AATCC Symposium

Innovations in Medical, Protective, and Technical Textiles

February 1-2, 2006

Embassy Suites Hotel
Cary, North Carolina

Sponsored by the Materials Interest Group of AATCC (American Association of Textile Chemists and Colorists)
CONTENTS

High Modulus Thermoplastic Fibers for Use in Thermoset Composites
Brian Morin, Innegrity LLC, Greenville, SC .......................................................... 1

Unique Fiber Structures for Chemical and Biological Separations by Liquid Chromatography
R. Kenneth Marcus, Philip J. Brown, and Igor A. Luzinov, Specialty & Custom Fibers LLC, Clemson, SC .......................................................... 11

Micro Organisms on Textiles – Detection, Evaluation and Prevention
Helen Hyde, Arch UK Biocides Limited, Manchester, UK ........................................... 18

Implementing the Potent Biocidal Properties of Copper Oxide in Protective Textiles
Gadi Borkow and Jeffrey Gabbay, Cupron Inc., Greensboro, NC ............................... 24

Antibiotic Uptake and Release from Textile Materials
Martin Bide, University of Rhode Island and Matthew Phaneuf, BioSurfaces, Ashland, MA .......................................................... 28

Development of Protective Ensembles: Advanced CB Protective Firefighter Turnout Suit Advanced Personal Protective Equipment Challenges in Protecting First Responders
Don Thompson, Roger L. Barker, and A. Shawn Deaton, Textile Protection & Comfort Center, NC State University, Raleigh, NC .................................................. 34

Enhancement of Face Masks with Electret Filter Media and Protective Finishes for Safety from Biological Threats
Larry C. Wadsworth and Peter P. Tsai, University of Tennessee, Knoxville, TN .......................................................... 41

Beyond Perception, Brominated Flame Retardants
Ronald Dombrowski, TechTex Solutions, Chester, VA .................................................. 53

Silicones for Textile Coatings – Protecting your Fabric
Martin Stoemmer, Wacker Chemical Corp., Duncan, SC .................................................. 58

Unique Structures of Bicomponent Fibers to Achieve Unique Properties
Jeff Haggard, Hills Inc, West Melbourne, FL .......................................................... 67

Nanofibrous Membrane Development for Sensor Applications
Kris Senecal, Andre Senecal, and Joshua Magnone, US Army RDECOM, Natick Soldier Center, Natick, MA .......................................................... 73
