Proceedings of the
IEEE ITSOC Information Theory Workshop 2005
on
Coding and Complexity

ITW2005

Rotorua, New Zealand, August 29 – September 1, 2005

Michael J. Dinneen (editor)
Department of Computer Science
The University of Auckland
Auckland, New Zealand
Email: mjd@cs.auckland.ac.nz

Ulrich Speidel (co-chair)
Department of Computer Science
The University of Auckland
Auckland, New Zealand
Email: ulrich@cs.auckland.ac.nz

Desmond P. Taylor (co-chair)
Electrical and Computer Engineering
The University of Canterbury
Christchurch, New Zealand
Email: d.taylor@elec.canterbury.ac.nz
Invited Speaker
Information Storage in Noise—A Survey
Peter Gács

Contributed Talks

Finite-Length Scaling for Irregular LDPC Code Ensembles
Abdelaziz Amraoui, Andrea Montanari and Rudiger Urbanke

BEAST Decoding—Asymptotic Complexity
Irina Bocharova, Rolf Johannesson and Boris Kudryashov

Optimum Symbol-by-Symbol Detection of Space-Time Coded Continuous Phase Modulated Signals over Fast Rayleigh Fading Channels
Dhammika Bokolamulla and Tor Aulin

Rate-Compatible Path-Pruned Convolutional Codes and their Applications on Channels with Insertion, Deletion and Substitution Errors
Ling Cheng and Hendrik C. Ferreira

Duality between Packings and Coverings of the Hamming Space
Gerard Cohen and Alexander Vardy

Interference Management via Capacity-Achieving Codes for the Deterministic Broadcast Channel
Todd P. Coleman, Emin Martinian, Michelle Effros and Muriel Medard

Fisher Information Matrix and Hyperbolic Geometry
Sueli I. R. Costa, Sandra A. Santos and João E. Strapasson

Periodic Oppermann Sequences for Spread Spectrum Systems
Gregory Cresp, Hans-Jurgen Zepernick and Hai Huyen Dam

Steepest Descent on Factor Graphs
Justin Dauwels, Sascha Korl and Hans-Andrea Loeliger

Bounds on the Performance of Sphere Decoding of Linear Block Codes
Mostafa El-Khamy, Haris Vikalo and Babak Hassibi

Asymptotically Optimum Detection for Large Wireless Networks with Fading
RaviGopalan and Oliver M. Collins

The Multivariate Merit Factor of a Boolean Function
T. Aaron Gulliver and Matthew G. Parker

Bounds on Signature Coding for Fast Frequency Hopping with Asynchronous Access
Sándor Györi
Maximum Entropy and the Edgewood Expansion
Peter Harremoes 68

New Monomial Bent Functions over the Finite Fields of Odd Characteristic
Tor Helleseth and Alexander Kholosha 72

A Finite-Field Transform Domain Construction of Binary Low-Density Parity-Check Codes
Robin Horan, Cen Jung Tjhai, Martin Tomlinson, Marcel Ambroze and Mohammed Ahmed 77

Correlation Analysis of Random Number Sequences based on Pseudo Random Binary Sequence Generation
David M. Horan and Richard A. Guinee 82

Capacity of M-ary 2-D RLL Constraints for Optical Recording Channels
Hua Hu, Duanyi Xu and Guosheng Qi 87

Iterative List Decoding
Jørn Justesen, Tom Høholdt and Johann Hjaltason 91

A New Method of The Codeword Reception of Systematic Codes
Vladimir Kazakov and Miguel Sanchez-Meraz 95

Viterbi Algorithm Motives in Turbo Decoding
Michael Kerner and Ofer Amrani 99

On the Capacity of Erasure Relay Channel: Multi-relay Case
Ramin Khalili and Kave Salamatian 104

A Note on a Decoding Algorithm of Codes on Graphs with Small Loops
Naoto Kobayashi, Toshiyasu Matsushima and Shigeichi Hirasawa 109

Computing the Levenshtein Distance of a Regular Language
Stavros Konstantinidis 114

A Simple Element Inverse Jacket Transform Coding
Moon Ho Lee and Ken Finlayson 118

Generalized Signature Delegation Algorithm
Chih-Yin Lin and Chen-Hwa Song 121

A New Trellis Source Encoding Method and its Application on Joint Source and Channel Coding
Zihuai Lin and Tor Aulin 124

