SIAM - Society for Industrial and Applied Mathematics

The Combustion Institute - Italian Section

NINTH INTERNATIONAL CONFERENCE
ON NUMERICAL COMBUSTION

April 7-10, 2002, Sorrento, ITALY
Table of Contents

Plenary I
Modeling of Turbulent Combustion Using Large-Eddy Simulation
H. Pitsch (USA) 21

CP01 – Turbulent Combustion: LES

A power-law flame wrinkling model for large eddy simulations of premixed turbulent combustion (Paper No 015)
F. Charlette (France), C. Meneveau (USA), D. Veynante (France) 23

A power-law dynamic model for large eddy simulations of premixed turbulent combustion (Paper No 046)
F. Charlette (France), C. Meneveau (USA), D. Veynante (France) 25

Towards the generation of Turbulent Inflow conditions for Combustion LES (Paper No 076)
A. Kempf, M. Klein, R. Bauer, A. Sadiki, J. Janicka (Germany) 27

Scalar Transport Modelling in Large Eddy Simulation of Turbulent Premixed Flames (Paper No 128)
S. Tullis, S. Cant (UK) 29

DNS analysis of a generalized progress variable for LES of partially premixed turbulent combustion (Paper No 042)
P. Domingo, J. Réveillon, L. Vervisch (France) 31

Large Eddy Simulation of a Solid-fuel Jet Flame (Paper No 013)
R. Kurose, H. Makino (Japan) 33

CP02 – Numerical Methods I

Designing Adaptive Low Dissipative High Order Schemes for Long-time Integrations (Paper No 138)
H.C. Yee (USA), B. Sjögren (Sweden) 35

Performance of Several High order Numerical Methods for Supersonic Combustion (Paper No 011)
B. Sjögren (Sweden), H.C. Yee, W.S. Don (USA) 37

Compensated Operator Splitting to Couple Multiple Stiff Processes (Paper No 030)
J.P. Boris, E. S. Oran, G. Patnaik (USA) 39
Effect of the round-off errors on flame fronts governed by the Sivashinsky equation (Paper No 073)
V. Karlin (UK)

Error Control Techniques for Explicit Time Integration of the Compressible Navier-Stokes Equations in the Presence of Moderately Stiff Chemistry (Paper No 114)
S.D. Mason, C.A. Kennedy, J.C. Sutherland (USA)

Numerical Investigation of the Stochastic Reactor Model (Paper No 28)
A. Bhave, M. Kraft (UK)

CP03 – Laminar Combustion: flame structure and flame propagation

Computational and Experimental Study of Two-Dimensional Counterflow diffusion flames (Paper No 120)
G. Amantini, V.S. Santoro, D.C. Kyritsis, A. Gomez, M.D. Smooke (USA)

Numerical simulations of gas diffusion flames in microgravity on a flat plate in a flow of oxidizer parallel to its surface. Stand-off distance and boundary layer assumption (Paper No 110)
S. Rouvreau, H.Y. Wang, P. Joulain (France), J.L. Torero (UK)

Damköhler number at the tip of a diffusion edge-flame (Paper No 133)
J. Boulanger, L. Vervisch (France)

Simple chain-branching premixed-flame asymptotics (Paper No 06)
J. Dold (UK)

Effect of volumetric heat-loss on triple flame propagation (Paper No 040)
R. Daou, J. Daou, J. Dold (UK)

Effect of Zeldovich number on flame-balls with one-step chemistry (Paper No 09)
R. Thatcher, J. Dold (UK)

CP04 – Multiphase combustion: sprays

Numerical Simulation of Jet Dynamics in the Inviscid and viscous Regimes using the Level Set Method (Paper No 019)
A. Balabel, B. Binninger, M. Herrmann, N. Peters (Germany)

Analysis of mixture fraction fluctuations generated by spray vaporisation (Paper No 034)
J. Hélie, B. Bédat, T. Poinsot, O. Simonin (France)

Surface Density Concepts for Cryogenic Combustion Modeling (Paper No 068)
S. Jay, F. Lacas, S. Candel (France)

