electromagnetic compatibility 2005

16th International Zurich Symposium and Technical Exhibition on Electromagnetic Compatibility
February 13–18, 2005
# Table of Contents

## Broadband Powerline Communications

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical Considerations for Broadband Powerline (BPL) Communication</td>
<td>1</td>
</tr>
<tr>
<td>Sensitivity of a Short-Wave Receiving Station Regarding PLC Transmission</td>
<td>7</td>
</tr>
<tr>
<td>Effects of Broadband Over Power Line Communication Systems on Aeronautical HF-Services</td>
<td>13</td>
</tr>
</tbody>
</table>

## EMC in Communications

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Higher-Order Effects of Radiated Interference — Future Challenging Research Domains Within</td>
<td>19</td>
</tr>
<tr>
<td>Bandwidth Conversion of the Amplitude Probability Distribution for Emission Requirements of Pulse Modulated Interference</td>
<td>23</td>
</tr>
<tr>
<td>Immunity of Bluetooth-Transmitters Against Interfering Electromagnetic Fields with High Field-Strengths</td>
<td>27</td>
</tr>
<tr>
<td>Electromagnetic Emission of xDSI. Systems Transmitted on Twisted Copper Pairs</td>
<td>31</td>
</tr>
</tbody>
</table>

## Reverberation Chambers and TEM Cells

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parameter Estimates for the Stirrer Efficiency in Reverberation Chambers</td>
<td>35</td>
</tr>
<tr>
<td>Mode Perturbation Induced by the Stirrer Rotation in a Reverberating Chamber</td>
<td>39</td>
</tr>
<tr>
<td>The Influence of Stirrer Size and Chamber Load on the Number of Uncorrelated Samples Created in a Reverberation Chamber</td>
<td>43</td>
</tr>
<tr>
<td>Modeling Coupling Phenomena Between Septum and Loop at Low Frequency</td>
<td>47</td>
</tr>
</tbody>
</table>

## Miscellaneous

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Band Ratio and Frequency-Domain Norms</td>
<td>51</td>
</tr>
<tr>
<td>Managing EMC and Safety Compliance for Telecommunication Products</td>
<td>55</td>
</tr>
<tr>
<td>Distribution of Levels of Intrasytem Electromagnetic Interference in Systems of Co-Located Radio Equipment</td>
<td>59</td>
</tr>
<tr>
<td>Experimental and Theoretical Studies of the Schumann Resonance Magnetic Polarization in the Gyrotropic Earth-Ionosphere Cavity</td>
<td>63</td>
</tr>
</tbody>
</table>
History of EMC

A General History of the Evolution of the Discipline of EMC
Daniel D. Hoolihan1, Nigel Carter; 1Hoolihan EMC Consulting, USA

Three Decades of EMC Zurich and the Impacts of a Changing Environment
Peter E. Leuthold, ETH Zurich, Switzerland

A History of the Evolution of EMC Regulatory Bodies and Standards
Donald N. Heirman1, Manfred Stecher; 1Don HEIRMAN Consultants, USA

A Brief History of EMC Education
Todd Hubing1, Antonio Orlandi; 1University of Missouri-Rolla, USA

Automotive EMC

Simulating the Electromagnetic Susceptibility of Automotive Vehicles in Their Early Design Stage
Frédéric Bocquet 1, Jean-Claude Kedzia; 1RENAULT, France

Harness Influence in Bulk Current Injection Testing
Frédéric Lafon, François de Daran, Laurent Caves, VALEO, France

Periodic Frequency Modulation Applied to Noise Cancellation Between Power and Communication Buses
Alfonso Santolaria1, David González, Javier Gago, Josep Balcells, Stéphane Brehaut, Jean-Charles Le Bunetel, Didier Magnon; 1Universitat Politècnica de Catalunya, Spain

Investigation of Automotive Emissions Measurement Frequencies, Test Methods and Operating Modes
Alastair R. Ruddle, MIRA Limited, U.K.

