Modified AHP to Determine the Weights of Assessment Factors With Many Indexes  
(New Approach) .................................................. 1640
S. Mohghada Hashemiparast, K.N.T University of technology, Iran (Islamic Republic Of)

Systematic Development of Courseware Systems .................................................. 1646
Claus Pahl, Dublin City University, Ireland

Modeling Audio-Based Virtual Environments for Children with Visual Disabilities  
Jaime Sánchez, Nelson Baloian, University of Chile, Chile

A Methodology for the Development of Didactical Software for the Physical Education  
and Sports .......................................................... 1660
Alexander Silva, Silvina Santana, University of Aveiro, Portugal

How Computer Simulations Can Assist Model Generation In Students: Providing an  
Adaptable Structure to Guide Student Learning .................................................. 1666
David Sprague, Svetlana Trey, Sharmila Pillay, Samia Khan, University of British Columbia, Canada

Dependability in E-Assessment .......................................................... 1674
Edgar Weippl, Vienna University of Technology, Austria

The effects of personalized computer-based instruction on mathematics problem solving in  
Taiwanese student's performance and attitude .................................................. 1680
Chiu-Jung Chen, University of Southern California, USA; Pei-Lin Liu, Hsing-Kuo University of Management,  
Taiwan

Multimedia Interactive Software for Infancy: Analysis of the Communicative  
Effectiveness, the Usability and the Function of the Iconic Code ......................... 1687
Rita Ciceri, Federica Biassoni, Paola Colombo, Catholic University of Sacred Heart, Italy

Effects of Interruptions on Readers' Actual and Perceived Reading Performance in  
Hypertext .......................................................... 1694
Diana DeStefano, Aryn Pyke, Matthew F. Rulege-Taylor, Jo-Anne LeFevre, Carleton University, Canada

Lectures On DEmand: the architecture of a system for delivering traditional lectures  
over the Web .......................................................... 1702
Mauro Dolzani, Marco Ronchetti, Università di Trento, Italy

The Production Model of Digital Video Course at the University of Oulu .................. 1710
Kari Liukkonen, Jarkko Aro, Pasi Karppinen, University of Oulu, Finland

Pedagogical Applications and Redesign of A Web Mediation Infrastructure .......... 1717
Samuel Martin, Stepanny Nymbayire, Cassandra Schmitz, Samuel Rebelsky, Grinnell College, USA

Cooperative Student Modelling in a hypermedial web-based environment .......... 1725
Teresa Roselli, Antonella Grasso, Vito Leonardo Plantamura, University of Bari - Department of Computer Science,  
Italy

Using Cognitive Theories in the Instructional Design of Biomec  ......................... 1730
Silvina Santana, Alexander Silva, University of Aveiro, Portugal

Low Cost & High Quality E-Learning using Scanned Textbooks and Interactive  
Environment .......................................................... 1736
Edgar Weippl, Vienna University of Technology, Austria

How to Avoid the Whirling Blades of Blended Learning as a Moderator ................. 1742
Joanne Bentley, Melynda Fitt, Utah State University, USA

A Processing and Analyzing Model on Digital Content Courses of Universities in  
Taiwan Using Course Data Warehouse Technology ............................................. 1747
Chiu-pai Ho, Chien Yun Dai, Ming-Ju Hsu, Jung-Kai Cheng, Depart. of Industrial Education, National Taiwan  
Normal University, Taiwan

Tracker: A tool to improve student retention .................................................. 1753
Phil Holifield, Guy Heatley, University of Central Lancashire, UK

The Construction of Multidimensional Data Analysis Model for Taiwan's University  
Culture & Creative Industry Courses (CCIC) .................................................. 1759
Ming-Ju Hsu, Asso. Research Fellow National Policy Foundation, Taiwan; Chien-Yun Dai, Asso. Professor,  
National Taiwan Normal University, Taiwan; Jung-Kai Cheng, Songshan High School of Agriculture and Industry,  
Taiwan; Pao-Lun Lin, National Taiwan Normal University, Taiwan

QMS: Providing a Liberal Arts Core Experience ............................................. 1765
Beidler John, Univ. of Scranton, USA; Ethan Giordano, Univ. of Delaware, USA

Open Source Learning Management Systems .................................................. 1769
Firoz Kaderali, Thorsten Kisner, CampusSource / FernUniversietaet Hagen, Germany
NEW ROLES OF THE INSTRUCTOR & LEARNER

Making Work Real: Building Virtual Learning Communities ................................................................. 1827
Dan Bascelli, Spelman College, USA

Web-mediated Student-led Collaborative Science & Technology Projects: Transcending our Current Educational Paradigm ................................................................. 1831
Larry Bencze, Maurice Di Giuseppe, OISE, University of Toronto, Canada; Michael Bowen, University of New Brunswick, Canada

Personal Epistemological Beliefs, Critical Thinking Abilities, and Information-Seeking Behavior of College Students ................................................................. 1836
Hsiao-yu Chen, Kun Shan University of Technology, Taiwan; Chun-Yen Chang, National Taiwan Normal University, Taiwan