Numerical and analytical Modeling of a Radially Propagating Spray Flame (Paper No 060)
J.B. Greenberg, A. Kalma (Israel)
Design-Optimisation of an Aero-Engine Premixer-Burner by Means of Sequential Time-Dependent Multi-Phase Flow Predictions (Paper No 102)
F. Pittaluga, S. Traverso (Italy) 67

Contributions of Numerical Computations to the Design of Common Rail Diesel Combustion Systems (Paper No 022)
P. Belardini, C. Bertoli, M. Migliaccio (Italy) 69

CP05 – Turbulent Combustion: Premixed
Multicomponent Transport Impact on Turbulent Premixed H₂/O₂ Flames (Paper No 044)
J. de Charentenay, A. Ern (France) 71

Flamelet models in partially premixed combustion (Paper No 070)
C. Jiménez (Spain), B. Cuenot (France), T. Poinsot (France) 73

Numerical Simulation of Premixed Turbulent Methane Combustion (Paper No 023)
J.B. Bell, M.S. Day, J.F. Grcar (USA) 75

Integration of CFD and Linearised Theory for LPP Combustion Dynamics (Paper No 096)
C.A. Armitage, R.S. Cant, A.P. Dowling, T.P. Hynes (UK) 77

The Application of a Partially Premixed Turbulent Combustion Model to Predicting Lift off Heights of Lifted Jet Flames (Paper No 103)
J. Ranasinghe, R. S. Cant (UK) 79

Two-Fluid Modeling of Premixed Turbulent Combustion by Zone Conditioning Approach (Paper No 045)
E. Lee, K.Y. Huh (Korea) 81

CP06 – Numerical Methods II
Exploiting ISAT to Solve the Equations of Reacting Flow (Paper No 117)
S.B. Pope, M.A. Singer (USA) 83

A model for steady state flameless combustion in homogeneous isotropic turbulence (Paper No 063)
P. Gualtieri, B. Favini, C.M. Casciola, C. Bruno, R. Piva (Italy) 85

Towards Universal Model of Turbulent Combustion (Paper No 054)
V.I. Golovitchev (Sweden) 87

Fuego: an Extensible Toolkit for Building Chemical Kinetics and Thermodynamics Applications (Paper No 017)
M.A.G. Aivazis (USA) 89

Stochastic, Lagrangian algorithms for analysis of flame simulations (Paper No 024)
J.B. Bell, M.S. Day, J.F. Grcar, M.J. Lijewski (USA) 91
Simulation of Methane Combustion Using Multiprocessor Computer System (Paper No 109)
B. Chetverushkin, N. Churbanova, M. Jacobovski, N. Romanyukha (Russia) 93

CP07 – Dynamics, Stability and Bifurcation Analysis

On Analysis of Critical States for Combustion Processes by Mathematical Catastrophe Theory (Paper No 082)
V.P. Korobeinikov (Russia) 95

Propagation of Premixed Flames in Quiescent Media with Periodic Laminar Flame Speed Variations (Paper No 079)
S.R. Lee, J.S. Kim (Korea) 97

Nonlinear Dynamics of a Reverse – Flow Catalytic Combustor: Frequency-locking (Paper No 090)
E. Mancusi, G. Continillo, L. Russo, S. Crescitelli (Italy) 99

Investigation of Flame Front Tulip and Cellular Configurations (Paper No 048)
A.V. Fedorov, A.G. Istratov, N.I. Kidin (Russia) 101

Spinning Instability of Gaseous Detonations (Paper No 074)
A.R. Kasimov, D. S. Stewart (USA) 103

3D Modelling of Spinning Reaction Waves (Paper No 067)
T.P. Ivleva, A.G. Merzhanov (Russia) 105

CP08 – Chemistry: Mechanism Reduction

Analysis and Interpretation of the ILDM algorithm (Paper No 065)
P. Hung, J.E. Shepherd (USA) 107

