1st International Conference

STEELSIM
2005

SIMULATION and MODELLING of METALLURGICAL PROCESSES in STEELMAKING

25 - 27 October 2005
Brno
Czech Republic

organised by

- CZECH METALLURGICAL SOCIETY
- THE AUSTRIAN SOCIETY FOR METALLURGY AND MATERIALS
- THE INSTITUTE OF MATERIALS, MINERALS AND MINING, ENGLAND

THE CONFERENCE IS SUPPORTED BY:
* TRINECKÉ ŽELEZÁRNY, a.s., CZECH REPUBLIC
* MORAVIA STEEL, a.s., CZECH REPUBLIC
# Contents of the Conference Proceedings

## Plenary session

1. **SIMULATION OF TRANSPORT PHENOMENA IN STEELMAKING**  
   A. Ludwig, University of Leoben, Austria  
   Page 11

2. **GOALS, RECENT DEVELOPMENTS AND CRITICAL ISSUES IN MODELLING OF HOT ROLLING, FORGING, HEAT TREATMENT AND PREDICTION OF MATERIAL PROPERTIES**  
   B. Buchmayr, University of Leoben, Austria  
   Page 13

## Session 1, part 1

1. **MASS TRANSFER MODEL OF GAS-LIQUID REACTIONS INSIDE A GAS-STIRRED LADLE**  
   G. N. Venturini, M. B. Goldschmit, Tenaris - Center for Industrial Research, Argentina  
   Page 23

2. **MODELLING OF MIXING PROCESS IN METALLURGICAL REACTORS USING COLORED LIQUIDS**  
   N. P. Stelian, V. Adrian, B. Vasile, Universitatea "Dunarea de Jos", Romania  
   Page 39

3. **OPTIMIZATION OF GAS STIRRING PROCESSES IN THE LADLE WITH UTILIZATION OF MATHEMATICAL MODELS**  
   A. Smirnov, S. Gridin, I. Salmash, Donetsk National Technical University, Ukraine  
   Page 51

4. **SIMULATION OF LADLE STEEL TEMPERATURE**  
   S. Pirker, Johannes Kepler University, Austria; M. Forsthuber, voestalpine Donawitz GmbH, Austria  
   Page 61

5. **KINETICS OF REFINING OPERATIONS IN A LADLE FURNACE**  
   F. Lara, A. Conejo, Morelia Technological Institute, Metallurgy Department, México  
   Page 71

6. **A THEORETICAL CONCEPT FOR MODELLING CLEANNESS OF STEEL**  
   K. Th. Mavrommatis, RWTH Aachen University, Department of Ferrous Metallurgy, Germany  
   Page 87

---

Advertisement of STROJÍRNY TŘINEC, a. s.
Session 1, part 2

7. PHYSICAL AND MATHEMATICAL MODELING FLUID FLOWS MOVEMENT IN TUNDISH FOR 6-STRAND BILLET CCM
   A. Smirnov, S. Gridin, Donetsk National Technical University, Ukraine

8. PHYSICAL MODELING OF ARGON BUBBLING
   R. Moravec, L. Válek, J. Pyš, Mittal Steel Ostrava a. s., Czech Republic

9. MODELLING OF TRANSITION PHENOMENA IN TUNDISH DURING GRADE CHANGE OF CC-STEEL
   K. Michalek, M. Sawová, K. Gryc, VŠB-Technical University of Ostrava, Czech Republic; J. Pindor, TŘINECKÉ ŽELEZÁRNY, a.s, Czech Republic; P. Stříšák, TechSoft Engineering, s.r.o., Czech Republic; J. Morávka, V. Mrájca, Třinecký inženýring, a.s., Czech Republic

