A Control-Oriented Model of a Common Rail Injection System for Diesel Engines ................................................................. 557
Paolo Lino, Bruno Maione, Alessandro Rizzo

Combining Loop-shaping and Laguerre Development for Rational Approximation of a Noninteger Order, Integral, Analog Controller ................................................................. 565
Guido Maione

A new simulation tool for action-oriented perception systems .................. 571
Paolo Arena, Luigi Fortuna, Mattia Frasca, Giuseppe Lo Turco, Luca Patanè, Rosario Russo

Automatic fault detection and diagnosis implementation based on intelligent approaches ............................................................. 579
Ana Fernández, Lara González, Iñigo Bediaga, Ainhoa Gastón, Javier Hernández

Carlos Bernal-Ruiz, Francisco García-Tapias, Bonifacio Martín-del-Brió, Antonio Bono-Nuez, Nicolas Medrano-Marques

Applying an Expert System to Factory Budget Calculations .................. 593
Jose L. Lopez-Cuadrado, Israel González-Carrasco, Ángel García-Crespo, Belén Ruiz-Mezcuca, Yerun Fernández-Heijnen, Jose Luis Cantero-Guisández

S01.2 Session 2 ............................................................................. 601

Service-Based Methodology for Controlling Reconfigurable Mechatronic Devices ................................................................. 603
Omar López Orozco, Jose L. Martinez Lastra

Incremental development of production units using HW/SW-encapsulation and simulation supported by a complete Toolset .................... 611
Uwe Schmidtmann, Gerhard Kreutz, Bodo Wenker, Rainer Koers, Gerd von Coelln

Orchestration of Service-Oriented Manufacturing Processes .................. 617
Francois Jammes, Harm Smit, Jose L. Martinez Lastra, Ivan M. Delamer

Reconfigurable Transfer Lines Cost Optimization - A Linear Programming Approach ................................................................. 625
Antoneta Iuliana Bratcu, Alexandre Dolgui, Sana Belmokhtar

An Approach towards the Development Life-Cycle of Agent-based Production Control Applications ................................................................. 633
Paulo Leitão, Armando Colombo

On-Line Control Reconfiguration at the Machine and Cell Levels: Case Studies from the Reconfigurable Factory Testbed .................. 641
J. E. Luntz, J. R. Moyne Moyne, D. M. Tilbury

K3 Invited Keynote 3 ..................................................................... 649

Fieldbus Technology and Industrial Automation ........................................ 651
Jean-Pierre Thomesse
WIP.2 Communication ........................................ 655

Wireless Sensor Network for "Intelligent" Acquisition and
Processing of Physiological Information ....................... 657
Christian Peter, Helmut Beikirch, Eric Ebert, Matthias Voss

Development of a Service-Oriented Architecture for the dynamic
integration of mobile remote software components .............. 661
Martino Fornasa, Massimo Maresca, Nicola Zingirian, Lucia Ballardin, Sonia Be-
din

TTCAN over mixed CAN/Switched Ethernet architecture ............ 665
Jean-Luc Scharbarg, Marc Boyer, Jerome Ermont, Christian Fraboul

Self-describing devices in COSMIC ................................ 669
Jörg Kaiser, Hubert Piontek

A Security Architecture for Data Privacy and Security ............ 673
Alfred C. Weaver

Towards analyzing the fault-tolerant operation of Server-CAN .......... 677
Thomas Nolte, Guillermo Rodriguez-Navas, Julian Proenza, Sasikumar Punnekatt, Hans Hansson

Approach .......................................................... 681
Mario Barbera, Salvatore Incardona, Giovanni Schembra

An Efficient Retransmission Strategy for Data Gathering in
Wireless Sensor Networks ......................................... 685
Marco Ortolani, Luca Gatani, Alfonso Urso, Giuseppe Lo Re, Salvatore Gaglio

Fork-Lift Truck Simulator for Training in Industrial Environment ........ 689
M.Bergamasco, S.Perotti, C.A.Avizzano, M.Angerilli, M.Carrozzino, E.Ruffaldi

T5.2 Supply Chain Management .................................... 695

Modelling of distributed system in one single simulation model: a
way to study communications within distributed systems .......... 697
Christine Gertosio, Emilie Grandgirard

Virtual Organization and Supply Chain Management ............... 705
Taivo Kangilaski

e-Collaboartion for Ship repair Supply Chain Management .......... 713
S. Makris, D. Mourtzis, N. Papakostas, G. Chryssoulouris

T8.2 Unmanned Vehicles ........................................... 719

A Multi-Robot System for Landmine Detection .................... 721
Pedro Santana, José Barata, Hildebrando Cruz, António Mestre, João Lisboa, Luís Flores
Unmanned Helicopters Applied To Humanitarian Demining .... 729
Pedro Santana, José Barata