Application of Geometry Based Strategies in the Development of EMC-Conformable Motors in the Automotive Industry
Linh-Thao Stubenbord1, Claus Schmiederer; 1FernUniversität in Hagen, Germany

Bioelectromagnetics

Spectral Analysis of Simulated Currents for the Study of the Interaction Between Electromagnetic Fields and Cellular Ionic Channels
Alessandra Paffi, Giuseppe Cotignola, Micaela Liberti, Francesca Apollonio, Guglielmo D’Inzeo, ICemB at "La Sapienza" University of Rome, Italy

MSRC Measurements of High Frequency Non Ionizing Electromagnetic Radiations (NIR) on Living Organisms
David Roux1, Alain Vian, Pascale Goupil, Gérard Ledoigt, Sébastien Girard, Françoise Paladian, Pierre Bonnet; 1Blaise Pascal University, France

Modelling Electromagnetic Field Exposure and SAR in Vehicles Due to On-Board Transmitters
Alastair R. Ruddle, MIRA Limited, U.K.

The Estimation of the Maximum SAR with Respect to Various Types of Wireless Device Usage
Teruo Onishi, Takahiro Iyama, Shinji Uebayashi, NTT DoCoMo Inc., Japan

FDTD Analysis of SAR from a Cell Phone Inside a Vehicle
Gabriel Anzaláti1, Eduard Canela Delgado, Pere J. Riu, Ferran Silva; 1Technical Superior School, Argentina

The SAR Evaluation Method with Optical Fiber Thermometer
Yoshinobu Okano, Youji Sugama, Minoru Abe, Musashi Institute of Technology, Japan
Sensors and Antennas

Time Domain Characteristics of Resistively-Loaded Electric Field Sensors ........................................... 167
James McLean¹, Heinrich Foltz, Robert Sutton; ¹ TDK R&D Corp., USA

Comparison Between Three Antenna Method and Measuring Impedance Method for the
Antenna Factor of a Small Half Loop Antenna .................................................................................. 173
Masanori Ishi, Koji Komiyama, AIST, Japan

A Novel Indirect Method to Determine the Radiation Impedance of an Unknown Antenna
Structure ............................................................................................................................................... 179
Jari O. Jekkonen¹, Ian D. Flintoft, Myles H. Capstick, Andrew C. Marvin; ¹ NOKIA Corporation, Finland

Analyzing the Coupling Principles of Radiated Immunity Tests for Automotive Components
in the UHF Band .................................................................................................................................... 183
Bernd Körber¹, Dieter Sperling, Karl-Heinz Gonschorek; ¹ Zwickau University of Applied Sciences, Germany

Calibration of Small Antennas in a GTEM Cell .................................................................................... 189
Claudio Piutti¹, Marco Falda, Alessandro Giardina, Michele Borsero, Giuseppe Vizio, Ernesto Arri; ¹ TESEO S.p.A., Italy

Quasi Free-Space Antenna Calibration in Anechoic Room ..................................................................... 195
Frédéric Conrad Pythoud, Swiss Federal Office of Metrology and Accreditation, Switzerland

Requirement to Input Impedance of Common Mode Absorbing Device ................................................. 199
Peter Mosshammer¹, Lutz Dunker; ¹ emv GmbH, Germany

The Dynamic Range of a Time-Domain EMI Measurement System Using Several Parallel
Analog to Digital Converters ................................................................................................................ 203
Stephan Braun, Peter Russer, Technische Universität München, Germany

Lightning and its Effects I

A Simple Model of Repeating Lightning-Leader Pulses .......................................................................... 209
Carl E. Baum, Air Force Research Laboratory, USA

Incorporation of Distributed Capacitive Loads in the Antenna Theory Model of Lightning
Return Stroke ......................................................................................................................................... 213
S. Bonyadi-Ram¹, R. Mohi, S.H.H. Sadeghi, V. Rakov; ¹ Amirkabir University of Technology, Iran

Influence of Lightning Channel Tortuosity and Branches on a Magnetic Field Distribution ..................... 219
Grzegorz Maslowski, Rzeszow University of Technology, Poland

Time-Frequency Resolution of the Electric Field Radiated from a Lightning Discharge ......................... 225
Stefano Marchi, Riccardo E. Zich, Politecnico di Milano, Italy

