ADVANCES IN
STEEL STRUCTURES

Proceedings of the
Fourth International Conference on Advances in Steel Structures

13 - 15 June 2005, Shanghai, China

Volume I

Edited by
Z.Y. Shen and G.Q. Li
Tongji University
S.L. Chan
The Hong Kong Polytechnic University

Organized by
College of Civil Engineering, Tongji University
And Department of Civil and Structural Engineering,
The Hong Kong Polytechnic University

Sponsored by
The China Society of Steel Construction
The China Society of Metal Structures for Buildings
The Shanghai Society of Metal Structures

ELSEVIER
Amsterdam • Boston • Heidelberg • London • New York • Oxford
Paris • San Diego • San Francisco • Singapore • Sydney • Tokyo
CONTENTS

VOLUME I

Preface v
International Advisory Committee vii
Local Advisory Committee x
Local Organizing Committee xii

Keynote Papers

Structural Steel Design Codes: Vehicles for Improving Practice or for Implementing Research? 3
D.A. Nethercot

Direct Strength Design of Hot-Rolled and Cold-Formed Steel Compression Members 13
G. J. Hancock, D.O. Cook, R.E. Moisy and A. Yen

Roof Structure Design of Shanghai South Railway Station 21
D.S. Wang, J.L.G. Zhou and S. Li

Some Developments in Tubular Joint Research 31
J. Wardenier and Y.S. Choo

Theory, Design Criteria and Practical Applications of Curved Members in Construction 41
R. Bjorhovde

On The Treatment of Joint Rotations in Buckling Analyses of Space Frames 51
Y.B. Yang and L.J. Leu

Advanced Analysis for Steel Design: from Theory to Practice 61
W.F. Chen and S.E. Kim

Failure Mechanism of Reticular Shells Subjected to Dynamic Actions 69
S.Z. Shen and X.D. Zhi

Instability Research Of Single Layer Reticulated Shells At Tongji University 83
Z.Y. Shen, Y.Q. Li and Y.F. Luo

Beams and Columns

* Simplified Design of Crane Girders with Open Cross Sections Subjected to Biaxial Bending and Torsion 95
J. Lindner and T. Glitsch

Geometric Imperfections in Stainless Steel Cross-Sections 105
M. Ashraf, L. Gardner and D.A. Nethercot

* Invited Paper
*Flexural-Torsional Buckling of Arches under Directed Or Hydrostatic Loads
  M.A. Bradford and Y.-L. Pi 113

Tests of Aluminum Alloy Circular Hollow Section Compression Members
  J.H. Zhu and B. Young 121

Elastic In-Plane Buckling of Circular Tied Steel Arches
  M.A. Bradford, Y.X. Zhang and R.I. Gilbert 131

Behaviour and Design of Webs in High Strength Steel under Flexural Loading
  A. Wheeler and R. Bridge 137

Behaviour of Slender Fabricated High Strength Steel Columns Subjected to Biaxial Bending
  B. Uy, M. Mursi, J. Haedir and J. Lee 143

Numerical Simulation of High Strength Steel Lipped Channel Columns
  D.M. Yang and G.J. Hancock 149

Ultimate Load-Carrying Capacity of Shuttle-Shaped Box Hollow-Section Column
  K. Deng, Y.L. Guo, D.B. Hu and J.B. Liu 155

The Restraining Requirements for The Buckling-Restrained Brace
  Y.L. Guo, J.B. Liu, D.B. Hu and K. Deng 161

Study on The Out-Of-Plane Stability of Bending Cantilever Beam
  P. Lan, N.L. Lu and B. Luo 167

Elastic Stability of Centrally Loaded Partially Restrained Steel I-Sections
  M. Glaesle, M. Pircher and R. Bridge 173

Ductility of Stiffened Steel Box Member
  O. Mohamed, T. Sakimoto and T. Yamao 179

Load-Carrying Capacity and Application of Locally Buckled Hollow Section Stub
  T. Liu and Y.L. Guo 185

