Sixth International Conference on Tall Buildings
Mini Symposium on Sustainable Cities
Mini Symposium on Planning, Design and
Socio-Economic Aspects of Tall Residential Living Environment

Hong Kong, China
6 – 8 December 2005

Editors

Y K Cheung • K W Chau
The University of Hong Kong

Organisers

The University of Hong Kong
Tongji University
China Academy of Building Research
CONTENTS

Preface v

Organisers vi

Organising Committee vii

Technical Committee viii

Supporting Organisations ix

Opening Address and Keynote Papers

The Reform and Development of the Engineering Education in China
Wu, Q. 3

Sustainable Development of Tall Buildings in Hong Kong
Lo, Y.C. 8

Future Directions for the Development of Tall Buildings
Ayres, P. 14

Carbon Fuels and Industrialisation: Reduction of Energy Demand with Special Reference to Tall Buildings
Fordham, M. 17

Theme Papers

Policies and Planning of Tall Buildings in Hong Kong
Wu, M.H.H. 29

The Shifting Paradigms of High-Rise Living
Yuen, B. 33

The Challenge of Managing the 88-Storey Two International Finance Centre in Hong Kong
Ho, T.H.K. 39

A City Beyond Tall Buildings — Rediscover City Value and People Value
Ng, M. 49

Sustainable Tall Buildings — From an Energy Perspective
Poon, O. 55
Brief Introduction to Chinese Revised Technical Specification for Concrete Structures of Tall Building

Huang, X.

Framed Structure

Behavior of Concrete Frame-Corewall Structure with Non-Continuous Exterior Frame Beams

He, X.G.

Test Research on Beam-Wall Semi-Rigid Joint in Super High-Rise Hybrid Structure

Zhou, D., Liu, A., Zou, X. and Zhu, H.

Application of Strut-and-Tie Method on Outrigger Braced Core Wall Buildings

Analysis of Shearing Stiffness of Column Related to External Forces in Frames

Wu, B.

Time Dependent Differential Shortening of Reinforced Concrete Columns in Tall Buildings

Lee, K.W. and Lo, S.H.

Seismic Engineering

Design of Energy Dissipation-seismic Reduction of One Tall Building and It’s Shaking Table Test Verification

Chao, S., Yang, F. and Qing, W.

Dynamic Characteristics and Seismic Response Analysis of Multi-Tower Structure Connected with Circular Corridor

Zheng, Y. and Chen, Y.

Finite Element Analysis on Seismic Properties of Mid-High Rise Steel Braced Frame

Huang, Y., Wang, Y.Q., Chen, H. and Shi, Y.J.

Comparative Research on Displacement Control Scheme of High-Rise Building in High Seismic Intensity Area

Gu, W.

Design Principles of Asymmetrical Building Subject to Horizontal Earthquake and Application in Shen Zhen International Mayor Building

Wei, L., Wang, S. and Yuan, C.M.

Elastic Seismic Analysis of RC Core-Tube Steel Frame Hybrid Structures with Different Damping Models

Wang, Y., Wen, H. and Wang, F.

Variable Friction Dampers for Earthquake Protection of Coupled Building Structures

Ng, C.L. and Xu, Y.L.

</table>
Real-Time Control of Internal Force of Retaining Structure for the Deep Pit
Li, S.H., Sun, M. and Xu, W. 229

Prediction of Behavior of Piled Raft Foundation for Shanghai World Financial Center of 101-Storey Using
Comparison Concept
Gong, J., Zhao, X. and Zhang, B. 233

Piled Raft Design Process for a High-Rise Building on the Gold Coast, Australia
Moyes, P., Poulos, H.G., Small, J.C. and Badelow, F. 241

A Field Study on Super-Tall Building/Super-Long Pile/Thick Raft Interaction in Shanghai
Fan, Q., Dai, B., Deng, W., Ai, Z. and Zhao, X. 250

Simplified Dynamic Finite-Element Analysis for Three-Dimensional Pile-Grouped-Raft-High-Rise Buildings
Xiong, H., Lu, X. and Huang, L. 258

Soil Response and Group Interactions in Torsionally Loaded Large-Diameter Bored Pile Groups
Zhang, L. and Tsang, C.Y.M. 267