A Method Approach for Lightning Return Stroke Characterization ...................................................... 231
Joan Montanya¹, Blas Hermoso, Angel Illa, Pedro Rodriguez, David Romero; ¹ Universitat Politècnica
de Catalunya, Spain

The Temporal Characteristics of Leader Fields at Ground Level When a Part of the Lightning
Channel is Inclined .......................................................................................................................... 237
Chandima Gomes¹, Vernon Cooray; ¹ University of Colombo, Sri Lanka

Finite Difference Analyses of Schumann Resonance and Reconstruction of Lightning
Distribution ......................................................................................................................................... 243
Yoshiaki Ando, Masashi Hayakawa, University of Electro-Communications, Japan
Chip Level EMC (invited)

Single Summation Expression for the Rectangular Power Ground Plane Cavity

Joe Trinkle¹, Antonio Cantoni¹; University of Western Australia, Australia

The Impact of Decoupling Capacitors on the Impedance of Rectangular PCB Power-Bus Structures

Matthias Hampe, Stefan Dickmann, Helmut-Schmidt-University, Germany

Impedance Analysis of Power Ground Planes Loaded with Multiple Capacitors

Joe Trinkle¹, Antonio Cantoni¹; University of Western Australia, Australia

Mixed Volume and Surface PEEC Circuit and Electromagnetic Solver

Albert E. Ruehli¹, Dipanjan Gope, Vikram Janadhyala; IBM Research Division, USA

Parasitic Extraction and Simulation of Simultaneous Switching Noise in On-Chip Power Distribution Networks

Subramanian N. Lalgudi, Jifeng Mao, Madhavan Swaminathan, Georgia Institute of Technology, USA

PCB Interconnects Characterization from S-Parameter Measurements

Vittorio Ricchiuti¹, Antonio Orlandi, Giulio Antonini; Siemens CNX S.p.A., Italy

Analog and Mixed-Signal Simulation of EMC at System Level

F.G. Canavero, S. Grivet-Talocia, I.A. Malo, I.S. Stievano, Politecnico di Torino, Italy

Adaptive Broadband Macromodeling of Passive High-Speed Components Using Vector Fitting

Tom Dhaene, University of Antwerp, Belgium

EMC Innovation

Source Identification of Electromagnetic Radiation in Electronic Circuits Using Artificial Neural Network

K. Aunchaleevaraman¹, S. Intajag, W. Khan-Ngern, Y. Preampaaneerach, P. Teekaput, S. Nitta; NECTEC, Thailand

2mm Industrial Connector Modeling with EM-ANN and Polynomial Description

A. Argouarch¹, G. Levanic, M'hamed Drissi; Thales Airborne System, France

Experimental Study of Thermal Influence on EMC Emissions of Digital Circuit on PCB

Jean-Marc Dienot¹, Guillaume Lourdela; LESIA/IUT Tarbes, France

Influence of the Short-Channel Effects in HEMTs on EMC Characteristics of the HEMT-Based Amplifier

Igor Khrebtov, Anatoly Bobreshov, Voronezh State University, Russia

A Universal Method of Setting up Macromodels from Frequency Response of Devices

N. Korovkin, T. Minevich, State Polytechnic University, Russia

A New Broadband Double Ridge Guide Horn with Improved Radiation Pattern for Electromagnetic Compatibility Testing

Vicente Rodriguez, ETS-Lindgren, USA

Lightning and its effects II

The Performance of Charge Transfer System Against Lightning Rod at the Communication Towers Analyzed by Using Lightning Video System and Rogowski Coils

A. Ramli, N. Idris, B. Shariief, Telekom Research & Development Sdn Bhd, Malaysia

A Novel Model for Lightning Induced Current Computation

Afed Slama¹, Jack Nachamkin¹; Villanova University, USA

A Wavelet Based Classifier for Classification of Cloud-to-Ground Lightning Strokes

K. Sheshyekani, P. Sattari, A. Nicomanesh, S.H.H. Sadeghi, R. Moini, Amirkabir University of Technology, Iran

Electromagnetic Radiated Field by a Direct Lightning Stroke on an Aircraft Model

Edoardo Alfassio Grimaldi, Morris Brenna, Fulvio Martinelli, Riccardo E. Zich, Politecnico di Milano, Italy

