The Fifth International Conference on HSLA Steels
HSLA Steels 2005
(November 8-10, 2005. Sanya, Hainan, China)

Sponsored by
The Chinese Society for Metals (CSM)

Organized by
The Chinese Society for Metals (CSM)
Central Iron and Steel Research Institute (CISRI)
National Engineering Research Center of Advanced Steel Technology (NERCAST)

Co-sponsored by
ABM-Brazilian Metallurgy & Materials Society
AIMM-The Australasian Institute of Mining and Metallurgy, Australia
IIM-The Indian Institute of Metals
ISIJ-Iron and Steel Institute of Japan
ASM International, USA
KIM-The Korean Institute of Metals and Materials
VDEh-Verein Deutscher Eisenhuttenleute, Germany

Supported by
Vanadium International Technical Committee (VANITEC)
Companhia Brasileira de Metalurgia e Mineracão (CBMM)
CONTENTS

The Joint Plenary Session

China Needs High Strength Low Alloy Steels, Microalloyed Steels, and Ultrafine Grained Steels .................................................. Li Shi-Jun 1

The Role of Microalloyed Steels in the Age of Explosive Growth of Steel Usage ................................................................. Michael Korchynsky 3

Overview on the Theory of Deformation Induced Ferrite Transformation ..................................................................................... WENG Yu-qing, SUN Xin-jun, DONG Han 9

Kinetics and Crystallography of Intragranular Ferrite Formed on MnS+V(C,N) Complex Precipitate in Austenite ..................... T. Maki, T. Furuha 16

Producing High Quality Niobium-Bearing Steels Using the CSP Process at Nucor Steel Berkeley .................................................. A. J. DeArdo, R. Marraccini, M. J. Hua, et al. 23

Plenary Session

The Development and Application of Microalloyed Steel in Baosteel ...................................................................................... Jiangxin Lu 31

The Effect of Vanadium on the Microstructure and Toughness of Weld Heat Affected Zones ...................................................... P. S. Mitchell 36

An Alloy Design Concept for Better Matching of Strength and Toughness in Pipeline Steels .......................................................... Pascoal Bordignon, Klaus Hulka 43

Grain Refinement and Mechanical Properties in Advanced High Strength Sheet Steels .......................................................... BLECK Wolfgang, PHIU-ON Kriangyut 50

Recent Progress in High Strength Steels for Automobile in Japan ......................................................................................... Hiroshi Takechi 58

Manufacture and Application of Advanced High Strength Steel Sheets for Auto Parts Manufacture ................................................... Ohjoon Kwon and Sueng Chul Baik 64

Developments in Advanced High Strength Steels ....................................................................................................................... Debanshu Bhattacharya 69

Modeling the Microstructural Evolution in HSLA Steels Produced by Thin Slab Casting and Direct Rolling ....................................... J.M. RODRIGUEZ-IBABE 76

Surface Scale Evolution in the Hot Rolling of Steel ................................................................................................................. BEYNON John H, KRZYzanowski Michal, TARANETS Nataliya 83

R&D of New Generation Steels .................................................................................................................................................. WANG Guodong, LIU Xianghua 91
The Development of 600MPa-800MPa Grade High Strength Low Carbon Bainitic Steel

He Xinlai, Shang Chengjia, Hou Huaxin, et al. 98

Nb Micro-alloyed CMnAlSiP TRIP Steel

B.C. De Cooman, D.Krizan 105

Mathematical Modelling Design of Multi-Phase Steels for Advanced Applications

ANELLI Ettore, BUZZICHELLI Giuliano 111

Technical Session: Physical Metallurgy of HSLA Steels

Alloying Effects and Mechanisms

Vanadium in Cold Rolled HSLA Sheet Steel

David K. MATLOCK, Robert J. GLODOWSKI, John G. SPEER 117

Effect of Niobium Addition on Zn-coated 590 DP Steel

Shunichi Hashimoto 122

Synergistic Effect of Copper and Manganese on Resistant to Atmospheric Corrosion for Low-alloying Steel

