COASTAL ZONE '91
Volume 3

Proceedings of the Seventh Symposium on Coastal and Ocean Management
Long Beach, California
July 8-12, 1991

Sponsors

Contributing
American Shore and Beach Preservation Association
American Society of Civil Engineers
Coastal Zone Foundation
County of Los Angeles Department of Beaches and Harbors
National Ocean Industries Association
U.S. Department of Commerce, NOAA
  National Environmental Satellite, Data, and Information Service
  National Ocean Service
U.S. Department of the Interior
  Fish and Wildlife Service
  Geological Survey
  Minerals Management Service
U.S. Environmental Protection Agency

Affiliating
American Fishing Tackle Manufacturers Association
American Society for Environmental Education
California Coastal Commission
California Department of Parks and Recreation
California State Lands Commission
California State Universities Ocean Studies Institute
Central Coast Conservation Center
Frederic R. Harris, Inc.
Guenoc Winery
International Coastal and Ocean Organization
Japanese Association for Coastal Zone Studies
National Wildlife Federation
Natural Resources Defense Council
Point Reyes Bird Observatory
Port of Long Beach
San Francisco Bay Conservation and Development Commission
Society of American Military Engineers
Sport Fishing Institute
UNESCO Intergovernmental Oceanographic Commission
United Nations Environment Programme
U.S. Army Corps of Engineers

  Coast Guard
  Maritime Administration

Edited by Orville T. Magoon, Hugh Converse, Virginia Tippie, L. Thomas Tobin, and Delores Clark
SESSION 54: OCS MANAGEMENT ISSUES

Conflict Resolution—MMS and North Carolina
Judith M. Wilson .................................................. 1762

A Model for Evaluating Outer Continental Shelf (OCS) Oil and Gas Exploration Plans
David S. Palmer and Donna D. Moffitt .................................. 1773

OCS Oil and Gas Off South Florida—Developing a Consensus on the Facts
John Goll and Debby Tucker ........................................... 1786

Subject Index .................................................................. 1798A
Author Index .................................................................... 1798G

VOLUME 3

SESSION 54: OCS MANAGEMENT ISSUES (Continued)

The Pacific Northwest OCS Task Force—Evolution and Status
John B. Smith and Therese Swanson ........................................ 1799

Defining a Standard of Scientific Information for Decisions on Oil and Gas Leasing in the
Pacific Northwest
Pamela Miller ................................................................. *

Environmental Sensitivity Criteria for Managing Offshore Oil and Gas
Raymond Beittel and John Goll .............................................. *

SESSION 55: POLLUTION MONITORING AND RESEARCH

Physical-Chemical Evaluation of Rainwater as an Indicator of Atmospheric Pollution in Some
Zones of the City of Maracaibo, Venezuela
Blanca Medina Urdaneta and Hender Urdaneta .................................. 1806

NOAA’s Monitoring of Ocean Dumping at the 106-Mile Dumpsite
Andrew Robertson, Adriana Cantillo, and Frank Aikman, III .................................................. 1820

New Directions for NOAA National Status and Trends Program—Historical Reconstruction of
Sediment Contamination Using Dated Cores
Nathalie J. Valette-Silver and Thomas P. O’Connor .................................................. 1830

National Status and Trends Program—Contaminants in Mussel Tissues from United States
Coastal Waters
Donna D. Turgeon and Gunnar G. Lauenstein ........................................... 1842

The Effect of Industrial Development on Sediment Contamination of Apponaug Cove, Rhode
Island—A Historical Analysis
Marina Havan-Orumieh, John A. Knauss, and Jeffery Corbin .................................................. *

Responses of Benthic Macrofauna to Phaseout of Sewage Sludge Disposal in the Inner
New York Bight
Robert N. Reid, Steven A. Fromm, Ann B. Frame, Dorothy Jeffress, and Joseph J. Vitaliano ... 1859

Halifax Harbour Clean Up—A Research Perspective
H. Brian Nicholls ............................................................... 1874

Accumulation of Aromatic Fractions in Tissues of the Crab Uca rapax Exposed to Crude Oil
Arlette Rodriguez .............................................................. *