Model Variations of Global Lightning Activity Derived from Optical Transient Detector Data

A.P. Nickolaenko¹, O. Pechony, C. Price, G. Satori¹; Ukrainian National Academy of Sciences, Ukraine
Chip and Package Level EMC

A Modal Transmission Technique Providing a Large Reduction of Crosstalk and Echo
Frédéric Broydě, Evelyne Clavelier, Excem, France

Accurate Identification of Long Interconnects with the Generalized Method of Characteristics
M. de Magistris1, L. De Tommasi, A. Maffucci, G. Miano; 1Università di Napoli Federico II, Italy

Using ICEM Models for Substrate Noise Characterization in Mixed Signals IC’s
Olivier Valorge1, Cristian Andrei, Bertrand Vrignon, Francis Calmon, Christian Gontrand, Jacques Verdier, Pierre Dautriche; 1STMicroelectronics, France

Assessment of Resonance Properties of Electrically Small PCBs via Radar Cross-Section
Measurements in a GTEM Cell
David Pouthé, Gerhard Monich, Wilfried Fami Kemi, Technical University Berlin, Germany

Analysis of the Effect of Radio Frequency Interference on the DC Performance of CMOS Operational Amplifiers
Muhammad Taher Abuelma’atti, King Fahd University of Petroleum and Minerals, Saudi Arabia

A PLL-Based Clock Generator with Improved EMC
Fabio Pareschi, Luca Antonio De Michele, Riccardo Rovatti, Gianluca Setti, University of Bologna, Italy

HEMP Effects (invited)

The Effects of HEMP and UWB Pulses on Complex Computer Systems
Daniel H. Nitsch1, Andre Bausen, Jörg Maack, Roland Krzikalla; 1Scientific Institute for Protective Technologies, Germany

Fast Pulse Testing of Power System Control Equipment to Determine Their Susceptibility to HEMP Conducted Transients
Edward Savage, Kenneth Smith, Michael Madrid, James L. Gilbert, William A. Radasky, Metatech Corporation, USA

Simulator Test Results of the Withstand of Distribution Class Insulators to Steep-Front/Short Duration (SFSD) Impulses to Simulate the Early-Time HEMP
John G. Kappenman1, William A. Radasky, S. Grzybowski, Y. Song; 1Metatech Corporation, USA

Research of Power Line Insulator Flashover Due to the Joint Effect of a High Voltage Disturbance and Line Operating Voltage
A. Kozlov1, S. Louzganov, Y. Parfenov, M. Povareshkin, V. Polischouk, A. Shurupov, L. Zdoukhov, William A. Radasky; 1Institute for High Energy Densities, Russia

Emission Testing

A Study and Improvement of Open-Ended Coaxial Probe Used for Near-Field Measurements
David Baudry, Anne Louis, Bélahcène Mazari, IRSEEM-ESIGELEC, France

Complex Deconvolution for Improvement of Standard Monopole Near-Field Measurement Results
Adam Tankielun1, Uwe Keller, Werner John, Heyno Garbe; 1Fraunhofer IZM, Germany

Multi-Purpose Anechoic Chambers — EMC (SAR/FAR) to Antenna Measurements
Martin A.K. Wiles1, Alexander Kriz; 1ETS-Lindgren, U.K.

How to Test Really Big Machines Investigations to Improve the Test Wire Method
Karl-Heinz Gonschorek1, Samuel Hochauf, Franz Schlagenhauser; 1Dresden University of technology, Germany
Computational Electromagnetics I

EMC Relevant Arrangements — A Combination of MoM and GMT ........................................ 411
Stefan Balling, Dirk Plettemeier, Karl-Heinz Gonschorek, Dresden University of Technology, Germany

A Partitioned MoM Scheme for Treating EMC Problems on a Series of Geometries with a Predominant Common Part ................................................................. 415
Faik G. Bogdanov1, Roman G. Jobava, Paata Tsereteli, Stephan Fret, 1 EMCoS, Georgia

Geometrical Optimization Embedded in the Method of Moments ........................................... 419
Natalie Baganz, Dirk Plettemeier, Karl-Heinz Gonschorek, Dresden University of Technology, Germany