The Research of The Effective Length for The Column in Stability Analysis of Steel Frames with Semi-Rigid Connection
  Y. Wang and W.H. Yang 191

Effect of Two Directional Loading on Ductility and Ultimate Strength of Steel Bridge Piers with Inner Cruciform Walls
  Z.F. Wang, T. Yamao and Z. Ishii 197

Plastic Deformation of Beams in Steel Moment-Resistant Frames Subjected to Strong Earthquakes
  H. Nakahara, M. Yamanari and K. Ogawa 203

Experimental and Numerical Analysis on Steel Box-Section Beam-Columns under Cyclic Bending
  M.Z. Su and Q. Gu 209

* Invited Paper
Frames

Nonlinear Analysis of Inelastic Steel Frames
L. Xu and Y. Liu

Second-Order Analysis and Design of Pitched-Roof Steel Frames
N. Silvestre and D. Camotim

Practical Advanced Analysis for Semi-Rigid Frame Design
J. Chen

Longitudinal Bracings Requirements of Sway Buckling Industrial Frame
G.S. Tong and D. Li

Optimal Design of Special Steel Moment Frames under Extreme Seismic Loading
Y.L. Gong

Experimental Research and Finite Element Analysis on Steel Frame Structure with New Infilling Cavity Wall
Q. Gu, X.F. Liu, K.J. Guan and S.M. Peng

Experimental Research on Lateral-Load Resistance of Steel Frames with ALC Out-Hanged and In-Filled Walls
C. Wang, Y.S. Liu and B. Zhang

The Analysis of Steel Gabled Frames with Flexible Connections
X.J. Liao, Y.J. Shi and Y.Q. Wang

System Reliability Assessment of Planar Steel Frames
Y.S. Liu and G.Q. Li

Topology Optimization of Bracing in Steel Structures By Genetic Algorithm
M.R. Maheri and D. Safari

Accurate and Simplified Design Method of Staggered Truss System Considering Second-Order Effects
T. Mo and X.H. Zhou

The Integral Stability Analysis of The Long-Span Tension-Chord Portal Frame
K. Tang, B.D. Liu and J.Q. Gong

Characteristics of 3D Steel Subassemblages with Steel RHS Column and Wide Flange Beam Stiffened By External Diaphragm under Biaxial Lateral Force
W.N. Sui and M. Yamanari

Second-Order Analysis for Space Framed Structures with a Gradually Elasto-Plastic Numerical Model
K. Zhou, Q.Z. Zheng and Q.G. Song

Collapse Analysis of 3D Steel Frame By a Fibered Plastic Hinge Method
M. Shugyo, M. Shimazu and Y. Sakumoto

* Invited Paper
Dual System Design of Steel Frames Incorporating Buckling-Restrained Braces
Q. Xie

A Computational Model for Elastic Analysis of Steel Moment Frames with RBS Connection
A. Deylami and H. Habashi

Experimental Studies of Frames with Steel-Concrete Composite Beams under Low Reversed Cyclic Loading
W.C. Xue, J. Li, K. Li and F. Yang

Experimental and Numerical Studies of Double Storey Scaffolds
A.Y.T. Chu, S.L. Chan, F. Albermani and K.F. Chung

Space Structures and Shells

*Evaluation of Buckling Strength of Single Layer Reticulated Shells for Design Practice
S. Kato

*Second-Order Codified P-Δ-δ Analysis for Design of Long-Span Roofs Allowing for Δ₀ and δ₀ Imperfections- A Powerful & Matured Technology for Use by Engineers
S. L. Chan

*Introduction of Structures of Some Stadiums and Gymnasiums for Beijing 2008 Olympic Games
X.L. Liu

*Some Practical Aspects of Modeling Lattice Towers
S. Kitipornchai, F. Albermani, W.J. Kang and H.F. Lam

The Behavior of Cylindrical Steel Shells Supported on Local Brackets
C. Doerich, J.M.F.G. Holst and J.M. Rotter

Construction of Ma on Shan Indoor Recreation Centre
M.K. Tong, C.T. Wong and C.C. Choy