SESSION 56: IMPACTS OF COASTAL STRUCTURES II

Downdrift Effects of Navigation Structures on the California Coast
James R. Walker .............................................................. 1889

Impact of Charleston Harbor Jetties on Folly Beach, South Carolina
Billy L. Edge ................................................................. *

Beach Erosion in the Town of Jupiter Island—Causes and Remedial Measures
Robert G. Dean ............................................................... 1904

The Florida Approach to Minimizing Downdrift Impacts from Navigational Inlets
Kirby Green ................................................................. *
SESSION 57: PUBLIC EDUCATION ACTIVITIES AND PROGRAMS

The Marine and Coastal Educational Resource Directory
Lisa Hybarger ................................................................. *

Hawaii Earth Day 1990—A Statewide Environmental Education Program
Peter J. Rappa ................................................................. *

Boater Environmental Education in Puget Sound
Peggy Britt ................................................................. *

Evolution of Public Education Programs at the Channel Islands National Marine Sanctuary
Todd A. Jacobs ................................................................. *

Environmental Education Programs—Marine Debris and Endangered Species
Jonna Engel ................................................................. *

Petting Tanks, Ethics, and Public Education
Gary Robinson ................................................................. *

On Ecocostal Engineering
Erdal Ozhan ................................................................. 1935

SESSION 58: COMPUTER MAPPING AND GEOGRAPHIC INFORMATION SYSTEMS

Managing Information for Regional Coastal Management in the Gulf of Maine
Peter J. Ricketts ................................................................. 1946

Design and Implementation of a Coastal Resource Geographic Information System—Administrative Considerations
Kenneth D. Haddad and William K. Michener ................................................................. 1958

U.S. Fish and Wildlife Service Selected Geographic Analyses
Floyd O. Stayner, James D. Scurry, James B. Johnston, Mary C. Watzin, and Pasquale F. Roscigno ................................................................. 1968

The Application of a Geographical Information System to Resource Management—The U.K. Offshore Sand and Gravel Case
Arthur Evans and Trevor Giddings ................................................................. 1981

Estuarine Shoreline Changes in Sarasota County, Florida—Long-Term Trends and the Effects of Regulatory Management
M.W. Evans, Rhonda K. Evans, and Belinda Perry ................................................................. *

SESSION 59: CORAL REEFS AND SURF ZONES

A Reef Conservation Project Involving Sport Divers in Singapore
Loke Ming Chou ................................................................. 1990

Coral Reef Project in Okinawa
Makio Honda, Kimiaki Kudo, and Takeshi Onishi ................................................................. *

Numerical Simulation of Larval Dispersal and Recruitment to Coral Reefs from the Mainstream Water Circulation
Ian J. Dight and K.P. Black ................................................................. 1995

Hydrogeology of Caribbean Coral Reef Islands
Daniel W. Urish ................................................................. **

Studies on Meiofauna on Rio de Janeiro Coast, Brazil
Vera Maria A.P. da Silva, Priscila A. Grohmann, and Catarina S.R. Nogueira ................................................................. 2010

Importance of the Surf Zone of Exposed Sandy Beaches for Development of Juvenile Trachinotus (Pisces, Carangidae)
Luiz Paulo Rodrigues Cunha ................................................................. 2023

SESSION 60: LOUISIANA WETLANDS STUDY

Louisiana Coastal Wetland Loss Study—An Overview
James B. Johnston, Mary C. Watzin, and S. Jeffress Williams ................................................................. *

*Manuscript not available at the time of printing.
**See "Coastlines of the World" specialty volumes.
Results of Geologic Processes Studies of Barrier Island Erosion and Wetlands Loss in Coastal Louisiana
S. Jeffress Williams, Shea Penland, and Asbury H. Sallenger, Jr. .................................................. **
Landscape Simulation of Coastal Wetlands
Thomas W. Doyle ................................................................................................................................. **
Managing Louisiana Marshes—An Experimental Approach
Edward C. Pendleton, A.L. Foote, and G.R. Guntenspergen .......................................................... **