Junhua Dong, Xinhua Chen, Enhou Han, et al. 127

Influence of Zr on Toughness of HAZ for Ultra High Strength Low Carbon Bainite Steel

Guo Aimin, Guo Jia, Yuan Weixia 132

Effect of Titanium on the Precipitation of VN and AlN in Austenite

ZHANG Jian-su, T. N. Baker 137

Some Physical Metallurgy Aspects of High Strength Hot Rolled Nb-Ti Microalloyed Steels with Superior Fracture Resistance and Formability

HARISH Nathani, DEVESH.K. Misra, JACK Hartmann, et al. 142

Effect of V Microalloying on Phase Transformation in Low Carbon Steels during Continuous Cooling Process

WANG Kai, WANG Li-jun, CUI Wen-fang, et al. 147

Niobium in Microalloyed Structural & Engineering Steel

Christian Klinkenberg 151

Effect of Vanadium on the Strength and Toughness of Wheel Steel at Different Reheat Temperatures

PAN Tao, CUI Yin-hui, SU Hang, et al. 157

Effect of Al, C, and Mn on Structure and Mechanical Properties of Dual-Phase and TRIP Steels

Nina FONSTEIN 162

Effect of Mn Content and TMCP on Microstructures and Mechanical Properties of C-Mn Steels

LI Long, DING Hua, DU Lin-xiu, et al. 169

The Influence of Chromium on Rust Structure and Corrosion Resistance of Microalloyed Steels

ZHAO Yun-tang, YANG Shan-wu, ZHANG Xue-yong, et al. 174

Research on Microalloying for Improving Segregation of High-Carbon Hot-Rolling Wire-Rod

HUANG Zhenyi, CHEN Guang, LIU Yaran et al. 179

Effects of Silicon, Manganese and Hot-rolling Parameters on Mechanical Properties of DP Steels

SONG Hongmei 184

Effect of Sulfur Content on Hydrogen Induced Cracking in Pipeline Steels

Kai Liu, Yiyin Shan, Jiayan Xu, et al. 189
Effect of TiN Inclusions on Impact Toughness of Low Carbon Microalloyed Steels ................................. YAN Wei, SHAN Yi-yin, Yang Ke, et al. 195

Effect of RE (Rare Earth) on Improving the Corrosion Resistance of Steel ................................. Wang Bing, Liu Qinyou, Wang Xiangdon, et al. 207

**Transformation and Precipitation**

Precipitation Strengthening of V(C,N) in High Vanadium Steels ................................. XU Man, SUN Xinjun, LIU Qingyou, et al. 217

Influence of a Trace Amount of Ti on Precipitates in Nb Microalloyed Steel during Reheating ................................. Yueling Qin, Haiwen Luo, Bart Kooi, et al. 222

Mechanism of Friction Heat Induced Phase Transformation and Spalling of Train Wheel Steel ................................. SU Hang, PAN Tao, LI Li, et al. 228

In Situ Neutron Diffraction of Austenite-to-Ferrite Transformation in Nb-free and Nb-added Low Alloy Steels during Thermo-mechanically Controlled Process ................................. XU Ping-guang, TOMOTA Yo, LUKAS Peter, et al. 234

Characterization of Precipitates in Vanadium and Titanium Microalloyed HSLA Steels ................................. WU Hong-yan, DU Lin-xiu, MA Zheng, et al. 239

Effect of Inclusion on Formation of Acicular Ferrite in Ti-bearing Non-quenched and-Tempered Steels ................................. Yang Ying, Yang Zhanbing, Wang Fuming, et al. 244

In-situ Observations of Austenite Grain Growth ................................. WANG Wei, WANG Huan-rong, WANG Cheng-quan 250

The Recrystallization Behavior of Nb-microalloyed Steel under High Strain Rate Conditions ................................. SHA Qing-yun, HAO Sen, ZHANG Wan-shan, et al. 255

Investigation on Continuous Cooling Transformation Behavior of High Strength Cold Rolled Steel Containing Nb & Ti ................................. Liu Hao, Zhong Dingzhong, Chen Yantang, et al. 260

