ASK & GUESS: a Computer Game About (Almost) Anything .......................... 3481
João Paiva, Faculty of Science, University of Porto, Portugal; Carlos Fiolhais, Centre for Computational Physics, University of Coimbra, Portugal; Victor Gil, Exploratório Infante D. Henrique, Coimbra, Portugal; Isabel Vilares, Faculty of Science, University of Porto, Portugal

The Design for Authoring and Deploying Web-based Interactive Learning Environments ........... 3485
Lin Qiu, State University of New York at Oswego, USA; Christopher Riesbeck, Northwestern University, USA

QuickData: Online Survey Creation and Data Collection ........................................ 3493
Dawn Ressel Nidy, DePaul University, USA

Building a Training Simulation in Runtime Revolution – (HyperCard on Steroids!) ......................... 3499
Terry Schumacher, Rose-Hulman Institute of Technology, USA

Academic Web Site Design with an XML Design Language ............................................. 3500
David Sher, MatlStat/CMP Department, Nassau Community College, USA

Anthony Stenton, Université Toulouse I, France

Running Virtual Schools in EduPalace ........................................................................... 3510
Harris Wang, Athabasca University, Canada

IDIOMA-TIC online and off-line: a truly innovative language learning authoring tool .................. 3516
Bert Wylin, K.U.Leuven Campus Kortrijk, Belgium

Authoring Services-Centered Web-based Learning Environment: a Hybrid Model for Multimedia Components and Web Services Composition ......................................................... 3519
Karim Zeramdini, Yassin Rekik, Denis Gillet, Ecole Polytechnique Fédérale de Lausanne, Switzerland

Exploring dimensions of e-learning in competency-based settings: Case studies in the mining and oil and gas sectors ................................................................. 3527
Frank Bate, University of Notre Dame, Australia

Educational Media Research Best Practices .................................................................... 3535
Gary Boyd, Johannes Strobel, Robert Bernard, Concordia University, Canada

The Impacts of Competency-Based Web Learning Material on Self-Directed Aptitudes ................... 3538
Chi-Cheng Chang, Institute of Technological & Vocational Education, National Taipei University of Technology, Taiwan

Development and Evaluation of Concept Mapping Software with Bookmarking Function for Supporting Reflection and Dialogue ......................................................... 3547
Akiko Deguchi, Graduate school of cultural studies and human science, Kobe University, Japan; Etsuji Yamaguchi, Faculty of Education and Culture, University of Miyazaki, Japan; Hideo Funaoi, Faculty of Humanities Ibaraki University, Japan; Shigenori Inagaki, Faculty of Human Development, Kobe University, Japan

Assessment as an instrument to evaluate quality of instruction ........................................... 3555
Lukas Paessler, Hans Hitierberger, Laura Bossa, Markus Dahinden, Institute of Computational Science, ETH Zurich, Switzerland

E-learning Design as a Traceable, Adaptive Activity .......................................................... 3563
Franca Garzotto, HOC-Politecnico di Milano, Italy; Aldo Torrebruno, Politecnico di Milano, Italy

Evaluation of a Prototype GIS Learning System to Teach Civil Engineering Concepts .................... 3569
Richard Hall, Ronaldo Luna, Michael Hilgers, John Sullivan, William Lawrence, Matt Buechler, University of Missouri - Rolla, USA

Building an Assessment and Evaluation Capacity in Higher Education Instructional and Learning Technology Support ................................................................. 3575
Jude Higdon, Tu Tran, University of Southern California, USA

Learning Object Evaluation: Challenges and Lessons Learned in the Hong Kong Context ................ 3580
Jennifer Jones, Consultant, Australia; Carmel McNaught, The Chinese University of Hong Kong, Hong Kong

A Comparison Study of Online versus Traditional Student Evaluation of Instruction .................. 3586
Yuiliang Liu, SOUTHERN ILLINOIS UNIVERSITY, USA

AN EVALUATION OF LOs IN USE: AN OVERVIEW OF THE CELEBRATE EVALUATION FINDINGS... 3592
Robert McCormick, Nai Li, The Open University, UK

Designing Evaluations of Online Interactive Learning: A Case Study ....................................... 3600
Leslie Miller, Rice University, USA

Medical Students' Perceptions of a Course Management System in Facilitating Learning and Performance ........................................................................................................ 3604
Anju Relan, Sally Krasne, David Geffen School of Medicine at UCLA, USA
Performance and Attitude of Children in Computer Based Versus Paper Based Testing .......... 3610
Gavin Sim, Matthew Horton, University of Central Lancashire, UK

