ONE WORLD?
ONE VIEW OF OM?

The Challenges of Integrating Research & Practice

Cernobbio, Lake Como, June 16th - 18th 2003

Gianluca Spina
Andrea Vinelli
Raffaella Cagliano
Matteo Kalchschmidt
Pietro Romano
Fabrizio Salvador

Editors

Volume III
Operations Management and the Internet
New Product Development and Codesign
Quality Management and Continuous Improvement
Knowledge Management
Teaching and Research in Operations Management

E-supply chain collaboration within the textile district of Como
Ferrari S. and Noci G. ................................................................. pag. 97

The development of an electronic B2B transaction strategy for a soft drinks manufacturer
Fouweather I. and Webster M. ....................................................... » 107

The role of supplier’s institutional trustworthiness signals in e-purchasing in open B2B e-marketplaces: An exploratory study
Garavelli A. C., Lanzolla G. and Voss C. ...................................... » 117

Technological breakthroughs and (early) technology adoption within firms: Empirical evidence from e-procurement technologies
Lanzolla G. and Tsikriktsis N. ........................................................ » 127

Supply chain management in the presence of secondary markets
Lee H. L., Peleg B., Whang S. and Zou Y. ..................................... » 137

Business process change in manufacturing companies implementing e-business
MacBryde J., Albores P. and Ball P. .............................................. » 147

Virtual organization and e-business: A case study in a Brazilian aircraft company
Neto J. A. ..................................................................................... » 157

E-enablement and B2B e-commerce: Findings from an empirical investigation
New S. ....................................................................................... » 169

Understanding B2B e-commerce: Explaining the histories of B2B initiatives
New S., Oh Y. and Siddall M. ....................................................... » 179

Managing electronic business in supply chain management
Nguyen H. M. and Harrison N. J. ................................................ » 189

Exploring the barriers to adoption of portals in collaborative improvement activities
Integrating the value system with the Internet: The case of a Brazilian harbour
Oliveira C. L., Laurindo F. J. B., Carvalho M. M. and Silva F. ........ pag. 207

The relationship between B2B e-commerce integration, trading partner relationships, and impediments to adoption
Power D. ................................................................. » 217

A structured framework for analysis and understanding of factors impacting the effective application of e-marketplaces
Sharifi H., Kehoe D. F., Burns N. and Boughton N. J. ................. » 227

A classification framework for the selection of appropriate electronic marketplaces
Sharifi H., Kehoe D. F., Hopkins J. and Boughton N. J. ............. » 237

The development of a commercial distributed document management system
Thompson D. M. and Homer G. R. .................................. » 247

Using the Internet to link service providers to their customers: Does it affect performance?
Tsikriktsis N. and Frohlich M. ........................................ » 253

Outsourcing characteristics and the e-business development in the United States
Yang Y. H. ................................................................. » 261

NEW PRODUCT DEVELOPMENT AND CODESIGN

The impact of virtual simulation tools on the organization of new product development
Becker M. C., Caputo M. and Zirpoli F. ............................... » 273

Management of product development process in Brazilian food companies: A comparison between models and case studies
Bosi M. G., Alliprandini D. H. and de Toledo J. C. ................... » 283

Managing the customer interface in high variety environments
Bramham J., MacCarthy B. and Guinery J. ............................ » 293
Innovation and performance improvement in Irish manufacturing
Brennan L., Crowe D., Coughlan P. and Dromgoole T. .......................... pag. 303

Four case studies of QFD usage in the product development process
Cauchick Miguel P. A. and Formaggio I. A. ........................................... » 313

Implementation and use of collaborative product development systems-observations from Swedish manufacturing firms
Christensen C., Magnusson M. G. and Zetherström M. B. ...................... » 323

Innovative behaviour in Indian cooperatives; New product development in traditional sectors
de Haan J., Louter K. and de Groot G. ................................................ » 333

Performance of new product in the market: The influence of marketing knowledge and innovation
Gonçalves Filho C. and Gonçalves C. A. ................................................. » 343

Concurrent product and demand chain creation - In search of contingencies and strategic choices
Gubi E. and Heikkilä J. ................................................................. » 353

Aspects of product development by cooperation in industrial biotechnology
Hoitsch H. J. and Eberhardt I. ............................................................ » 363

Methods for cooperative product development within extended enterprises
Johansen K. and Björklund S. ............................................................... » 373

Risk-sharing in partnerships embracing new product development
Karjalainen J., Haahtel T., Malinen P. and Salminen V. ...................... » 383

An exploratory study of product modularization on supply chain design and coordination: A case study of a leading audio consumer electronics firm in Hong Kong / China
Lau A. K. W. and Yam R. C. M. .......................................................... » 393

