2006 NSTI Nanotechnology Conference and Trade Show

NSTI Nanotech 2006

Volume 1

Boston, May 7-11 2006

The Nanotechnology Conference and Trade Show

An Interdisciplinary Integrative Forum on
Nanotechnology, Biotechnology and Microtechnology

May 7-11, 2006
Hynes Convention Center
Boston, Massachusetts, U.S.A.

The Impact of Patent Reform on Nanotechnology: File Early and File Often ................................. 87
  D.J. Featherstone, M. Messinger and M.D. Specht

Carbon Nanotubes

Diagnostics of carbon nanotube composites by Raman spectroscopy ........................................ 91
  P. Puech, A. Bassil, S. Barrau, P. Demont, R.R. Bacsa, E. Flahaut and W.S. Bacsa

Fabrication of Nano-sized Single-walled Carbon Nanotube Vias for Electronic Device Applications .. 94
  T. Iwasaki, R. Morikane, G. Zhong, T. Edura, K. Tsutsui, Y. Wada and H. Kawarada

Diameter controlled synthesis of carbon nanotubes by CVD using steric-stabilized iron nanoparticle catalysts 98
  K.S. Mayya, S. Lee, I-S Yeo, U-I Chung, J-T Moon

Separating Single-Walled Carbon Nanotubes by Length ............................................................ 102
  U. Rauwald, D.J. Schmidt, R.H. Hauge, R.E. Smalley and K.J. Ziegler

Gated Chemical Transport and Enhance Flow through Carbon Nanotube Membranes ...................... 106
  M. Majumder, N. Chopra, B.J. Hinds

Determination of relative concentrations of metallic and semi-conducting SWNTs in suspension via
dielectrophoresis .......................................................................................................................... 110
  N. Mureau, E. Mendoza, K.F. Hoetttges, S.R.P. Silva and M.P. Hughes

Investigation of Carbon Nanotube Mechanical Properties Using Atomistic-Continuum Mechanics Method .... 113
  C-J Wu, C-Y Chou, C-N Han and K-N Chiang

Self-Welded Metal-Catalyzed Carbon Nanotube Piezoresistors with Very Large Longitudinal
Piezoresponseivity of ~ 4x10-8 Pa-1 ...................................................................................... 117
  M. Tabib-Azar, R. Wang and Y. Xie

In Situ Synthesis of Carbon Nanotubes by Polymer Materials .................................................... 121
  C.W. Huang, L.C. Hsu and Y.Y. Li

Synthesis of Narrow Diameter Multivalled Carbon Nanotubes (MWNts) By Catalytic Chemical Vapor
Deposition For Mechanical Reinforcement Applications .................................................................. 125
  N.M. Mohamed, Y.C. Tan and A.K. Kadir

CNT Composites for Aerospace Applications ................................................................................ 129
  S. Bellucci, C. Balasubramanian, P. Borin, F. Micciulla and G. Rinaldi

Absorption Characteristics of Single Wall Carbon Nanotubes .................................................... 134
  S. Haque, C. Marinelli, F. Udrea and W.I. Milne

CMOS Compatatability of Carbon Nanotubes on SOI Devices ................................................... 138
  M.S. Haque, S.P. Oei, K.B.K. Teo, F. Udrea, J.W. Gardner and W.I. Milne

Ultrafine Carbon Nitride Nanocrystals Synthesized by Laser Ablation in Liquid Solution ............. 142
  L. Yang, P.W. May, J.A. Smith and L. Yin

Composite Carbon Nanostructures as Promising Carriers for Gaz Analysis .................................. 146
  L. Majoli, A. Evstratov, J-M. Guillot, A. Rouvière and P. Baussand

Polydisperse Detonation Nanodiamond and Approaches for its Fractioning .................................. 150
  I. Petrov, P. Detkov, J. Walch and O. Shenderova

Application-Specific Detonation Nanodiamond Particulate .......................................................... 154
  O. Shenderova, G. McGuire, I. Petrov, B. Spitsyn, A. Puzur and V. Kuznetsov

A Grand Canonical Monte-Carlo Simulation of the Textural, Mechanical and Adsorption Properties of
Faujasite zeolite Carbon Replica .................................................................................................. 158
  T. Roussel, C. Bichara and R.J.-M. Pellenq