Intrinsic Low-Dimensional Manifold Method Extended with Diffusion (Paper No 029)
H. Bongers, J. van Oijen, P. de Goey (the Netherlands) 109

A new improvement of the FPI kinetics reduction technique by taking into account heat loss (Paper No 049)
B. Fiorina, O. Gicquel, N. Darabiha (France) 111

A Chemical Reduction Method Based on FPI for Homogeneous Charge Compression Ignition Engine (Paper No 052)
O. Gicquel, M. Embouazza, D. Thévenin, N. Darabiha (France) 113

Automatically Derived Reduced Models of Chemistry-Fluid Interaction for Trace Species (Paper No 059)
J.F. Grcar, M.S. Day, J.B. Bell (USA) 115

Enhanced CSP Diagnostic Tools to Analyze Reacting Flows (Paper No 131)
M. Valorani (Italy), D. Goussis (Greece), H.N. Najm (USA) 117
MS01 Level Set Methods Applied to Combustion Problems

Level Set Methods for Tracking Discontinuities in Reactive Flow (Paper No MS011)
T. Aslam (USA) 119

The Ghost Fluid Method for Deflagrations and Detonations (Paper No MS012)
R. Fedkiw (USA) 121

Level Set Methods applied to Detonation Shock Dynamics and Other Moving Boundary Problems (Paper No MS013)
D.S. Stewart, S. Yoo (USA) 123

A Generalized Level-Set/In-Cell-Reconstruction Method for accelerating Turbulent Premixed Flames (Paper No MS014)
H. Schmidt, R. Klein (Germany) 125

MS02 – Computationally-Efficient Implementation of Combustion Chemistry

Turbulent Premixed Flames Investigated Using Direct Simulations and Reduced Chemistry (Paper No MS021)
D. Thevenin, O. Gicquel, R. Hilbert (France) 129

Mapping High Dimensional Input-Output Behavior in Reactive Dynamics (Paper No MS022)
H. Rabitz (USA) 131

Identification, Tabulation and Use of Low-Dimensional Manifolds for Combustion Computations (Paper No MS023)
S.B. Pope (USA) 133

Efficient Methods of Generating and Implementing ILDMs (Paper No MS024)
U. Maas (Germany) 135

MS03 – Topics in Premixed Flame Theory

A Unified Model of Flames as Gasdynamic Discontinuities (Paper No MS031)
B.J. Matkowsky (USA), A.G. Class (Germany), A.Y. Klimenko (Australia) 137

A Level Set Method for Flames as Gasdynamic Discontinuities (Paper No MS032)
A.G. Class (Germany), A. Bayliss, B.J. Matkowsky (USA) 139

Nonlinear Dynamics of Sequential Flames (Paper No MS033)
A.A. Golovin, A.A. Nepomnyashchy, B.J. Matkowsky (USA) 141

Multiple Solutions, Extinction and Stability of Nonadiabatic Catalytic Flames in Stagnation-Point Flow (Paper No MS034)
S.B. Margolis, T.J. Gardner (USA) 143

MS04 – Numerical Modeling of Transient Premixed Turbulent Flames: Problems and Solutions with the TFC Combustion Model

Physical Background of the TFC Combustion Model (Paper No MS041)
V.L. Zimont (Italy) 145

Table of Contents

- 9 -
### Comparison of the TFC Combustion model with Premixed Flame Experiments (Paper No MS042)
F. Dinkelacker, S.P. Reddy Muppala (Germany) 153

### Modeling of Turbulent Flames Expanding under Elevated Pressures in Combustion Bombs and Internal Combustion Engines (Paper No MS043)
A. Lipatnikov, J. Chomiak, J. Wallesten (Sweden) 155

### Simulation of Turbulent Combustion in Industrial Dry Low Emission Burners Using the TFC Model: Validation, Modelling Implications and Future Directions (Paper No MS044)
F. Biagioli (Switzerland) 157

### Plenary II
**Computational Fluid Dynamics for High Performance Engine Simulations**
T. Baritaud (Italy), C. Angelberger (France) 159

