Table of Contents

Keynote papers
10 The materials of construction in the chemical process industries (P5116)
18 Cost effective materials selections - what is true? (P5115)
24 The new 200-series: an alternative answer to Ni. surcharge? Risks or opportunities? (P5112)

Oil & Gas corrosion
34 Postweld heat treatment to avoid intergranular stress corrosion cracking of supermartensitic stainless steels (P5045)
43 How best to test welded corrosion resistant alloys for resistance to hydrogen embrittlement under cathodic protection? (P5033)
49 Corrosion and Stress Corrosion Cracking of Corrosion Resistant Alloys in Spent Acid Environments (P5027)
56 Effect of cathodic current densities and strain rates on SSRT fracture behavior of lean duplex stainless steels and a 13% Cr supermartensitic stainless steel in synthetic formation water (P5036)

Corrosion
64 Influence of the Final Heat Treatment Process on the Properties of Welded Pipes from Stainless Steels (P5102)
68 Pitting Corrosion of Stainless Steels Caused by Dissolving Sodium Chloride under Heat Transfer Conditions (P5101)
73 The Effect of Heat Input on Pitting Corrosion of AISI 316L Stainless Steel During MIG Welding (P5053)
77 Corrosion Defect of Stabilized Stainless Steel Welds (P5020)

Energy & surfaces
82 Boiling water reactor pipe cracking: prediction, detection and life extension (P5048)
88 Utilization of ferritic stainless steel tubes in moisture separator reheaters (P5015)
94 Stainless Steel Corrosion in Geothermal Condensing Steam (P5011)
97 Semiconductive properties of thermally grown oxide films on AISI 304L (influence of oxidation time) (P5044)

Seawater
106 The Introduction of Alloy 2101 for Use as Zinc-Clad Umbilical Tubing for Deepwater Subsea Oil and Gas Developments (P5056)
112 CRA’s for Corrosion Control in the Desalination Industry (P5026)
116 Sea water stress corrosion cracking characterisation of X4CrNiMo16-5-1 martensitic stainless steel (P5088)
120 Super austenitic astainless steel B66 (P5090)
129 Sacrificial Cathodic protection and crevice corrosion of stainless steel in seawater and ferric chloride solution (P5046)

Welding
138 Can purging gas oxygen content be measured reliably with commercial instruments? (P5074)
143 Effect on Mechanical Properties at Ageing or Stress Relieving Weld Metal of Grade UNS S32750 (P5054)
147 Development of Ni-Cu Filler Metals for Joining Austenitic Stainless Steels (P5097)
154 Further Studies of Ductility-Dip Cracking in Ni-base Weld Metals (P5098)
160 Ferritic stainless steel X2CrNi12 with improved weldability for structural applications (P5058)

New alloys - lean
168 SSC / SCC Testing of Lean Duplex AL 2003TM (S32003) Welds (P5017)
171 Applications Utilising the Advantageous Properties Of LDX 2101® (EN 1.4162, UNS S32101) (P5038)
177 On the Development of a New Low-Nickel Stainless Steel for Structural and Long Product Applications (P5091)
184 Super Ferritic Stainless Steels - Rediscovered (P5114)
191 AL 201HPTM (UNS S20100) alloy: a high-performance, lower-nickel alternative to 300 series alloys (P5119)

CRA pipelines
200 Lean Duplex Grades as Longitudinally Welded Pipes for Linepipes in the Oil and Gas Business (P5009)
205 Friction Stir Welding of 12Cr-7Ni-2Mo Super Martensitic Stainless Steel (P5039)
210 Effect of Back Shield Gas on Performance of GMA Welding of Supermartensitic Pipe using Matching Consumable (P5028)
215 Characterization of Sink Drawn Lined Steel Pipe for Subsea Applications (P5061)

Chemical
222 Corrosion behaviour of Duplex stainless steels in organic acids (P5029)
228 Failure Analysis of Leakage in a Heat Exchanger (P5096)
233 Corrosion resistance of super austenitic and duplex stainless steels to hypochlorite solutions (P5042)
238 Use of Corrosion-Resistant High-Alloyed Metallic Materials for Transport Tanks of Dangerous Goods (P5003)
244 The effect of filler metal on the corrosion resistance of stainless steel weldments in an organic acid environment (P5041)
248 Microstructure effect on the corrosion behaviour of AISI 304 stainless steel in sulphuric and Hydrochloric acid solutions (P5059)
Titanium