Combined-Node Method: Analysis of Through Hole Vias .................................................... 425
Reza Sabbagh Amirkhizi, Hermann Singer, Technische Universität Hamburg-Harburg, Germany

Boundary Integrodifferential Equations for the Solution of Electromagnetic Scattering Problems for Metal-Dielectric Bodies ......................................................... 429
Alexey M. Serebrennikov, Perm Federal Technical University, Russia

Numerical Simulation of Power-Bus Structures on Printed Circuit Boards ........................... 435
Marco Leone1, Heinz-D. Bräns, D. Leugner, 1 Siemens AG, Germany

Analysis of the Coupling of a Deterministic Plane Wave to a Stochastic Twisted Pair of Wires ... 439
Bas L. Michielsen, ONERA DEMR, France

Modeling of Composite Walls in Hospitals for Ray-Tracing and FDTD Simulations ................ 443
Thomas M. Schäfer, Thorsten Kayser, Marlo Pauli, Michael Baldauf, Werner Wiesbeck, Universität Karlsruhe (TH), Germany

Power System EMC I

Electric Power Grid Vulnerability to Natural and IntentionalGeomagnetic Disturbances .......... 447
John G. Kappenman, William A. Radasky, James L. Gilbert, Metatech Corporation, USA

Electromagnetic Noise Emission Measurements Near FACTS Devices at the Inez UPFC Station ... 451
David Klinect1, David Nichols, Ben Mehraban, Stephen Sebo, Longya Xu, Xin Liu, Brian Cramer, Michael Silva, Robert G. Olsen, Jerry Ramie; 1 American Electric Power Service Corporation, USA

Analysis of the Heatsink Influence on Conducted EMI Generation in SMPS ........................... 455
Andrea Dolente, Ugo Reggiani, Leonardo Sandrolini, University of Bologna, Italy

Crossed-Frequency-Admittance-Matrix Approach for Voltage Quality Study in Distribution Power Systems ................................................................. 459
Andrzej Bachyry1, Cezary Dziens, Rainer Krebs, Zbigniew Styczynski; 1 Siemens AG, Germany

Measurement Validation

A Practical Analysis of Test Site Validation Methods for Radiated RF Measurements Above 1 GHz ................................................................. 463
Angela Nothofer1, David Knight, Martin Alexander, Andrew Rowell, Andrew Ward, Andrew C. Marvin; 1 National Physical Laboratory, U.K.

Inter-Laboratory Tests of Electromagnetic Field Measurements ........................................... 469
Michael Mann1, Bernd Guthell, Karsten Glöser, Hauke Brüggemeyer, Paul Weiß; 1 University of Kaiserslautern, Germany

Reduction of the Uncertainty in Radiated Susceptibility Testing by Introduction of the Compound Polarisation Efficiency ................................................................. 475
Magnus Höjér, Swedish Defence Research Agency, Sweden

Practical Validation of a Low Cost Truck Container as EMC Pre-Compliance Test Facility ...... 479
Wilbert M. Ellema, Queensland University of Technology, Australia
Power System EMC II

Voltagen and Currents Distribution Along an AC Electrified Railway Line: Comparision Between Measurements and Calculations ........................................ 483
G. Lucca1, M. Moro, A. Pagani, L. Zucchelli; 1Sirti S.p.A., Italy

Calculation of Overvoltage of Power Transformer Windings Under VFTO Based on Network Functions ......................................................... 489
Gui-shu Liang, Xile Zhang, Xiao-hui Wang, Xiang Cui, North China Electric Power University, China

Calculation of Very Fast Transient Overvoltages in Power Transformer Windings ............................................... 493
Xile Zhang, Gui-shu Liang, Hai-feng Sun, Xiang Cui, North China Electric Power University, China

Application of the Wavelet Transform to the Analysis of Conducted EMI in SMPSs ......................................................... 497
Luisa Coppola, Simone Buso, University of Padova, Italy

Interactions Between an Input EMI Filter and a Power Supply ......................................................... 503
Stéphane Brehaut1, Jean-Charles Le Bunetel, Didier Magnon, Antoine Puzo, Alfonso Santolaria, Davíd González, Javier Gago, Josep Balcárs; 1Laboratoire de Micro-électronique de Puissance, France