10. POSSIBLE WAYS OF PROCESSING RESULTS OF TRANSITION PHENOMENA OCCURRING IN THE TUNDISH USING APPROXIMATION METHODS AND THEIR IMPLEMENTATION IN FIELD PRACTICE
    J. Morávka, V. Mrájca, Třinecký inženýring, a.s., Czech Republic; K. Michalek, K. Gryc, M. Sawová, VŠB-Technical University of Ostrava, Czech Republic; J. Pindor, TŘINECKÉ ŽELEZÁRNY, a.s., Czech Republic

11. NUMERICAL SIMULATION OF STEEL SOLIDIFICATION AS A TOOL FOR SECONDARY COOLING OPTIMIZATION OF THE CONTINUOUS CASTING MACHINE
    L. Válek, R. Moravec, Mittal Steel Ostrava a.s., Czech Republic; J. Pospíšil, Technical University of Ostrava, Czech Republic

Advertisement of Třinecký inženýring, a.s.

Session 1, part 3

12. COMPUTER PROCESS MODELLING APPLIED TO THE DESIGN AND ENHANCEMENT OF CONTINUOUS CASTERS
    B. Barber, B. Patrick, Corus UK Ltd, Teesside Technology Centre

    J. Střetina, F. Kavička, Vysoké učení technické, Czech Republic; J. Pindor, J. Kuběna, TŘINECKÉ ŽELEZÁRNY, a.s., Czech Republic
14. ANALYSIS OF TURBULENT FLOW STRUCTURES IN THICK SLAB MOLD
P. Ramírez-López, R. D. Morales, The National Polytechnic Institute-ESIQIE, Mexico

15. NUMERICAL DESCRIPTION OF PARTICLE AND BUBBLE MOTION IN THE SUBMERGED ENTRY NOZZLE REGION DURING STEEL CONTINUOUS CASTING
Claudia Pfeiler, Andreas Ludwig, Menghuai Wu, Christian-Doppler, University of Leoben, Austria

16. THERMOMECHANICAL MODELLING OF STEEL CONTINUOUS CASTING
M. Gäumann, O. Köser, Calcom ESI SA, Switzerland; V. Krutíš, Mecas ESI s.r.o., Czech Republic

17. OPTIMISATION OF MOULD FLOW PATTERNS TO IMPROVE SLAB QUALITY AND OPERATIONAL PERFORMANCE AT MITTAL STEEL OSTRAVA (MSO)
M. Allatt, Advent Process Engineering Inc, Canada; T. Mischinger, MSO, Czech Republic; M. Pszczołka, Vesuvius Česka Republika a.s.

18. SIMULATION OF TECHNOLOGICAL PARAMETERS INFLUENCE ON SURFACE TEMPERATURE OF ROUND CC BLANK
R. Pyszko, M. Přihoda, P. Fojtík, J. Molínek, VŠB-TU Ostrava, ČR

19. A 3D THREE PHASE EULERIAN SOLIDIFICATION MODEL FOR THE COLUMNAR-TO-EQUIAXED TRANSITION (CET)
M. Wu, A. Ludwig, University of Leoben, Austria

20. A BETTER UNDERSTANDING OF INITIAL SOLIDIFICATION PHENOMENA DURING CONTINUOUS CASTING BY USING A MOULD SIMULATOR
W. van der Knoop, H. H. Visser, G. Abbel, Corus Research, the Netherlands

21. NUMERICAL AND EXPERIMENTAL STUDY OF CONTINUOUS CASTING MOLD FLOWS WITH HIGH GAS LOADING
M. Javurek, J.K. Universität Linz, Austria; M. Brummayer, R. Wincor, B. Kaufmann, voestalpine Linz, Austria

22. ROLE OF CFD ANALYSIS AND OPTIMIZATION OF THE CONTINUOUS CASTING PROCESSES
A. Mukhopadhyay, J. Lam, Fluent Inc., USA; P. Střásák, TechSoft Eng., Czech Republic
23. **OPTIMISATION OF CONTROLLED COOLING IN CONTINUOUS CASTING**
M. Raudenský, A. Horák, P. Kotrbáček, Brno University of Technology, Czech Republic