Elastic Buckling of Thin Cylindrical Shells under Local Axial Compressive Stresses
M.J. Cai, J.M.F.G. Holst and J.M. Rotter

The Inflection Performance Analysis of The Complex Single-Layer Cable Net under Horizontal Load
F. Sun, Y.Q. Wang, Y.J. Shi, K.Y. Luo and Y. Xu

Experimental Research and Finite Element Analysis on New Joint of Reticulated Shells
X.T. Wang and J.P. Hao

Study on The Dynamic Capabilities of Arched Corrugated Metal Roof
Y.Q. Wang, C.D. Tan and Y. Zhang

Modeling of Cable-Bar Nonlinear Finite Element of Wide-Span Transmission Line System and Analysis of Its Dynamic Behavior
X.S. Xu, Y.M. Zhang, and S. Su

* Invited Paper
A Study on Dynamic Stability of Elastic Structures By Degree of Stability of Equilibrium
  J.H. Ye and S.Z. Shen

Experimental Research on Double-Layer Cylinder Composite Grid Shell Structure
  Z.X. Yin and Z.Y. Liu

Dynamic Analysis of a Levy Dome
  J. Zhou, H.J. Wang and Q.L. Zhang

Theoretical Analysis and Experimental Study on Tensegrity System
  Z.H. Chen and J. Shi

Review of Construction Analysis Methods for Cable-Strut Tensile Structures in China
  Z.Y. Shen, Q.X. He and F.B. Zhang

A Simple Method for Form Finding of Cable Nets Based on Nonlinear Displacement Analysis
  H.X. Wan, D.H. Wu and W.L. Pu

Stability Analysis of Circular Steel Arches in a Long-Span Spheroidal Shell Structure
  Y. Zhao, X.C. Chen and S.L. Dong

Strengthening Silos and Tanks Against Elephant's Foot Buckling
  J.F. Chen, J.M. Rotter and J.G. Teng

**Thin-Walled Structures**

*Finite Element Analysis of Cold-Formed Steel Lipped Angle Compression Members
  B. Young and E. Ellobody

*Experimental and Analytical Study on Stability and Ductility of Thin-Walled Columns under Bidirectional Cyclic Load
  Y. Goto, K.S. Jiang and M. Obata

Design and Tests of Cold-Formed Stainless Steel Sections Subjected to Concentrated Bearing Load
  F. Zhou and B. Young

Erosion Effect of Geometrical and Material Imperfections on the Buckling Strength of Thin-Walled Cold-Formed Steel Members
  V. Ungureanu and D. Dubina

Material Properties of Cold-Formed Thick-Walled Steel
  A.Z. Zhu and Y.J. Guo

Analysis of Hysteretic Behavior of Cold-Formed Thin-Wall C Steel Members
  J. Dong, S.Q. Wang and X.J. Zhang

Structural Behaviour of Oval Hollow Sections
  L. Gardner

* Invited Paper
A Study on Bolted Connection of Built-up I-Shaped Member Consisting of Double Thin-Walled Cold-Formed Lipped Channels
X.M. Tang and H.W. Ma 523

The Latest Development and Application of Aluminum Alloy Roofing System
X.X. Zhang and X. Guo 529

Effect of Cutting on Initial Geometric Imperfections of Cold-Formed Steel Stub Columns with Lipped C-Section
X.P. Wang, K.F. Chung and S.S.E. Lam 535

Composite Structures and Hybrid Structures

*Innovative FRP-Steel-Concrete Hybrid Columns
J.G. Teng, T. Yu, Y.L. Wong and S.L. Dong 545

*3-D Inelastic Analysis of Hollow and Concrete-Filled Steel Columns
S.B. Gao and H.B. Ge 555

*Research on Confined Concrete Filled Tubular (CCFT) Columns
Y. Xiao, W.H. He and X.Y. Mao 563

*Nonlinear Finite Element Analysis of SCC Filled Steel Tubular Beams
H. Lu, X.L. Zhao and L.H. Han 571