### MS05 – Computer Modeling of HCCI Combustion
**A Stochastic Simulation of an HCCI Engine Using an Automatically reduced Mechanism (Paper No MS051)**
H. Soyan, T. Løvås, F. Mauss (Sweden) 163

**A Quasi-dimensional HCCI Model for Performance and Emissions Studies (Paper No MS052)**
S.B. Fiveland, D.N. Assanis (USA) 165

**Alternatives for Modeling Autoignition in Homogeneous Charge, Compression Ignition (HCCI) Combustion (Paper No MS053)**
C.K. Westbrook, W.J. Pitz (USA) 167

### MS06 – Significance of DNS in Combustion Studies
**Analysis of a 6-Cylinders Turbocharged HCCI Engine Using a Detailed Kinetic Mechanism (Paper No MS054)**
G. Cantore, L. Montorsi (Italy), F. Mauss, P. Annéus (Sweden) 169

**DNS of Turbulent Combustion in GRID like Environments (Paper No MS061)**
M. Lange (Germany) 173

**Numerical Analysis of Hydrogen-Air Jet Diffusion Flame (Paper No MS062)**
Y. Mizobuchi, S. Tachibana, J. Shinjo, S. Ogawa, T. Takeno (Japan) 175

**Direct Numerical Simulation of Turbulent Partially Premixed Flames (Paper No MS063)**
B. Cuenot (France), C. Jiménez (Spain), T. Poinsot (France) 177

**Dynamics of Freely-Propagating Premixed Flame Edges (Paper No MS064)**
H.G. Im (USA), J.S. Kim (Korea) 179
MS07 – Pattern Forming Phenomena in Combustion

Lewis-Number Effects on Pattern-Forming Edge-Flame Propagation
(Paper No MS071)
V. Nayagam, F.A. Williams (USA) 183

Challenges in Numerical Simulation of Pattern Formation in Flames Motivated by Experiments (Paper No MS072)
P.D. Ronney (USA) 185

Modulated Rotating Wave Patterns in Combustion Experiments with Circular Symmetry
(Paper No MS073)
A. Palacios (USA) 187

Instabilities in Non-Premixed Combustion: Cells and Oscillations (Paper No MS074)
M. Matalon (USA) 189

MS08 – Numerical Modeling of Combustion in Explosions

Numerical Simulations of Shock-Induced Mixing and Combustion (Paper No MS081)
J. Bell, M. Day, V. Beckner, A. Kuhl (USA), P. Neuwald, H. Reichenbach (Germany) 193

Multi-Fluid Model of Non-Premixed Combustion in TNT Explosions (Paper No MS082)
A.L. Kuhl, R.E. Ferguson (USA) 195

Modeling Combustion of Aluminium Particles in Detonation Products Gases
(Paper No MS083)
B.A. Khasainov (Russia) 197

Generic Mechanisms during Detonation Initiation (Paper No MS084)
N. Nikiforakis (UK) 199

CP09 – DNS: Instabilities

Direct Numerical Simulation of Combustion-Induced Sound in Turbulent Diffusion Flames (Paper No 04)
M. Tanahashi, Y. Li, G.M. Choi, T. Miyauchi (Japan) 201

Artificial Removal of the Acoustic Penalty in Fully Compressible, Direct Numerical Simulation of Combustion (Paper No 007)
A. Trouvé (USA) 203

Non reflecting inflow conditions for DNS (Paper No 012)
R. Prosser (UK) 205

A priori analysis of DNS of non-premixed combustion in a mixing layer (Paper No 020)
R. Bastiaans, B. Somers, R. de Lange (the Netherlands) 207

CP10 – Laminar Unsteady Combustion

Thin front propagation in steady and unsteady flows (Paper No 135)
M. Cencini, D. Vergni, A. Vulpiani, A. Torcini (Italy) 209
Transverse Acoustic Forcing of a Reacting Mixing Layer (Paper No 106)
C. Rey, S. Ducruix, S. Candel (France) 211

