</tr>
</thead>
<tbody>
<tr>
<td>Aspects of Z Order with Possible Applications</td>
<td>Kirk Scott (University of Alaska Anchorage, USA)</td>
<td>1</td>
</tr>
<tr>
<td>Design and Implementation of a Dependable Interpreter for Functional Programs</td>
<td>Y. Takigiku, Y. Oota and K. Kaneko (Tokyo University of Agriculture and Technology, Japan)</td>
<td>7</td>
</tr>
<tr>
<td>Immune Algorithm Processor</td>
<td>Masaya Yoshikawa, Masahiro Fukui, and Hidekazu Terai (Ritsumeikan University, Japan)</td>
<td>13</td>
</tr>
<tr>
<td>Decomposition of XML Path Expressions</td>
<td>Yan Liu and Gongzhu Hu (Central Michigan University, USA)</td>
<td>19</td>
</tr>
<tr>
<td>Restricted Weighted Minimum Independent Domination on $I_k$-starlike Graphs</td>
<td>William Chung-Kung Yen (Shih Hsin University, Taiwan)</td>
<td>25</td>
</tr>
<tr>
<td>Parallelizing Frequent Itemset Mining with FP-Trees</td>
<td>Peiyi Tang and Markus P. Turkia (University of Arkansas at Little Rock, USA)</td>
<td>30</td>
</tr>
<tr>
<td>Achieving $O(n^3 / \log n)$ Time for All Pairs Shortest Paths by Using a Smaller Table</td>
<td>Yijie Han (University of Missouri at Kansas City, USA)</td>
<td>36</td>
</tr>
<tr>
<td>Improved Algorithm for the Symmetry Number Problem on Trees</td>
<td>Yijie Han (University of Missouri at Kansas City, USA)</td>
<td>38</td>
</tr>
<tr>
<td>A Framework for Clustering on Data Streams</td>
<td>Zhewei Jiang, Wen-Chi Hou, Chi-Fang Wang (Southern Illinois University, USA), Huaqing Wang (California State University, Bakersfield, USA), and Jie Chen (Southern Illinois University, USA)</td>
<td>41</td>
</tr>
<tr>
<td>An Alternative Arrangement of Symmetric Datasets for Vertical Clustering Algorithms</td>
<td>Taufik Abidin and William Perrizo (North Dakota State University, USA)</td>
<td>47</td>
</tr>
<tr>
<td>Robust Successive Clustering via Feature Similarity</td>
<td>Carl G. Looney (University of Nevada, Reno, USA)</td>
<td>53</td>
</tr>
</tbody>
</table>

### COMPUTER, NETWORK AND SYSTEMS ARCHITECTURE

<table>

</thead>
<tbody>
<tr>
<td>Validation of the Potentials of Vertical Striping on Disks</td>
<td>Cheng Luo, Wen-Chi Hou, Chih-Fang Wang (Southern Illinois University, USA), Huaqing Wang (California State University, Bakersfield, USA)</td>
<td>57</td>
</tr>
<tr>
<td>Designing a Conditional Merge Component - From Streams to State Transitions</td>
<td>Walter Dosch (University of Lübeck, Germany) and Tõnu Tamme (University of Tartu, Estonia)</td>
<td>64</td>
</tr>
</tbody>
</table>
A Bird's Eye View of Some Common Elements of Science of Design Applicable to the Design of Software Systems
Lokesh Shivaramaiah and Thomas Philip (Mississippi State University, USA) ............................................ 72

Effect of Architecture and Component Parameters on Application Performance and Reliability
Rehab A. El Kharboutly, Reda Ammar and Swapna S. Gokhale (University of Connecticut, USA) .......... 78

Traffic Monitoring for a Network Visualization Environment
Chia-Pin R Liu, Shaofeng Yang, Mahmoud A. Manzoul (Jackson State University, USA) ......................... 84

Advanced Hybrid Branch Predictors for High-Performance CPUs
Venkata S. Yerasi and Wei-Ming Lin (The University of Texas at San Antonio, USA) ............................... 90

Understanding the Behavior of Simultaneous Multithreaded and Multiprocessor Architectures
Nagi N. Mekhiel (Ryerson University, Canada) .......................................................................................... 96