SESSION 61: PORT ENVIRONMENTAL MANAGEMENT AND OPERATIONS

Views of Environmental Issues Among Port Managers
Dennis L. Soden ....................................................................................................................................... 2037
A Conflict Avoidance Methodology for Port Dredging Issues
Richard Nelson Byrnes .......................................................................................................................... 2048
Coastal Port Development—Cumulative Environmental Impacts on Chao Phraya River, Thailand
Vithet Srinetr ........................................................................................................................................... *
Development, Utilization, and Conservation of Ise Bay Area
Takechiho Tabata, Masanori Sakurai, and Hiroshi Sasajima ............................................................ 2066
Defining and Analyzing the Maritime Support Service Industries
Philip C. Sears, Kimberly A. Beasley, and Eva Hanhardt .................................................................... 2078

SESSION 62: KINGS BAY, GA: PHYSICAL ASPECTS OF DREDGING

Potential for Seawater Encroachment Near Cumberland Island, Georgia
Jennifer G. Herndon, Ram Arora, and Stephen V. Cofer-Shabica ...................................................... **
Hydrogeochemistry of Southern Cumberland Island, Georgia
Stephen K. Wilson, Seth Rose, and Stephen V. Cofer-Shabica .......................................................... **
Automated Remote Meteorological Stations for Climatic Water Budget Determination at Cumberland Island, Georgia, U.S.A.
Stephen V. Cofer-Shabica and William W. Hargrove ......................................................................... **
Summary of Directional Wave Data from Three Different Monitoring Systems Deployed Offshore of St. Mary’s Entrance, Georgia
William D. Corson and James P. McKinney .......................................................................................... **
Kings Bay Coastal Monitoring Studies and Review of the Engineering and Geologic History
Joan Pope, Laurel T. Gorman, and Steven C. Knowles ...................................................................... **
Estuarine Dynamics at Cumberland Sound, Georgia, U.S.A.
George M. Fisackerly, Tim L. Fagerburg, and Steven C. Knowles ................................................... **
Cumberland Island Geographic Information System Implementation and Data Management
John Pickering, William W. Hargrove, Kevin B. Weinrich, and Stephen V. Cofer-Shabica ............... **

SESSION 63: PROTECTION AND RESTORATION OF ORANGE COUNTY COASTAL WETLANDS

Public Involvement in Restoration of Wetlands at Bolsa Chica
G. Victor Leipzig ...................................................................................................................................... *
Bolsa Chica—Compromise After Fifteen Years of Struggle
Shirley Dettloff ......................................................................................................................................... *
Restoration Alternatives for the Bolsa Chica Wetlands, Huntington Beach, CA
Michael Josselyn, John Callaway, and Melanie Denninger ................................................................. 2093
Upper Newport Bay—The Last 150 Years
Frank Robinson ......................................................................................................................................... *
Lessons Learned from the Restoration of the Talbert Marsh
Gordon Smith ........................................................................................................................................... *
Politics of Wetlands Preservation in Huntington Beach
Charles Gant ............................................................................................................................................ *
Protection of Coastal Wetlands from Oil Spills at Sea
Gary C. Gorman .................................................................................................................................... *

*Manuscript not available at the time of printing.
**See "Coastlines of the World" specialty volumes.
SESSION 64: CALIFORNIA DATA COLLECTION, ANALYSIS, AND RESULTS

Geomorphic Analysis for Enhancement and Restoration of the Tijuana Estuary, California
Joan L. Florsheim, Larry Fishbain, and Philip B. Williams ........................................ 2108

The Use of Geographical Information Systems in Assessing Dredged Sediment Contamination in California Harbors
Shelley C. Clarke and Patrick J. Cotter ................................................................. *

Beach and Cliff Erosion Processes at Solano Beach, California, 1984–1990
Allen H. Harker and Reinhard E. Flick ......................................................... 2122

Opportunities in Applied Oceanography in the California Current
Gary D. Sharp ........................................................................................................ 2136

Results of the Marine Review Committee's Study on the San Onofre Nuclear Generating Station—Implications for Future Marine Environmental Decisions
Richard F. Ambrose and Susan M. Hansch ...................................................... **

The Los Angeles County Coastal Biota Inventory and Database
Martin R. Meisler, John M. Engle, and Andrew E. Jahn ........................................... *