Local Rectangular Refinement Solution-Adaptive Gridding with Application to Unsteady Combustion (Paper No 026)
B.A.V. Bennett, M.D. Smooke (USA) 213

A Computational Study on Propagating Spherical and Cylindrical Premixed Flames (Paper No 062)
G.R.A. Groot, L.P.H. de Goey (the Netherlands) 215

CP11 – Numerical Methods: Design and Optimisation

Uncertainty Quantification in Reacting Flow Modeling (Paper No 095)
O.M. Knio, R.G. Ghanem (USA), O.P. Le Maitre (France), M.T. Reagan, H.N. Najm (USA) 217

Design optimization of after-burner systems for combined-cycle plants (Paper No 091)
L.A. Catalano, A. Dadone, D. Manodoro (Italy) 219

Response of Offshore Structures to Explosion Loading (Paper No 037)
G. Caretta, R.S. Cant, A.C. Palmer (UK) 221

Thermal Regimes in a Shock Layer of a Space Probe in Atmospheres of the planets and sun crown. A Heating of a Space Probe Heat Protection (Paper No 101)
G.A. Pavlov (Russia) 223

CP12 – Turbulent Combustion: Submodels

Joint RANS/LES Numerical Simulations of Premixed Combustion at Strong Turbulence (Paper No 141)
V.L. Zimont, V. Battaglia (Italy) 225

A Numerical Study of Flame-Balls Embedded in Random Straining Flows (Paper No 039)
Y. D’Angelo, G. Joulin (France) 227

Vortex Dynamics in a Transverse Jet, and the Formation of Streamwise Vorticity (Paper No 050)
A. Ghoniem, Y. Marzouk (USA) 229

Statistical Modelling of Radiative Transfer in Buoyant Turbulent Diffusion Flames (Paper No 089)
A.Yu. Sneigirev, G.M. Makhviladze (UK), V.A. Talalov (Russia) 231

Poster Session

Modeling of Ignition Phenomena in Combustion Synthesis (Paper No 003)
C. Zanotti, P. Giuliani, M. Monagheddu, N. Bertolino (Italy) 233

Modeling of Isothermal Spray Flows at Different Inlet Gas Temperatures (Paper No 010)
C. Mongiello, G. Langella, C. Noviello (Italy) 235

Table of Contents
Numerical Modeling of combustion in boundary layer (Paper No 014)
G.T. Balakaeva (Kazakhstan) 237

Techniques for Incorporation of Improved Chemistry in CFD-Based Combustion Modeling (Paper No 016)
B. Adams, M. Bockelie, M. Cremer, D. Wang, W. Zhao, J-Y. Chen (USA) 239

Modeling of Moving Surfaces with Application to Combustion and Crystal Growth (or Material Science) (Paper No 100)
I. Nikolova (USA), S.S. Tabakova (Bulgaria) 241

An elementary model to validate unsteady flamelet approximations (Paper No 031)
A. Bourlioux, O. Volkov (Canada) 243

DNS and LES of H2/Air Turbulent Non-Premixed Flame (Paper No 051)
E. Giacomazzi, B. Favini, C. Bruno, R. Picchia, N. Arcidiacono (Italy) 245

Automated Reaction Path Analysis (Paper No 058)
J.F. Grcar, M.S. Day, W.Y. Crutchfield, J.B. Bell (USA) 247

A Fictitious Domain Method for Combustion Problems in Non-Regular Domains (Paper No 071)
A. Kaltayev, Zh. Ualiev, Sh. Smagulov (Kazakhstan) 249

On the Bifurcation Structure of Flame Stripes Formed in Strained Diffusion Flames by Diffusional-Thermal Instability (Paper No 078)
S.R. Lee, J.S. Kim (Korea) 251

On Modeling of Shock Waves/Gas Layers Interactions and Dusty Gas Combustion (Paper No 081)
V.P. Korobeinikov, V.I. Semenov, A.A. Illarionov (Russia) 253

Comparison and Validation of Reduction Methods Applying CSP and Lifetime Analysis for Ignition Phenomena (Paper No 087)
T. Lovás, F. Mauss (Sweden), E. Mastorakos (UK) 255