Ground Movements due to Excavation with Lateral Supporting System
Lau, T.W. and Yang, J. 274

Limiting Force Profile and Laterally Loaded Pile Groups
Guo, W.D. 280

Practice of “2 in 1” Technology in Design and Construction of Deeply Excavated Foundation for
High-Rise Building
Chen, S. and Xu, X. 286

Numerical Analysis of the Soil-Foundation-Supporting Pile-High-Rise Building Dynamic Interaction System
Li, P., Lu, X., Zhang, H. and Chen, Y. 291

An Analytical Model to Estimate Load Capacity Possessed by Supporting Soil for Piled Raft Foundations
Zhu, C., Yan, X. and Bi, S. 302

Three-Dimensional Analysis of Torsionally Loaded Large-Diameter Bored Pile Groups
Zhang, L. and Tsang, C.Y.M. 311

Design and Construction of the Joint Node Used in the Deep Foundation of Top-Down Construction Method
Zhao, Q. and Xie, J. 318

Design Principle for Large-Area Thick Raft Foundation under Tall Buildings
Gong, J. F., Huan, X. L. and Teng, Y. J. 322

Vertically Loaded Single Piles in Sand Subjected to Lateral Soil Movement
Guo, W.D. and Qin, H.Y. 327
Response of Axially Loaded Pile Groups Subjected to Lateral Soil Movement — An Experimental Investigation
Guo, W.D. and Ghee, E.H.

Development of the Apparatus for Quality Control of Rushed Stone Pile
Chen, L., Liu, Z., Wangg, B. and Liu, J.

Experimental Study on Reinforced-at-High-Stress-Region Soil-Cement Retaining Structure for Deep Foundation Pit
Zhu, D.

Concept of Plastically Bearing Pile and Its Engineering Application

Case Studies

Tubular Systems for Tall Office Buildings with Special Cases from Turkey
Sev, A.

Differential Deformations of Columns and Cores in Tall Buildings — Assessment, Monitoring and Correction Measures
Boonlualoah, S., Fragomeni, S., Loo, Y.C. and Baweja, D.

China Central Television New Headquarters, Beijing, China

The Structural Design and Construction of “Three Pacific Place”, Hong Kong SAR, China
Ng, G.S.L. and Tsang, P.S.C.

Structural Design Challenges for Twin Tower of “Gate to the East”, Suzhou China
Tsui, J., Gibbons, C., Kwok, M. and Ng, G.

The Structural Design of the Mega Tower, China World Trade Centre Phase 3, Beijing China
Kwok, M., Gibbons, C., Tsui, J., Liu, P, Wang, Y. and Ho, G.

The Construction Tracing and Simulating Analysis for High-Rise Leaning Steel Building Structures
Guo, Y.L., Dong, Q.L. and Hu, D.B.

Steel Structure Design of Zhongguancun Financial Center Tower
Fan, Z. and Hu, C.

The Choice of Structural Forms and Use of Structural Materials of Three Landmark Tall Buildings in Hong Kong: Central Plaza, Two International Finance Centre, International Commerce Centre
Wind Engineering

Wind Tunnel Studies on the Behaviour of a High-Rise Building
Zheng, S. and Xue, S.

Wind Tunnel and CFD Studies on Wind Flow around a High-Rise Building with a Refuge Floor

Wind-induced Vibration Response Analysis of Long Span Steel Spatial Corridor
Zheng, Y. and Cheng, X.

Integration of GPS with Accelerometer for Measuring Total Displacement Response of Tall Buildings
Chan, W.S., Xu, Y.L. and Ding, X.L.

Parameters Affecting Wind-Driven Rain and Its Effect on High-Rise Buildings
Choi, E.C.C.

Wind-Induced Dynamic Response Analysis for Power Transmission Tower by PDEM
Zhang, L. and Li, J.

Effects on Nonlinear Damping and Time Constant on Wind-Induced Responses of a 79-Storey Tall Building
Wu, J.R., Liu, P.F. and Li, Q.S.

Wind Load Estimation for a Practical Tall Building Considering Topographical Effect
Li, Y., Liu, Z., Xia, J. and Tamura, Y.

Transfer Structure

Scheme Comparison between Primary Beam and Secondary Beam in the Transfer Structure of Tall Buildings
Liu, Y. and Lin, R.