Time and cost performance in new product development projects: A survey study in the Brazilian autoparts industry
Luz R. D. and Arkader R. ................................................................. » 403
A contract manufacturer's role in designing the supply chain  
*McKone K. E.* ................................................................. pag. 413

Linking supply chain architecture to product design: Proposing the P-SC/DM framework  
*Noori H., Chen C. and Lau F.* ........................................... » 423

Recent product development performance in the Japanese and UK auto industries  
*Oliver N. and Primost D.* ................................................... » 433

Perceptions in risk evaluation for project management  
*Parker D. and Mobey A.* ................................................... » 443

An evaluation of the stage of new product development in the Brazilian automobile industry  
*Pereira L., Abensur E. O., Bartuccio F. A. and Brunstein I.* .......... » 455

Negotiating customer value  
*Readman J., Squire B., Bessant J. and Brown S.* ....................... » 463

Drivers and performances in new product development: A cross-country comparison  
*Filippini R., Tessarolo P., Morita M., Matsui Y. and Rungtusanatham M.* ................................................................. » 473

Outsourcing of innovation - An ideological field of research? Managerial implications from a meta-analysis evaluating empirical research in the field  
*Rundquist J. and Nordin L.* ................................................. » 483

The relationship between market orientation, learning orientation and product innovation  
*Sampaio C. H., Perin M. G. and Faliero S. N.* ............................. » 493

Is flexible development really important to Japanese manufacturing? An empirical research  
*Sato O., Matsui Y. and Kitanaka H.* ....................................... » 501

Bio-disruption: Challenges for new product development in a genomic age  
*Smart P.* ........................................................................... » 511
The workflow management system integrated with PDM
Zhang C-J., Lu H. and Jiang Z-F. ........................................... pag. 521

QUALITY MANAGEMENT
AND CONTINUOUS IMPROVEMENT

Continuous improvement in the metal-mechanic sector: A Mexican example
Borges L. A. J. and Sanchez M. M. M. ........................................... » 531

A temporal study on the impact of ISO 9000 quality management systems
Casadesús M. and Karapetrovic S. ........................................... » 541

ISO 9000:2000. Is it the key to quality? A preliminary research study in Spanish companies
Costa M. M. and Lorente A. R. ........................................... » 551

Reconciling motivation, creativity, and process variability issues in process documentation
de Treville S., Antonakis J. and Edelson N. M. ........................................... » 561

The softer issues of OM: comparing the objectives of change management against the outcomes of change
Douglas-Judson Z. J. and Radnor Z. J. ........................................... » 571

Quality costs in the Galicia (Spain)-North Portugal Euro-region: Empirical study results
González A. J. and Prado J. C. ........................................... » 581

Six sigma and information technology: A case study in an insurance company
Infantini S., Laurindo F. J. B. and Pessoa M. S. ........................................... » 591

Factors affecting the development of collaborative improvement with strategic suppliers
Kaltoft R., Boer H., Corso M., Gertsen F., Gieskes J., Middel R. and Nielsen J. S. ........................................... » 601

Use and benefit of planned and systematic maintenance in manufacturing companies
Laugen B. T., Boer H., Frick J., Acur N. and Gertsen F. ........................................... » 611
Continuous improvement and manufacturing company survival - A case based analysis
Li X. ........................................................................................................ pag. 619

A model for starting up and implement continuous improvements and work development
Ljungström M. ............................................................................................ » 629

Gradual qualification system for food industries: An applied model in Brazilian cases
Makiya I. K. and Rotondaro R. G. ............................................................... » 639

Challenging EME’s to learn through collaborative improvement projects
Middel R., Cagliano R., Caniato F., Kaltoft R. and Nielsen J. S. ...... » 645

Describing and understanding change in operations - Beyond the notions of radical and continuous change
Petersen A. H. and Nielsen-Englyst L. ......................................................... » 655

Continuous improvement according to ISO 9000:2000 standards Where to start? How to measure it?
Santos J. F. and Arbós L. C. ................................................................. » 665

Cross-national evaluation of small to medium-sized manufacturing enterprises (SME’s) using an expert system based assessment tool (Quickview)
Simons G. R., Trachtenberger R., Ochoa-Laburu C., Heras I. and Merino Díaz de Cerio J. ................................................................. » 675

A TQM approach to evaluation criteria for human resource performance: Results of a questionnaire survey
Soltani E., Van der Meer R. B., Gennard J. and Williams T. M. ...... » 685

Continuous process innovation and company wide employee participation
Tonnesen T. ............................................................................................... » 695

