Welcome to the printed from CD-rom version of the AAMAS 2005 Proceedings. This publication includes the volumes of the proceedings and industrial track publications.

Editors:
Frank Dignum, Virginia Dignum
Sven Koenig, Sarit Kraus
Michal Pechoucek, Munindar Singh
Donald Steiner, Simon Thompson
Michael Wooldridge

With the collaboration of:

ACM-SIGART
The International Foundation for Multiagent Systems (IFMAS)
The International Workshop on Agents, Theories Architectures and Languages (ATAL)

Volume 3

Printed from CD-ROM with permission of ACM by:
Curran Associates, Inc.

INDUSTRIAL TRACK

DEMOS

POSTERS

SESSION 1a: embodied, emotional and believable agents I
SESSION 2a: collective and emergent behavior
SESSION 3a: learning and emergent behavior
SESSION 4a: coordination and planning
SESSION 5a: AOSE II
SESSION 6a: logical foundations II
SESSION 7a: multi-agent plans and planning

SESSION 1b: learning
SESSION 2b: cooperation I
SESSION 3b: cooperation II
SESSION 4b: agent applications
SESSION 5b: information agents, brokering and matchmaking
SESSION 6b: task and resource allocation I
SESSION 7b: task and resource allocation II

SESSION 1c: ACL and protocols
SESSION 2c: AOSE I
SESSION 3c: voting
SESSION 4c: trust and reputation I
SESSION 5c: auctions and mechanism design
SESSION 6c: ontologies
SESSION 7c: robotics

SESSION 1d: logical foundations I
SESSION 2d: negotiation and agreement I
SESSION 3d: negotiation and agreement II
SESSION 4d: argumentation and dialog
SESSION 5d: norms, social laws and social structures
SESSION 7a: argumentation and dialog
SESSION 7e: embodied, emotional and believable agents II

SESSION 1a: embodied, emotional and believable agents I
Humans and Agents in 3D Electronic Institutions (page 1093)
Anton Bogdanovych (University of Technology Sydney), Helmut Berger, Carles Sierra, Simeon Simoff
Design and Evaluation of Expressive Gesture Synthesis for Embodied Conversational Agents (page 1095)
Bjoern Hartmann (Stanford University IUT Montreuil University of Paris 8), Maurizio Mancini, Stéphanie Buisine, Catherine Pelachaud

Controlling the Focus of Perceptual Attention in Embodied Conversational Agents (page 1097)
Youngjun Kim (USC / Institute for Creative Technologies), Randall Hill, David Traum

Evaluating the Interaction with Synthetic Agents Using Attention and Affect Tracking (page 1099)
Helmut Prendinger (National Institute of Informatics), Chunling Ma, Jin Yingzi, Kushida Kazutaka, Mitsuru Ishizuka

SESSION 1b: learning

Adaptive Agent's Integration in a New Environment: Interactions as a Source of Learning (page 1103)
Isabelle Jars (LASS), Nadia Kabachi, Michel Lamure

Coordinated Exploration in Multi-Agent Reinforcement Learning: An Application to Load-balancing (page 1105)
Katja Verbeeck (Vrije Universiteit Brussel), Ann Nowe, Karl Tuyls

Sharing Information for Qlearning-based Network Bandwidth Estimation and Network Failure Detection (page 1107)
Partha Dutta (University of Southampton), Nicholas Jennings, Luc Moreau

GACS an Evolutionary Approach to the Spatial Coordination of Agents (page 1109)
Fabien Flacher (AnimatLab-LIP6 Paris France Dassault-Aviation St-Cloud France), Olivier Sigaud

Automatic Computer Game Balancing: A Reinforcement Learning Approach (page 1111)
Gustavo Andrade (Geraldo Vanderlei de Andrade Leticia Danzi de Andrade), Geber Ramalho, Hugo Santana, Vincent Corruble

SESSION 1c: ACL and protocols

Communication Management Using Abstraction in Distributed Bayesian Networks (page 1115)
Jiaying Shen (Department of Computer Science University of Massachusetts Amherst), Victor Lesser

A Software Tool for the Development of MAS Communication Protocols based on Conversations (page 1117)
Madieyna Lamine Fall (Université du Québec à Trois-Rivières), Sylvain Delisle

Reliable Group Communication and Institutional Action in a Multi-Agent Trading Scenario (page 1119)
Stephen Cranefield (University of Otago)

Hermes: A Methodology for GoalOriented Agent Interactions (page 1121)
Christopher Cheong (RMIT University), Michael Winikoff