Analysis of Transfer Plate Structures Using 3D Coupling Element
Lo, S.H., Cheung, Y.K. and Sze, K.Y.

The Theoretical Analysis and Engineering Practice of Overlong Jointless Transfer Structures
Zhou, S. and Gu, W.

Measures to Alleviate Shrinkage Problems in Large Reinforced Concrete Podium Structures

Computer Modelling and Analysis

The Research and Development of Post-Processing System for CAD of High-Rising Steel Building Based on
3D Solid Model
Chang, Z., Yang, H. and Zhang, Q.
Optimization of Reinforced Concrete Structures with Genetic Algorithm
Wong, K.I. and Lo, S.H.

Optimum RC Structural Design System Builds-C in an Intelligent Building Design System i-Builds
Choi, C.K., Kwak, H.G. and Kim, J.E.

Multilevel Optimization for Structural Design of Tall Buildings
Gong, H., Chang, T.Y.P., Li, G.Q. and Chen, Q.

Nonlinear Finite Element Analysis of Reinforced Concrete Frame under Different Lateral Loading Patterns
Jia, X., Liu, X. and Yuan, Y.

Study on Interactive Graphical Input and Calculation System of Frame Joint
Xu, Q., Zhang, Q. and Yang, H.

IFC Based Design Integration between Architectural and Structural Models
Deng, X.Y., Chang, T.Y.P. and Wang, G.J.

Study on Tall Building Structure Analysis
Liu, H. and Zhao, N.

Application of Integrated CAD Framework in Tall Building Design
Long, J., Kuang, J.S. and Chang, T.Y.P.

Virtual Implementation of RC Frames Push-Over Test Based on the Object-Oriented Programming Method
Zhou, Y., Liu, X. and Yuan, Y.

Innovative Technology

Optimization of Scaffold Supporting System for Slab Transfer Storey
Cai, S., Chen, Z. and Huang, Y.

Dynamical Property Analysis of Self-Climbing Scaffold in High-Rise Building
Chen, C., Xie, X. and Xu, W.

Working State Analysis and Hydraulic System Design for Excavator
Uk, R.Y., Liu, Z. and Huang, C.

Research on Intelligent Control of Bulldozer’s Transmission
Zhang, C., Liu, Z. and Du, F.

Innovative Design and Construction Technologies for Building Internal Partitions for Super Hi-Rise Buildings on an International Basis
Abomoslim, S. and Russell, A.D.
RC Structure

Concurrent Flexural Strength and Ductility Design of Normal- and High-Strength Concrete Beams
Ho, J.C.M. and Kwan, A.K.H.

Complete Nonlinear Behaviour of Normal- and High-Strength Concrete Beams under Cyclic Loading
Bai, B.Z.Z. and Au, F.T.K.

Numerical Study of Plate Strengthened Deep RC Coupling Beams with Dynamic Set Anchors
Su, R.K.L. and Zhu, Y.

A Method for Determining Optimum Locations and Number of Stiffening Coupling Beams in Coupled Shear Wall Structure
Liu, Q., Liang, X. and Deng, M.

A Breakthrough in Precasting of Public Housing Blocks in Hong Kong
Lam, S.C., Chung, K.C. and Sham, S.W.

Steel Structure

Experimental Investigation and Simulation Analysis of New Steel Shear Walls with Slits
Wei, D., Wen, P. and Li, L.

Effects of Transverse Welds on Aluminum Tubular Columns
Zhu, J. and Young, B.

Experimental Investigation of Cold-Formed High Strength Stainless Steel Compression Members
Young, B. and Lui, W.M.

Static Behavior of Buckling-Restrained Steel Plate Shear Walls
Guo, Y.L. and Dong, Q.L.

Optimized Location of Energy-Dissipation Braces in Tall Buildings with Irregular Floors
Chao, S., Yang, F. and Hu, Y.

Management Issues

Applying Wireless Transmission Technique to Improve Construction Management in Tall Buildings
Lin, L.K., Cheng, C.L., Li, S.X. and Lin, P.C.

Distinguishing the Decrepit from the Old: Is Building Age a Good Proxy for Building Performance?
Wong, S.K., Cheung, A.C.K., Yau, Y., Chau, K.W. and Ho, D.C.W.