KNOWLEDGE MANAGEMENT

Building and sustaining learning networks
Bessant J., Barnes J., Morris M. and Kaplinsky R. ................................. » 707
Dynamic capabilities at work. A case from the art industry
Calcagno M., Faccipieri S. and Rocco E. ........................................ pag. 717

Cognitive assets: A model to understand the organizational appropriation of collective tacit knowledge
Cataldo J. and Prochno P. ............................................................... » 727

Learning from old projects: Developing a framework for evaluating projects through action research
Christiansen J. K., Mouritsen J., Vesth H. and Wellendorf M. .......... » 737

Knowledge management for dispersed workers in utilities firms
Corso M., De Cantis G., Martini A., Massa S., Paolucci E., Pellegrini L. and Testa S. .......................................................... » 747

Variations on a theme: Advanced implementation of the NALP action learning approach in the extended manufacturing enterprise
Coughlan P., Coghlan D., Lombard E., Brennan L., McNichols T. and Nolan R. .......................................................... » 757

The group benchmarking method as a new tool in the competence transfer process between technology companies
Kleemola A. and Koskinen K. U. .................................................. » 767

Retrieval of organizational knowledge: A framework to understand how knowledge stocks are used
Nakano D. N. and Fleury A. C. .................................................... » 777

Evaluation of the organizational learning about Toyota production system / lean production system: A methodological proposition
Pantaleão L. H. and Antunes J. A. ................................................ » 787

The relationship between self-managed work teams and the learning organisation
Power J. and Waddell D. ............................................................. » 797

What is really behind the learning curve? Learning, knowledge development and performance evolution
Prochno P. .................................................................................. » 807

Limitations to the organizational learning capacity on complex environments: The case of the aerial safety
Revilla E. and Sánchez-Alarcos J. ................................................ » 817
Prerequisites for mutual learning in business relationships from a supplier's perspective - An analysis of six companies
Sjernström S. and Bengtsson L. ........................................ pag. 827

A dynamic programming approach to managing changes of the manufacturing process recipe and process knowledge
Vits J., Gelders L. and Pintelon L. ........................................ » 837

TEACHING AND RESEARCH IN OPERATIONS MANAGEMENT

Prototyping an electronic poll tool (EPT) to augment the operations management curriculum in computer classrooms
Allen S. L., Richmond D. and Carter W. ........................................ » 847

Simulated operations management
Bamford D. R. ............................................................... » 857

Valuating the e-learning system for safety in operation management - The ENEL case study
Bellandi G., Balzano R., Martini A. and Pellegrini L. ................. » 865

Learning by R.O.D. (Reading, Observing in practice, and Doing)
Borges L. A. J. ........................................................................ » 875

Operations teaching by integrating practice into the learning process
Bothams J. F. ........................................................................ » 881

Contribution for the understanding of the history of operations management
Corrêa H. L. ........................................................................ » 891

Equipping operations management students to reduce lead times: The role of mathematical modeling
de Treville S. ........................................................................ » 899

Service operations management teaching in the world: Academic factors favouring development
Aguilar V. G. and Machuca J. A. ........................................... » 909

Experience of using a multimedia case study in teaching operations management
Lane R. ................................................................................. » 919
Learning production management through a web-enabled simulation game
Lehtonen J-M., Haho P. and Mattila I. ................................................. pag.  929

Innovation in pom teaching and learning: A new generation of business simulators
Machuca J. A., Zamora M. G. and Ruiz del Castillo J. C. .................... » 939

Learning M.R.P. with I.C.T. based software
Márquez F. J., Machuca J. A. and Ruiz del Castillo J. C. .................... » 949

Qualitative research in OM: Criteria for evaluation
Martínez V. and Albores P. .......................................................... » 959

Improving POM self-learning: Development of a Just-in-Time multimedia application
Medina Lopez C. and Alfalla Luque R. .......................................... » 969

From black box to glass box: Experiments in reproducing operational realities
Nicholson T. A. J. ........................................................................ » 979

Strategy visualisation: Knowing, understanding, and formulating
Platts K. and Tan K. H. ................................................................. » 989

Optimized capability-entitlement: The competitive edge through the proposition of value
Stachoviak A. V. and Martins D. M. ................................................ » 999

Operations management education as a service
Vail R. L. .................................................................................. » 1009

Reflections on international operations management teaching and research
Vega P. G. and Machuca J. A. ......................................................... » 1017

Service operations management research through the analysis of scientific journals: preliminary results
Zamora M. G., Machuca J. A. and Aguilar V. G. ............................... » 1027

Author Index.................................................................................. » 1039