Pore-Size Control of Carbon Nanospace with Ultrasonic Irradiation ........................................ 162
  T. Ohkubo, R. Hori, K. Tsuchiya, H. Sakai and M. Abe

Role of Nanoscale Topography on the Super-Hydrophobicity: A Study of Fluoro-Based Polymer Film on
vertically Carbon Nanotubes .......................................................................................................... 166
  A.R. Phani, V. Grossi, M. Passacantando and S. Santucci

Exfoliated Graphite Nanoplatelets (xGnP): A Carbon Nanotube Alternative .................................. 170
  L.T. Drzal and H. Fukushima

Carbon nanotube Josephson junctions .............................................................................................. 174
  H.I. Jørgensen, K. Grove-Rasmussen, P.E. Lindelof

ZnO Nanoparticles Beaded Multiwalled Carbon Nanotubes .......................................................... 178

Nanocone in a periodic potential: A conveyer belt for electrons .................................................. 182
  D.S. Novikov
Spin Glass Behaviour of Magnetic Carbon Nanoclusters

Field emission characteristics of carbon nanofibers grown on the electroplated copper micro-tips

Interfacial Properties of Carbon Nanotube Arrays
L. Zalamea and R.B. Pipes

Vibration damping/dynamic properties of CNT-reinforced composite structures
M.V. Kireitseu

Qubit Entanglement from a Bipartite Atomic System in a Carbon Nanotube
I.V. Bondarev and B. Vlahovic

Dispersion and rheological aspects of SWNTs in ultra high molecular weight polyethylene
Q. Zhang, D.R. Lippits, S.N. Vaidya and S. Rastogi

Quantum Dot Modified Multiwall Carbon Nanotubes
M. Olek, T. Büsgen, J. van Embden, M. Hilgendorff, P. Mulvaney and M. Giersig

Unique Roles of DNA Wrapped SWNTs: In-situ Fabrication of Self-Doped Polyaniline Nanocomposites
Y.F. Ma, S.R. Ali and H.X. He

New route to manufacture high performance carbon nanotubes nanocomposites based on pre-dispersed concentrates generated by in-situ polymerization
M. Claes, D. Bonduel, S. Pegel, M. Alexandre, P. Poetschke, P. Dubois and F. Luizi

Conductive Carbon-Nanotube/Polymer Composites: Spectroscopic Monitoring of the Exfoliation Process in Water and the Crucial Role of Wetting
N. Grossiord, J. Loos, J. Meuldijk, O. Regev, H.E. Miltner, B. Van Mele and C.E. Koning

Coatings, Adhesives and Composites

Large Enhancement of Mechanical Properties and Environmental Resistance of Glass Fibre from Polymer Coating with Low Fraction of Nano-reinforcements
S.L. Gao, E. Mader and R. Plonka

The Impact of Nano-Materials on UV-Protective Coatings
R.H. Cayton and T. Sawitowski

Characterization of Aluminum Nitride Nanostructures by XANES and FTIR Spectroscopies with Synchrotron Radiation
S. Bellucci, C. Balasubramanian, G. Cinque, A. Marcelli, M. Cestelli Guidi, M. Piccinini, A. Popov, A. Soldatov and P. Onorato

Cold Cathode Fluorescence Light with Amorphous Diamond Coated Electrodes
J.C. Sung and M-C Kan

Curing Quantum Dots using Inductively Coupled Argon Plasma
T. Mei, D. Nie, H.S. Djie and B.S. Ooi

Investigation of the Behaviors of Various Electroplated Copper films during CMP
H.P. Feng, M.Y. Cheng, Y.Y. Wang and C.C. Wan

A New Copper Electrodeposition Scheme to Reduce Void Defects after Chemical Mechanical Polishing
J.Y. Lin, Y.Y. Wang and C.C. Wan

Self-assembled Polymer Nanocylinders as Template for Nanoporous Metal Oxide Films
O. Dong, N. Yao and K.L. Yeung

Investigation of the Electronic Properties of the ZrO₂ and HfO₂ Thin Films by Scanning Probe Microscopy and X-ray Photoelectron Spectroscopy

Self-assembled Film of Cholesterol Molecules on the Au (111): An STM Study
A. Segura and N. Batina