Simulating the Impact of Motivation Support Factors on Faculty Adoption of Web-Based
Instruction ...................................................................................................................... 3615
Hae-Deok Song, University at Albany, SUNY, USA; Wonseok Suh, Penn State University, USA; Sehnaz Baltaci,
University at Albany, SUNY, USA

Development of a Fieldwork Support System Using Camera-Equipped Mobile Phones: Two
Experimental Studies at an Elementary School ......................................................... 3621
Makiko Takenaka, Center for Research in Education and Human Development, Oita University, Japan; Shigenori
Inagaki, Faculty of Human Development, Kobe University, Japan; Hideko Kuroda, Sumiyoshi Elementary School
Attached to Faculty of Human Development, Kobe University, Japan; Akiko Deguchi, Graduate school of cultural
studies and human science, Kobe University, Japan; Masahiko Ohkubo, Faculty of Human Development, Kobe
University, Japan

On-Line Analysis of e-Learning Time based on Gamma Distributions .................................. 3629
Maomi Ueno, Nagaoka University of Technology, Japan; Keizo Nagaoka, Waseda University, Japan

The Role of Intelligent Agents on Learner Performance ................................................ 3638
George Veletsianos, Theano Yerasimou, Aaron Doering, University of Minnesota, USA

Future Directions of Blended Learning in Higher Education and Workplace Learning
Settings .......................................................................................................................... 3644
Curt Bonk, Indiana University and SurveyShare, Inc., USA; Kyong-Jee Kim, Indiana University, USA; TingTing
Zeng, Warwick University, UK

Collaboratively constructed diagrams to facilitate small group, problem-based learning .......... 3650
Marc Brisbane, University of Alberta, Canada

From Individual Way to Awareness : Behaviours Study in a Pedagogical System ............... 3656
Pierre Camps, ENFA - Ecole Nationale de Formation Agronomique, France; Marie-Francoise Canut, André
Péninou, LGC, Laboratoire de gestion et cognition, IUT, France; Florence Sedes, IRIT, Institut de Recherche en
Informatique de Toulouse, France

Online assessing tenth-grade students’ problem solving ability in the area of Earth sciences .... 3662
Chun-Yen Chang, Department of Earth Sciences, National Taiwan Normal University, Taiwan; James P. Barufaldi,
Center for Science and Mathematics Education, The University of Texas at Austin, USA; Ming-Chao Lin, Yi-Chun
Chen, Jing-Ye Jhan, Department of Earth Sciences, National Taiwan Normal University, Taiwan

Enterprise OpenSource eLearning and Online Communities with .LRN ................................ 3666
Alfred Essa, MIT, USA

Enhancing an electronic portfolio with field observations: A field assessment tool for
internships ...................................................................................................................... 3669
Adam Finkelstein, Mariette Xenopoulos, McGill University, Canada

Supporting and Guiding Learners’ Collaboration Through a Structured Adaptive
Communication Tool .................................................................................................... 3671
Evangelia Gouli.Agoritsa Gogoulou, Maria Grigoriadou, Department of Informatics and Telecommunications,
University of Athens, Greece; Maria Samarakou, Department of Energy Technology, Technological Education
Institution of Athens, Greece

Dyn3W - A Pedagogical Tool for Online Collaboration ................................................ 3679
Pentti Hietala, Kimmo Koivunen, University of Tampere, Finland; Jukka Siltanen, Tampere Polytechnic University,
Finland; Antti Kaakinen, University of Tampere, Finland

IPLAR - An Internet-based Prior Learning Assessment and Recognition System .............. 3686
Rob Higgins, Ryerson University, Canada

Using An Adaptive Survey System to Understand Learners; Perceptions toward Web-based
Learning: A case of Taiwan .......................................................................................... 3692
Hsiu-Mei Huang, National Taichung Institute of Technology, Taiwan; Shu-Sheng Liaw, China Medical University,
Taiwan

Development and evaluation of DlnCo: using digital ink to correct Japanese compositions ...... 3698
Kai Li, Kouki Sato, Kanji Akahori, Tokyo Institute of Technology, Japan

Bridging the Gap between Students and Computers for Internet Group Learning Activity .... 3703
Chen-Chung Liu, Graduate Institute of Network Learning Technology, National Central University, Taiwan; Shu-
Yuan Tao, Department of Information Management, Chungy Institute of Technology, Taiwan; Jinu-Ning Nee, Baw-
Juiane Liu, Department of Computer Science and Engineering, Yuan Ze University, Taiwan

