BRIDGING THE GAP:
Transforming Knowledge into Action through Gaming and Simulation

Edited by Willy Christian Kriz & Thomas Eberle
## Contents

### Preface  ................................................................. 6

### Theory, Methodology and Potentials of Gaming Simulation

#### Play as a crucial activity in leisure and labour;
Rolf Oerter ............................................................ 9

#### The Depth and Breadth of Games and Simulation;
Richard D. Teach .................................................... 19

#### Translating simulation results into real-life performance improvement: a practitioner's view;
Ivo Wenzler ............................................................ 33

#### Challenging the Dominant Paradigm: Evidence Supporting Time-Based Simulation Gaming;
Timo Lainema .......................................................... 42

#### Towards a Choreography of Gaming;
Pieter van der Hijden ................................................. 51

#### The use of software focused on the analysis and simulation of complex systems to plan and create Gaming Simulations;
Paola Rizzi ............................................................. 61

### Politics and Strategic Behaviour

#### The Interpretation of Players' Behavior in the Gaming-Simulation of Politics;
Masayoshi Kuboya ..................................................... 72

#### A three person chess game: Coalition formation and strategic behavior;
Ralf Hansmann, Helmut W. Crott, Maurus Gamper, Martin Haaf & Roland W. Scholz ........................................... 82

### Management, Policy Making and Decision Making

#### Strategic Human Resource Management: The PERFORM™ management game framework;
Jan H.G. Klabbers ...................................................... 93

#### The Discipline of the Policy Exercise;
Richard D. Duke & Jac L. A. Geurts ............................ 112

#### A Simulation-Gaming Approach to Collaborative Decision-Making for Sustainable Urban Renewal;
Pieter Bots, Igor Mayer, Ellen van Bueren, Robin Seijdel & Haiko van der Voort .................................................. 124

#### Serious Gaming for Infrastructure Design and Management: Prototypes of VENTUM ON LINE and SIM MV2;
Stijn-Pieter van Houten, Geertje Bekebrede, Richard Scalzo, Armand Moeis, Nathan Bowden & Igor Mayer .................. 134
Combining various time scales though joint use of Agent Based Modelling and Role Playing Games: application to a river basin management game;  
O. Barreteau, G. Abrami & S. Chennit ................................. 144

Model United Nations Online (MUNO): a study of a policy exercise using Internet Gaming; Koen Matthys & Jan H. G. Klabbers .................. 154

Knowledge Management and Information / Communication Technology

On the path to a new learning culture – the contribution of web-based business games;  
Heinz Mandl ................................................................. 163

Business Simulations within Executive Education – The Trade-off between technological Opportunities and intended Learning Objectives;  
Hans-Jörg Fechner & Andreas Nill ........................................ 175

Learning Knowledge Management in a Collaborative Game:  
Effects of Player Preparation and Visualization of Variables;  
Rijanto Purbojo & Robert de Hoog ...................................... 185

The KM Quest business simulation model: supporting acquisition of decision-making skills for knowledge management;  
Irina Shostak & Robert de Hoog .......................................... 198

Authenticity in Learning: Transactional Learning in Virtual Communities;  
Paul Maharg ................................................................. 206

Knowledge Building in Online Simulations with Sieberdam/ROCS;  
Karen Jager & Rudi Holzhauer ............................................. 216

The Knowledgepol Project: A Tool for Making Knowledge Act;  
Riin Saadžärv, Katre Talviste & Anne Villems ....................... 227

Crisis and Emergency Management

MS ANTWERPEN: A Simulation for Emergency Management Training;  
Stefan Strohschneider ..................................................... 235

‘Crossroad: Kobe’: A training tool for disaster preparedness and response;  
Toshiko Kikkawa, Katsuya Yamori, Tsuyoshi Ajiro & Haruo Hayashi .. 245

Experiential Learning and Education

Learning Communities in Simulation and Gaming;  
Amparo García-Carbonell, Frances Watts & Begoña Montero Fleta ......................................................... 254

Using Experiential Learning in a Service Learning Application of Electronic Business for Preparing Upper Class Undergraduate Student to Embark in the Work World;  
Nina McGarry & John Lobuts ............................................. 263

Culture at play;  
Mª Ángeles Andreu-Andrés & Miguel García-Casas .................. 273
Effects of experiencing outdoor challenges - canyoning;
Thomas Eberle .......................................................... 278

Environmental Education

Regional environmental education involving children's play and games -
A new gaming simulation of local citizens in cooperation with children;
Shinobu Kitani, Kiyoshi Arai, Tadashi Hasebe,
Noriaki Nomura, & Ryuji Amano .................................. 289

"Green succeeds": a simulation game for environmental education –
development and evaluation;
Willy Christian Kriz, Michaela Schmitt,
Stefanie Thomé & Kathrin Ziegleder .......................... 299

Facilitation, Debriefing and Evaluation

Researching Congruency in Facilitation Styles;
Elyssebeth Leigh & Laraine Spindler .......................... 309

What should you ask, and why?;
Mieko Nakamura ..................................................... 318

Evaluation in the context of collaborative/cooperative learning;
Beverly Rising .......................................................... 326

Education and Training for Business and Economy

SIMGAME – transforming theoretical business studies knowledge into action;
Matthias Puschert & Jürgen Weinert ......................... 332

Theory-oriented evaluation of gaming simulations - The case of Simgame;
Jan Hense ................................................................. 339

Evaluation of the EU-Project “SIMGAME” in business education;
Willy Christian Kriz & Jan Hense ............................. 352

Insurance Industry Simulation Games between Knowledge and Action;
Ralf Klotzbücher ....................................................... 364

Simulation and gaming in public administration: how to teach financial
and budgetary management;
Andrei E. Volkov, Alexander A. Klimov, Vyacheslav V. Shoptenko,
Michael J. Tugaev & Svetlana I. Lysova ..................... 377

The Benefits of Simulations in Entrepreneurship Education: Presentation
of a Start-Up Simulation Approach and First Evaluation Results;
Eberhard Auchter & Moritz Keding .......................... 385

Software-Based Simulation: A Case Study of a Business School;
Vinod Dumblekar ...................................................... 395

Tool for Simulation Road Maintenance Management;
Juozas Patasius, Giedrius Siaudinis & Martynas Patasius .... 405

Role and place of the role games in the quick preparation
of tour guides for work in Europe;
Tatiana Neshcheret, Larisa Taratina & Irina Yakhimovich .... 412