Precipitation Behavior of Second-phase Particles and Microstructure Characteristics in Nb & Ti Micro-alloyed High Strength Steel ................................. Liu Hao, Chen Xiao, Li Pinghe, et al. 264

The Influence of Holding Time on Bainite Transformation in Deformed Niobium Microalloyed Steel ................................. YI Hai-long, DU Lin-xiu, WANG Guo-dong, et al. 274

On-line Softening of Medium Carbon Steel through TMCP and Its Application

SU Shihuai, HUI Weijun, YU Tongren, et al. 368

Analysis of Fracture Toughness in Transition Temperature Region of an API X70 Linepipe Steel

S.Y. Shin, S. Lee, N.J. Kim, et al. 373

Strength and Bauschinger Effect in TMCP Line Pipe Steels

Quantitative Compositional Analysis of P Segregation to Grain Boundaries in Steel by Use of EDS and EELS

Qi Jun-jie, Zhang Li-na, Zhang Xiao-zhong, et al. 384

Research on the Deformation Behavior of Low Carbon Steel

PEI Xin-hua, HU Heng-fa, HUANG Xu-chuan, et al. 388

Effect of Tensile Specimen Shape Factor on Test Results for High Grade Line Pipe with Heavy Thickness

Ji Lingkang, Xie Lihua, Wang Hongxia, et al. 393

A Wear-resistant Study on Plasma Surface Metallurgy Mo-Cr Alloy Layer

Xu Jinyong, Xu Min, Long Xiangqian, et al. 399

Experimental Study on the Strength and Toughness Properties of HSLA Steel under Dynamic Loading

FANG Jian 403

Microstructure and Mechanical Properties of Plain Carbon Steel Q195 by Wire Drawing at Room Temperature

WU Yuenzhong, Gao Hongtao, MA Yongqing, et al. 408

Comparison between Charpy Transition Temperature $T_{CVN}$ and Reference Temperature $T_o$ for 10Ni3CrMoV Ferritic Steel

Gao Yifei, Shen Junchang, Liu Tao, et al. 413

Study on the Microstructure, Mechanical Properties and Corrosion Resistance of a Novel HSLA Steel

ZHANG Xueyong, GUO Aimin, YANG Shanwu, et al. 417

Comparison Research on Fire Endurance between Fire-resistant &Weathering Construction Steel and Q235 Steel

LIU Ji-xiong, CHEN Xiao, LI Ping-he, et al. 422

Effect of Deformation on the Mechanical Properties of a Microalloyed Medium Carbon Steel

Y. J. Zhang, H. Dong, W. J. Hui, et al. 428

Microstructure of Wear Resistant Steel with Austenite Toughening Martensite

Sun Yu-hong, Li Jian-hua, Fan Yun-bo 432

Weldability Research of B610E (08MnNiVR) High Strength Q&T Steel Developed by Baosteel

Ma Zhao-hui, Zhang Han-qian, Han Jian, et al. 435

Intermediate Transformation Structure and Mechanical Properties of High Strength Low Carbon Bainite Steel

SHANG Chengjia, NIE Yi, HE Xinlai, et al. 440

The Influence of Temperature Distribution after Hot Rolling on Structure and Mechanical Performance of the VN Micro-alloying H-beam

Wang En-rui, Yang Cai-fu, Zhang Yong-quan, et al. 445
Technical Session: Processes and Modeling of HSLA Steels

Grain Refinement and Strengthening Mechanism of Automobile Beam Steels Produced by CSP Technology
- ZHAO Zheng-zhi, KANG Yong-lin, YU Hao, et al. 451

Processing of Nb-microalloyed HSLA Steels in CSP Facilities
- Fulvio Siciliano, Luis A. Leduc Lezama, Christian Klinkenberg, et al. 456

Strengthening Mechanism of Ti Micro-alloyed High Strength Steels Produced by Thin Slab Casting and Rolling
- HUO Xiang-dong, MAO Xin-ping, LI Lie-jun, et al. 464

The Effect of Chemical Composition on the Hot-Deformation Resistance during Processing of Microalloyed Steels in Thin Slab Casting/Direct Rolling Process
- F. Siciliano, L. L. Leduc and K. Hensger 469

