# Table of Contents

## Keynote Address

Safe Design of Wood Machining Operations in Sawmills, Furniture and Joinery Plant Operations  
*R. Birkeland* ................................................................................................................. 3

## Chapter 1: The Basic Cutting Process

A Computer Program for Deriving Peripheral Loading on Rotary Tools from Edge Forces  
*W.M. McKenzie* ........................................................................................................... 11

Study of the Rotary Cutting Process (90-0): Relations Between Mechanical Characteristics, Density and Cutting Forces  
*F. Eyma, P.J. Meausoone, P. Martin* ................................................................. 25

Choice of Optimal Cutting Conditions in Wood Machining Using the "Coupled Tool-Material" Method  
*P-J. Meausoone, A. Aguilera, P. Martin* ................................................................. 37

Development of Innovative Milling Tools with Interior Disposal of Chips and the Implementation into Industrial Practice  
*M. Oertel, R. Fischer* ................................................................................................... 49

Chipless Molding of Veneer and Plywood  
*A. Wagenfuehr, B. Buchelt* .................................................................................... 57

The Effect of Grain Orientation on Swelling of Chips in Orthogonal Cutting  
*S. Ozaki, H. Yonenobu, M. Nagahama, S. Kimura, C. Xian-Bao* ......................... 59

The Process of Wooden Roller Sanding and Surface Quality  
*G. Wieloch, B. Kortylewski* .................................................................................... 69

## Chapter 2: Tool Materials and Tool Wear

Effects of the Knife Jointing and Wear on the Planed Surface Quality of Sugar Maple Wood  
*R. Hernandez, G. Rojas* ............................................................................................ 79

The Effect of Glue Type on Planer-Knife Wear When Machining Radiata Pine  
*R. Anderson, J. Kelly, J. Turner, P. Bayne, S. Weal, A. Singh* ......................... 93
Synergism of the Abrasive and Electrochemical Wear of Steel Tools Used in Wood Peeling
P. Beer ................................................................. 97

Tool Coatings for Wood Machining
J. Sheikh-Ahmad, T. Morita ........................................ 103

Determination of Wear on Cutting Edges
C. Gottloeber, R-J. Fischer, R. Fischer ......................... 115

Characteristics of Corrosive Wear of Coated High-Speed Steel Tools
H.K. Fukuda, K. Banshoya, Y. Murase ..................................... 131

Investigations of Wear Resistance of New Stellite 700 Series Grades Used for Saw Tipping
R. Szymani, J. H. Tylczak, J. A. Hauk, M. Ziomek-Moraz, J. B. C. Wu ........................................ 133

Duplex Treatment Based on the Combination of Ion Nitriding and PVD Process:
Application in Wood Machining

CHAPTER 3: DEVELOPMENTS IN WOOD PROCESSING MACHINES ........................................ 143

New Motion Systems for Machining Wood
R. Fischer ................................................................. 145

Influence of Log Characteristics and Machine Performance on Eucalyptus Board End Splitting and Board Deflections
J.N. Garcia, E. de Alvarenga Crespo, H. Baillères ........................................ 155

Industrial Machining of Douglas Fir with Various Tools and Materials
G. Goli, R. Marchal, M. Negri ........................................ 165

CHAPTER 4: ADVANCES IN SAWING ........................................ 185

Influence of Workpiece Contact on Guided Saw Cutting Behavior
G. S. Schafier, S. Udupi ........................................ 187

Remodeled Bandsaw to Control Washboarding During Sawing II
S. Kimura, H. Yokochi, M. Edamura, Y. Kojima ........................................ 199

Experimental Study on Washboarding in Wide Bandsaws
Z. Luo, C. Chen, S.G. Hutton, J. Taylor ........................................ 205

Washboarding During Cutting on Frame Sawing Machines
K. Orlowski, R.E. Wastielewski ........................................ 219

Designing Optimized Dust and Chip Extraction Systems with the Help of Numerical Methods
H.-W. Hoffmeister, J. Blecken

Abrasive Wear and Annual Ring Structure of Wood
T. Ohtani, T. Yakou, S. Kitayama, C. Tanaka

Wood Fiber-Plastic Composites: Machining and Surface Quality
U. Buehlmann, D. Saloni, R. Lemaster

Compression of the Surface Layer by Upmilling and Detection Methods
F. Scholz, J. Lauge

Fundamental Relationships of Wood Surface Roughness at Milling Operations
E. Magoss, G. Sitkei

On the Machining Accuracies For Grooving and Side Milling With A CNC Router
T. Ohuchi, Y. Murase

Surface Roughness and Acoustic Emission Measurements in Radiata Pine Planed Wood: A Tool-Material Pairing Application
A. Aguilera, P-J. Meausoone, P. Martin

Surface Quality: Comparison Among Visual Grading and 3D Roughness Measurements
Goli, P. Larricq, R. Marchal, M. Negri, J-P. Costes

Surface Characterization with 3-Dimensional Roughness Parameter
J-P. Costes, P. Larricq

Research and Experiments Concerning Sanding Rationalization Technologies of Wood Surfaces
N. Taran, N. Began

The Study of Selected Parameters in Wood Sanding in the Dependence on Sanding Pressure
M. Siklienka, A. Ockajova

Burr Formation in Machine through-Hole Boring of Wood Based Materials
K. Banshoya

Edge Area Deformation Through the Cutting Process
H.-W. Hoffmeister, T.A. Schnetker, J. Blecken

CHAPTER 7: MONITORING AND PROCESS CONTROL

Update of Process Monitoring and Control Research at North Carolina State University
R.L. Lemaster, D. Saloni, S. Rodkwan
Automatic Detection of Router Bit Failure During Machining
C. Tanaka, N. Zhu, T. Ohtani ................................................................. ...523

In-Process Controlled Robots Can Improve Quality
M. Lenner, J-E. Andersson ................................................................... ...533

Modeling Cutting Parameters to Control NC Milling
P. Hemmila, C. Gottloeber, A. Usenius, R. Fischer ................................... ...545

Recognition of Wood Cutting Conditions Through Cutting Sounds. Part IV: Relationship Between Surface Roughness and Cutting Sound Characteristics in Orthogonal Cutting with a Cap Iron
K. Nagatomi, K. Yoshida, K. Banshoya, Y. Murase ................................... ...553

Measurement of Surface Roughness of Coated Wood by Laser Scanning
Y. Fujiwara, K. Mori, Y. Fujii, Y. Sawada, S. Okumura ................................... ...563

ADDENDUM.......................................................................................... ...569

High Performance Cutting Processes in Woodworking
H.J. Gittel ............................................................................................ ...571

Wood Induced Electrochemical Corrosion Of Steel
P. Beer, J.Kamiński, T.Wierzęchoń, A.Sokolowska, S.Tschegg............................ ...577