24. **ON A NEW METHOD OF CHEMICAL HETEROGENEITY MEASUREMENT AND EVALUATION IN CC STEEL SLAB**
J. Dobrovská, V. Dobrovská, VŠB – Technical University of Ostrava, Czech Republic, K. Stránský, F. Kavička, Brno University of Technology, Czech Republic

25. **SIMULATION OF DROPLET FORMATION DURING DC ELECTRO-SLAG-REMLETING**
A. Kharicha, A. Ludwig, M. Wu, University of Leoben Austria

Advertisement of Progrestech, s. r. o.

Session 2, part 1

26. **APPLICATION OF CASE BASED REASONING TECHNIQUE FOR ADVICE ON SUCCESSFUL QUICK TAP PRACTIC**
M. Adderley, J. Madill, Corus RD&T, UK

27. **€coMod - ONLINE PROFIT OPTIMIZATION DURING PRODUCTION THROUGH TOTAL TRANSPARENCY OF PROCESS COSTS**
H. Wallner, VOEST-ALPINE INDUSTRIEANLAGENBAU GMBH & CO, AUSTRIA

Advertisement of D5, a. s.

Session 2, part 2

28. **NEW ACHIEVEMENTS IN QUALITY CONTROL SYSTEMS FOR HOT BAND AT VOESTALPINE STAHL/AUSTRIA**
G. Hubmer, VAI, Austria; K. Rendl, voestalpine Stahl, Austria

29. **THE HOT-DEFORMATION RESISTANCE AND MICROSTRUCTURE EVOLUTION DURING PROSESSING OF MICROALLOYED STEELS IN THIN SLAB CASTING/DIRECT ROLLING PROCESS**
F. Siciliano, CBMM, Brazil; Luis L. Leduc, Hylsa, Mexico; Karl-Ernst Hensger, Schkeuditz, Germany

30. **CALCULATION MODELLING OF METALLURGICAL PROCESSES DURING HOT WIRE ROLLING**
J. Elfmark, P. Šimeček, ITA s. r. o., Czech republic; K. Čmiel, TŘINECKÉ ŽELEZÁRNY a. s., Czech republic
31. **OPTIMIZED ROD ROLLING TO ACHIEVE DESIRED MECHANICAL PROPERTIES**
Ch. Sommitsch, B. Buchmayr, University of Leoben, Austria; M. Roveda, VAI Pomini S.r.l., Italy; N. Gaudenzi, O.R.I. Martin S.P.A, Italy

32. **SIMULATION OF FORMING CONDITIONS DURING SECTION ROLLING USING THE FINITE ELEMENTS METHOD**
D. Hajduk, Pavel Šimeček, ITA s. r. o., Czech Republic; V. Vašíček, VÍTKOVICE STEEL a. s., Czech Republic

33. **MODEL FOR STATIC RECRYSTALLISATION KINETICS OF HOT DEFORMED AUSTENITE IN LOW ALLOY AND Nb/V MICROALLOYED STEELS**
S. F. Medina, M. Gómez, National Center for Metallurgical Research Spain; A. Quispe, National University "Jorge Basadre", Peru; J.E. Mancilla, C. A. Hernández, CICATA-IPN, México

34. **CONTROL OF THE THERMO-PHYSICAL PROPERTIES OF THE STEEL DURING THE ROLLING PROCESS BY MODELLING OF THE HEAT TRANSFER**
D. Constantinescu, University Politehnica of Bucharest, Romania

35. **SIMULATION OF THERMAL BEHAVIOR OF ROLLS IN ROLLING**
J. Horský, L. Vavrečka, M. Pohanka, Brno University of Technology Czech Republic

36. **DEVELOPMENT OF MICROSTRUCTURE IN FORGING ALLOY 718**
O. Harrer, Ch. Sommitsch, University of Leoben, Austria; S. Wallner, Materials Center Leoben, Austria; V. Wieser, Böhler Edelstahl GmbH, Austria