Practice in HSLA Structural Steel Production with Wide Slab Caster
- OU-YANG Fei, CHENG Xiao-wen, ZENG Ling-yu 474

The Production Practice of Ultra-Low-Sulfur Steel in Benxi-steel
- Song Mantang, Wang Huizhong 479

Analysis of Cracking in High-Strength Ship Plates
- LI Guo-bin, LIU xu-hui 484

Study on High Temperature Mechanical Properties of Peritectic Steel
- Chen Zhiping, Zhu Miaoyong, Cheng Naiyang, et al. 489

Effect of Thermo-mechanical Control Process on Property of Age Hardenable Copper Bearing Steel
- LI Chao-feng, ZHANG Yong-jia 493

Effect of Different Ti Process on Microstructure and Toughness of HAZ
- Fu Kuijun, Hao Sen, Wang Dongming 498

Physical Based Modeling on Microstructure Evolution in Thermo-mechanical Processing
- WANG Xitao, SIWECKI Tadeusz, ENGBERG Göran 502

Modeling of Ferrite Transformation Kinetics during Hot Strip Rolling of the Q460 Grade Steel
- ZHOU Xiao-guang, LIU Zhen-yu, JIAO Si-hai, et al. 508

Modeling of Strain Rate Effects on Microstructure Evolution and Mechanical Properties of HSLA and IF-Ti Steels
- Janusz MAJTA, Monika STEFANSKA-KADZIELA, Krzysztof MUSZKA 513

The Application of Crystal Plasticity Finite Element Method in the Mesoscale Simulation of Deformed Austenite Decomposition into Ferrite
- Namin Xiao, Mingming Tong, Yongjun Lan, et al. 518

A Prediction Model for Transformation-Induced Plasticity and Mechanically-Induced Martensitic Transformation in Steel
- Heung Nam Han, Seung Hyun Lee, Hu-Chul Lee, et al. 524

Microstructure and Properties of Non-Quenched/Tempered Seamless Tubes Made of Medium Carbon V-microalloyed Steel
- LIU Guo-quan, LIU Sheng-xin, ZHONG Yun-long, et al. 530

Physical Modelling of the Transient Behaviour of Flow Stress in Ferrite under Abrupt Strain Rate Change Conditions
- SOMANI Mahesh and KARJALAINEN Pentti 537
Assessment and Investigation of Recrystallization Models During Hot Strip Rolling

LIU Zheng-dong, TANG Guang-bo, WEI Jie, et al. 543

Modeling Study of Interaction between Grain Boundary and Second Phase Particles

WANG Wei, LIU Dan 548

Kinetics of Bainite Transformation (I) Diffusional Growth Model

S.X. Zhao, W. Wang, D.L. Mao, et al. 552

Effect of Rolling Process on the Microstructure and Mechanical Properties of Low Carbon V-N Steel

CAO Yan, HUANG Zhen-yi, WANG Ping, et al. 557

Experimental Investigation and Mathematical Modeling of Dynamic Recrystallization Behavior of Nb Microalloyed Steels

MA Li-qiang, YUAN Xiang-qian, LIU Zheng-yu, et al. 561

Research on Microstructure and Property of Low Carbon Steel Produced by Flexible Slab Rolling with Warm Rolling Technology

Yu Hao, Kang Yong-lin, Wang Xin, et al. 566

Hardening of Low-Carbon Steel by Electron-Beam Surfacing of Nitrogen and Carbon Coatings with the Austenitic Matrix

N.A. Narkevich, N.K. Galchenko, E.A. Ivanova, et al. 571

Development of Cr, V Microalloyed SWRH82B Wire Rod Produced by CC-CR with 130mm×130mm Billet

Wang Quan-li, Li Fei, Zhang Gong-yan, et al. 576

Laser Welding of Modern Automotive High Strength Steels

Hardy Mohrbacher 582

Development of TRIP Effect in Si-Mn Bulk Steel Using Technique of Press Forging

ZRNIK Jozef, STEJSKAL Ondrej, NOVY Zbyšek, et al. 587

Grain Refinement of Cold Rolled Low Carbon Steels by Rapid Transformation Annealing