SESSION 65: PUBLIC PARTICIPATION: INFORMATION SHARING AND CONSENSUS BUILDING

Sechelt Inlets Coastal Strategy—Conflict Resolution Using Consensus-Based Planning and a Computer G.I.S.
Catherine Berris ........................................................................................................ 2147

Cleaning North America’s Beaches—Volunteers Across America Monitor the Quality of Our Coasts
Kathryn J. O’Hara ...................................................................................................... 2157

The Los Penasquitos Lagoon Foundation—A Study of Citizen Involvement in Coastal Wetland Management
Joan Jackson .............................................................................................................. 2168

Citizen Participation in Beach Surveys for Marine Plastics Debris and Beached Birds
Pamela Miller, Ken Pritchard, and Betsy Peabody ...................................................... *

Public Participation in the Planning of a Coastal Reserve in South Africa
Merle Sowman and Guy Preston ............................................................................... 2173

SESSION 66: FISHERIES MANAGEMENT AND IMPACT MITIGATION

Mitigation for Offshore Development/Fisheries Conflicts
Eugenia Laychak ........................................................................................................ 2182

Systems for Control of Environmental Conditions in Regional Marine Ecosystems—A Fundamental Study
Masaaki Sakuta, Norimasa Takagi, Akio Kuroyanagi, and Yoshihiro Suenaga ................................................................. **

Grunion Spawning Versus Beach Nourishment—Nursery or Burial Ground?
Susanne Lawrenz-Miller .......................................................................................... 2197

The Future of the Mariculture Industry in Ecuador
Stephen Olsen, B. Epler, and H.T. Odum ..................................................................... *

Crab and Salmon Habitat Enhancement in Grays Harbor Estuary, Washington
Bert S. Brun ............................................................................................................... 2209

Future of Commercial Fisheries in California
Craig R. Denisoff and James W. Rote ........................................................................ **

Coordinating Fishery Management and Habitat Conservation
Thomas E. Bigford and Robert J. Pawlowski ......................................................... 2226

Program for Fisheries Management and Environment Monitoring of Exclusive Economic Zone, Rio de Janeiro, Brazil
Sergio R.P. Annibal, Olinto da Silva, and Leo Nascimento ........................................ 2234

SESSION 67: BEACH CLASSIFICATION AND MANAGEMENT

A Systematic Classification of Florida’s Saltwater Beaches and Shores
Fritz Wettstein ........................................................................................................... *

*Manuscript not available at the time of printing.
**See "Coastlines of the World" specialty volumes.
A Study of the Impact of the Dumping of Spoil on Beach Processes
   Lynne Humphries and William B. Scott ........................................... 2246
Coastal Erosion Problems in Romania
   Julian Postolache and Danut Diaconcasa ........................................... 2260
Sediments and Quaternary Study of the Coastal Lagoon of Unare (Venezuela)
   Pedro Roa Morales ............................................................................. 2271
The Coastline of Bangladesh—An Overview of Processes and Forms
   Dilip K. Barua .................................................................................. 2284
Genesis and Evolution of the Lagoons of Atlantic Coast Since Holocene—Oualidia-Moulay Bou Salham (Morocco) and Arcachon (France)
   Christian Carruesco ........................................................................ 2302
Evaluating Shoreline Protection Alternatives
   Mark O. Kolberg and Otavio J. Sayao .................................................. 2303

SESSION 68: MODELING AND SIMULATION II

Modeling of Salt-Water Intrusion in River Mouth Region
   R. Zhang, J.R. Ni, and G.Q. Wang ...................................................... 2315
Numerical Modeling of Apalachicola Bay, Florida
   Kang-Ren Jin .................................................................................. 2325
Three-Dimensional Modelling of Suspended Sediment Transport
   Panayis Matsoukis ........................................................................ 2325
Shore Protection—Conflicting Objectives in Decision Making
   David M. Chapman ........................................................................ 2340
The Effect of a Change in Coastline on Rainfall Distribution
   L.J.M. Kroon ................................................................................ 2340

