Proceedings

European Metallurgical Conference

Emc 2005

18 to 21 September 2005
Dresden, Germany

Volume 2
Lead / Zinc

New Developments and Trends in Hydrometallurgy
General Pyrometallurgy
Issues and Novel Technologies in Manufacturing
# Table of Contents – Volume 2

## Lead / Zinc

**Modelling of a Submerged Plasma Process for Zn-Containing Residues and Acid Mine Drainage Waters**

Karel Verscheure, Maurits Van Camp, Bart Blanpain, Patrick Wollants, Peter Hayes, Eugene Jak

Four years operational experience of lining condition monitoring on an Imperial Smelter

P. Linke, B. Böttcher, B. Schmitz, Dr. A. Löhlein, Dr. M. Hopf

**Zn Production from Zinc Bearing Secondary Materials: The Combined Indutec®/Ezinex® Process**

Dr. M. Olper and Dr. M. Maccagni

Determining the electrochemical activity of an anode for zinc electrowinning

M.Sc.(Tech) Lauri Pajunen, D.Sc.(Tech) Jari Aromaa, Professor Olof Forsén, D.Sc.(Tech) Olli Hyvärinen, Ph.D. Michael Barker

Continuous combined fuming-process of zinc slags and polymetallic raw materials

Dr.-Ing., prof. Arkady Okunev, Dr.-Ing. Victor Chentsov

**The Green Factory in Secondary Lead Production**

Dr. M. Olper, Dr. M. Maccagni

Clean Technologies for automotive Batteries Recycling: A case Study in Brazil

Dr.-Ing. Heloisa Vasconcellos de Medina
Leaching of Fluedusts Containing Chlorides From the Secondary Lead Blast Furnace
Zdenek Kunicky, Lukas Kroca

MPI – Lead Recycling Plant Mežica Slovenia – Influence of EU-Expansion
Univ. Dipl.-Ing. met. Igor Lipovnik

New Developments and Trends in Hydrometallurgy

Development of a new hydrometallurgical process
to recover oxidised Zn-Pb deposit
Jean Frenay, François Pondant, Françoise Peters, Georges Schmickrath

Application of Pressure Hydrometallurgy in Nonferrous Metal Industry
Kai-xi Jiang, Hai-bei Wang

Copper Production Combining Pyro- and Hydrometallurgy
Dr. M. Olper, Dr. M. Maccagni

High Purity Arsenic Trioxide Production by Hydrothermal Treatment of Arsenic Sulphide Ores and Concentrates
Dr. César Joe Ferron, Dipl.-Ing. Norbert L. Piret

Membrane technology in the metal industry
Dr. Elke Niederschlag, Prof. Dr.-Ing. Michael Stelter

Synergy of Pyrohydrolysis with Metals Extraction from Oxide Ores

General Pyrometallurgy

The new concept of polymetallic sulphide ores, ferrous and non-ferrous metals concentrate wasteless ecologic processing
Dr.-Ing. Prof. Arkady Okunev, Dr.-Ing. Victor Chentsov

The selective roasting, an efficient way for the treatment of complex concentrates, by products and residues
Paul-Dominique Oudenne

Roasting of High Arsenic Concentrate Flue Dust Mixtures
Dr.-Ing. C.M. Acuna, Ing. Diploma G. Berg, B. Lindquist

Issues and Novel Technologies in Manufacturing

Quality, productivity and numerical modeling in continuous casting of copper
D. Arto Kotipelto, Prof. Reijo Karvinen

Advanced Continuous Casting for Direct-Forged Aluminium Parts – Part 1
J. Lee Davis, Hans-Gerd Roczyn, Rick Bruski

Advanced Continuous Casting for Direct-Forged Aluminium Parts – Part 2
J. Lee Davis, Hans-Gerd Roczyn, Rick Bruski
Tribojet Atomization Unit – Preliminary Investigations of a New Method

A Pilot Mill Test Method for Lubricants and Emulsions in Hot and Cold Rolling
Andreas Johnsson

Aluminium alloy strip casting using an unequal diameter twin roll caster
Dr. Toshio Haga, Dr. Hisaki Watari, Dr. Shinji Kumai

High speed roll casting of Al alloy and Mg alloy strips
Dr. Toshio Haga, Dr. Hisaki Watari, Dr. Shinji Kumai

Preparation and Characterization of Cu-Al-Ni Shape Memory Alloy by Ingot Metallurgy
K. Jai Ganesh, Arunya Suresh, Prateek Maheshwari

Advances in WD-XRF – Flexible Response to Modern Analytical Tasks
Dr. Kai Behrens

The influence of glue on copper nucleation on titanium for electrolytic copper foil production

Chemical vapour deposition of CuInTe₂(s): Cu-In-Te-He-I system
Professor Y. K. Rao

Synthesis of particles of Ni- and Co- powders by ultrasonic spray of NiCl₂ and Co(NO₃)₂ and hydrogen reduction pyrolysis
Dr.-Ing. Srečko Stopić, Prof. Dr.-Ing. Bernd Friedrich, Dr.-Ing. Sebahattin Gürtmen

Production of capacitor grade tantalum and niobium powders using the new magnesium vapour reduction process
Dr. Helmut Haas, Dr. Christoph Schnitter

Thermodynamics of Surfaces and Adsorption in Al – Cu System
S. Acharya, T. Ray, J. P. Hajra