LESCH Christian, ÁLVAREZ Pedro, BLECK Wolfgang, et al. 594

Effect of Cyclic Annealing on the Development of Grain Size, Microstructures and Mechanical Properties of Plain – Carbon Steels

MONDAL Dipak kumar, SAHA Atanu 600

Investigation of Batched Annealing Process in Nb&Ti Bearing High Strength Cold Rolled Steel Sheet

Liu Hao, Chen Xiao, Sun Fangyi, et al. 606

Numerical Simulation of Heat Transfer Process under Ultra Fast Cooling for Hot Strip

YUAN Guo, WANG Guodong, LIU Xianghua 610

Cr2 Cold Work Roll Spalling Mechanism Analysis

WU Guo-sheng 614

Numerical Simulation of Deformed 35CrMo Steel during Continuous Cooling

ZHANG Bin, QI Quo-ping 620

Coiling Temperature Prediction at 2050 HSM of Baosteel

CHENG Jie-feng, LIU Zheng-dong, TANG Guang-bo, et al. 627

Effect of Heat Treatment on Microstructure and Mechanical Property of Brake Beam Steel

DENG Su-huai, CUI Jing-yu, CHEN Jing-sheng, et al. 632
Finite Element Simulation of Rolling Process for Wide and Thin Bainitic Plate with High Strength

CHEN Qing-jun, KANG Yong-lin, YU Hao, et al. 637

Analysis on Section Effect of Controlled Rolling and Controlled Cooling Thick Plate by Finite Element Method

Li Nan, Yang Caifu, Zhang Yongquan, et al. 642

Study on Surface Heat Oxidation of Copper-Bearing HSLA Steel

LI Li, SU Hang, YANG Cai-fu, et al. 647

Thermodynamic Model for Precipitation in Low Carbon Steels and Its Application in CSP Process

XIANG Song, LIU Guo-quan, LI Chang-rong, et al. 651

Thermo-Mechanical Simulation Study on Chromium-bearing Low Carbon Hot-rolled TRIP Steel

Chen Yu, Tang Guo-yi, L.H. Wang, et al. 657

Modeling of Carbonitride Precipitation in Austenite During Hot Rolling

ZENG Yu, WANG Wei 661

Modeling Study of Soft Impingement Effect on the Isothermal Formation of Ferrite

ZHANG Pi-jun, FU Li-ming, WANG Wei 666

Kinetics of Bainite Transformation (II) Displacive Model

S.X. Zhao, W. Wang, D.L. Mao 672

Technical Session: Products and Applications of HSLA Steels

Development of Ultrahigh Strength (100-120ksi) Niobium Containing HSLA Steels for Pipeline Applications

SANKARAN Shanmugam, MAHESH Tanniru, DEVESH K. Misra, et al. 677

Development of Steels with Increased Strength and Cold Resistance for Large-diameter Electric-welded Pipes at Severstal Steel Works

Efron L.I., Matrosov M. Y., Golovanov A.V., et al. 682

Production and Application of High Strength and High Toughness Pipeline Steel with Acicular Ferrite

ZHENG Lei, GAO Shan 688

Research on the Strengthening and Toughening Mechanism of Nb Bearing X60 Pipeline Steel by CSP Process

Liu Yazheng, He Jianzhong, Liu Libin, et al. 694

The Use of High Temperature Processing(HTP) Steel for High Strength Oil and Gas Transmission Pipeline Applications

Douglas G. Stalheim 699

Development of Hot Rolled Strip Steels with Improved Weldability for API X60-X70 Grade Pipes

Y. Morozov, V. Kornilov, S. Nastich, et al. 705

First X-80 HSLA Pipeline in the USA

FAZACKERLEY, W.J., MANUEL, P. A., CHRISTENSEN, L. 711

Acicular Ferrite Microstructure under Isothermal Transformation in Low Carbon Steel containing V and Mo