Surface Modification of Perovskite Manganite Thin Films using Atomic Force Microscopy

A new system of composites: MWNT-mullite
J. Wang, H.M. Kou, C.S. Xiang, Y.B. Pan and J.K. Guo

Polyamide 6-Organoclay- Impact Modifier Nanocomposites
I. Isik, U. Yilmazer and G. Bayram

Nanoparticle Surface Treatments – Application Tailored Interfaces
Aligned Electrospun Nanocomposite Fibers ................................................................. 278
S.R. Nartker, M. Misra and L.T. Drzal

Nylon - Exfoliated Graphite Nanoplatelet (xGnP) Nanocomposites with Enhanced Mechanical, Electrical and Thermal Properties ......................................................... 282
H. Fukushima and L.T. Drzal

Quantum Dot Dissemination and Behavior in Bacterial Biofilms ............................. 286
J.B. Morrow, R.D. Holbrook and C.J. Zeissler

Morphological Consequence of Sonication on Lignin-CNT-Epoxy Composite ........... 290

Gold Composite- and Macroporous Gold Nanoparticle Films by a Vertical Deposition Method .............................................................. 293
S. Badilescu, M. Kahrizi, P.V. Ashrit and V-V Truong

Innovative PMMA/CaCO₃ Nanocomposites .............................................................. 297
M. Avella, M.E. Errico and G. Gentile

Nanoparticle Processes & Applications

Overview - Nanoparticulate Dry (Flame) Synthesis & Applications .......................... 301
S.E. Pratsinis

Synthesis and Electrical Characterization of Silicon Nanoparticles for Electronic Applications .......................................................... 308
D. Gopireddy, C.G. Takoudis, D. Gamota, J. Zhang and P.W. Brazis

Expansion-Limited Nanocluster Growth in a Plume Formed by MHz-Pulse-Rate Laser Ablation ............................................................. 311
A.V. Rode, N.R. Madsen, E.G. Gamaly and B. Luther-Davies

Flowability Modification of Fine Powders by Plasma Enhanced Chemical Vapor Deposition .............................................................. 315
A. Spillmann, A. Sonnenfeld and Ph. Rudolf von Rohr

Europium-Doped Yttrium Silicate Nanophosphors Prepared by Flame Synthesis .......... 318
X. Qin, Y. Ju, S. Bernhard and N. Yao

Integrated Gas-Phase Manufacturing of Nanostructured Particulate Films ................. 322
K. Wegner, P. Piseri, G. Bongiorno, S. Vinati, S.E. Pratsinis and P. Milani

Laser pyrolysis - a platform technology to produce functional nanoscale materials for a range of applications .................................................. 325
S. Chiruvolu, W. Li, M. Ng, K. Du, N.K. Ting, W.E. McGovern, N. Kambe, R. Mosso and K. Drain

Cubic and oriented Ag nano-particles by high vacuum evaporation ...................... 329
D. Berner, L. Zuppiroli, M. Caumont, W.S. Bacsu

Nanoparticles in chemistry and their industrial applications ................................ 332
P. Maestro, Y. Bomal and T. Chopin

The role of the synthetic procedure on the photoactivity of nanocrystalline TiO₂ .......... 336
S. Ardizzone, C.L. Bianchi, G. Cappelletti, C. Pirola and V. Ragaini

YAG:Ce³⁺ Nanophosphor Synthesized with Salted Sol-Gel Method ......................... 339
D. Jia, C.V. Shaffer, J.E. Weyant, A. Goonewardene, X. Guo, Y. Wang, X.Z. Guo, K.K. Li,
Y.K. Zou and W. Jia

Synthesis of Magnetic Nanoparticles Using Spinning Disc Processing .................... 343
N. Smith, C.L. Raston, M. Saunders and R. Woodward

Advancements in the Supercritical Water Hydrothermal Synthesis (scWHS) of Metal Oxide Nanoparticles ........................................ 347
E. Lester, P. Blood, J. Li and M. Poliakoff

Monometallic nano-catalysts for the reduction of perchlorate in water ................... 351
D.M. Wang, H.Y. Lin and C.P. Huang

Functionalized Nanoporous Ceramic Sorbents for Removal of Mercury and Other Contaminants .............................................................. 355
S.V. Mattigod, G.E. Fryxell, R. Skaggs and K.E. Parker