Filtering: The Case for “Noisier” Data
Brian Lucena and Ioannis Kontoyiannis 129

Soft-In Soft-Out Reed-Solomon Decoding using Critically Subsampled Filterbanks
Geert Van Meerbergen, Marc Moonen and Hugo De Man 132

Multiuser Diversity in Delay-Limited Cellular Wideband Systems
Ralf R. Müller, Giuseppe Caire and Raymond Knopp 138
A Unified Framework for Tree Search Decoding: Rediscovering Sequential Decoding

Arul D. Murugan, Hesham El Gamal, Mohamed O. Damen and Giuseppe Caire

Ergodic Theorems for Algorithmically Random Sequences

Masahiro Nakamura

The Mutual Information Constellation

Anders Nilsson and Tor Aulin

Explicit Expression of the Interval Algorithm for Random Number Generation Based on Number Systems

Yasutada Oohama

Mutual Information of Non Coherent Rayleigh Fading Channels with Gaussian Input

Rasika R. Perera, Tony S. Pollock and Thushara D. Abhayapala

Finite-Length Analysis of a Capacity-Achieving Ensemble for the Binary Erasure Channel

Henry D. Pfister

Theoretical Analysis of Zero-redundancy Estimator with a Finite Window for a Memoryless Source

Mohammad M. Rashid and Tsutomu Kawabata

Decoding of Second Order Reed-Muller Codes with a Large Number of Errors

Bassem Sakkour

On Decoding Product Lattices

Amir J. Salomon and Ofer Amrani

Boneh-Shaw Fingerprinting and Soft Decision Decoding

Hans Georg Schaathun and Marcel Fernandez-Munoz

Achieving MIMO Channel Capacity Using Multirate Layered Space-Time Coding Architectures

Mathini Sellathurai and Tharmalingam Ratnarajah

Design of Non-Systematic Turbo Codes for Universal Source Controlled Channel Coding

Gil I. Shamir and Kai Xie

Bounds on the Entropy of Patterns of I.I.D. Sequences

Gil I. Shamir

On Polyalphabetic Block Codes

Vladimir Sidorenko, Georg Schmidt, Ernst Gabidulin, Martin Bossert and Valentin Afanassiev

Complex Spotty Byte Error Control Codes

Kazuyoshi Suzuki, Toshihiko Kashiyama and Eiji Fujiwara

Analytic Algorithmics, Combinatorics, and Information Theory

Wojciech Szpankowski
Bayesian Approach to a Definition of Random Sequences with Respect to Parametric Models
Hayato Takahashi 217

Further Results on Mapping Functions
Alberto Tarable and Sergio Benedetto 221

Capacity Loss in CDMA Systems Due to the Constraint of Scalability
Frederik Vanhaverbeke and Marc Moeneclaey 226

Universal Estimation of Information Measures
Sergio Verdú 232

Upper Bounds for Writing on Dirty Paper with Noisy Side Information
Sriram Vishwanath 233

Universal Similarity
Paul Vitanyi 238

Stopping Set Analysis for Hamming Codes
Jos H. Weber and Khaled A.S. Abdel-Ghaffar 244

A Construction of Resilient Functions with Satisfying Synthetical Cryptographic Criteria
Yong-Zhuang Wei and Yu-Pu Hu 248

Serially Concatenated Continuous Phase Modulation with Low Density Generator Matrix Codes:
Property, Optimization and Performance Analysis
Ming Xiao and Tor Aulin 253

On Performance Bounds for Serially Concatenated Codes with a General Inner Code and Interleaver
Ming Xiao and Tor Aulin 258

String Parsing-based Similarity Detection
Jia Yang and Ulrich Speidel 263

Universal Lossless Data Embedding without Explicit Compression
Hidetoshi Yokoo 268

Construction of LDPC Codes for AWGN and Binary Erasure Channels Based on Finite Fields
Lingqi Zeng, Ying Y. Tai, Lan Lan, Shu Lin and Khaled Abdel-Ghaffar 273

Estimation and Decoding Strategies for Channels with Abruptly Changing Statistics
Wufei Zhang, Christian Koller, Andrew W. Eckford, Daniel J. Costello, Jr., Thomas E. Fuja and Gil I. Shamir 277
