigh, CQ Inc., Homer City, PA; J. Renk, U.S. Department of Energy, Pittsburgh, PA

Transition Hoppers in Bulk Material Handling .................................................................. 13
Mark Virus, David Wood, FMC Technologies

Analyzer Based Blending Builds Peace of Mind ...................................................................... 17
S. Smith, Grand Eagle Mining; M. Goshert, Thermo Electron; R. Woodward, Thermo Electron

Closed Loop Control of Screens ............................................................................................ 27
G. Ashley B.E. (Hons), Engineering Manager, Schenck Australia Pty Ltd

Technical Session II: Preparation Plant Upgrades

Recovering an Additional 20 T.P.H. Coal Through a Deslime Column Flotation Circuit Addition at Lone Mountain Processing - Virginia ................................................................. 39
T. Baumgarth, General Manager, Lone Mountain Processing, Inc.; P. Bethell, Director of Preparation, Arch Coal, Inc.; B. Gupta, Preparation Plant Manager, Lone Mountain Processing, Inc.

Paramont Coal Company Virginia's Toms Creek Preparation Plant Undergoes Major Reconstructive Surgery ............................................................... 51
F. Addison, Paramont Coal Company Virginia, LLC, Coeburn, Virginia

Heavy Media Cleaning of Indian Coal for Sponge Iron Production ..................................... 69
S. M. Jain, President, The Daniels Co.

Capacity Upgrades to the Wash Plant at the Fording River Operations of Elk Valley .......... 79
T. Fredin, R. Smith, Fording River Operations, Elk Valley Coal

Technical Session III: Coal Quality

Flotation Diagnostics Via Coal Grain Analysis ..................................................................... 93
B. Firth, CSIRO Energy Technology; P. Ofori, CSIRO Energy Technology; G. O'Brien, CSIRO Exploration and Mining; B. Jenkins, Jenkins-Kwan Technology

Radio Frequency Identification Techniques for Determining the Efficiency of Dense Medium Cyclones ................................................................. 111
Johan A. Engelbrecht, Multotec Process Equipment (Pty) Ltd, Kempton Park, South Africa
Dense-Medium Beneficiation of Fine Coal .............................................................. 133
G J de Korte, CSIR Division of Mining Technology, Pretoria, South Africa

The Future of Coal Washability Analysis - A Review of the Options .......................... 147
W. Membrey, ACIRL Pty Ltd, Riverview, Queensland Australia; K.P. Galvin, School of Engineering, University of Newcastle, Callaghan, NSW Australia

Technical Session IV: Coal Cleaning

Factors Influencing the Drain and Rinse Operation of Banana Screens .................. 165
M. O'Brien and B. Firth, CSIRO Energy Technology

In-Plant Evaluation of Dense Medium Process Performances ................................. 183
R. Q. Honaker, Department of Mining Engineering, University of Kentucky, Lexington, Kentucky; A. Patwardhan, Department of Mining Engineering, Southern Illinois University, Carbondale, Illinois

Hyperbaric Filtration (HBF) - Operating Experience with ANDRITZ Pressure Filters in Mineral Coal Dressing ................................................................. 199
Ernst Frohnwieser, Senior Engineer, Sales Manager, ANDRITZ AG Separation Technologies

Improved Screen-Bowl Centrifuge Recovery Using Polymer Injection Technology ......................................................... 203
R. T. Burchett, Department of Mining & Minerals Engineering, Virginia Tech, Blacksburg, VA; K. M. McGough, Nalco Company Charleston, WV; G. H. Luttrell, Department of Mining & Minerals Engineering, Virginia Tech, Blacksburg, VA

UPGRADING LOW RANK COALS SYMPOSIUM

Upgrading Low Rank Coals Session I: Workshop

Characteristics of Low-Rank Coals; Coal Preparation Starts at the Face; The Economics of Coal Beneficiation; Washability Analyses; Impacts of Coal Characteristics on Utility Boilers .................. 219
Kip Alderman, President, Materials Automation & Service; Don Sutton, P. E., President, Spectrum Engineering

Coal Analyzers; Removal of Inherent Moisture; Gravity Separation ......................... 219
Kip Alderman, President, Materials Automation & Service; Rob Reeves, Senior Project Manager, Hazen Research, Inc.

Upgrading Low Rank Coals Session II: The Issues

Low Rank Coal Deposits in the World ................................................................. 223
Brian C. Young, Envirosafe International Pty Ltd.

The Impact of Coal Drying on Low Rank Coal Fired Power Plants ......................... 243
Edward Levy and Nenad Sarunac, Energy Research Center, Lehigh University

The Utilization of Sub-Bituminous Coal by American Electric Power ......................... 257
Mike Doherty and Dave King, American Electric Power, Columbus, Ohio
Self Heating and Spontaneous Combustion of Low Rank Coals

Brian C. Young, Envirosafe International Pty Ltd.

Upgrading Low Rank Coals Session III: Moisture Reduction Processes

The Use of the Parry Process for the Thermal Drying of a Lignitic Feed to a Mine-Month Generating Plant

Dave Carris, John T. Boyd Co and G. William Kalb, TraDet, Inc.

PreDrying the Lignitic Feed to the Great River Energy Power Plant in Underwood, North Dakota

Charles Bullinger, Engineering Services Leader, Great River Energy, Coal Creek Station, Underwood, ND, USA; Mark Ness, Great River Energy, Coal Creek Station, Underwood, ND, USA

PreDrying the Lignitic Feed to a Calcining Operation

D. R. Barnstable, Luscar Ltd. – Bienfait Mine

Upgrading Low Rank Coals Session IV: Moisture Reduction Processes

Pre-drying of High Moisture Content Australian Brown Coal for Power Generation

MJ McIntosh and DQ Huynh, Cooperative Research Centre for Clean Power from Lignite

The Fleissner Saturated Steam Drying Process and It's Optimization by the US Bureau of Mines

G. William Kalb, TraDet, Inc.

History and Description of the KFx Pre-Combustion Coal Process

R. van Zyl, KFx, Inc. and L. White, MR&E, LLC

Upgrading Low Rank Coals Session V: Moisture Reduction Processes

Thermal Drying and Binderless Briquetting of Low Rank Coals

Keith Clark, Binderless (Coal) Briquetting Company Pty Limited, North Sydney NSW, Australia

ENCOAL Project Experience and SponCom Solutions

D. W. Coolidge, J. P. Frederick, B. A. Knottnerus and R. G. Smith, MR&E, LLC

Upgrading Coals using the Nu-Fuel Process

A. N. Mann, Confluence Coal Combustion

Upgrading Low Rank Coals Session VI: Dry Beneficiation Processes

Testing of the FGX Compound Dry Separator for Upgrading Low Rank Coals

J.N. Kohmuench, X. Jiang, and V.P. Richardson, Eriez Manufacturing Company, Erie, PA

The Use of Magnetic Forces to Upgrade Low Rank Coals

Air Dense Medium Separation for Dry Coal Beneficiation
Yuemin Zhao, Zhenfu Luo, and Qingru Chen, China University of Mining and Technology

Testing of Magnetic Separation and the Allmineral Air Jig on North Dakota and Mississippi Lignites
Richard Weinstein, Engineering Manager, The Falkirk Mining Company, Underwood, ND, USA