Operator-Splitting and Stiffness in Reacting Flow Computations (Paper No 094)
H.N. Najm, R.B. McCoy, O.M. Knio (USA) 257

Numerical Modeling of Condensed-Phase Oxidation in the Presence of Spin Trap (Paper No 098)
A. Németh, D. Gál (Hungary) 259

New Models for Convective and Radiative Heating of Fuel Droplets: Application to Numerical Simulation of Combustion Processes in Diesel Engines (Paper No 113)
S.S. Sazhin (Russia), L.A. Dombrovsky (UK), E.M. Sazhina, M.R. Heikal (Russia) 261

Numerical Simulation of Flame Behavior in a Combustor (Paper No 116)
J. Shinjo, S. Tachibana, Y. Mizobuchi, S. Ogawa (Japan) 263

Computational and Experimental Study of Ammonium Perchlorate Combustion in a Counterflow Geometry (Paper No 119)

Model and Methods of 2D simulation of Filtration Combustion Reactors with Arbitrary Chemical Kinetics (Paper No 041)

Table of Contents
K. Dobrego, I. Kozlov, N. Gnezdilov (Belarus) 317

**CP15 – Detonations**

*From Hot Spot to Detonation – Mechanism and Criterion (Paper No 021)*
L. Bauwens, Z. Liang (Canada) 319

*Numerical Study of One-Dimensional Detonation Instability for Acetylene-Oxygen-Argon Mixture with Realistic Chemistry (Paper No 099)*
H.D. Ng, M.I. Radulescu, J.H.S. Lee (Canada), B. Varatharajan (USA), F.A. Williams (USA) 321

*Analysis of Numerical Simulations of Detonation Diffraction (Paper No 018)*
M. Arienti, J.E. Shepherd (USA) 323

*Cellular Structures and Chemical Kinetics of H₂-O₂-Diluent Detonations (Paper No 066)*
K. Inaba, A. Matsuo, K. Tanaka (Japan) 325

*Numerical Studies on the Reaction Zone of a Detonation Wave with Detailed Chemical Reaction Model (Paper No 137)*
X.Y. Hu, D.L. Zhang, Z.L. Jiang, X.B. Lu (China) 327

*Critical Conditions of continuous gas detonation transition from a channel into unconfined volume (Paper No 134)*
D.V. Voronin (Russia) 329

**CP16 – Multiphase Combustion: Porous Media and Particles**

*Two Approaches to the Simulation of Silica Particle Synthesis in Aerosol Flame Reactors (Paper No 061)*
D. Grosschmidt, H. Bockhorn (Germany), M. Goodson, M. Kraft (UK) 331

*An Efficient Stochastic Algorithm for Simulating Nano-Particle Dynamics (Paper No 055)*
M. Goodson, M. Kraft (UK), W. Wagner (Germany) 333

*Performance Modelling of Solid Oxide Fuel Cells (Paper No 001)*
A.C. King, J. Billingham, R.J. Cooper (UK) 335

*The Infiltration Mode of Spin Combustion In a Gas-Solid System (Paper No 077)*
I. Filimonov, N. Kidin, A. Moukasyan (Russia) 337

*Computer study of electrothermal explosion in layered Ni-Al system (Paper No 056)*
V.A. Gorelski, A. Yu. Smolin, A.S. Shteinberg (Russia) 339

*On a Data Base for Theoretical and Experimental Study of Dusty Gas Combustion (Paper No 027)*
V.M. Bespalov, P.P. Grintzevich, V.P. Korobeinikov, P.V. Stulov, G. Sh. Tsitsiashvili (Russia) 341
MS09 – Ignition of Non-idealized Detonations 343

The Effect of Branched-Chain chemistry on Direct Initiation of Detonation (Paper No MS091)
H.D. Ng, J.H.S. Lee (Canada) 345

Detonation Ignition from a Temperature Gradient: Chain-Branching Kinetics (Paper No MS092)
G.J. Sharpe (UK), M. Short (USA) 347