An Integrated Framework for Adaptive Reasoning About Conversation Patterns (page 1123)
Michael Rovatsos (University of Edinburgh), Felix Fischer, Gerhard Weiss

SESSION 1d: logical foundations I

Temporal Logics for Normative Agent Communication Protocols (page 1127)
Ulle Endriss (Imperial College London)
Bounded Model Checking Knowledge and Branching Time in Synchronous Multiagent Systems
Xiangyu Luo (Dept. of Computer Science Sun Yat-sen Univ.), Kaile Su, Abdul Sattar, Qingliang Chen, Guanfeng Lv

Model Generation for PRS-like Agents
Wayne Wobcke (University of New South Wales), Marc Chee, Krystian Ji

Recognition of the Intention to Perform a Procedure: a Method Based on Probabilities
Robert Demolombe (ONERA Toulouse), Ana Maria Otermin Fernandez

A Logic of Reasoning, Communication and Cooperation with Syntactic Knowledge
Thomas Agotnes (Department of informatics University of Bergen), Michal Walicki

SESSION 2a: collective and emergent behavior

Emergent Programming Feasibility Study using SelfOrganizing InstructionAgents
Jean-Pierre Georgé (IRIT), Marie-Pierre Gleizes

Using Decision-Theoretic Models to Enhance Agent System Survivability
Anthony Cassandra (Telcordia Technologies), Marian Nodine, Shilpa Bondale, Steve Ford, David Wells

Stability and Control of Agent Ecosystems
Maxim Peysakhov (Drexel University), Robert Lass, William Regli

SESSION 2b: cooperation I

Study of Virtual Organizations Using MultiAgent System
Qinhe Zheng (University of Massachusetts at Dartmouth), Xiaoqin (Shelley) Zhang

A Hybrid Transfer of Control Model for Adjustable Autonomy Multiagent Systems
Michael Cheng (University of Waterloo School of Computer Science), Robin Cohen

Agent-Based Virtual Organisations for the Grid

SESSION 2c: AOSE I

From Concepts to Agents: Towards a Framework for Multi-Agent System Modelling
Richard Hill (Sheffield Hallam University), Simon Polovina, Martin Beer

Multi-agent Concepts as Basis for Dynamic Plug-in Software Architectures
Lawrence Cabac (University of Hamburg), Michael Duvigneau, Daniel Moldt, Heiko Rölke

Comparative Analysis of Top-Down and Bottom-up Methodologies for Multi-Agent System Design
Valentino Crespi (California State University Los Angeles), Aram Galstyan, Kristina Lerman
SESSION 2d: negotiation and agreement I

A RealWorld Approach to Secure and Trusted Negotiation in MASs  (page 1163)
Roberto Bianchi (Parma University), Andrea Fontana, Federico Bergenti

A Verifiable Protocol for Arguing about Rejections in Negotiation  (page 1165)
Jelle van Veenen (Tilburg University), Henry Prakken

Negotiating Agents: From Full Autonomy to Dynamic Degrees of Delegation  (page 1167)
Diemo Urbig (Humboldt-Universität zu Berlin), Kay Schröter

SESSION 3a: learning and emergent behavior

Pheromone Model: Application to Traffic Congestion Prediction  (page 1171)
Osamu Masutani (Denso IT Laboratory Inc. Research and Development Group), Hiroshi Sasaki, Hirotoshi Iwasaki, Yasushi Ando, Yoshiaki Fukazawa, Shinichi Homiden

Simulating Data Dissemination Techniques for Local Reputation Systems  (page 1173)
Andreas Schlosser (Darmstadt University of Technology), Marco Voss

On Decentralised Clustering in Self-monitoring Networks  (page 1175)
Piraveenan Mahendra (University of Adelaide), Mikhail Prokopenko, Peter Wang, Don Price

Discovering Strategic Multi-Agent Behavior in a Robotic Soccer Domain  (page 1177)
Andraz Bezek (Joel Stefan Institute)

Intelligent Agents for Wireless Sensor Networks  (page 1179)
Richard Tynan (UCD), David Marsh, Donal O’Kane, Gregory O’Hare

SESSION 3b: cooperation II

Task and Social Coordination in Agent Organizations  (page 1183)
Virginia Dignum (Utrecht University), Frank Dignum

Towards a Formal Model for Task Allocation via Coalition Formation  (page 1185)
Leila Amgoud (IRIT - CNRS)

