Proceedings of the 35th Annual International Seminar

‘Investigate—Communicate—Educate’

August 30–September 2, 2004
Gold Coast, Queensland, Australia
# Table of Contents

2 ISASI Information

4 Preface Investigate, Communicate, and Educate
   By Frank Del Gandio, President

5 Ron Chippindale: 2004 Lederer Award Winner
   By Esperison Martinez, Editor

7 Opening Speech: Welcome to Australia
   By Bruce Byrnn, Chief Executive Officer, Civil Aviation Safety Authority, Australia

SESSION 1
9 Aviation Investigation in Australia: Sex, Drugs, Rock ’n Roll, and the Law
   By Kym Bills, Executive Director, Australian Transport Safety Bureau

16 Investigate, Communicate, Educate: Are We Doing All Three with the Same Energy?
   By Ryal Lessuren, Transportation Safety Board of Canada

22 Past, Current, and Future Accident Rates: Achieving the Next Breakthrough in Accident Rates
   By Dr Robert Mathurin, Federal Aviation Administration, U.S.A

SESSION 2
38 New Opportunities and New Boundaries: Accident Investigations Involving Engine Consortiums and Alliances
   By Michael Barston and Mike Gandon, Pratt and Whitney, USA, and Rolls-Royce plc, U.K.

46 Airborne Collision Avoidance System: ACAS/TCAS from the Accident Investigation’s Point of View
   By Johann Reuss, Bundesstelle für Flugunfalluntersuchung (Germany Federal Bureau of Aircraft Accident Investigation)

SESSION 3
51 The Role of Lessons Learned in the Investigate, Communicate, Educate Cycle for Commercial Aviation
   By Dr. Paul Werner and Richard Perry, Sandia National Laboratories, U.S.A.

57 Underwater Recovery Operation off Sharm el-Sheikh
   By Olivier Ferrante and Jean-Claude Vital, Bureau d’Analyses, Frame

SESSION 4
62 ISASI 2004 Theme
   By Rob Lee, International Consultant on Human Factors

63 Latent Failures in the Hangar: Uncovering Organizational Deficiencies in Maintenance Operations [Invited Paper]
   By Dr. Alan Halcomb, SJSU/NASA Ames Research Center, U.S.A.

67 Equipment Damage and Human Injury on the Apron—Is It the Cost of Doing Business?
   By Bob Vandel, Flight Safety Foundation, U.S.A.

73 The ATSB Ansett Class A Investigation
   By Richard Babi, Laurene Brown, Suzanne Garniss, Mike Watson, and Jakub Webb, Australian Transport Safety Bureau

SESSION 5
79 Juridical and Technical Aspects in the Investigation of Aviation Accidents and Incidents in Argentina and Latin America
   By Con. Luis Ojeda and Dr. Griselda Capaldo, Argentine Air Force and Universidad Nacional de Buenos Aires, Argentina.

85 The Protection of the Sources of Safety Information
   By James Burn, Flight Safety Foundation, U.S.A.

87 A300B4 Loss of All Hydraulics, Baghdad: A Remarkable Example of Airmanship
   By Yannick Malagne, Airbus Industrie, France

SESSION 6
90 When an Aircraft Crash Is Not an Accident: Experiences of an Air Safety Investigator at Ground Zero
   By Eric West, Federal Aviation Administration, U.S.A.

97 The Size of the Aircraft Doesn’t Matter
   By Lorenza Ward, National Transportation Safety Board, U.S.A.

100 Investigation of Fatal Double Engine Flame-out to Shorts SD 360 Turboprop
   By Peter Coombs, Air Accidents Investigation Branch, U.K.

SESSION 7
104 Field Investigation of the Accident Involving an Ilyushin IL-76 Transport Aircraft in East Timor
   By S. Hunter, L. Molen, P. Robertson, S. Thompson, G. Trax, and G. Komans, Defense Science and Technology Organization, Australian Transport Safety Bureau, and Directorate of Flying Safety ALF, Australia

118 WYSIWYG—Or Is It?

124 Flight Data Analysis Using Limited Data Sets
   By Neil Campbell, Australian Transport Safety Bureau

SESSION 8
127 Managing Fatigue as an Integral Part of a Fatigue Risk Management System [Invited Paper]
   By Professor Drew Dawson and Kesty McCullough, Director, Center for Sleep Research, University of South Australia, and Research Student, Center for Sleep Research, University of South Australia

135 HFACS Analysis of Military and Civilian Aviation Accidents: A North American Comparison
   By Dr. Scott Shappell and Dr. Dong Wegmann, Civil Aerospace Medical Institute and University of Illinois at Urbana-Champaign, U.S.A.

SESSION 9
141 Who Moved My (Swiss) Cheese? The (R)Evolution of Transport Safety Investigation
   By Dr Steven Shorrock, Mark Young, Capt. John Raudiker, and Graham Bradshaw, the University of NSW, Australia, and Cranfield University, U.K.

145 Analysis of Aircraft Propulsion System Failure
   By Dr. Arjen Romeijn, Australian Transport Safety Bureau

152 The Myth of the Unstable Approach
   By Dr. Ed Wischmeyer, Embry-Riddle Aeronautical University, U.S.A.

SESSION 10
156 Human Factors in Stressful Team Situations: A View from an Operational and Training Perspective
   By Werner Narf, Air New Zealand

159 Maintaining an Aircraft Accident Investigation Capability in a Small Military Aviation Organization
   By WgCdr Peter Wood, Directorate of Flying Safety, Australian Defense Force

164 The Use of Full Flight Simulators for Accident Investigation
   By Rob Tidyman, Air Accidents Investigation Branch, U.K.

SESSION 11
170 Air Safety Investigation in the Information Age
   By Dr. Robert Croft, Embray, Brazil

175 Using Physical Evidence from More Complex Mid-air Collisions
   By Gisbert Vogelaar and Keith McGavin, Dutch Transport Safety Board, the Netherlands, and National Transportation Safety Board, U.S.A.

179 Reinventing (with Wheels, Wings, and Sails)—A New Look at Transport Accident Investigator Training
   By Dr. Graham Bradshaw, Cranfield University, U.K.

Facts and Lessons Learned from the C1611 Accident Investigation
   By Non available

184 ISASI 2004 Pictorial Review