SESSION 69: SEA LEVEL RISE I

Vulnerability of the United States to Future Sea Level Rise
   Vivien Gornitz, Tammy W. White, and Robert M. Cushman .................. 2354
Rise and Intrusion of Caspian Sea Water Into Mazandaran Province Coastal Lands
   Mirkhalegh Z. Ahmadi .................................................................... 2369
Use of a Geographical Information System to Analyze the Impacts of Sea Level Rise on Groundwater Resources for a Coastal Community in Massachusetts
   Nicholas C. Zavolas and Lyna L. Wiggins ......................................... 2374
Coastal Protection Management of the German Wadden Sea with Special Emphasis on the Impact of an Increasing Relative Sea Level Rise
   Hans Kunz ................................................................................... 2374
Monitoring Absolute Sea Level Change
   Bruce C. Douglas .......................................................................... 2380
Geomorphology of the Lekki Barrier Lagoon Coastline in Nigeria and its Vulnerability to Rising Sea Level
   L.F. Awosika, A.C. Ibe, C.E. Ibe, and L.E. Inegbedion ....................... 2380

SESSION 70: COASTAL PROCESSES I

Recession of the Littoral Zone Cliffs of the Bristol Channel, U.K.
   A.T. Williams, N.R. Morgan, and P. Davies ...................................... 2394
Comparison of Estuarine Beaches in Germany and U.S.A.
   Karl F. Nordstrom, Horst M. Sterr, and Nancy L. Jackson ................... 2409
Nantucket Island's Shifting Shoals and Moving Shores—Near-Shore Bathymetry Controls Beach Deposition and Erosion
   Wesley N. Tiffney, Jr., Lee L. Weishar, and J. Clinton Andrews .................. 2421
Shoreline Response to Offshore Shoals and Storms—Low Beach, Nantucket, MA
   Lee L. Weishar, Wesley N. Tiffney, Jr., N.M. DeKimpe, and M.L. Fields .................. 2435
Environmental Impact on Sepetiba Beach
   Mauro Sergio F. Argento and Andre Calixto Vieira ............................ 2450
Coastal Erosion in Ghana—Causes, Patterns, Research Needs, and Possible Solutions
   A.K. Annah .............................................................................. 2463

*Manuscript not available at the time of printing.
SESSION 71: RESEARCH IMPLICATIONS FOR OIL SPILL CONTINGENCY PLANNING AND CLEAN UP

In-Situ Burning—A Promising Oil Spill Response Strategy
David D. Evans and Edward J. Tennyson ................................................................. *

Reactivation of the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) Facility
Lawrence J. Hannon and Edward J. Tennyson ......................................................... 2474

Results from Selected Oil-Spill Response Research
Edward J. Tennyson ..................................................................................................... 2479

Chemical Treating Agents for Oil Spill Response—Recent Research Results
Mervin F. Fingas and Edward J. Tennyson ............................................................... 2491

A Stochastic Model for Predicting the Movement of Oil Slicks in Cardenas Bay
Felix Palacios-Perez and Jorge Martori-Oxamendi ................................................... *

The Weathering of Spilled Crude Oil in Coastal Water Environment
Jorma Rytkonen, Juha-Pekka Hirvi, and Risto Hakala .................................................. 2501

SESSION 72: NOAA COASTAL OCEAN PROGRAM AND COASTWATCH

The NOAA Coastal Ocean Program—Introduction and Overview
Don Scavia ..................................................................................................................... *

NOAA CoastWatch—Imagery for Coastal Resource Management and Research
Kent H. Hughes .......................................................................................................... 2512

An Update to CoastWatch—NOAA's New Capability for the Coastal Ocean
Marcia L. Weak, Peter J. Celone, Walton B. Campbell, and Kevin McCarthy ............... 2518

Satellite Mapped Imagery for CoastWatch
William Rich, Marcia L. Weak, John Sapper, Krishna Tadepalli, Agni Jandhyala, and Sunita Ketineni ................................................................. 2531

NOAA's Coastal Observation Network—Information and Forecasts for Industry, Recreation, Research, and Coastal Management
John A. Calder and Paul A. Jacobs ............................................................................... *

A New Approach to Ocean Data Management
William G. Schramm ................................................................................................... 2546

SESSION 73: WETLANDS MAPPING—NATIONAL PROGRAMS

Overview of the Federal Coastal Wetlands Mapping Effort
Sari J. Kiraly .................................................................................................................. **

