Solid Freeform Fabrication as an important and totally integrated approach to design, materials processing and manufacturing research results related to it is contained in this proceedings of the SFF Symposium held in Austin, Texas on August 1-3, 2005

SFF Topics covered in the Symposium include:

Processes
Modeling
Applications
Materials

David L. Bourell, Richard H. Crawford,
Joseph J. Beaman, Kristin L. Wood,
and Harris Marcus, Editors

**Preface** ................................................................................................................................. ix  
**Organizing/Advisory Committee** ........................................................................................... xi  

## Processes

Spiral Growth Manufacturing (SGM) – A Continuous Additive Manufacturing Technology for Processing Metal Powder by Selective Laser Melting  
C. Hauser, C. Sutcliffe, M. Egan, P. Fox, University of Liverpool ........................................... 1-12  

New Printing Technology for Fully Graduated Material Properties  
E. Uhlmann, P. Elsner, Fraunhofer Institute for Production Systems and Design Technology .......................................................... 13-18  

Mobile Paving System (MPS): A New Large Scale Freeform Fabrication Method  
B. Asiabanpour, D. Um, V. Sriraman, A. Tseng, J. Mata, N. Wahed, Texas  
State University-San Marcos ................................................................................................. 19-30  

PCPro a Novel Technology for Rapid Prototyping and Rapid Manufacturing  
T. Himmer¹, E. Stiles², A. Techet³, E. Beyer³, Fraunhofer USA,  
Fraunhofer IWS, University of Technology at Dresden .......................................................... 31-38  

Hybrid Manufacturing: Integrating Direct Write and Stereolithography  
Frank Medina⁰, Amit Lopes⁰, Asim Inamdar⁰, Robert Hennessey⁰, Jeremy Palmer⁰, Bart Chavez⁰, Don Davis⁰, Phil Gallegos⁰, Ryan Wicker⁰, University of Texas-El Paso, Sandia National Labs-NM ......................................................... 39-49  

Numerical Study on the Recoating Process in Microstereolithography  
W. Tan, I. Gibson, University of Hong Kong .......................................................................... 50-59  

Rapid Fabrication of Large-sized Solid Shape using Variable Lamination Manufacturing and Multi-functional Hotwire Cutting System  
Chosun University, Menix Engineering Ltd. ................................................................. 60-71  

Freeze-form Extrusion Fabrication of Ceramics  
Tieshu Huang, Michael S. Mason, Gregory E. Hilmas, Ming C. Leu,  
University of Missouri-Rolla .......................................................................................... 72-85  

New Design for Conserving Polymer Powder for the SIS Rapid Prototyping Process  
Bahram Asiabanpour, Robert Cano, Lane VanWagner, Thomas McCormick, Farhana Wasik, Texas State University-San Marcos ........................................................................ 86-97  

Innovative Selective Laser Sintering Rapid Manufacturing using Nanotechnology
J.H. Koo, L. Pilato, G. Wissler, J. Cheng, W. Ho, K. Nguyen, S. Lao, A. Cummings, M. Ervin

Residual Stresses in Selective Laser Sintering and Selective Laser Melting
Peter Mercelis, Jean-Pierre Kruth, University of Leuven

Materials

Mechanical Properties and Biological Responses of Bioactive Glass Ceramics Processed using Indirect SLS

SLS Processing Studies of Nylon 11 Nanocomposites
J. Cheng, S. Lao, K. Nguyen, W. Ho, A. Cummings, J. Koo

A Genetic Algorithm with Design of Experiments Approach to Predict the Optimal Process Parameters for FDM
G. Arumaikkannu, N. Uma Maheshwarra, S. Gowri

Mechanical Properties and Bioanalytical Characterization for a Novel Non-Toxic Flexible Photopolymer Formulation Class

Polymer Matrix Nanocomposites by Inkjet Printing
Brian McMorrow, Richard Chartoff, Pierre Lucas, Wade Richardson

SLS Materials Development Method for Rapid Manufacturing
R.S. Evans, D.L. Bourell, J.J. Beaman, M.I. Campbell

Controlled Local Properties in the Same Part with Sintaflex A New Elastomer Powder Material for the SLS Process
Gideon N. Levy, Paul Boehler, Raffaele Martinoni, Ralf Schindel, Peter Schleiss

Transparentization of SLS Processed SMMA Copolymer Parts by Infiltrating a Thermosetting Epoxy Resin with Tuned Refractive Index
Toshiki Niino, Hidenori Yamada

Towards the Design of a Layer-Based Additive Manufacturing Process for the Realization of Metal Parts of Designed Mesostructure
Christopher B. Williams, Farrokh Mistree, David W. Rosen
Rapid Design and Manufacture of Ultralight Cellular Materials
W. Brooks, C. Sutcliffe, W. Cantwell, P. Fox, J. Todd, R. Mines,
University of Liverpool---------------------------------- 231-241

Non-isothermal Initial Stage Sintering Strain Model with Application to
316L Stainless Steel
S. Johnston\textsuperscript{a}, R. Anderson\textsuperscript{a,b}, D. Storni\textsuperscript{a}, \textsuperscript{a}University of Washington-Seattle,
\textsuperscript{b}Concurrent Technologies Corporation---------------------------------- 242-253