256 Some comparisons of the erosion-corrosion behaviour of titanium and stainless steels (P5099)

261 An Experimental Investigation on Machining Characteristics of Titanium Alloys using USM (P5006)

265 Modeling the oxygen diffusion profile in TA3V and T40 during heat-treatment under air between 620 and 850 °C (P5051)

Duplex

272 Thickness Limitations of Large Forgings made of 25Cr Duplex Stainless Steel Due to Reduced Toughness (P5052)

278 Influence of phase transformations on mechanical properties and corrosion properties in Duplex Stainless Steels (P5064)

284 Stress relief treatments of 22Cr duplex stainless steel EN 1.4462 (P5067)

290 Fatigue damage micromechanism analysis method in austenitic-ferritic stainless steel (P5068)

295 Investigation on the susceptibility of impact toughness to Ti, Al contents in 1Cr21Ni5Ti Duplex stainless steel (P5040)

Oil & gas - cases

300 13 Cr laser welded pipe experience in PDO (P5019)

305 Hydrogen embrittlement failures in 13Cr SMSS due to cathodic protection, a technical review (P5025)

314 Failure Investigation of Duplex Stainless Steel Piping (P5111)

318 Application of duplex and super duplex stainless steels in the offshore industry - Case histories (P5108)

Fabrication/metallurgy

326 Stainless Steel HIP PM Near-Net Shapes for Offshore Applications (P5014)

333 Machinability and mechanical properties of two stainless steels - A comparative study between centrifugally cast CF-3M and a machinability improved variant of AISI316L (P5055)

342 Corrosion protection in pressure vessel applications through the usage of clad plates (P5021)

346 Descaling of stainless steels in an oxidising salt bath (P5077)

351 Comparison of the manufacturing and quality of duplex and superduplex stainless steels by hot isostatic pressing technology and forging (P5057)

357 Investigation of multi-phases mechanical and physical characterization of fatigued stainless steel AISI 321 by neutron diffraction (P5010)

363 Technological problems in elaboration of massive casting from duplex cast steel (P5073)

369 Analysis of hot workability of Haynes 230 Ni-based superalloy by means of hot compression test (P5022)

374 Magnetically Assisted Martensitic Transformation in a 12Cr-9Ni Maraging Steel (P5076)

380 Manufacturing, Assembly and Testing of Swivel Systems for Oil and Gas Applications (P5109)

New alloys - high

388 A Nickel-Based Corrosion Resistant Alloy for Mixtures of Nitric and Hydrofluoric Acids - MC Alloy, Ni-45Cr-1Mo (P5023)

391 A High Corrosion Resistant Stainless steel "NSS-CTM 260A" developed for a chemical cargo tanker (P5062)

395 Applications for a New Ni-Cr-Mo Alloy (P5060)

400 Study on the Strengthening and Cutting Capability of a New Type of High Strength Free-cutting Precipitation-hardening stainless steel 2Cr16Ni3Mo2CuN (P5005)

404 New Development of martensitic stainless steel grades: a high performance for mechanical, machinability and corrosion resistance properties (P5050)

Gas transport

412 Efficient Welding of 9% Nickel Steel for LNG Applications (P5075)

421 Is Welding Stainless Steel For LNG Applications Easy? (P5024)

428 Welding 9% Nickel Steel for LNG Applications (P5106)

439 Use of Stainless Steels and their Welding in Maintaining an LNG Facility (P5113)

Student papers

454 The EPR-test to characterize the sensitization behaviour of 02Cr21Ni33TiAl (P5001-st)

456 Development of stainless austenitic steel alloyed with carbon+nitrogen (P5013-st)

462 Corrosion Fatigue Behaviour of Nitrided Low Alloy Steel Compared to Austenitic Stainless Steel (P5031-st)

467 Low Temperature Sensitization of Austenitic Stainless Steel (P5047-st)

471 Effect of thermal ageing and welding on microbiologically influenced corrosion of SAF 2205 type Duplex Stainless Steels (P5070-st)

477 Comparison of localised corrosion resistance of fusion zone of 2205 type DSS autogenous welds produced by CO2 Laser and TIG welding processes (P5072-st)

483 Oxidation Behaviour of P91, P92 and E911 Alloys for Supercritical Fossil Fuel Based Power Plant (P5078-st)

491 The Use of High Energy SAXS/WAXS for Structural Characterization of Stainless Steels (P5083-st)

497 Casting Simulation Process of an Austenitic Stainless Steel Used for Orthopaedic Prosthesis (P5084-st)

503 Characterization of the Functional Surface Properties of Stainless Steels (P5110-st)