Supporting Collaborative Learning with Blogs .................................................................. 3711
Joe Luca, Edith Cowan University, Australia; Catherine McLoughlin, Australian Catholic University, Australia

XXX
Covering Different Levels of Evaluation Needs by an Internet-Based Computer-Assisted Testing Framework for Collaborative Distributed Test Development and Delivery .......................... 3715
Romain Martin, University of Luxembourg, Luxembourg; Thibaud Latour, CRP Henri Tudor, Luxembourg; Reginald Burton, Gilbert Busana, University of Luxembourg, Luxembourg; Luc Vandenabeele, CRP Henri Tudor, Luxembourg

SOFIA: an open source virtual learning environment ......................................................... 3721
Luis Martinez, Luis Chavez, Antonio Gonzalez, Alejandro Robles, Universidad Iberoamericana, Mexico

Reflection and Influence of Learning Activities in Preparation/Review Process on e-Learning .................................................. 3727
Kenji Matsuzaki, Kazuhide Kanenishi, Yasuo Miyoshi, Yoneo Yano, Tokushima University, Japan

A framework for sustaining the continuity of interaction in Web-based learning environment for engineering education .......................................... 3734
Anh Vu Nguyen, Yassin Retik, Denis Giller, Ecole Polytechnique Federale de Lausanne (EPFL), Switzerland

Using an e-courseMap™ for Organizing Online Course Content on One Webpage! ............... 3742
Michael Ruffini, Mansfield University of Pennsylvania, USA

Enabling access to information and knowledge: A report on new tools – Enable and Unify – for conducting federated search of distributed content, extraction and management of metadata, and development of user-centered views of content ........................................ 3745
Steven Shaw, Edeo Knowledgeware Corp, Canada; Marie-Claude Lavoie, Concordia University, Canada

Facilitating Discussion on BBS through Turn-Assigning System: Concept of Community Incubator .......................................................... 3752
Hideyuki Suzuki, Ibaraki University, Japan

Participatory Simulation of a Stock Exchange ................................................................. 3759
Till Aldinger, Stephan Kopf, Nicolai Scheele, Wolfgang Effelsberg, University of Mannheim, Germany

Interaction During Lectures Using Mobile Phones ......................................................... 3767
Henning Baer, Max Muehlauever, Eric Tews, Guido Roessling, Technische Universitaet Darmstadt, Germany

Building Cognitively Informed Simulators Utilizing Multiple, Linked Representations Which Explain Core Concepts in Modern Biology .................................................. 3773
Diana Bajzek, James Burnette, William Brown, Carnegie Mellon University, USA

MOBILE DBA TRAINER – 24/7/365 Availability Training for Future Database Administrators ........................ 3779
Dominic Becking, Gunther Schlogeter, University of Hagen, Germany

Incidental Learning in Hypemedia Environments: The Impact of Individual Differences and Spatial Overviews ................................................................. 3789
Patricia Boechler, University of Alberta, Canada; Dorothy Steffler, Concordia University College of Alberta, Canada; Michael Dawson, University of Alberta, Canada; Jamal Mansour, Queens University, Canada

A constructivist approach for training environment ......................................................... 3795
Nasreddine Bouhai, Paragraphe Laboratory, France

Supporting reuse of instructional designs through a learning activities repository within a course management system .................................................. 3800
Liviana Bringelson, Tom Carey, University of Waterloo, Canada

Visual representations for Student’s learning processes in Internet Tasks .................................. 3806
Ole C Brudvik, Nanyang Technological University, Singapore; John G Hedberg, Macquarie University, Australia

Online Interaction for Co-construction of Knowledge .................................................... 3813
Lih-Juan ChanLin, Department of Library & Information Science, Fu-Jen Catholic University, Taiwan; Kung-Chi Chan, Dept. of Food & Nutrition, Providence University, Taiwan

On-line English Pronunciation Training System with Automatic Speech Recognition Technologies .................................................................................. 3819
Fu-chiang Chou, Dept. of Computer & Communication Engineering, Ming Chuan University, Taiwan

Embedding educational content between gameplay: An example from a sports action videogame .................................................. 3825
Chad Ciavaro, Jill Meanley, Jim Bizzocchi, David Goodman, Simon Fraser University, Canada

Alphie’s Alley Early Literacy Tutoring Software .............................................................. 3829
Benoit Danis, Sebastien Rainville, Micha Therrien, Bradley Tucker, Phillip Abrami, Concordia University, Canada

