Bericht 272

Proceedings of the Fourth International Workshop on Modelling of Objects, Components and Agents MOCA´06

FBI-HH-B-272/06
Contents

1 Petri Nets and Model-Based Development
Fabrice Kordon ........................................... 3

2 A Design Framework for Interactive Simulation based on
Formal Specification of Scenarios
Michel Augeraud, Frédéric Collé, Pascal Estraillier and David Sarramia. 7

3 From Petri Hypernets to 1-safe Nets
Marek A. Bednarczyk, Luca Bernardinello, Wiesław Pawłowski and
Lucia Pomello ........................................... 23

4 Large Scale Simulations of Railroad Nets
Joakim Björk, Anders M. Hagalísletto, and Pål Enger ............... 45

5 An Approach to model Variations of a Scenario: Application
to Intelligent Transport Systems
Fabien Bonnefoi, Lorn Messan Hillah, Fabrice Kordon and Guy Frémont 65

6 Net Components Revisited
Lawrence Cabac, Michael Duvigneau, Heiko Rölke ....................... 87

7 Modeling Distributed Systems using Concurrent Object
Oriented Petri Nets
Ang Chen, Didier Buchs, Levi Lucio, Luis Pedro and Matteo Risoldi 103

8 Defining Formalisms and Models in the Draw-Net Modeling
System
Daniele Codetta-Raiteri, Giuliana Franceschinis and Marco Gribaudo 123

9 Process Mining in a Multi-Agent Auctioning System
Boudewijn van Dongen, Jereon van Luin and Eric Verbeek ............ 145
10 Applying Petri Net Unfoldings for Verification of Mobile Systems
Victor Khomenko, Maciej Koutny and Apostolos Niaouris..................161

11 The Reachability Problem for Object Nets
Michael Köhler ........................................................................179

12 Modelling Mobile IP with Mobile Petri Nets
Charles Lakos ...........................................................................199

13 Modular Discrete Pseudo-State Graphs for Time Petri Nets
Samia Mazouz and Laure Petrucci .............................................223

14 Petri Net-Based Team Modules for Collaborative Multi-Agent Action
Matthias Wester-Ebbinghaus and Heiko Rölke .................................245

15 Petri Net Plans
Vittorio Amos Ziparo and Luca Iocchi .........................................267

16 Modelling Service Dependencies for the Analysis and Design of Multi-Agent Applications
Lawrence Cabac, Ragna Dirkner and Heiko Rölke ............................291

17 PNtalk: State of the Art
Milan Češka, Vladimír Janoušek, Radek Kočí, Bohuslav Křena and Tomáš Vojnar .................................................................299
