  2.4 Comparison between first time buyers in 1992 and 2001 ...... 27
  2.5 Scope for housing policy? ................................ 28
  2.6 Conclusions .............................................. 31

3 'The quantified customer', or how financial institutions value risk .... 33
  Manuel B. Aalbers
  3.1 Risk and home ownership ................................ 33
  3.2 Risk selection in the mortgage market ...................... 37
  3.3 The power of quantification ................................ 38
  3.4 Credit risk management .................................. 40
  3.5 Profiling .................................................. 42
  3.6 Credit scoring ............................................ 42
  3.7 Social-demographic data .................................. 43
  3.8 Acceptance policy and credit limits ....................... 44
  3.9 Difficulties and risk .................................... 47
  3.10 Conclusions .............................................. 51

4 Optimal mortgage choices within different institutional contexts .... 59
  Peter Neuteboom
  4.1 Introduction ............................................. 59
  4.2 Model and data .......................................... 61
  4.2.1 Modelling the spot rate and the appropriate yield curve 61
  4.2.2 Estimation procedure ................................ 64
  4.2.3 Data .................................................... 65
  4.3 Optimal mortgage choices in a cost-risk framework .......... 66
  4.3.1 Introduction .......................................... 66
  4.3.2 Optimal mortgage choice strategies .................... 66
4.3.3 Results ................................................. 69
4.4 Discussion ............................................. 70

Appendix  Modelling the costs and risk of mortgages ................. 73

5 Affordable and low-risk home ownership .................. 75
   Marja Elsinga
   5.1 Introduction ...................................... 75
   5.2 A search for different forms of affordable and low-risk
       home ownership in four countries .................. 76
   5.3 Further analysis of three Dutch tenures ............... 85
   5.4 Conclusions ....................................... 90

6 Affordability, need and the intermediate market .......... 95
   Responding to the challenge in pressured regions
   Glen Bramley & Noah Kofi Karley
   6.1 Introduction ...................................... 95
   6.2 Concept of affordability ............................ 96
   6.3 Measurement and modelling of affordability and
       access ............................................. 98
   6.4 Affordability over space and time .................. 103
   6.5 The intermediate market .......................... 108
   6.6 Concluding discussion ............................. 112

7 Structural changes in the Danish market for
   owner-occupation .................................... 117
   Jens Lunde
   7.1 Changing conditions and changing structures for
       owner-occupation .................................. 117
   7.2 Owner-occupation - an economic policy target .......... 118
   7.3 Owner-occupation - the aspired form of tenure ........ 119

   7.8 Owner-occupier families' housing wealth/income
       ratios ............................................. 129
   7.9 Owner-occupier's housing wealth/income ratios,
       by age ........................................... 132
   7.10 Housing wealth/income ratios for young owner-
       occupies families ................................. 134
7.11 Rates of change in housing wealth/income ratios during a bust and boom period ........................................ 136
7.12 How do people finance the increasingly expensive owner-occupied dwellings? ........................................ 139
7.13 Conclusion ........................................................................ 140

8 Mortgage equity withdrawal and remortgaging activity ................................................................. 145
Jackie Smith
8.1 Introduction ........................................................................ 145
8.2 The Bank of England's measure of MEW ....................... 146
8.3 The component flows of MEW ......................................... 147
8.4 Survey of English Housing data ...................................... 148
8.5 Average amounts of equity withdrawal over time .......... 151
8.6 Remortgagers and equity withdrawal ............................... 152
8.7 Reasons for remortgage .................................................. 153
8.8 Characteristics of remortgagers ......................................... 153
8.9 Serial remortgaging .......................................................... 154
8.10 Are movers also remortgaging and withdrawing equity? ................................................................. 156
8.11 Households' equity position .............................................. 157
8.12 Conclusion ........................................................................ 158

9 Home ownership, poverty and educational achievement ................................................................. 161
Glen Bramley & Noah Kofi Karley
9.1 Introduction ........................................................................ 161
9.2 Review of factors affecting educational attainment .......... 162
9.3 Methodology ...................................................................... 169
9.4 Results of modelling .......................................................... 174
9.5 Concluding discussion ........................................................ 181

10 Payment difficulties of home owners in Germany ................................................................. 187
Melanie Kloth
10.1 Introduction ........................................................................ 187
10.2 Context: The owner-occupied sector of the German housing market .................................................. 188