Fire Disaster and Prevention Management of Tall Buildings
A Study on the Debonding of External Wall Tile for High-Rise Buildings in Hong Kong

Sprinkler System Design for Auditorium in the Theatre
Liu, Z. and Fan, S.

A Framework for Monitoring Rework in Building Projects
Palaneeswaran, E., KumaraSwamy, M.M., Ng, S.T. and Love, P.

Cost Comparison Study of Plasterboard Drywall Partitions vs. Traditional Masonry/Concrete Partitions in High-Rise Residential Buildings, Shanghai
Chen, S.

Study on the Economical Efficiency Performance and Comparison between Reinforced Concrete Hollow Girderless Floor and Common Floors
Wu, X., Xiong, X. and Huang, D.

Enabling Automation in Tall Building Works with Wireless Technologies and Tagging Devices
Palaneeswaran, E., Ng, S.T., KumaraSwamy, M.M. and Cheung, D.W.

Criterion to Evaluate the High Office Building
Wang, J. and Zhu, H.F.

Composite Structure

Design and Research for a Tall Building of Concrete Filled Square Steel Tube
Ding, J., Chao, S. and Chen, J.

Experimental Study on Concrete-Filled Steel Tube Structure Subjected to Compression and Bending in High Rise Buildings
Chao, S. and Wu, M.

Experimental Investigation of Concrete-filled High Strength Stainless Steel Tube Columns for Tall Building Construction
Young, B. and Ellobody, E.

Structural Analysis of the Apartment Tower of Fortune Center Phase Sited in Beijing
Zhang, T., Xiao, Z., Li, L., Zhang, R. and Lui, B.

Composite (Hybrid) Systems for Tall Buildings
Sev, A.

Other Structural Aspects

Construction Technology for Super High-Rise Buildings
Yao, Y., Zhang, S. and Huang, H.
Collapse of a Piled Industrial Building due to Surcharge Loads  
Zhu, B.T. and Yang, M.  

Research on the Application of Pre-Stressed Technology to Floor of Super Tall Building  
Xiong, X., Cai, Y. and Wang, J.  

Effect of Concrete Strength on Shear Resistance of Stud Connectors and Moment Resistance of Composite Beams  
Hu, X., Yang, W. and Zhang, Q.  

Research on Calculating Methods of Storey Drift for Reinforced Concrete Shear Wall Structures  
Deng, M., Liang, X. and Liu, Q.  

Urban Planning and Development  

Better Underground Utility Services Design for Sustainable Cities  
Lam, K.C.  

Earth Environmental Problems in City Construction  
Ma, B. and Lin, L.  

Pilot Survey on Perceptions and Use of Open Space in Two Selected Mixed Use Residential Developments in Hong Kong  
Coorey, S.B.A. and Lau, S.S.Y.  

The Effects of Compact Neighborhood Design on Pedestrian Behaviour in Contemporary Chinese Cities — Cases Studies from Urban Guangzhou  
Ou, Y., Jia, B. and Lau, S.S.Y.  

The Relationship between Water and Landscape  
Liu, J.  

Urban Living Space  

Fantasy and Spatiality: High-Rise Living Buildings in Contemporary Chinese Cities  
Li, H.  

Property Price, Floor Level and Building Density  
Wong, S.K., Chau, K.W., Yau, Y. and Cheung A.K.C.  

Air Quality and Property Prices in High Density Urban Areas  
Chan, A.T., Chau, K.W., Wong, S.K. and Lam, K.  

A Study of Microclimate Conditions in Outdoor Spaces of High-Rise Residential Developments  
Giridharan, R., Tai, J. and Lau, S.S.Y.
An Initial Environmental-Epidemiological Analysis of the Spread of SARS at a High-Rise Housing Estate in Hong Kong
*Lai, L.W.C., Chan, K.W., Ho, D., Lam, G. and Lin, V.*

**Energy Efficiency, New and Renewable Energy**

A Systemic Simulation Model and Experiments on Vertical Ground Heat Exchangers in GCHP Systems
*Cui, P., Yang, H. and Fang, Z.*

Future Living — Safe, Smart and Efficient Use of Energy
*Chow, T.F.*

Implications of Solar Chimney Size for Ventilation
*Haase, M. and Amato, A.*

Building Devices Control System Based on Ethernet and CAN and its Application in Lighting Scene Project
*Xu, A., Zhang, Z., Liu, J., Li, R. and Ding, C.*