Reducing Coalition Structures via Agreement Specification  (page 1187)
Guido Boella (dipartimento informatica università di torino), Sauro Luigi, Leon van der Torre

An Organisation Infrastructure for Multi-Agent Systems based on Agent Coordination Contexts  (page 1189)
Mirko Viroli (DEIS Università di Bologna), Alessandro Ricci, Andrea Omicini

A Framework for Specifying Group Decision-Making Mechanisms  (page 1191)
Luke Hunsberger (Vassar College)

SESSION 3c: voting

Strategy/Falsename Proof Protocols for Combinatorial Multi-Attribute Procurement Auction: Handling Arbitrary Utility of the Buyer  (page 1195)
Takayuki Suyama (NTT Communication Science Laboratories), Makoto Yokoo
Cooperation In Stochastic Games Through Communication (page 1197)
Raghav Aras (Loria \ Inria-Lorraine), Alain Dutech, François Charpillet

Using Tags to Evolve Trust and Cooperation Between Groups (page 1199)
Aviv Zohar (The Hebrew University Jerusalem Israel), Jeffrey Rosenschein

An analysis of the Shapley value and its uncertainty for the voting game (page 1201)
Shaheen Fatima (University of Liverpool), Michael Wooldridge, Nicholas Jennings

Optimizing Auctioneer's Revenues in Expanding Multi-Unit Auctions (page 1203)
Onn Shehory (IBM Haifa Research Labs), Eran Dror

Computing the Communication Costs of Item Allocation (page 1205)
Timothy Rauenbusch (SRI International), Stuart Shieber, Barbara Grosz

SESSION 3d: negotiation and agreement II

Experimental Analysis of Negotiation Meta Strategies (page 1209)
Raquel Ros Espinoza (Artificial Intelligence Research Institute CSIC), Carles Sierra

A Negotiation Model for Autonomous Agents: Key Features and Comparison with Existing Models (page 1211)
Fernando Lopes (INETI), Nuno Mamede, Augusto Novais, Helder Coelho

A Decentralized Bargaining Protocol on Dependent Continuous Multi-Issue for Approximate Pareto Optimal Outcomes (page 1213)
Nicola Gatti (Politecnico di Milano DEI), Francesco Amigoni

Strategical Considerations for Negotiating Agents (page 1215)
Leila Amgoud (IRIT - CNRS), Souhila Kaci

Balancing Conflict and Cost in the Selection of Negotiation Opponents (page 1217)
Steve Munroe (University of Southampton), Michael Luck

SESSION 4a: coordination and planning

Coordination of Quantum Internet Agents (page 1221)
Matthias Klusch (DFKI)

A Simulator for Multi-Agent Partnership Formation Based on Dependence Graphs (page 1223)
Júlio Monteiro (Escola Politécnica da USP), Jaime Sichman

Buyer's Coalition for Optimal Search (page 1225)
David Sarne (Bar-Ilan University), Sarit Kraus

Individual Beliefs and Group Acceptances within Agent Organizations (page 1227)
Ioannis Partsakoulakis (University of the Aegean), George Vouros

The DEFACTO System for Human Omnipresence to Coordinate Agent Teams: The Future of Disaster Response (page 1229)
Nathan Schurr (University of Southern California), Janusz Marecki, Nikhil Kasinadhuni, J.P. Lewis, Milind Tambe, Paul Scerri
SESSION 4b: agent applications

Untraceability of Mobile Agents (page 1233)
Rafal Leszczyna (Joint Research Centre), Janusz Gorski

Access Control with Safe Role Assignment for Mobile Agents (page 1235)
Guillermo Navarro (Universitat Autonoma de Barcelona), Joan Borrell, Jose Antonio Ortega-Ruiz, Sergi Robles

Just in Time Mobile Agent Generation and Management (page 1237)
Glenn Jayaputera (Computer Science and Software Engineering Monash University), Seng Loke, Arkady Zaslavsky

Attacking the Migration Bottleneck of Mobile Agents (page 1239)
Peter Braun (Swinburne University of Technology), Steffen Kern, Ingo Mueller, Ryszard Kowalczyk

Efficient Information Retrieval Using Mobile Agents (page 1241)
Irene Sygkouna (National Technical University of Athens NTUA), Miltiades Anagnostou

SESSION 4c: trust and reputation I

Formalising Trust for Online Communities (page 1245)
Ali Shaikh Ali (Cardiff University School of Computer Science), Omer Rana

