Proceedings of 2005 International Conference
On Machine Learning and Cybernetics

Volume 2 of 9

August 18-21, 2005
Ramada Hotel
Guangzhou, China

IEEE Catalog Number: 05EX1059
ISBN: 0-7803-9091-1
Library of Congress: 2005923429

Sponsored by IEEE Systems, Man and Cybernetics Technical Committee on Cybernetics, Hong Kong Polytechnic University, Hebei University, South China University of Technology, Chongqing University, Sun Yat-sen University, Harbin Institute of Technology and International University in Germany
## Contents

**Greetings**

Greetings from the Conference Co-Chairs .................................................................................. I  
Greetings from the Program Co-Chairs ..................................................................................... II

## Acknowledgements .................................................................................................................. VI

## Contributed Papers

### Control

**Adaptive System** (2)

Fuzzy Control

Guaranteed Cost Control of Uncertain T-S Fuzzy Descriptor Systems
Bao-Ping Ma, Xue-Mei Zhu and Ji Sun .............................................. 742

A Novel Switching Control Algorithm and Stabilization Condition
Bao-Zhu Jia, Guang Ren and Jun-Dong Zhang .................................. 747

Automatic Generating Numerical Control Rule Using Genetic-Based with Multiple Critical Evaluation
Bi Zeng, Yi-Min Yang and Wei Lin ................................................. 752

Stability Analysis of Fuzzy Control for A Class of Complex Uncertain Nonlinear Systems
Chang-Zhong Gong and Ai-Hong Wang ............................................ 758

Investigation on Application of Fuzzy Decoupling Control into Penicillin Crystallization Process
Chao-Ying Liu, Xue-Ling Song and Zhe-Ying Song .......................... 762

Composite Sliding Mode Fuzzy Control for Double-Pendulum-Type Overhead Crane
Dian-Tong Liu, Wei-Ping Guo and Jian-Qiang Yi ................................ 767

Fuzzy PID Control of Traction System for Vehicles
Jian Pei, Li-Ming Zhao, De-Jun Wang and Liang Chu ...................... 773

Direct Torque Control System for Induction Motors with Fuzzy Speed PI Regulator
Jia-Qiang Yang and Jin Huang ....................................................... 778

Fcmac Based on Minesweeping Strategy
Jing-Song Hu, Gui-Wu Hu, Jia-Bing Wang and Bo Liu ..................... 784

Design and Analysis of Load Balancing Mode Mobile Agent-Based in DDSS
Jun-Feng Tian, Yu-Ling Liu and Rui-Zhong Du ................................ 788

Non-Fragile LQ Fuzzy Control for A Class of Nonlinear Descriptor System with Time Delays
Jun-Sheng Ren ............................................................................. 797

A Scheme of Fuzzy Direct Torque Control for Induction Machine
Lin Chen, Kang-Ling Fang and Zi-Fan Hu ...................................... 803

A Class of Nonlinear Networked Control System Based on Exact T-S Model
Ling-Fang Chang and Hui-Guang Li ............................................... 808

Fuzzy Logic Based Robot Path Planning in Unknown Environment
Meng Wang and James N.K. Liu .................................................... 813

Fuzzy Control of A New Type of Piezoelectric Direct Drive Electro-Hydraulic Servo Valve
Miao-Lei Zhou, Zhi-Gang Yang, Wei Gao, Yan-Tao Tian, Chuan-Liang Shen and Peng Li 819

Research on Fuzzy Control Algorithm for Bed Temperature Control of Circulating Fluidized Bed Boiler
Ping Fu, Xi-Ning Yu and Hui Wang ................................................. 825

Research of Grey Predictive Fuzzy Controller for Large Time Delay System
Pu Han, Hong-Jun Liu, Li-Min Meng and Na Wang ............................ 829

Fuzzy Adaptive PD Control for Robot and Experiment Study
Shu-Huan Wen and Hua Yang ....................................................... 834

Application of GA-FNN Hybrid Control System for Hydroelectric Generating Units
Shu-Qing Wang, Zhao-Hui Li, Zhi-Huai Xiao and Zi-Peng Zhang ........ 840

The Restricted Concept Lattice and Its Formation
Su-Lan Zhang, Ji-Fu Zhang, Li-Hua Hu and Yin-Hua Li ..................... 846

Fuzzy Robust Decentralized Control of Nonlinear Interconnected Systems with Parametric Uncertainties
Tao Wang and Shao-Cheng Tong ..................................................... 851

Adaptive Fuzzy Sliding Mode Control with Unknown Virtual Control Coefficients and Perturbed Uncertainties
Tian-Ping Zhang, Jian-Dong Mei, Qi-Kun Shen and Hai-Bo Jiang ........ 857

Competitive Analysis for the on-Line Fuzzy Shortest Path Problem
Wei-Min Ma and Guo-Qing Chen .................................................. 862

Lmi-Based H-Infinity Control Fuzzy Shortest Path Problem
Wu-Neng Zhou and Pei-Yuan Meng ................................................ 868