Effect of Thermal Nonhomogeneity on the Evolution of Detonation in an Annulus (Paper No MS093)
D.W. Schwendeman, A.K. Kapila (USA) 349

Shock-Flame Interactions and DDT in the Presence of Boundary Layer and Wakes (Paper No MS094)
V.N. Gamezo, A.M. Khokhlov, E.S. Oran (USA) 351

MS10 – Numerical Modelling of Microscale Combustion 353

Extinction Limits of Catalytic Combustion in Microchannels (Paper No MS101)
K. Maruta, K. Takeda (Japan), J.Ahn, K. Borer, L. Sitzki, P.D. Ronney (USA), O. Deutschmann (Germany) 355

Numerical Simulation of Combustion in Microscale “Swiss roll” Combustors (Paper No MS102)
L. Sitzki, K. Borer, S. Wussow, P.D. Ronney (USA) 357

Large Eddy Simulations of Flow-Combustion Dynamics in a High-Aspect-Ratio Micro-Engine (Paper No MS103)
M. Kirtas, S. Menon (USA) 359

Microscale Physics of Turbulent Combustion (Paper No MS104)
C. Bruno, E. Giacomazzi (Italy) 361

MS11 – Finite Elements for Reacting Flows 363

Adaptive 3D Flame Calculations (Paper No MS111)
M. Braack, R. Becker, R. Rannacher (Germany) 365

Adaptive Finite Element Methods for Low Mach, Steady, Laminar Combustion (Paper No MS112)
E. Burman (Switzerland), A. Em, V. Giovangigli (France) 367

Stabilized Finite Element Simulations of Large-scale Reacting Flow Applications (Paper No MS113)
J.N. Shadid, T.M. Smith, G.L. Hennigan, A.G. Salinger, R.P. Pawlowski (USA) 369

Adaptive Finite Element Methods for Reactive Navier-Stokes Equations on Symmetric Form (Paper No MS114)
R. Sandboge (USA), E. Burman (Switzerland) 371
CP17 – Turbulent Combustion: Practical Systems

Analysis of Practical Turbulent Combustion Models (Paper No 140)
V.L. Zimont (Italy), M.C. Barbato (Switzerland)

Thermo-Fluid Dynamic Analysis of a Natural Gas Swirl Combustor by Experimental Techniques and Numerical Simulation (Paper No 047)
G. Solero, A. Frassoldati, T. Faravelli, A. Coghe (Italy)

The Role of Turbulent Diffusivity in the Numerical Prediction of NOx Formation in Diesel Combustion (Paper No 038)
V. Botte, M. Costa, S.S. Merola, B.M. Vaglieco (Italy)

The GDT Software Package in Application to High Gradient Chemically Reacting Flow Simulations (Paper No 139)
D.B. Babayev, A.A. Mironov, V.N. Okhitin, A.V. Zibarov (Russia)

Application of an Originally Developed Numerical Model for Simulation of Flow, Heat Transfer and Combustion in Pulverized Coal Boiler Furnace (Paper No 025)
S. Belosevic, S. Oka, M. Sijercic, L. Brkic, T. Zivanovic (Yugoslavia)

Unsteady State Numerical Simulation of the High Temperature Air Combustion in the Aluminium Melting Furnace (Paper No 124)
Y. Suwa, T. Yamamoto, H. Aoki, T. Miura (Japan)

CP18 – Chemistry: Reaction Mechanisms

Modelling Study of Low and High Temperature Oxidation of Alkenes (Paper No 053)
P.A. Glaude, B. Heyberger, R. Fournet, V. Warth, F. Battin-Leclerc, G.M. Côme, G. Scacchi (France)

Internal Representation of Molecules and Reactions in Computer Generated Chemical Mechanism (Paper No 136)
V. Warth, P.A. Glaude, F. Battin-Leclerc, R. Fournet (France)

Numerical Simulation of micro pollutants formation in a nonpremixed turbulent flame (Paper No 008)
C. Meola, G. Mazzotti, F. Sarghini, A. D’Alessio, A. D’Anna (Italy)