National Mapping Division Programs, Products, and Services That Can Support Wetlands Mapping
Franklin S. Baxter ........................................................................................................ **

The U.S. Fish and Wildlife Service's National Wetlands Inventory
Bill O. Wilen ................................................................................................................ *

NOAA's CoastWatch—Change Analysis Program
James P. Thomas, Randolph L. Ferguson, Jerome E. Dobson, and Ford A. Cross ............ **

Monitoring Seagrass Distribution and Abundance Patterns
Robert J. Orth, Randolph L. Ferguson, and Kenneth D. Haddad .................................... **

SESSION 74: POLICY, POLITICS AND LEGAL IMPLICATIONS OF WETLAND MANAGEMENT

Survey of Coastal States Wetlands Mitigation Policy Procedure and Practices
William B. O'Beirne ...................................................................................................... *

Impounding Our Nation's Coastal Wetlands—Win, Lose, or Draw?
J. Scott Feierabend ....................................................................................................... *

State Freshwater Wetlands Protection Legislation Leading to Section 404 Assumption—The New Jersey Experience
Marjorie Ernst and Ernest Hahn ................................................................................ *

Defining Wetlands—A Balance of Policy, Practicality, and Science
David M. Ivester .......................................................................................................... **

Coastal Louisiana—Abundant Renewable Natural Resources In Peril
William S. Perret and Mark F. Chatry .......................................................................... **

*Manuscript not available at the time of printing.
**See "Coastlines of the World" specialty volumes.
SESSION 75: SELECTED TOPICS IN MANAGING CALIFORNIA COASTAL RESOURCES I

Beach Nourishment Incorporating Protection for Grunion at Cabrillo Beach in San Pedro, California
Dale P. Hall and Choule J. Sonu ............................................. *

Planning a New Management Program for Dredging and Disposal in San Francisco Bay
Steven Goldbeck ................................................................. *

Southern California Water Supply Augmentation Through OTEC
Philip B. Chandler ............................................................... *

The Marine Review Committee, San Onofre Nuclear Generating Station—Case Study of the Use of Scientific Data in the Regulatory Decision-Making Process
Susan M. Hansch and William W. Murdoch 2551

Using a Constraints Analysis to Develop Project Alternatives
Deborah Fleischer ................................................................. 2553

SESSION 76: OCEAN MANAGEMENT TECHNIQUES AND EXPERIENCES

Multiple Use Ocean Management in the U.S.—Toward A New Conceptual Framework
Biliana Cicin-Sain and Robert W. Knecht 2568

Regional Ocean Resources Management
Richard Hildreth ............................................................. 2583

Interim Findings of an Ocean Policy Study for the State of Mississippi
Richard J. McLaughlin and Laura S. Howorth 2607

The International North Sea Conference—A New Force in Marine Regional Environmental Cooperation
David Freestonese .............................................................. **

Environmental and Economic Feasibility of Water Supply Alternatives in Hawaii and California—Desalination, Water Marketing and Conservation
Linda M. Fernandez ......................................................... 2618

State Ocean Management Planning
Susan O’Malley Wade ........................................................ *

The Hawaii Ocean Resources Management Program—Policy Planning and Interagency Coordination
Craig D. MacDonald, Athline M. Clark, and Sequoia Shannon 2633

SESSION 77: INNOVATIONS IN FISHING PORT DEVELOPMENT I

The Development of Fishing Community Zones With Improvement of Coast Environment in Fishing Port Areas
Nobuo Takaki, Koichi Honda, Koji Mitsushashi, and Sadayuki Oka ................................ **

A Study on Fishing Port Structures with Improved Environmental Protection Technology
Atsushi Sakai, Tetsuo Nakayama, Akira Nagano, and Masakazu Sugimoto ................................ **

Planning of an Offshore Fishing Port in Shallow Sandy Beach
Takeshi Kawaguchi, Kouichi Honda, Kiyohide Nemoto, Kazuo Yamada, and Shinichi Sato ................................ **

A Redevelopment of Large-Scale Fishing Port Located in the Vicinity of City (Misake Fishing Port Redevelopment)
Noboru Ohshima, Susumu Kawase, Junichi Hataya, and Jun Ikeda ................................ **