Fuzzy Number Approach to Trust in Coalition Environment (page 1247)
Martin Rehak (Department Of Cybernetics Czech Technical University), Michal Pechoucek, Petr Benda

Trusted Intermediating Agents in Electronic Trade Networks (page 1249)
Tomas B. Klos (Center for Mathematics and Computer Science), Floortje Alkemade

Trust-Based Contracting in Supply Chains (page 1251)
Sandip Sen (University of Tulsa Department of Mathematical & Computer Science), Sabyasachi Saha, Dipyaman Banerjee

A Framework for Decomposing Reputation in MAS into Competence and Integrity (page 1253)
Michael Smith (UMBC), Marie des Jardins

SESSION 4d: argumentation and dialog

Law-Governed Linda as a Semantics for Agent Dialogue Protocols (page 1257)
Sylvie Doutre (University of Liverpool), Peter McBurney, Michael Wooldridge

Liberalizing Protocols for Argumentation in Multi-agent Systems (page 1259)
Gerard A.W. Vreeswijk (Utrecht University)

Generating Intentions Through Argumentation (page 1261)
Katie Atkinson (Department of Computer Science University of Liverpool), Trevor Bench-Capon, Peter McBurney

A Drosophila for Computational Dialectics (page 1263)
Simon Wells (Division of Applied Computing University of Dundee), Chris Reed
SESSION 5a: AOSE II

Agent Synthesis: Partnership and Agreement in Cooperative Mobile Agents  (page 1267)
Fuyuki Ishikawa (The University of Tokyo), Nobukazu Yoshioka, Yasuyuki Tahara, Shinichi Honiden

Integrating a MAS and a Pandemonium: the Open-Source Framework AKIRA  (page 1269)
Giovanni Pezzulo (ISTC-CNR), Calvi Gianguglielmo, Rino Facone

SEAGENT: A Platform for Developing Semantic Web Based Multi Agent Systems  (page 1271)
Oguz Dikenelli (Ege University Computer Eng. Department), Riza Cenk Erdur, Ozgur Gumus, Erdem Eser Ekinci, Onder Gurcan, Geylani Karda, Inan Seylan, Ali Murat Tiryaki

SESSION 5b: information agents, brokering and matchmaking

Handling Information Overload: A MAS Architecture For Distributed Information Brokering  (page 1275)
Klaus Stein (Uni Bamberg), Christoph Schlieder

Agent-based Matchmaking of Mathematical Web Services  (page 1277)
Simone Ludwig (School of Computer Science Cardiff Universit), Omer Rana, Bill Naylor, Julian Padget

SESSION 5c: auctions and mechanism design

Usability of Dial-a-Ride Systems  (page 1281)
Itsuki Noda (AIST JAPAN), Masayuki Ohta, Yoichiro Kumada, Kosuke Shinoda, Hideyuki Nakashima

Distributed Network Scheduling  (page 1283)
Brad Clement (Jet Propulsion Laboratory Artificial Intelligence Group), Steven Schaffer

SESSION 5d: norms, social laws and social structures

Agent-Oriented Context-Aware Platforms Supporting Communities of Practice in Health Care  (page 1287)
Luiz Olavo Silva Santos (Università degli Studi di Trento), Renata Guizzardi, Marten van Sinderen

An Operational Approach to Norms in Artificial Institutions  (page 1289)
Francesco Vigano' (Università della Svizzera italiana), Nicoletta Fornara, Marco Colombetti

Norm Compliance of Protocols in Electronic Institutions  (page 1291)
Huib Aldewereld (Utrecht University), Javier Vazquez-Salceda, Frank Dignum, John-Jules Meyer

SESSION 6a: logical foundations II

A BDI Architecture for Goal Deliberation  (page 1295)
Alexander Pokahr (University of Hamburg Distributed Systems and Information Systems), Lars Braubach, Winfried Lamersdorf

Towards An Agent Oriented Programming Language with Caste and Scenario Mechanisms  (page 1297)
Ji Wang (National Lab for P&D), Rui Shen, Hong Zhu
On the Metaphysics of Agents (page 1299)
Paul Davidsson (Blekinge Institute of Technology School of engineering), Stefan Johansson

Game Theoretic Golog under Partial Observability (page 1301)
Alberto Finzi (TU Wien), Thomas Lukasiewicz

How Local Is That Optimum? k-Optimality for DCOP (page 1303)
Jonathan Pearce (University of Southern California), Rajiv Maheswaran, Milind Tambe