*Debonding Failure Model for FRP Retrofitted Steel Beams
S.P. Chiew, S.T. Lie, C.K. Lee and Y. Yu 579

Experimental Study on Composite Frame Beam
X.Y. Cheng, X.X. Du and H. Shi 587

Experimental Research on The Bearing Capacity of Axially Loaded Composite Columns with Concrete Core Encased By Steel Tube
L.J. Wang and Y.H. Chi 593

Seismic Behavior of Post-Tensioned Precast Concrete-Filled Tube Segmental Bridge Columns
C.C. Chou, Y.C. Chen and M.S. Chien 599

Study of Holistic Resistant Behavior of Steel Frame-Concrete Tube Structure of Different Connection Types of Nodes
S.B. Dai, J. Huang and J. Zhu 605

Ultimate Capacity of Rectangular CFT Columns with High-Strength Concrete
D.M. Lue, T. Yen and J.L. Liu 611

The Behaviour of Composite Steel Beams with Precast Hollowcore Slabs in Hogging Moment Regions
D. Lam and F. Fu 617

Strength of Slender Steel Reinforced Concrete Composite Columns
G.T. Zhao, Y.H. Li, B. Li, G. Xue, Z. Han and F.B. Cao 623

* Invited Paper
Finite Element Simulation of Cable Sliding in Membrane Pocket
  Y.L. Guo and E.N. Zhang

Inelastic Behavior of a New-Type Cable-Arch Structure
  S.H. Hu and Y.L. Guo

Longitudinal Shear Strength of Concrete Flanges of Composite Beams
  X.M. Hu, W. Ramm and Q. Zhang

Hydration Heat and Shrinkage of HSS Columns Filled with Self-Consolidating Concrete
  L.H. Han, Y.F. Yang, Y.J. Li and B. Feng

Cyclic Behaviour of Self-Consolidating Concrete (SCC) Filled HSS Columns
  L.H. Han, J.T. You and X.K. Lin

Flexural Behavior of Steel Tubes Filled with Self-Consolidating Concrete
  H. Lu and L.H. Han

Applied Research of Light Steel Rib-Concrete with Dipy Construction Formwork System
  Z.Y. Ren and L.J. Wang

Experimental Study on Concentrically Compressed Stub Columns Reinforced By Concrete Filled CFRP-Steel Tube
  Q.L. Wang, G.Y. Wang and F. Han

Theoretical Analysis About Concentrically Compressed Concrete Stub Columns Reinforced By Concrete Filled CFRP-Steel Tube
  Q.L. Wang, J. Xu and Y.F. Ning

The Study on The Restraining Stiffness of Joints of Steel Beams to CFST Column
  Z. Wang, J.X. Yuan and J. Chen

Non-Linear Analysis of The Initial Stress Effect on The Behavior of Concrete-Filled Square Steel Tubular Members
  D.X. Xiong and X.X. Zha

Spatial Stress Analysis for Large Cantilevered Steel-Concrete Composite Bridge Decks
  Y. Zhang, X.D. Shao and L.F. Li

Using CFRP to Strengthen Concrete-Filled Steel Tubular Columns: Stub Column Tests
  Z. Tao, L.H. Han and J.P. Zhuang

Steel Tube Confined Concrete Structure Defect Analysis and Construction Control Method Analysis
  M.W. Yang, Y.F. Luo and G.H. Ye

Experimental Study on Expansive Concrete Filled Steel Tube
  K.C. Huo and X.C. Shu

Experimental Research on Shear Resistance of Concrete-Filled Steel Tube
  C.L. Xu, C.Z. Xiao, S.H. Cai and Y.F. Luo

* Invited Paper
Steel-Concrete Composite Beams Prestressed By External Cables: Effects at Collapse of Material and Geometric Nonlinearities
A. Dall’Asta, L. Ragni and A. Zona

A Beam Finite Element for The Shear-Lag Analysis of Steel-Concrete Composite Decks
L. Dezi, F. Gara and G. Leoni