Architecture of a UAV for volcanic gas sampling ............... 739
Daniele Caltabiano, Giovanni Muscato, Angelo Orlando, Cinzia Federico, Gaetano Giudice, Sergio Guerrieri

S10.1 Session 1 ......................................................... 745

A Comparison of Fieldbus Protocols: LIN 1.3, LIN 2.0, and TTP/A ......................................................... 747
Wilfried Elmenreich, Stefan Krywult

Cédric Wilwert, François Simonot-Lion, YeQiong Song, François Simonot

Efficient Stimulus Generation for Testing Embedded Distributed Systems - The FlexRay Example .................... 763
Eric Armengaud, Andreas Steininger, Martin Horauer

IP.2 Session 2 .......................................................... 771

Intelligent system for dynamic transport fleet management .... 773
Daniel Boto-Giralda, Miriam Antón-Rodríguez, Francisco J. Díaz-Pernas, J. Fernando Díez-Higuera, David González-Ortega, Mario Martínez-Zarzuela

High-level factory environment for process simulation. An open architecture. ........................................ 777
Agatino Bruno, Salvatore Fabio Liotta, Elio Sciaccia, Salvatore Rinaudo

Data Integrity in Electric Utility IT Systems: A Case Study ...... 781
Thomas Werner, Claus Vetter

Systems integration of a mixed fibre detection process in raw yarn packages by computer vision ......................... 785
Javier Silvestre, Ruben Pérez, Javier Muñoz

T2.3 Middleware ....................................................... 789

Modelling CANopen Communications According to the Socket Paradigm .................................................... 791
Gianluca Cena, Ivan Cibrario Bertolotti, Adriano Valentano

Plug-and-Play: Bridging the Semantic Gap Between Application and Transducers ........................................... 799
Stefan Pitzek, Wilfried Elmenreich

Middleware-Integration of Small Devices .......................... 807
Michael Mock, Stefan Couturier

PROFINET: An Integration Platform for heterogeneous Industrial Communication Systems ....................... 815
Juergen Jasperneite, Joachim Feld
Aspect Orientation and Object Orientation of Control Application  
Code for Distributed Control Systems in TORERO  
Marcus Tagermann, Christian Schwab, Arndt Lueder  

Environmental Control System based on mobile devices.  
Teresa Albero, Víctor Sempere, Javier Silvestre, Patricia Dabbas  

T3.1 RT Embedded Systems Design  
Performance evaluation of Java Architectures in Embedded Real Time Systems  
Carlos Eduardo Pereira, Fernando Henrique Ataide, Guilherme Oliveira Kunz, Edison Pignaton Freitas, Elias Teodoro Silva Jr, Fabiano Costa Carvalho  
The Analysis and Evaluation of Design Patterns for Distributed Real-Time Java Software  
Angelo Corsaro, Corrado Santoro  

A Tool for Tailored Code Generation from Petri Net Models  
Rui Pais, Joao Barros, Luis Gomes  

An Approach to Modelling and Analysis of Coordinated Atomic Actions  
Simeon Veloudis, Nimal Nissanke  

On the Automatic Generation of SoC-based Embedded Systems  
Fauze Polpeta, Antônio Fröhlich  

Decision guide environment for design space exploration  
Benoit Miramond, Jean-Marc Delosme  

T5.3 Planning and Scheduling  
Volume and Product Flexibility: A case Study for a Refrigerators Producing Facility  
K. Alexopoulos, A. Mamassioulas, D. Mourtzis, G. Chryssolouris  

A Combinatory Approach to Order Release and Shop Scheduling in Discrete Manufacturing Environments  
C. Lalas, D. Mourtzis, N. Papakostas, G. Chryssolouris  

A Platform for Distributed Modeling and Simulation of Productive Systems based on Petri Nets and Object-Oriented Paradigm  
Fabrício Junqueira, Emília Villani, Paulo E. Miyagi  

A Holonic Ontology-Based Multi-Agent System for the Distributed Scheduling and Monitoring of Industrial Processes  
Manos Georgoudakis, Athanasios Kalogeras, Christos Alexakos, Konstantinos Charatisis, Stavros Krubias  

"Gantt Charts for Production Flow": a Performance Analysis Framework for Shop Floor Control Effectiveness Evaluation and Monitoring  
Caterina Genua, Silvestro Giuffrida, Salvatore Rinaudo
Petri Net Models of Agent-Based Control of a FMS With Randomly Generated Recipes .......................... 929
Adamo Castelnuovo, Luca Ferrarini

T6.4 Advanced Control Issues 2 .............................. 937

Inverter for Microturbines Based on Multiobjective Genetic Algorithm ........................................... 939
Francisco Jurado, Manuel Valverde

Proactive/Reactive Approach for Maintenance Tasks in Time Critical Systems .................................. 947
Soizick Calvez, Pascal Aygalinc, Patrice Bonhomme