Design Characteristics of the Electric System for Provincial Mobile Telecommunications Hub Building
*Na, H.*

**Sustainable Development — Cases**

The New Police Headquarters — Arsenal House at Arsenal Street, Wanchai: Small Footprint, Big Expectations
*Wilson, A., Yeung, A. and Fung, A.*

Sustainability of a Tall Building in Hong Kong — Two International Finance Center
*Wong, E. and Lam, B.*

Suggesting a New Lifestyle in Asia Roppongi Hills in the Very Heart of Tokyo, A Compact Neighborhood where Workplaces and Residences are with Close Proximity — A Model for the Next Decade
*Watahiki, M. and Namba, H.*

Air Quality and High-Rise High Density Residential Environment in Hong Kong
*Edussuriya, P.S., Ye, A.M. and Chan, A.T.Y.*

Two IFC
*Leung, J. and To, A.*

**Sustainability Assessment**

The New Intelligent Building Index (IBI) for Buildings around the World — A Quantitative Approach in Building Assessment and Audit Experience with the Hong Kong Tallest Building, Two International Finance Centre (420m and 88-storey High)
*Chow, L.K.H.*
Tall Buildings: Measures of Green and Sustainable!

*Burnett, J.*

Hong Kong Building Environmental Assessment Method

*Chan, P. and Chu, C.*

The Cultural Shift of the Construction Industry of Hong Kong under the Influence of Sustainable Development

*Poon, C.S. and Yip, R.C.P.*

Ecological Energy Consumption Serialization of Highrise Housing in Shanghai

*Song, D. and Guo, F.*

**Sustainable Design**

A Study of Architectural Design Factors for Tall Office Buildings with Regional Climates Based on Sustainability

*Cho, J.S.*

Are Re-Entrants Good or Bad? An Empirical Test in Hong Kong

*Wong, S.K., Yau, Y., Cheung, A.K.C., Chau, K.W. and Ho, D.C.W.*

Towards Bioclimatic High-Rise Buildings: Is a Bioclimatic Design Approach Appropriate for Improving Environmental Performance of High-Rise Buildings?

*Law, J.*

Development in Enhancing the Standards of Lift Installation for Tall Building

*Mok, C.K., Wu, E.W.K. and Mui, S.Y.*

A Discussion on Design & Technology of Energy-Saving Environment-Friendly High-Rise Buildings

*Yan, H. and Chen, M.*

**Post-Occupancy Operation, Maintenance and Management**

Corporate Environmental Strategies — A Stakeholder Management Perspective

*Wong, T.K.T. and Wong, E.*

Sampling Point Densities for Assessing Indoor Air Quality

*Hui, P.S., Wong, L.T. and Mui, K.W.*

Hong Kong: Road to Super Sustainable City

*Yeung, C.C.T. and Lee, K.L.T.*

Developing a Life Cycle Assessment Tool for Commercial Buildings in Hong Kong

*Leung, W. and Tam, W.K.*
Energy Efficiency Towards Sustainability
Wong, E. and Chan, E.K.S.

Living Environment

Can We Live “High and Healthy”? 1073
Townsend, M.

The Problems and their Technological Solutions of Supertall Living in Tokyo Area
Kamiya, H. and Konami, H.

How Willing are We to Live in Tall(er) Housing?
Yuen, B., Yeh, A., Appold, S.J., Earl, G., Ting, J. and Kwee, L.K.

Age-Segregation and Quality of Life of the Elderly in Studio Apartments
Addae-Dapaah, K.

Delineation of View Rights in Development of High-Rise Buildings — The Case of Vancouver
Lorne, F., Cheung, D.T.M. and Ye, A.M.

Solving Externalities Problems Using Innovative Architectural Design
Wong, W.S., Lorne, F. and Chau, K.W.

Total Building Evacuation Strategy for High Rise Buildings
Wong, K.H.L. and Luo, M.C.

Optimized Interior Space Design of Small High-Rising Flats
Wu, Y.

Mixed-Use High Rise in UK; An Urban Renaissance?
Wood, A.

Changing the Social and Economic Fabric of Singapore
Timothy Johnson