SESSION 6b: task and resource allocation I

A Decentralized Variable Ordering Method for Distributed Constraint Optimization (page 1307)
Anton Chechetka (The Robotics Institute Carnegie Mellon University), Katia Sycara

Allocation Of Indivisible Goods: A General Model And Some Complexity Results (page 1309)
Sylvain Bouveret (ONERA-DCSD), Hélène Fargier, Jérôme Lang, Michel Lemaître

Adaptive A* (page 1311)
Sven Koenig (University of Southern California Computer Science Department), Maxim Likhachev

An Autonomous Performance Control Framework for Distributed Multi-Agent Systems: A Queueing Theory Based Approach (page 1313)

SESSION 6c: ontologies

OWL Ontology Translation based on the O3F Framework (page 1317)
Luís Mota (ISCTE), Luís Botelho

Coordinating Change of Agents' States in Situated Agents Models (page 1319)
Giuseppe Vizzari (University of Milan-Bicocca), Stefania Bandini

Observation-Based Proactive Communication in Team Cooperation (page 1321)
Yu Zhang (Trinity University), Richard A. Volz, Thomas R. Ioerger

Layered Message Semantics using Social Commitments (page 1323)
Roberto Flores (Christopher Newport University Dept. of Physics Computer Science & Eng), Philippe Pasquier, Brahim Chaib-draa

Engineering Agent Interactions from ACL-based Reusable Connectors (page 1325)
Juan Manuel Serrano (University Rey Juan Carlos), Sascha Ossowski, Sergio Saugar

SESSION 7a: argumentation and dialog

Protocol Synthesis with Dialogue Structure Theory (page 1329)
Jarred McGinnis (University of Edinburgh), David Roberston, Chris Walton

Argument-Based Negotiation in a Social Context (page 1331)
Nishan Karunatillake (University of Southampton), Nicholas Jennings, Iyad Rahwan, Timothy Norman
SESSION 7b: multi-agent plans and planning

Real-time Dense Communication among Agents for Active Tracking  (page 1335)
Norimichi Ukita (Nara Institute of Science and Technology)

Multiagent Planning through Plan Repair  (page 1337)
Roman van der Krogt (Delft University of Technology), Mathijs de Weerdt, Nico Roos, Cees Witteveen

Data Storage in Unreliable Multiagent Networks  (page 1339)
Filip Miletic (Delft University of Technology Circuits and Systems Group), Patrick Dewilde

Service-Based Computing for Agents on Disruption and Delay Prone Networks  (page 1341)
Joseph Kopena (Secure Wireless Agent Testbed College of Engineering; Drexel University), Guarav Naik, Maxim Peysakhov, Evan Sultanik, William Regli, Moshe Kam

SESSION 7c: task and resource allocation II

Agent-Based Integration of Web Services with Workflow Management Systems  (page 1345)
Bastin Tony Roy Savarimuthu (Department of Information Science University of Otago), Maryam Purvis, Martin Purvis, Stephen Cranefield

Evaluating the Minority Game Strategy in Agent Role Assignments  (page 1347)
Tingting Wang (Dept. of Computer Science HKBU), Jiming Liu

SESSION 7d: robotics

Construction of Numerical Potential Fields with Reactive Agents  (page 1351)
Olivier Simonin (Systems and Transportation laboratory (SeT) University of Technology Belfort-Montbéliard)

Physical Deployment of Digital Pheromones Through RFID Technology  (page 1353)
Marco Mamei (DISMI - Univ. Modena & Reggio Emilia), Franco Zambonelli

Towards Flexible Teamwork in Behavior-Based Robots: Extended Abstract  (page 1355)
Gal Kaminka (Bar Ilan University), Inna Frenkel

SESSION 7e: embodied, emotional and believable agents II

Intentional Adequacy of Computer Programs as the Experimental Reference of Agent-Based Social Simulation  (page 1359)
Nuno David (ISCTE/ADETTI), Jaime Sichman, Helder Coelho

An Artificial Maieutic Approach for Eliciting Experts’ Knowledge in Multi-agent Simulations  (page 1361)
Francois Sempe (IFI), Minh Nguyen-Duc, Alain Boucher, Alexis Drogoul

ix
TACOP: A Cognitive Agent for a Naval Training Simulation Environment  (page 1363)
Willem van Doesburg (TNO Human Factors Vrije Universiteit), Egon van den Broek, Annerieke Heuvelink

Validation of an Agent Based System Using Petri Nets  (page 1365)
Thomas Moncion (UMR 8042 of CNRS), Guillaume Hutzler, Patrick Amar