Moments of Memory Access Time for Systems With Hierarchical Memories
Kishori M. Konwar, Lester Lipsky, and Marwan S. Sleiman (University of Connecticut, USA) ............... 103

NEURAL NETWORKS

Developing MIMO Controller by Neuro-traveling Particle Swarm Optimizer Approach
Chwen-Tzeng Su and Jui-Tsung Wong (National Yulin University of Science and Technology, Taiwan) ..... 110

Classification of Chemical Data Sets Using Neural Networks
S. E. Hudson (California State University, Bakersfield, USA) ........................................................................ 116

A Novel Multiagent Supervisory Loop based Control Algorithm for Fighter Aircraft Pitch Rate Tracking
Sukumar Kamalasadan (University of West Florida, USA) and Anurag Kumar Srivastava (Mississippi State University, USA) ........................................................................................................ 122

On Parameter Selection for an Adaptive Neural Network Fuzzy Inference Controller Using Evolutionary Tuning
Gordon K. Lee (San Diego State University, USA) and Edward Grant (North Carolina State University, USA) ............................................................................................................. 128

GRAPHICS, VIDEO AND IMAGE PROCESSING

The Multi-Purpose Watermarking for Color Halftone Image Based On Wavelet and Zernike Transform
Ching-Tang Hsieh, Kuan-Ting Yeh, Wan-Ting Kuo (TamKang University, Taiwan) ...................................... 133

Image Coding Using Wavelet Transform Techniques
Dianhui Xu, Robert Li, David Song (North Carolina A&T State University, USA) ....................................... 139

Reversible Integer-to-Integer Wavelet Transform for the H.264 Advanced Video Codec Standard
Manjari Mishra, Mohamed El-Sharkawy, Maher Rizkalla and Paul Salama (Purdue University, Indianapolis, USA) ................................................................................................................. 145

Efficient Parallel Rendering on Hypercube
John Jenq (Montclair State University, USA) .................................................................................................. 152

An Application for Automatic Extraction of Objects from Digital Images
Dulal C. Kar and Dennis Ma (Texas A&M University-Corpus Christi, USA) ............................................ 158
Partial Object Recognition based on an Ellipse using Symmetry in Image Databases
June-Suh Cho (Hankuk University of Foreign Studies, Korea) and Joonsoo Choi (Kookmin University, Korea) .......................................................... 163

Integrated Documentary Video Access for Education
Aijuan Dong and Honglin Li (North Dakota State University, USA) .......................................................... 168

An Efficient Approach for the Restoration of Impulse Noise Corrupted Images
Wenbin Luo (St. Mary's University, USA) .......................................................... 174

COMPUTER SIMULATION

Discrete Shells Origami
Rob Burgoon, Zoë J. Wood (California Polytechnic State University, USA) and Eitan Grinspun (Columbia University, USA) .......................................................... 180

Numerical Wire Grid Modeling of Cavity Resonators to determine Quality Factors
Franz A. Pertl, Andrew D. Lowery, and James E. Smith (West Virginia University, USA) .......................................................... 188

vHand: A Human Hand Simulation System
Beifang Yi, Frederick C. Harris, Jr., and Sergiu M. Dascalu (University of Nevada, Reno, USA) .......................................................... 192

Computational Simulation of Heat Transfer Enhancement from Surfaces with Cavities
Geo Lee and Suresh Chandra (North Carolina A&T State University, USA) .......................................................... 200

EXPERT AND CLASSIFIER SYSTEMS

Shoechicken: An Intelligent System for Recommending RSS/Atom Content
James Horsley, Michael Wooten, and Eman El-Sheikh (University of West Florida, USA) .......................................................... 206

A New Measure of Text Relatedness Using a Novel Classifier-based Vector Approach
Chung-Hong Lee (National Kaohsiung University of Applied Sciences, Taiwan), Hsin-Chang Yang (Chang Jung University, Taiwan), and Feng-Chih Hsu (National Kaohsiung University of Applied Sciences, Taiwan) .......................................................... 211

A New Gene Selection Technique Using Feature Selection Methodology
Noushin Ghaffari and Hisham Al-Mubaid (University of Houston - Clear Lake, USA) .......................................................... 217