A Constructivist’s View of Using Information/Communication Technologies to Enhance Faculty Accountability beyond Letter Grades ................................................................. 1841
Mercy Fapojuwo, Shaw University, USA

A Constructivist Approach to the Delivery of Learning Objects ................................................................. 1843
Jessica Griffiths, Geneen Stubbs, Mike Watkins, University of Glamorgan, UK

A Constructivist Pedagogy to Online Learning in Software Engineering ................................................................. 1851
Said Hadjerrouit, Agder University College, Faculty of Mathematics and Sciences, Norway

Critical Pedagogy and New Media Literacy: A Case Study ................................................................. 1859
Jeannine Hirtle, The University of Texas at Arlington, USA; Christopher White, Sam Houston State University, USA

Reusable media-rich problem-based learning cases: Creating learning objects for teacher-education ................................................................. 1865
Mike Keppell, Hong Kong Institute of Education, Hong Kong

E-voking E-motion in E-Learning ................................................................. 1874
Sharon Kerrick, Mike Boyle, Carolyn Rude-Parkins, University of Louisville, USA

Effective Practices in Online Collaborative Learning In Campus-based Courses ................................................................. 1878
Therese Laferriere, Laval University, Canada; Elizabeth Murphy, Memorial University, Canada; Milton Campos, University of Montreal, Canada

High School Students’ and Teachers’ Preferences toward the Constructivist Internet-based Learning Environments ................................................................. 1886
Min-Hsien Lee, Chin-Chung Tsai, Institute of Education, National Chiao Tung University, Taiwan

Design Framework of Situated Online Environments for Foreign Language Learning ................................................................. 1894
Seung-Hee Lee, Indiana University, USA; Jeong-Hee Lee, Induk Institute of Technology, Korea (South); Jin-Woo Kim, Hanseo University, Korea (South)
Multimedia Enhanced Active Learning Studio: a development in physics teaching .......................... 1900
Iain McAlpine, Maria Cunningham, Richard Newbury, George Hatsidimitris, The University of New South Wales, Australia

Contribution of the Use of an Educational Software to Students' Conceptual Change about Mechanical Interactions .................................................................................................................. 1908
Christina Solomonidou, Dimitris Kolokotronis, University of Thessaly, Greece

How do primary school pupils conceive technology and its use in everyday life? .......................... 1916
Christina Solomonidou, Athanasios Tasios, University of Thessaly, Greece

Use of Microcomputer-Based Laboratory Experiments to Integrate Multiple Representations of Scientific Phenomena ............................................................................................................... 1924
Jerry Suits, Sister Nicole Kunze, University of Northern Colorado, USA; Moustapha Diack, Southern University-Baton Rouge, USA

The Constructivist Perspective in Distance Learning Environments ............................................. 1932
Areti Valasidou, Dimitrios Sidiropoulos, Despina Makridou-Bousiou, University of Macedonia, Greece

One way to study Learning Concepts: Course of Learning Concepts ............................................. 1936
Tuulikki Viitala, School of Vocational Teacher Education, Finland

A Case Study of Faculty Roles and Teaching Strategies in Web-Based Instruction: Implications for Practice .............................................................................................................................. 1941
Hong Wang, Fort Hays State University, USA; Diane McGrath, Sue Maes, Kansas State University, USA

Designing Games to Foster Social Network Development ............................................................. 1947
Alan Amory, Centre for IT in Higher Education (ITEd), South Africa

Participating Virtually in a Scientific Conference: A Collaborative E-Learning Scenario for Authentic Learning in Higher Education .......................................................................................... 1953
Josianne Basque, Télé-université, LICEF-CIRTA, Canada; Kim Chi Dao, Télé-université, Canada; Contamines Julien, LICEF-CIRTA, Télé-université, Canada

Technology-supported collaboration on field-based authentic tasks .................................................. 1961
Gwyn Brickell, Jan Herrington, Barry Harper, University of Wollongong, Australia

Exploring system factors that influence community development in online settings .......................... 1969
Chris Brook, Ron Oliver, Edith Cowan University, Australia

Collaborative Activities in a Traditional Self-Paced Individualised Distance Learning Setting ................................................................................................................................. 1977
Poellhuber Bruno, Chomienne Martine, Cegep@distance, Canada

Exploration of The Self-Directed Internal Management of Cognitive Load on Computer-Supported Collaborative Learning ............................................................................................................. 1983
Yu-Ju Chou, Chin-Chung Tsai, National Chiao-Tung University, Taiwan

New Perspectives in Physical Education: Using Online Learning to Promote Collaborative Critical Thinking .......................................................................................................................... 1989
Paulette Cote, Brock University, Canada; Shihui Chen, Michael Keppell, Hong Kong Institute of Education, China

CSVGS – Collaborative SVG-based Learning Spaces – New Potentials For Collaborative Generating Of Web Based Learning Areas ......................................................................................... 1995
Thorsten Hampel, Klaus Bertels, Sabrina Geißler, University of Paderborn, Germany