Optimization Design Method of Fuzzy Controller Based on GA
Xiao-Ping Zong and Yan-Jie Kou .................................................. 874
Application Research of Fuzzy Data Fusion Technology with Multi-Sensor in Crystallization Process
Xue-Ling Song, Chao-Ying Liu and Zhe-Ying Song ................................................................. 878

Humanoid Robot Locomotion
Xu-Sheng Lei, Jing Pan and Jian-Bo Su ....................................................................................... 882

Design of Fuzzy-Logic-Based Terminal Guidance Law
Ya-Dong Lu, Ming Yang and Zi-Cai Wang .................................................................................. 888

Adaptive Fuzzy Logic Controller with Changeable Universe of Discourse Using Neural Fuzzy Networks
Yi Wang ....................................................................................................................................... 893

Fuzzy Reinforcement Learning and Its Application in Robot Navigation
Yong Duan and Xin-He Xu ......................................................................................................... 899

A High-Precision Fuzzy Impedance Control Algorithm and Application in Robotic ARM
Yue-Yan Chen, Ji Zhao, Jian-Ming Zhan and Si-Guo Zhu ............................................................ 905

Hybrid System

Study of Stochastic Job Shop Dynamic Scheduling
Bi-Xi Zhang, Lu-Xia Yi and Shi Xiao ......................................................................................... 911

Delay-Dependent Stability and Stabilization of A Class of Linear Switched Time-Varying Delay Systems
Chang-Hong Wang, Li-Xian Zhang, Hui-Jun Gao and Li-Gang Wu .............................................. 917

Software Architecture-Driven Runtime Environment
Chang-Yun Li, Li Jiang, Ai-Nan Liang and Li-Jun Liao ................................................................ 923

Modeling and Analysis of Networked Control Systems Using Hidden Markov Models
Fu-Chun Liu and Yu Yao ........................................................................................................... 928

The Exponential Asymptotical Stability for Distributed Parameter Stochastic Systems with Varying-Delays
Gui-Ci Chen and Qi Luo ............................................................................................................. 932

Web-Based Remote Monitoring and Control for Process Plants
Hong-Yan Li ............................................................................................................................... 936

The Intelligent Hybrid Control of the Hydraulic Governor System
Jian-Ping Sun and Xiu-Zhang Jin ................................................................................................. 942

Modeling and Stabilizing of Long Random Delay Networked Control Systems
Jin Wu, Fei-Qi Deng and Jing-Guang Gao .................................................................................. 947

Analysis and Design of Networked Control Systems with Long Delays Based on Markovian Jump Model
Lei-Ming Liu, Chao-Nan Tong and Hai-Jun Zhang .................................................................... 953

Mixed $H_\infty$ Optimal PID Control for Superheated Steam Temperature System Based on PSO Optimization
Pu Han, Yu Huang, Zeng-Zhou Jia, Dong-Feng Wang and Yong-Ling Li ...................................... 960

Stability of Nonlinear Impulsive Partial Differential Equations
Qi Luo and Yu-Tian Zhang ......................................................................................................... 965

A New Iterative Algorithm with Errors for Maximal Monotone Operators and Its Applications
Wei Li .............................................................................................................................................. 969

Experimental Study of Robot Manipulators Based on Robust Adaptive Control
Wei-Dong Chen ............................................................................................................................ 976

Scheduling and Control of Mixed Batch/Continuous Processes Based on General Hybrid Petri Net
Wei-Zhi Liao, Ru-Liang Wang and Tian-Long Gu ...................................................................... 981

Coal Gangue on-Line Recognition and Automation Selection System Based on ARM and CAN Bus
Xian-Min Ma and Xiao-Ru Song .................................................................................................. 988

Study on Supply Chain-Oriented Hybrid Planning and Scheduling System for Iron and Steel Enterprises
Xiao-Bing Liu, Hong-Guang Bo, Yue Ma and Qiu-Nan Meng ....................................................... 993

Robust Wavelets Support Vector Machine Estimation Method for Regression
Xiao-Guang Zhang, Yi-Min Li, Shi-Jin Ren and Ji-Hua Xu ........................................................... 998

Rough Set Based on Modified Chimerge Algorithm and Its Application
Xiao-Hong Gu, Di-Bo Hou, Ze-Kui Zhou and Dan Yu ................................................................. 1004

Distributed Parameter Singular Perturbation Model and Cooperative Control of Flexible Manipulators
Xiao-Tao Cao and Yuan-Chun Li ................................................................................................. 1009
Structural Controllability and Reducibility of RLC Networks with Bipolar Transistor
Xiao-Yu Feng and Kai-Sheng Lu .................................................. 1015

Robust Stabilization of Switched Systems with Input Saturation
Xing-Long Liu and Guang-Ren Duan ........................................... 1021

A Heuristic Search Algorithm Based on Hybrid-Tasks System Model for Scheduling Tasks of NC System
Xin-Hua Yao, Xue-Zeng Pan, Jian-Zhong Fu and Zi-Chen Chen ............... 1026