U-Model Based Adaptive IMC for Nonlinear Dynamic Plants ................. 955
Muhammed Shafiq, Naveed R. Butt

An expert mill cutter selection system ........................................ 961
Luis Rubio, Manuel De la Sen, Asier Ibeas

Fault-Tolerant Two-Level Pyramid Networked Control Systems ......................... 969
Ramez Daoud, Hassanein Amer, Hany Elsayed

On the Heuristic Design of Common PI Controllers for Multi-Model Plants ......................... 975
Fotis N. Koumboulis

T9.1 Session 1 .................................................. 983

Automotive Communications - Past, Current and Future ................. 985
Thomas Nolte, Hans Hansson, Lucia Lo Bello

Outdoor Location Detection Based On Signal Propagation Models ......................... 993
Salvatore Cavalieri

The Effect of Power Consumption on the Real Time Performance of Routing Protocols for Ad Hoc Wireless Networks ......................... 1001
Christos Antonopoulos, Spilios Giannoulis, Stavros Koubias, Ioannis Lymperopoulos

A Vision-based User Interface for Real-Time Controlling Toy Cars ................. 1009
Giancarlo Iannizzotto, Carlo Costanzo, Pietro Lanzafame, Francesco La Rosa

ZRP versus DSR and TORA: A comprehensive survey on ZRP performance ......................... 1017
Spilios Giannoulis, Christos Antonopoulos, Evangelos Topalis, Stavros Koubias

Automating adaptive image generation for medical devices using Aspect-Oriented Programming ......................... 1025
Thomas Fritz, Marc Ségura, Mario Südholt, Egon Wuchner, Jean-Marc Menaud

K4 Invited Keynote 4 ............................................ 1033
Waves and locomotion control of bio-inspired robots .......................... 1035
Luigi Fortuna

WIP.3 Real-Time, Software and Processes ................................. 1037

A Self-Healing Real-Time System Based on Run-Time Self-Reconfiguration ........................................... 1039
Manuel Gericota, Gustavo Alves, Jose Ferreira

A Compact Monitoring System for Process Valves ....................... 1043
Qaisar Ahsan, Waseem Amer, Roger I. Grosvenor, Paul W. Prickett

Sub-Wavelength Surface Grating Application for High-Power Fundamental-Mode and Polarization Stabilization of the VCSELs. ......................................................... 1047
Åsa Haglund, Piotr Jedrasik, Johan Gustavsson, Anders Larsson

Intelligent Reconfiguration Using Knowledge Based Agent System .................................................. 1051
Munir Merdan, Ivanka Terzic, Alois Zoitl, Bernard Favre-Bulle

Process Fault Diagnosis Approach based on Neural Observers .......... 1057
Luis Brito Palma, Fernando Vieira Coito, Rui Neves da Silva

Programming fieldbus nodes: A RAD approach to customizable applications .............................................. 1061
Georg Neugschwandtner, Wolfgang Kastner, Martin Kögler

Probabilistic Delay Time Analysis in Networked Automation Systems .................................................. 1065
Jürgen Greifeneder, Georg Frey

ANN Approach to WECS Power Forecast ................................. 1069
Pedro Fonte, José Quadrado

DEA-based Data Mining for Energy Consumption ...................... 1073
Akihiro Koretsune, Shingo Aoki, Takefumi Konzo, Hiroshi Tsuji, Shinji Shimano, Eiji Mimura

Thermal Data Correction Algorithm for Electrical Components Using Infrared Camera ........................................... 1077
Seong-Ho Song

Adapting the sampling period of a real-time adaptive distributed controller to the bus load .......................... 1081
Ana Antunes, Paulo Pedreiras, Alexandre Mota

A Real-Time Task Model Based on Ideal Instant ..................... 1085
Fábio Rocha, Rômulo Oliveira

A practical iterative algorithm for sensor positioning ................. 1089
Andrea Bottino, Aldo Laurentini

S02.1 Session 1 ................................................................. 1093

XXX
Hotel Room Allocation for Sales Channel by Dynamic Programming
Masayuki Nakano, Ryosuke Saga, Hiroshi Tsuji

Negotiation Protocol for Bilateral Semi-competitive Trading Environments
Masanori Akiyoshi, Mariko Matsumoto, Hironori Oka, Norihisa Komoda

A Scheduling Method in Multi-item Production Adjusting to Urgent Orders Based on Job Modifiability
Masaki Samejima, Shingo Tamura, Yoshitomo Ikkai, Norihisa Komoda, Hitoshi Goshima, Teruyuki Mori

Total SCM Innovation for Business Globalization Based on Coupling Point Inventory Planning
Koshichiro Mitsukuni, Yuichi Nakamura, Tomoyuki Aoki