A General Framework for the Development of Automated Decision Support Systems
D. L. Hudson, M. E. Cohen (University of California, San Francisco, USA) .......................................................... 223

SPECIAL SESSION on TECHNOLOGY and RURAL HEALTH

Using Computer Technology to Enhance Chronic Illness Management
Clarann Weinert (Montana State University, USA) .......................................................... 229

Distance Learning and Simulation Technologies to Support Bioterrorism Preparedness Education
Rameshsharma Ramloll, Jaishree Beedasy, Beth H. Stamm, Neill Piland, Barbara Cunningham, Anne Kirkwood, Phil Massad, Russ Spearman, Arvind Patel, Rick Tivis, Cyndy Kelchner (Idaho State University, USA) .......................................................... 235

Technology-based Interventions for Promoting Rural Health: Building Community Readiness
Sharon Cumbie, Jennifer Earls and Rex Gantenbein (University of Wyoming, USA) .......................................................... 242
SPECIAL SESSION on SOFTWARE SYSTEMS: 
DESIGN, DEVELOPMENT, MANAGEMENT AND ANALYSIS

Crown Vision: Metrics Visualization for Project Management
Sergiu Dascalu (University of Nevada-Reno, USA), Norm Brown (National Institute for Systems Test and Productivity, USA), Sohei Okamoto, Sermak Buntha and Namit Chawla (University of Nevada-Reno, USA) .......................... 246

Object-Oriented Design and Implementation of the OE-Scheduler in Real Time Environments
Ilhyun Lee, Cherry K. Owen, and Haesun K. Lee (University of Texas Permian Basin, USA) ............... 254

Software Correctness
M. Burgin (University of California, Los Angeles, USA) and N. Debnath (Winona State University, USA) .... 259

Workflow Modeling and Simulation using a Extension of UML Activity Diagram
D. Riesco, G. Montejano and Robert Uzal (Universidad Nacional de San Luis, Argentina), Manuel Perez Cota and J. Baltasar Garcia Perez-Schofield (Universidad de Vigo, España), and Narayan Debnath (Winona State University, USA) ................................................................. 265

DISTRIBUTED SYSTEMS

A Generalized Broadcasting Schema for the Mesh Structures
Zhizhang Shen (Plymouth State University, USA) ........................................................................... 270

An Extended Framework of Safe Stabilization
Alina Bejan, Sukumar Ghosh, Shrisha Rao (University of Iowa, USA) ........................................ 276

A High-Performance Recovery Algorithm for Distributed Systems
B. Gupta, Y. Yang, S. Rahimi, and A. Vemuri (Southern Illinois University, USA) ...................... 283

Low-Overhead Roll-Forward Checkpointing and Failure Recovery for Distributed Systems
B. Gupta, S. Rahimi, R. A. Rias, and R. Bhupathi (Southern Illinois University, USA) ................... 289

Cohorts for Group Mutual Exclusion
Fouad B. Chedid (Notre Dame University, Lebanon) ................................................................. 295

A Load Balancing Technique for Some Coarse-Grained Multicomputer Algorithms
Thierry Garcia and David Semé (Université de Picardie Jules Verne, France)............................... 301

Highly Constrained Tasks Scheduling on Multiprocessing Systems
Abdelmaged Elsadek Abdelrazek (College of Business Administration, Saudi Arabia) .................. 307

Load Balancing Experiments in openMOSIX
J. Michael Meehan and Adam Wynne (Western Washington University, USA) ......................... 314

COMPUTING PRACTICE AND APPLICATIONS

Object-Oriented Finite Element Programming Using F2003
J. H. Nie, H. T. Hsieh, Y. T. Chen, L. J. Sun (University of Nevada, Las Vegas, USA), David A. Hopkins (Army Research Laboratory, USA), and Randy Clarksean (University of Nevada, Las Vegas, USA) ........ 320

WiQS: Web Integration Query System
Brian Harrington, Robert Brazile, and Kathleen Swigger (University of North Texas, USA) ................ 326

Multi-channel Software-Oriented Pulse Width Modulation (SPWM)
Marwan Sleiman (University of Connecticut, USA) ....................................................................... 332