Empathic Interfaces and Communication Protocols: Groupwork and Dialogues in Discussion Forums .................................................................................................................................................. 2004
Stylianos Hatzipanagos, King's College London, UK

An e-Tutor evolution: A Report on a European Project that seeks to both Direct and Distil Innovative Multicultural Collaborative and Synchronous E-learning Techniques ........................................ 2012
Bryn Holmes, Dudley Dolan, Denise Leahy, Paul Lynch, Trinity College Dublin, Ireland; Anthony Ward, University of York, UK

The impact of an Internet-based forum on preservice teachers' educational experience ................. 2020
Kathleen Hughes De Sousa, St. Petersburg College, USA; Kelley Chappell, PhD, Capella University, USA; Sally Naylor, PhD, St. Petersburg College, USA

Online Study Groups: Comparison of Two Strategies .................................................................. 2025
Genevieve Johnson, Grant MacEwan College/Athabasca University, Canada; Julia Johnson, Laurentian University, Canada
Factors for Successful Online Collaborative Learning: Experiences from Malaysian Secondary School Students
Ah-Choo Koo, Chien-Sing Lee, Weng-Ping Chin, Multimedia University, Malaysia

Using Massively-Multiplayer Online Role-Playing Games to Enhance Collaborative Learning and Teaching in the Australian High School Classroom
Mark Lee, Ken Eustace, Geoff Fellows, Allan Bytheway, Charles Sturt University, Australia; Leah Irving, Deakin University, Australia

Considerations into Nature of Virtual Teaming in Online MBA Program: A Case Study
Seung-hee Lee, Curtis J. Bonk, Richard J. Magjuka, Xiaojing Liu, Bude Su, Mengyu Zhai, Kyong-Jee Kim, Shijuan Liu, Min Shi, Indiana University, USA

Interplay Between Self-Directed Learning and Group Interactions in Online Problem-Based Discussions
Wen-Yu (Silvia) Lee, University of Michigan, USA

Facilitating medical decision making with collaborative tools
Jingyan Lu, Susanne Lajoie, McGill University, Canada

The Post and Vote Model of Web-Based Peer Assessment
Bruce Mann, Memorial University, Canada

Achieving Diversity through Online Inter-institutional Collaborations
Shari McCurdy, Ray Schroeder, University of Illinois at Springfield, USA

Learning Support in Multi-Cultural Collaboration - design and analyses of online communication -
Yoshiro Miyata, Chukyo University, Japan; Nobuyuki Ueda, Doshisha Women's University, Japan; Hillel Weintraub, Hakodate Future University, Japan

Learning for Understanding: A Web-based Model for Inquisitive Peer-review Learning
Activities
Joseph Mohan, City University of Hong Kong, Hong Kong; Paul Lam, Chinese University of Hong Kong, Hong Kong

A Case in the Design of Generative Learning Objects (GLOs): Applied Statistical Methods
Raquel Morales, Dawn Leeder, UCeL, Cambridge University, UK; Tom Boyle, London Metropolitan University, UK

Using learning protocols for knowledge acquisition and problem solving with individual and group incentives
Michael Oehl, Hans-Rudiger Pfister, University Luneburg, Germany

Visual Tools to Facilitate Discussion in Online Reading Clubs for Children
Constanza Pacher, University of Alberta, Canada

Examining the Impact of Computer Supported Intercultural Communication on Learners' Language-Learning Beliefs and Motivation
Hsinyi Peng, Institute of Education, National Chiao Tung University, Taiwan; Wei-Hsin Lu, School of Information Science and Learning Technologies, USA; Chao-I Wang, Institute of Education, National Chiao Tung University, Taiwan

Promoting Trans-Disciplinarity by Active Learner Support
Franz Reichl, Eva Obermüller, Vienna University of Technology, Austria; Jutta Jerlich, eTradeLink, Austria

Theory-Supported Problem-Based Cognitive Partnerships Spanning 3rd Grade To Higher Education: A Case Study
Joette Stefl-Mabry, Jennifer Goodall Powers, University at Albany, State University of New York, USA

A Collaboratory Ubiquitous Pedagogical Environment
Louis Villardier, Télé-université, Canada; Hamadou Saliah- Hassane, LICEF, Canada; Kim-Lien Do, Télé-université, Canada

Collaborative Ontologies in Knowledge Management
Michael Vonrueden, Thorsten Hampel, Sabrina Geissler, University of Paderborn, Germany

Integrating Computers in the English Language Arts Classroom based on Vygotsky’s Theory
Jenny Wang, Yuehchiu Fang, National Formosa University, Taiwan

Online Collaboration by Interprofessional Student Teams completing a Mixed-Mode Case Study
Rosemary Waterston, Judith Hunter, Judy Watt-Watson, Michael McGillion, Lalitha Raman-Wilms, Lynn Cockburn, University of Toronto, Canada