Laser Sintering of Stainless Steel using Resin Powder
Y. Imai, H. Kyogoku, K. Shiraishi, Kinki University ---------------------------------- 254-260

Improving Accuracy of Powder Sintering-based SFF Processes by Metal
Deposition from Nanoparticle Dispersion
N.B. Crane\textsuperscript{a}, J. Wilkes\textsuperscript{b}, E. Sachs\textsuperscript{b}, S.M. Allen\textsuperscript{b}, \textsuperscript{a}Sandia National Labs-
NM, \textsuperscript{b}Massachusetts Institute of Technology-------------------------------- 261-272

Development of a Co-Cr-Mo to Tantalum Transition using LENS for
Orthopedic Applications
Saripella Surya Kumar\textsuperscript{a}, Brent Stucker\textsuperscript{b}, \textsuperscript{a}IIT Bombay, \textsuperscript{b}Utah State
University ---------------------------------- 273-282

Sensitivity Analysis of Process Parameters in Laser Deposition
Zhiqiang Fan, Kaushik Phatak, Frank Liou, University of Missouri-Rolla -------- 283-294

Freeform Fabrication of Zinc Air Batteries with Tailored Geometry and
Performance
Megan E. Berry, Evan Malone, Hod Lipson, Cornell University ------------------- 295-307

Determination of Dynamic Powder Modeling Parameters via Optical
Methods
Todd Sparks, Heng Pan, Frank Liou, University of Missouri-Rolla ------------------ 308-314

Modeling

Use of Parameter Estimation for Stereolithography Surface Finish
Improvement
Benay Sager, David W. Rosen, Georgia Institute of Technology ------------------ 315-325

Compensation Zone Approach to Avoid Z Errors in Mask Projection
Stereolithography Builds
Ameya Limaye, David W. Rosen, Georgia Institute of Technology------------------ 326-337

Thermo-structural Finite Element Analysis of Direct Laser Metal
Deposited Thin-Walled Structures
Srdja Zekovic, Rajeev Dwivedi, Radovan Kovacevic, Southern Methodist
University --------------------------------------------------------------- 338-355

Thermal Modeling of Metal Powder-Based Selective Laser Sintering
Tiebing Chen, Yuwen Zhang, University of Missouri-Columbia------------------ 356-369

Mechanism for Determination of G-factors for Solid Freeform
Fabrication Techniques Based on Large Heat Input

iii
Rajeev Dwivedi, Srdja Zekovic, Radovan Kovacevic, Southern Methodist University

Techno-Economic Analysis of Hybrid Layered Manufacturing
K.P. Karunakaran, Vishal Pushpa, Sreenath Babu Akula, Rajeev Dwivedi, R. Kovacevic, Indian Institute of Technology Bombay, Southern Methodist University

A Model for Error Propagation in the Surface Profile for Solid Freeform Fabrication
Rajeev Dwivedi, Srdja Zekovic, Radovan Kovacevic, Southern Methodist University

Simplified Production of Large Prototypes using Visible Slicing
K.P. Karunakaran, P.D. Solanki, Onkar S. Sahasrabudhe, Vishal Pushpa, Rajeev Dwivedi, Radovan Kovacevic, Indian Institute of Technology Bombay, Southern Methodist University

Workpiece Alignment for Hybrid Laser Aided Part Repair Process
Ajay Panackal Padathu, Todd Sparks, Frank Liou, University of Missouri-Rolla

Part Repair using a Hybrid Manufacturing System
Kunnayut Eiamsa-ard, Hari Janardanan Nair, Lan Ren, Jianzhong Ruan, Todd Sparks, Frank W. Liou, University of Missouri-Rolla

Applications

Hydrogels in Stereolithography
Karina Arcaute, Luis Ochoa, Brenda Mann, Ryan Wicker, University of Texas-El Paso, Sentrx Surgical, Inc.

Rapid Prototyping of PEM Fuel Cell Bi-Polar Plates using 3D Printing and Thermal Spray Deposition
Brett Lyons, Marat Batalov, Pranavasu Mohanty, Suman Das, University of Michigan-Ann Arbor, University of Michigan-Dearborn

Improvement of Electrical Conductivity of SLS PEM Fuel Cell Bipolar Plates
Ssuwei Chen, David L. Bourell, Kristin L. Wood, University of Texas-Austin

Rapid Fabrication of Smart Tooling with Embedded Sensors by Casting in Molds Made by Three Dimensional Printing
John Kobliska, Petar Ostojic, Xudong Cheng, Xugang Zhang, Honseok Choi, Yong Yang, Xiaochun Li, University of Wisconsin-Madison

Stereolithography: A Basis for Integrated Meso Manufacturing
Freeform Fabrication of Ionomeric Polymer-Metal Composite Actuators
   Evan Malone, Hod Lipson, Cornell University---------------------------------- 484-502

The Potential of Freeform Construction Processes
   R.A. Buswell, R. Soar, A. Gibb, A. Thorpe, Loughborough University------------ 503-512

Nanotailoring Stereolithography Resins for Unique Applications using Carbon Nanotubes
   R.B. Wicker, University of Texas-El Paso ----------------------------------- 513-524

Author/Attendee List---------------------------------------------------------- 525-531