In pursuit of best practice: aiming for high quality ICT-based learning design in an entry level course at ACU National, Australia .................................................. 3835
Christine Dennis, Martin Maguire, Australian Catholic University Limited, Australia
Helping Instructors Scaffold Students' Design of Educational Technology Projects

Chris DiGiano, Michael Chorost, Mark Chung, Jeff Huang, SRI International, USA

Eroding Time and Space: An interactive web site for new students

Caroline Dobson, Debbie Holley, London Metropolitan University, UK

Multi-Scaffolding Environment (MSE): Providing Authentic Assistance in an Online Learning Environment

Aaron Doering, Theoan Yerasimou, George Veletsianos, University of Minnesota, USA

Ontologies and Ontology Mapping for Supporting Student Assessment in an Advanced Learning System

Gilles Falquet, Luka Nerina, Jean-Claude Ziswiler, University of Geneva, Switzerland

Framework for Distributed Simulation and Measuring of Complex Relations of Operating System Components

Volker Fickert, Winfried Kalfa, Thomas Weise, Chemnitz University of Technology, Germany

PICU: A virtual problem-based situated learning environment for medical residents

Adam Finkelstein, McGill University, Canada; Farhan Bhanji, Montreal Children's Hospital, McGill University Heath Centre, Canada; Laura Winer, McGill University, Canada; Ron Gottlesman, Montreal Children's Hospital, McGill University Health Centre, Canada

Learner as designer: exploring a collaborative model of instructional design, Part 2

Robert Fitzgerald, University of Canberra, Australia; John Findlay, University of Wollongong, Australia; Anne Forster, University of Sydney, Australia; Linda Newman, University of Western Sydney, Australia

Designing a Tale-based Learning Environment for Kids: the Experience of the FaTE Project

Franca Garzotto, Francesca Rizzo, Silvia Ghezzi, Silvia Barzaghi, Politecnico di Milano, Italy

The MUST Tool: Exploiting Propp’s Theory

Franca Garzotto, Francesca Rizzo, Politecnico di Milano, Italy

Do agents have to be so intelligent? - Self-organized knowledge construction in cooperative learning spaces supported by agents

Sabrina Geissler, Thorsten Hampel, University of Paderborn, Germany

Students’ communications with iconic representations of numerical simulations bridging gaps of knowledge and theories

Stefan Halverscheid, Fachbereich Mathematik-Informatik, Univ. Bremen, Germany

XDLT: A Distance Learning Tool for consistent teaching of XML and related Technologies

Beda Christoph Hammerschmidt, Institute of Information Systems, University of Lübeck, Germany; Philipp Stursberg, University of Lübeck, Germany; Jan Jungclaus, IMEDIA, USA; Volker Linne, Institute of Information Systems, University of Lübeck, Germany

Freudbot: An Investigation of Chatbot Technology in Distance Education

Bob Heller, Mike Proctor, Dean Mah, Lisa Jewell, Bill Cheung, Athabasca University, Canada

Avenue ASL: Transforming Language Assessment and Learning through Networked Video Integration

Simon Hooper, Charles Miller, George Veletsianos, University of Minnesota, USA

Pedagogy in an Online Writing Course: A contribution to autonomous learning

Wang Jenny, Ching-Huang Wang, Emily Wu, National Formosa University, Taiwan

Radiography for Students - Beyond a Textbook

Helen Kavnoudias, Nina Sacharias, The Alfred, Australia

E-learning: The Benefits, the Challenges and the Future

Jared Keengwe, Indiana State University, USA

Pushing the Boundaries of Streaming Media: Linking Streaming Video and Audio with Asynchronous Communication

Patrick Kuns, Joanna Tarnowska, Ross Dewstow, Ectus Ltd., New Zealand

Development of the street corner guide system using IC tags and Moblog

Takashi Kuroda, Jun-ichi Yamamichi, Toyama University, Japan; Tomio Saku, Toyama Internet Shimin-Juku, Japan

Ontology-based 3-d visualisation of composited concepts

Chien-Sing Lee, Wei-Ching Lim, Multimedia University, Malaysia

Peer-negotiated constructions of space and place using mobile telephony

Kenneth Lim, Nanyang Technological University, Singapore; John Hedberg, Macquarie University, Australia; Kalyani Chatterjea, Nanyang Technological University, Singapore

APEC Cyber Academy and its International Collaborative Learning Program

Chi-Syan Lin, National University of Tainan, Taiwan
CAMS (A Community/Course Online System designed with YOU in mind) ................................................. 3976
Brian Mackie, Northern Illinois University, USA

Collaboration in Action ................................................................................................................................. 3978