Radio Frequency Characteristics of High Power Common-Mode Chokes ......................................................... 507
S. Weber, M. Schinkel, E. Hoene, S. Gutowski, Werner John, H. Reichl, Fraunhofer IZM, Germany

Common Mode Current Generated by Multiple Transient Sources on Grounding Grids ......................................................... 511
Marcos A.F. Mattos, Okime Eletromagnetismo Aplicado, Brazil

System Level EMC

Proposal of a Modified Kron Computation Technique for Complex EMC Problems ......................................................... 515
Olivier Maurice1, Mohamed Ramdani, Aubry Picard, François Fouquet; 1EADS-CCR, France

Analysis of the Wire Coupling Under an Aperture Illuminated by an Incident Field by Means of a Topological Approach ......................................................... 521
Phumin Khrawantch1, Nakka S. Kranthi, A.R. Stillwell, Forrest J. Agee, S. Joe Yakura, N.E. Islam; 1University of Missouri, USA

Modeling of a Large Ground Structure by an Equivalent Circuit for Low Frequency Applications ......................................................... 525
Thiemo Stadtler, Jan Luiken ter Haseborg, Technische Universität Hamburg-Harburg, Germany

A Closed-Form Formulation for the Total Power Radiated by a Single-Wire Overhead Line ......................................................... 529
A. Cozza1, F.G. Canavero, Bernard Démoulin; 1Politecnico di Torino, Italy

Computational Electromagnetics II

Efficient Generalized Circuital Analysis of Rectangular Semi-Anechoic Chambers and NSA Computation ......................................................... 535
Ignacio Monterde1, Fernando D. Quesada, Luis Nuño, Juan V. Balbastre; 1Universidad Politécnica de Valencia, Spain

Cubic and Corrugated Reverberation Chambers: Mode Distribution, Correlation and Field Uniformity ......................................................... 539
Christian Bruns, Pascal Leuchtmann, Ruediger Vahldieck, ETH Zurich, Switzerland

Stability of Full-Wave PEEC Models: Reason for Instabilities and Way for Correction ......................................................... 543
S.V. Kochetov, G. Wollenberg, Otto-von-Guericke-Universität Magdeburg, Germany

Optimization of the Matching Network for Microstrip-Like Antennas Using Genetic Algorithm ......................................................... 547
Jalil Rasekhi, Jalil Rashed Mohasel, University of Tehran, Iran
Transmission Lines

Transfer Admittance and Impedance for Shielded Coaxial Cables: Evaluation by Voltage Measurements and Model Tuning ........................................... 551
   Giulio Antonini, Antonio Orlandi, R.M. Rizzi, University of L’Aquila, Italy

Effect of Modelling Fringing and Losses for a Microstrip on the Radiated Emission Characteristics ................................................................. 557
   Bert Wong¹, Antonio Cantoni, Kevin Fynn, Joe Trinkle;¹ Curtin University of Technology, Australia

Numerical Investigation of Crosstalk Effect in Coupled Coplanar Waveguides with Linear Frequency Dependent Loads ........................................... 563
   Tomasz Stefarski¹, Bogdan J. Janiczak;¹ R&D Marine Technology Centre, Poland

Inclusion of Proximity Effect on Full-Wave Analysis of Interconnects with Arbitrary Conductor Shapes ............................................................. 569
   A. Maffucci¹, G. Miano, F. Villone;¹ Università di Cassino, Italy

EMC Protection

Ageing of Shielding Joints: Shielding Performance and Corrosion .................................................. 575
   Lena Sjögren¹, Mats Bäckström;¹ Swedish Corrosion Institute, Sweden

Shielding Effectiveness of Woven Carbon Fiber Composite Materials for Aerospace Applications ............................................................... 579
   Simon Rea¹, David Linton, Eddie Orr, Jonathan McConnell;¹ Queens University Belfast, U.K.

Study on Reducing Common-Mode Current on a Wire Through an Aperture with a Ring Stack ... 585
   Sungtek Kahng, University of Incheon, Korea