SESSION 78: COASTAL HYDRODYNAMICS III: WAVE DYNAMICS

Detection of 2-D Nearshore Wave Patterns Using Linear Prediction and SAR Data
Pierre Larouche, Georges Drapeau, and Claude Cariou .......................................................... 2645

Studies of Waves Using SPOT Data
Lennart Jonsson ............................................................... *

Ocean Wave Propagation Up a Narrow Channel
Craig B. Leidersdorf, Kenneth E. Smith, and Ruh-Ming Li .......................................................... 2653

Waves on Coral Reefs
Ole Juul Jensen ................................................................. 2668

Great Lakes Wave Runup Methodology Study
David N. Barilovich .......................................................... 2681

Field Experiment of a Wave Power Extracting Caisson Breakwater
Hiroaki Nakada, Hideaki Ohneda, and Masazumi Shikamori .......................................................... 2691

*Manuscript not available at the time of printing.
**See "Coastlines of the World" specialty volumes.
Scour Around Cylindrical Piles Due to Wave Motion in the Surf Zone
Michele Di Natale .................................................. 2705

SESSION 79: INTERNATIONAL CZM: EUROPE AND AFRICA
Coastal Zone Management in a Changing Morphological Environment—A Case Study from the Netherlands
Joe S.L.J. Van Alphen and Frank M.J. Hoozemans .................................................. 2720
Coastal Maintenance—The Netherlands
Hendrik J. Verhagen .......................................................... 2734
Coastal Area Management Programmes in the Mediterranean Approach, Assessment and Strategy for the '90's
Ivica Trumbic *
Interrelationship Between Urban Development and Coastal Management and their Relation Under the Spanish Shores Act, July 1988
Francisco J. Montoya *
Facing the Challenge of Rapid Socio-Political Change and its Environmental Consequences for the Coastal Zone in Southern Africa—An Abridged Paper
Bruce C. Glavovic .......................................................... 2744
A Coastal Action Strategy for Southern Africa
Deon Retief, Muller Coetzee, Tony Little, and Benita Olen ........................................ 2750
Coastline Management—A Challenge for Developing Countries
Jonathan I. Matondo .......................................................... 2763

SESSION 80: SEA LEVEL RISE II
Effects of Sea Level Rise on the California Coast
Lesley Ewing and Jaime Michaels .................................................. 2767
Coastal Management and Sea Level Rise—Analysis on Global and Local Scale
C.H. Hulsbergen, J. Van Overeem, E.B. Peerbolte, and H.G. Wind * .................................. 2781
Impacts of Sea Level Rise in Developing Countries
Norbert P. Psuty and Vasantt Jogoo .................................................. 2781
Economic Implications of Relative Sea Level Rise in Ensenada, Baja California, Mexico
Jose Luis Ferman Almada and Lorenzo Gomez-Morin Fuentes * ........................................ 2781
Implications of Sea-Level Rise and Climate Change on Two Developing Resort Islands in Thailand and Singapore
Loke Ming Chou and Suraphol Sudara .................................................. 2793
Coastal Management and Sea Level Rise in Recife, Brazil
Claudio F. Neves, Dieter Muhe, and Gilberto O.M. Fialho .................................................. 2801

SESSION 81: DUNES AND COASTAL VEGETATION
Nature-Assisted Dune Restoration
Yu-Hwa Wang .......................................................... 2816
Roadside Associated Disturbance on Coastal Dunes
Management of Great Lakes' Sandy Barriers—The Conceptual Challenges
Reid D. Kreutzwiser and Anthony O. Gabriel .................................................. 2837
Coastal Dune Blowouts—Dynamics and Management Implications
Paul A. Gares and Karl F. Nordstrom .................................................. 2851
Success of Dune Restoration After Removal of Unexploded Ordnance
Catherine J. Demos .......................................................... 2863
Ecological and Geomorphic Impact of the Destruction of a Coastal Sand Dune System in a Sand Spit
Oscar Efrain Gonzalez-Yajimovich and Anamaria Escofet .................................................. 2877

Subject Index .......................................................... 2882A
Author Index .......................................................... 2882G