Dynamic Response of Composite Frames with Rubber-Based Dissipating Devices: Experimental Tests
A. Dall’Asta, L. Dezi, R. Giacchetti, G. Leoni and L. Ragni

A Beam Element for Steel-Concrete Composite Beams with Shear Lag and Area Load
F.F. Sun

Connections

*Factors Influencing the Cyclic Rotation Capacity of Steel Moment-Resisting Joints
D. Dubina

*Numerical Implementation and Calibration of a Hysteretic Model with Pinching for the Cyclic Response of Steel and Composite Joints
P. Nogueiro, L. Simões da Silva, R. Bento and R. Simões

Experiments on New Joints of Concrete Filled Steel Tube Truss
B.Z. Cao, Y.M. Yang and D.Z. Liu

Non-Linear Finite Element Analysis on Mechanical Properties of Dog-Bone Rigid Connection Joint
J. Huang, S. B. Dai, M.H. Song and J. Zhu

Modelling of Semi-Rigid Composite Beam-Column Connections with Precast Hollowcore Slabs
D. Lam and F. Fu

Traditional Versus Innovative Composite Base Column Connections
G. Fabbrocino, M.R. Pecce, L. Di Sarno

Warping and Bimoment Transmission Through Diagonally Stiffened Beam-to-Column Joints
G.S. Tong, X.X. Yan and L. Zhang

Simulation and Computation of Welded Joints
J. Hildebrand and F. Werner

Calculation of The Bearing Capacity of Fillet Welds Depending on The Weld Metal and The Welding Parameters
W. Hölbling and H. Saal

Experimental Research on Hysteretic Behaviour of Tubular Joints
Y.B. He, J.P. Hao and K. Zeng

Theoretical Analysis and Application Research of The Re-Bar Beam-Column Connection
H. Jin, Q.H. Han, H.T. Wang, X.Y. Liu and Y. Xiang

* Invited Paper
Numerical and Experimental Research on Mrfs Connection with Opening on Web Beam  
   B. Li and Q.-S. Yang  

Stress Intensity Factor (SIF) of Tubular K-Joints under Balanced Axial Load - Part I:  
Parametric Study  
   Y.B. Shao and S.T. Lie  

A Study on Extended Endplate Bolted Connection of Composite Beam and Continuous  
Compound Spiral Hoop Reinforced Concrete Column  
   H.W. Ma, X.L. Han, L. Chen, Y. Zhou and W.S. Jiang  

A Mechanical Model of Semi-Rigid Beam-to-Column Steel Joints  
   R. Pucinotti  

Experimental Research on Tightening Sequences and Strain Relaxation of High Strength Bolts  
in End-Plate Connections  
   G. Shi, Y.J. Shi and Y.Q. Wang  

Seismic Behavior of Steel Beam-Column Moment Connections with Composite Effect  
   D. Su, Y.J. Shi and Y.Q. Wang  

Experimental Research on Hysteretic Behavior of Top-Seat Angles Beam-Column Connections  
   X.W. Wang  

Analysis on Housing System of Lightweight Steel Structures and Joint Connection Behavior  
   L. Xu and J. Liu  

Analysis of Structural Behavior of Beam-to-Column Composite Joints in High-Rising Steel  
Structure  

Experimental Study on Cast Steel Joint of South Railway Station in Shanghai  
   Z.B. Wang, X.Z. Zhao, Y.Y. Chen and Z.Y. Shen  

Study of Cast Steel Joints in Pudong Cadre Institute  

Comparison of Stress Concentration Between Dendritic Cast-Steel Joint and Simple Joint  
   Y.L. Wang  

Seismic Behavior of Steel Beam to Steel Reinforced Concrete(SRC) Column Connections  
   F.C.C. Weng and H.S. Wang  

Moment Connection of Steel Built-up Column Using Side Plates  
   A. Deylami and M.R. Shiravand  

Seismic Design of RBS Moment Connections Strengthened with Welded Inclined Plates  
   A. Deylami and H. Ghasemi  

Index of Contributors  
   1-1  

Keyword Index  
   1-7  

* Invited Paper