**Session 2, part 3**

37. **DETERMINATION OF BOUNDARY CONDITIONS BY INVERSE ANALYSIS FOR FEM MODELLING OF COOLING OF RAILS**
R. Fabík, A. Babinec, VŠB-TUO, Czech Republic

38. **NUMERICAL MODEL OF THE SICO TEST**
L. Trebacz, M. Pietrzyk, Akademia Górniczo-Hutnicza, Poland; R. Kuziak, Institute for Ferrous Metallurgy, Poland

39. **COMPUTER SIMULATION OF FLAT AND SHAPED BARS ACCELERATED COOLING IN CONDITION OF MEDIUM-SECTION ROLLING MILL OF ISPAT NOVÁ HUŤ a.s.**
O. Žáček, R. Fabík, J. Kliber, VŠB-TUO, Czech Republic
40. **APPLICATION OF PROCESS MODELLING BY MEANS OF FEA**
   J. Kliber, VŠB - TU Ostrava, Czech Republic

41. **THE PREDICTION OF THROUGH COIL MECHANICAL PROPERTIES OF HOT ROLLED STEEL THROUGH THE APPLICATION OF ARTIFICIAL NEURAL NETWORKS USING BULK CHEMISTRY AND VARIOUS PROCESSING PARAMETERS**
   D M Jones, Corus Strip Products UK & Cardiff University; J. Watton, Cardiff University; K. J. Brown, Corus RD&T UK

42. **MODELLING OF AUSTENITIZATION KINETICS IN HYPOEUTECTOID STEELS DURING CONTINUOUS HEATING PROCESS**
   P. J. Zhang, Northeastern University, China; H. R. Wang, W. Wang, Baosteel Technology Center, China

43. **METHOD FOR DEVELOPMENT OF NEW STEEL GRADES**

44. **ENHANCED CONTROL OF THE FURNACE TEMPERATURES AND GAS VOLUME RATES OF A CONTINUOUS ANNEALING LINE BY A THERMODYNAMIC MODEL**
   L. Croce, celano GmbH, Germany; A. Grosse-Gorgemann, celano GmbH, Germany

45. **COMPARISON OF FRACTURE CRITERIA AT HIGH TEMPERATURES FOR NICKEL-BASED ALLOYS**
   G. Rüf, Ch. Sommitsch, B. Buchmayr, University of Leoben, Austria

46. **INFLUENCE GEOMETRY DIE OF ECAP TECHNOLOGY ON FINAL DEFORMATION EXTENSION**
   M. Kubíček, S. Rusz, M. Pastrňák, P. Filipč, VŠB – Technical University of Ostrava, Czech Republic
Poster section

1. **VERIFICATION OF THE NUMERICAL SIMULATION OF LIQUID STEEL FLOW IN CONTINUOUS CASTING TUNDISH**
   T. Merder, J. Jowsa, M. Warzucha, Technical University of Częstochowa, Poland

2. **NUMERICAL SIMULATIONS OF ALLOY ADDITION MIXING TIME IN THE METAL BATH DURING BOTTOM GAS INJECTION**
   M. Warzecha, J. Jowsa, T. Merder, University of Technology, Poland

3. **DETERMINATION OF VALUE OF COEFFICIENT OF THE MASS TRANSFER IN EVAPORATION PROCESS COMPONENT OF LIQUID METAL ALLOY**
   L. Blacha, A. Fornalczyk, Jerzy Łabaj, Silesian University of Technology, Poland

4. **ASSESSMENT OF AUSTENITE STRENGTHENING AND ENHANCEMENT OF FERRITIC GRAIN REFINEMENT IN A Nb-MICROALLOYED STEEL BY MEANS OF HOT ROLLING SIMULATION**
   M. Gómez, S. F. Medina, National Center for Metallurgical Research, Spain
