Numerical Modeling of Discrete Materials

In Geotechnical Engineering, Civil Engineering, and Earth Sciences

Edited by

Heinz Konietzky
ITASCA Consultants, Gelschenkirchen, Germany
Table of Contents

Preface IX
Organization XI

Masonry Structures

Comparative computations of masonry arch bridges using continuum and discontinuum mechanics 3
R. Schlegel, K. Rautenstrauch & J. Will

Modeling stone masonry dynamics with 3DEC 7
J.V. Lemos

Failure analysis of masonry shear walls 15
R. Schlegel & K. Rautenstrauch

Tunnels and Caverns

The Gotthard-Base-Tunnel: conceptual modeling for tunneling extremely weak zones 21
H. Konietzky, L. te Kamp & H. Hagedorn

A study on the deformation of the lining of a circular tunnel according to the variation of ground condition 29
Y.S. Oh, T.W. Ha, J.S. Lee & Y.W. Park

Modeled versus observed tunnel performance in weak bedded rock under high cover: the Dilarizos tunnel case study (Cyprus) 35

UDEC modeling of tunnel cavern excavation in Sydney 43
Y. Sun & R. Bertuzzi

Numerical analysis of the behavior of a karst cavern at Castellana-Grotte, Italy 49
P. Lollino, M. Purise & A. Reina

Modeling-aided design of a very large span underground excavation 57
S.C. Bandis, C.A. Schinas & J.C. Sharp

Stability study on the Xiaolangdi powerhouse cavern by UDEC and DIANA 65
Z. Huang, E. Broch & M. Lu

DEM research on the mechanical behavior of jointed rock mass and the support structure of shallow tunnels 73
G. Wang, F. Heinrich & H. Konietzky

Mining and Waste Repositories

Use of 3DEC to predict roof movements in thick coal seam operations where non-entry faces are employed 85
C. Liu & Y. Tan
Numerical modeling with 3DEC and risk assessment for a geometrically complex and highly stressed sill pillar at Onaping Mine
C.P. O'Connor, P.P. Andrieux, C. Pritchard & B.P. Simser

Influence of rock mass characteristics on inflow into deposition holes for nuclear waste disposal – a coupled hydro-mechanical analysis using 3DEC
D. Mas Ivors, E. Hakami & O. Stephansson

Back analysis rock burst Völkershausen 1989
W. Minkley

Safety assessment for the land surface in the vicinity of the potash shaft Neustäfburt VI
K. Salzer, W. Minkley & T. Popp

Determination and validation of the rock mass post-peak mechanical properties for a 3DEC strain-softening model of the 680 Sill Pillar at Louvicourt Mine
P.P. Andrieux, H. Zhu, D. Labrie, C. Doucet, S. Lampron & D. Fleury

General Geomechanics

Modeling creep in jointed rock masses
R. Glamheden, H. Hökmark & R. Christiansson

3D-hydromechanical modeling of hydraulic stimulation of deep geothermal wells in Hot Fractured Rock at Soultz-sous-Forêts (Alsace-France)
A. Hosni, S. Gentier, X. Rachez & D. Billaux

UDEC modeling of constant normal stiffness direct shear tests
J.B. Szymakowski

UDEC modeling of truck dumping
Y. Sun

Numerical stress field modeling for underground structures
H. Konietzky & L. te Kamp

3DEC modeling results generalized by stochastic approach
J. Jakubowski

Synthetic earthquake sequences – aspects of the spatiotemporal event distribution
H. Schelle & G. Grünthal

Simulation of tectonic history to define rockmass stresses on a regional geological scale
I.H. Clark

Rock Reinforcements

Dynamic rock bolt test and UDEC simulations for a large cavern under shock load
H. Hagedorn

The elasto-plastic material behavior of rock anchors with hardening and its application in mining
A. Hausdorf, F. Heinrich & H. Konietzky

Discussion on the determination of the $K_{\text{bond}}$ parameter for the numerical modeling of cablebolt elements with 3DEC
H. Zhu

Rock bolting and rock support and their combination in hard coal mining – a comparative study made with UDEC
U. Lendel
Mining reinforcement viability determination in situ in strong tectonized rock mass using DKRControl method

Gy. Dedk, St. E. Dedk, M. Georgescu, C. Predescu, M. Scurtu & C. Cioata

219

Slopes, Dams and Foundations

An investigation on stability and support of intake rock slopes of Karun III Dam and power project

N. Meyer & K. Ahangari

229

A numerical study about flexure toppling phenomenon on rock slope

Y. Mitani, T. Esaki & Y. Cai

235

A UDEC model for “kink band slumping” type failures of rock slopes

A. Preh & R. Poisel

243

Application of a discontinuity model with softening to the analysis of dam foundations using the Discrete Element Method

R. Resende, J.V. Lemos & P.B. Dinis

249

Foundation on rock: effect of rock fractures on settlement of bridge piers

P. Alfonsi, O. Fouche & E. Bourgeois

257

Stress and seepage analyses for a gravity dam on a jointed granitic rock mass

G. Barla, M. Bonini & G. Cammarata

263

Numerical analysis of an old masonry dam using UDEC

M. Dolezalova

269

Footwall slope failure mechanisms and design considerations using UDEC

L.R. Alejano

279

Application of UDEC to a stress-related mine slope failure at Leigh Creek, South Australia

M.A. Coulthard, D.S. Lucas & P.G. Fuller

289