Oxidation of Hydrocarbons in Non-Thermal Plasma Discharges (Paper No 107)
I. Orlandini, U. Riedel (Germany)

Order of Heavy-paraffin Auto-Ignition with Respect to Oxygen Concentration Inferred from a ‘Standard/Available’ Kinetic Scheme (Paper No 033)
M. de Joannon, A. Cavaliere, R. Donnarumma, R. Ragucci (Italy)

Modeling of Soot Formation in Premixed Ethylene-Air Flames Towards Higher Pressures (Paper No 097)
A. Németh, K. Héberger, I. Zsély (Hungary), H. Jander (Germany)
CP19 – DNS: Flame Structure

Turbulent spray combustion: a DNS analysis of the flames structures (Paper No 105)
J. Réveillon (France) 397

Local flame structure analysis in a 2D mixing layer DNS (Paper No 002)
B. Somers, R. Bastiaans (The Netherlands) 399

Direct Numerical Simulation of Multibrachial Structures using Detailed Chemistry and Transport (Paper No 064)
R. Hilbert, D. Thévenin (France) 401

Modeling the autoignition of a nonpremixed turbulent flame using DNS data (Paper No 125)
F. Tap, R. Hilbert, D. Veynante, D. Thévenin (France) 403

 Flame Kernel Curvature and Structure Effects in a Turbulent Environment (Paper No 069)
K.W. Jenkins, R. Cant (UK) 405

Flame Structure and Kinetic Mechanism in Hydrogen-Air Diffusion Flame (Paper No 005)
G.M. Choi, M. Tanahashi, Y. Li, T. Miyauchi (Japan) 407

CP20 – Multiphase Combustion: Propellants and Solid Fuels

Modeling the Thermomechanical Structure of Solid Propellant Flames (Paper No 085)
I.R. Kuznetsov, D. Stewart (USA) 409

Three-dimensional heterogeneous propellant combustion (Paper No 036)
L. Massa, T.L. Jackson, J. Buckmaster, M. Campbell (USA) 411

Nonsteady Combustion of Composite Solid Propellants (Paper No 104)
S.A. Rashkovsky (Russia) 413

Numerical Analysis of Coal/Biomass Co-Firing in Pulverised Fuel Boilers (Paper No 093)
B. Moghtaderi, C. Meesri (Australia) 415

Characterisation of the Formation of NOx During the Combustion of Volatiles from Municipal Solid Wastes Using a Successive PSR Approach (Paper No 108)
T. Rogaume, M. Auzanneau, F. Jabouille, J.C. Goudeau (France) 417

Numerical and Experimental Study of Biomass Combustion Behavior (Paper No 092)
Y. Matsushita, A. Goto, M. Shoji, T. Yamamoto, H. Aoki, T. Miura (Japan) 419

CP21 – Turbulent Combustion: Deflagrations, Jets and Fires

Flame Acceleration Distance in Obstacle-Laden Tubes (Paper No 043)
A. Veser, W. Breitung, S. Dorofeev (Germany), A. Efimenko (Russia) 421
Numerical Study of Combustion and Effects of Hydrocarbon Fuel Clouds (Paper No 088)
G. Makhviladze (UK), S. Yakush (Russia) 423

Numerical Simulation of Fuel-Droplet-Propane Releases after Tank Failure (Paper No 130)
S.V. Utyuzhnikov (UK) 425

Ignition and Flame Propagation in an Impulsively Started Fuel Jet (Paper No 075)

2D and 3D Simulation of Supersonic Hydrogen Jets Combustion in a Supersonic Air Flow (Paper No 072)
A. Kaltayev, A. Naimanova, Sh. A. Ershin, U.K. Zhapbaspayev (Kazakhstan) 429

Parallelization and Integration of a Large Scale Hydrocarbon Pool Fire in the Uintah PSE (Paper No 122)
R. Rawat, J.P. Spinti, W. Yee, P.J. Smith (USA) 431