Structural Optimization of Dual-Plane ERT Electrode Array
Xiu-Quan Jia, Feng Dong, Yan-Bin Xu, Chao Tan and Yi-Xuan Xue ............ 1031

Centralized and Distributed Robust State Fusion Estimation
Xue-Bo Jin, Yue-Song Lin and You-Xian Sun ................................... 1037

A Novel ERT System Based on DSP and CPLD
Yan-Bin Xu, Fu-Lai Zhao, Shuang Hua, Chao Tan and Feng Dong ............ 1042

A Whole Life Cycle Model to Dynamic Composed Web Services
Yan-Ping Chen, Zeng-Zhi Li and Qin-Xue Jin ................................... 1047

Stabilization of Hybrid System with Unstabilizable Subsystems
Yaodong Pan and Katsushia Furuta ............................................. 1053

Design of Ship Electric Propulsion Simulation System
Yi Guo, Hua-Yao Zheng, Bu-Lai Wang and Ai-Di Shen ......................... 1059

Guaranteed Cost Control for Uncertain Discrete-Time Switched Systems with Time-Delay
Ying Zhang and Guang-Ren Duan .................................................. 1064

Hybrid Navigation for a Climbing Robot By Fuzzy Neural Network and Trajectory Planning
Yong Jiang, Ming-Yang Zhao, Hong-Guang Wang and Li-Jin Fang ............. 1069

The Simulation Study for Switched Reluctance Motor Drives Based on Matlab6.5
Yu-Long Cui, Xin-Chang Yu, Hao-Liang Fan and Jian-Bo Fan .................. 1076

Study on Dsp-Based Pll-Controlled Superaudio Induction Heating Power Supply Simulation
Yu-Long Cui, Kun He, Zhi-Wei Fan and Hao-Liang Fan ........................ 1082

Intelligent Control System (1)

Control Methodologies in Networked Motion Control Systems
Bing Chen, You-Ping Chen, Jing-Ming Xie, Zu-De Zhou and Ji-Ming Sa ........ 1088

Optimized Load Distributed of Power Plant Units Based on the Improved Equal Incremental Principle
Bing-Shu Wang, Wen-Liang Cao, Jian-Qiang Gao, Liang-Yu Ma, Ji Zhang and Yong-Guang Ma ........ 1094

Sensorless Control of Brushless DC Motors at Low Speed Using Neural Networks
Chang-Liang Xia and Wei Chen .................................................... 1099

Embed State Machine into DEVS to Build Complex Control System
Chen Liu, Wei-Ping Wang and Yi-Fan Zhu ...................................... 1104

Robust Fault Detection for Uncertain Systems with Time-Delay in State
Chong-Hong Wang, Hong-Ru Wang and Hui-Jun Gao ............................ 1110

Research on Parameter Identification of Friction Model for Servo Systems Based on Genetic Algorithms
De-Peng Liu ............................................................................. 1116

Designing and Analysis of A Immune Controller Based on the Improvement Varela Immune Network Model
Dong-Mei Fu and De-Ling Zheng ................................................. 1121

The Research on Metrics for Network Performance Evaluation
Dong-Yan Zhang, Ming-Zeng Hu, Hong-Li Zhang and Ting-Biao Kang ........ 1127

Most Required Goals for Extracting Heuristics in Planning
Dun-Bo Cai and Wen-Xiang Gu .................................................... 1132

Robust Absolute Stability of Interval Lurie Systems with Time-Delays
Fen Wang ............................................................................. 1138

The Electromagnetic Interference and Diagnosis of Rotor Fault for Inverter Fed Motor
Feng Lv, Xi-Yuan Jv, Ren-Pu Jiao, Shu-E Li and Yuan Li ....................... 1143

Fusion Estimation of Dynamic System Based on Multi-Speed Sensor
Feng Lv, Xi-Qing Wang, Hai-Lian Du and Yuan Li .............................. 1148
Solution of the Unequal of Workers and Tasks Assignment Problem with Restriction of Qualification
Long-Sheng Huang ................................................................. 1297

An Attribute and Role Based Access Control Model for Web Services
Miao Liu, He-Qing Guo and Jin-Dian Su ...................................... 1302

Coal Mass Estimation of the Coal Mill Based on Two-Step Multi-Sensor Fusion
Ping Ma, Hai-Lian Du and Feng Lv ............................................. 1307

Online Deadline Assignment to Reduce Output Jitter of Real-Time Control Tasks
Ping-Fang Zhou and Jian-Ying Xie ............................................. 1312

Disturbance Observer Design for Electric Aerodynamic Load Simulator
Qiang Fang, Yu Yao and Xiao-Chen Wang .................................... 1316

Guaranteed Cost Control for Uncertain Time-Delay Singular Systems
Ru-Liang Wang and Yong-Qing Liu ............................................ 1322

An Autonomous Mobile Robot Control Method Based on Hierarchical Fuzzy Behaviors
Shou-Tao Li and Yuan-Chun Li .................................................. 1327