Hyung-Ha Jin and Hu-Chul Lee 719

Study on the 610 MPa Grade Steel for High Heat Input Weld Applications

LI Shu-rui, GUO Ai-min, HUANG Jing, et al. 723

The Properties and Microstructures of ULCB 800N/mm² Steel Grade Quenched at the Different Temperatures

HOU Huaxing, GUO Huijiu, HAO Sen, et al. 729
Applications of High Formability and Fine Grain Hot Rolling C-Mn Steel Plate in Vehicle

MA Ming-tu, LI Zhi-gang, YI Hong-liang 734

Designing of the Low Carbon Low Silicon TRIP Steels

LI Lin, B.C. De Cooman, ZHANG Mei, et al. 740

Microstructure and Mechanical Properties of Thermomechanically Processed and Bake-Hardened

Nb-Mo-Al TRIP Steel

I.B. Timokhina, M. Ryan, M.K. Miller, et al. 744

Static and Dynamic Mechanical Properties of Low Carbon Low Silicon TRIP Steel Containing Aluminum and Vanadium

Yang Chun-xia, Shi Wen, Li Lin, et al. 749

Development of the Micro-alloyed TRIP Steels and Properties of Their Laser Welded Blanks

ZHANG Mei, FU Ren-yu, CAO Dong-dong, et al. 754

High Strength Steel for the Truck Industry and Mining Equipment Operating in Arctic Environment

ALEKSANDROV Sergey, HULKA Klaus, STEPASHIN Andreij, et al. 759

High Strength Low Alloy Steels - Indian Scenario

Rachit Khanna, Shambhu Kumar Jha 764

Development of the Limited Hardenability Steel and Its Contact Fatigue Behavior

XU Luo-ping, LI Lin, MIN Yong-an 770

Recent Developments of Modern Rail Steels

LI Xiao-fei, Peter Langenberg, Sebastian Münstermann, et al. 775

Development of Super Steel Hot Rolled Ribbed Bars

WANG Xiaowen, LIU Xianghua, WU Di, et al. 782

Development of A 610 MPa Class Q&T High Strength Steel Plate B610E for Large Oil Storage Tanks

JIANG Lai-zhu, HOU Hong, PENG Kang, et al. 786

The Application of Microalloyed HSLA Steel in the Russian Construction Industry

ALEKSANDROV Sergey, HULKA Klaus, MOROSOV Youri, et al. 791

Trial Commercial Production and Research into Structure Formation Processes of High Strength Steel Plates for Pressure Vessels

Yu. I. Matrosov, O. V. Nosochenco, O. A. Bagmet 796

Current Progress in Study of Application of Rare Earth Elements in HSLA Steels

WANG Long-mei, LIN Qin, JI Jing-wen, et al. 802

Effect of Vanadium on the Properties of Fire-resistant Weathering Steels

Zheng Zhi-wang, Liu Qing-chun 807

Research of Fire-resistant Steels for Buildings

SHEN Jun-chang, LIU Zhi-yong, Yang Caifu, et al. 812

Elevated Temperature Properties of Niobium-Microalloyed Steels for Fire-Resistant Structural Applications

John G. SPEER, Steven G. JANSTO, Justin C. CROSS, et al. 818

Microstructure and Mechanical Properties of Fire-Resistant Steel

Liu Zhi-yong, Shen Jun-chang, Yang Cai-fu, et al. 824

The Development of Microalloyed Steel in Jistle

Feng yong 829

Microstructure and Properties of Large Section Microalloyed Steel in Unquenched and Untempered with

High Strength

Wu Xiaochun, Luo Yi, Min Yongan, et al. 833
Research and Application of X80 Pipeline Steel with High Strength and High Toughness

Gao Shan, Zheng Lei 839

Effect of Nitrogen Addition on The Properties of Hot-rolled high-strength Low-alloying Steels Containing V and Mo

Zheng Zhiwiang, Liu Qingchun 843

The Developments of the Hot Rolled Si-Mn TRIP Steel Sheets

LI Zhuang, WU Di, HU Rong 848

Development of High Strength with High Toughness Pipe-line Steel at BX Steel