Development of Stab Resistant Body Armor using Fumed SiO₂ Nanoparticles Dispersed into Polyethylene Glycol (PEG) through Sonic Cavitation ........................................ 358
H. Mahfuz, F.E. Clements and J. Stewart

Synthesis and Characterization of Magnetorheological Fluids with Super Paramagnetic Nanomaterials in Polymeric Matrix .............................................. 362
V. Kancharla, A. Fahmi, Q. Liu and N. Gindy

Tailoring the Surface Chemistry of Nanoparticles in Ceramic Processing ................ 365

Towards the Preparation of Boron Carbide Nanorods by Carbothermal Reaction Method .............................................................. 369
B. Chang, B.L. Gersten, S.T. Szewczyk and J.W. Adams
Nanoemulsion Formulations for Improved Oral Delivery of Poorly Soluble Drugs
S.B. Tiwari, D.B. Shenoy and M.M. Amiji

Simple Large-Scale Synthesis of Monolayer-Protected Silver Nanocrystal
K.J. Lee, B.H. Jun and J. Joung

Glass Transition Temperature of High Molecular Weight Polystyrene: Effect of Particle Size, Bulk to Micron to Nano
P. Paik and K.K. Kar

Synthesis of Nano Crystalline TiO₂ powders by soft chemistry method
M. Vijayakumar, M. Venkateswarlu and N. Satyanarayana

Ethylene Glycol Mediated Synthesis of Nano - Crystalline NiFe₂O₄ Spinel Powder
S. Vivekanandhan, M. Venkateswarlu and N. Satyanarayana

Effectively Grinding and Dispersing Nanoparticles Using a Fine Bead Mill
U. Enderle, G. Kolb, S. Mende and H. Way

A statistical approach to control particle size of poly(acrylic acid) stabilized iron oxide nanoparticles
M. Demirer and H.Y. Acar

A Simple Method to Prepare Template-removed Zeolite MFI Nanomaterials
Q. Li, J. Wang and H. Yuan

Lattice Constant Dependence on Particle Size for Bulk and Doped Ceria prepared from a Citrate Sol-Gel
V.N. Morris, R.A. Farrell, A.M. Sexton and M.A. Morris

A search of superparamagnetic oxide-mygoglobin as potential nanoparticle based magnetic resonance imaging marker in mouse heart imaging
R. Sharma, Y. Haik and C-J Chen

Nano-Engineering Of Magnetic Particles For Biocatalysis And Bioseparation

Gas Sensor Arrays by Supersonic Cluster Beam Deposition

Energy Applications of Nanotechnology
TiN/GaN- Metal/Semiconductor Multilayers for Thermionic Energy Conversion Devices
V. Rawat and T.D. Sands

Pt and Pt-Ru/Carbon Nanotube Nanocomposites Synthesized in Supercritical Fluid as Electrocatalysts for Low-Temperature Fuel Cells
Y. Lin, X. Cui, J. Wang, C.H. Yen and C.M. Wai

Nanoporous Silicon Membrane Based Micro Fuel Cells for Portable Power Sources Applications
K.-L. Chu, M.A. Shannon and R.I. Masel

Novel Electrolyte Membrane for Fuel Cell Utilizing Nano Composite

Improving the High Temperature Thermoelectric Properties of Boron Cluster Compounds through Microstructure Control
T. Mori, T. Nishimura and Y. Bando

Environmental, Health and Societal Impacts of Nanotechnology
The Effect of Gold Nanoparticles on Dendritic Cells
H. Vallhov, J. Qin, S. Johansson, M. Muhammed, S. Gabrielsson and A. Scheynius

Issues relating to the use of Micro and Nanoparticle Zinc Oxide in Personal Care Products based on Skin Penetration Studies
P. Casey, N. Chau and B. Finnin

R.J.M. Pelleng and B. Coasne

Nano-Diamond compressibility at pressures up to 85 GPa ........................................................................................................................................ 823
C. Pantea, J. Zhang, J. Qian, Y. Zhao, A. Migliori, E. Grzanka, B. Palosz, Y. Wang, T.W. Zerda, H. Liu, Y. Ding, P.W. Stephens and C.E. Botez

A Novel Ultrasonic Method for Characterizing Suspensions of Nanoparticles ........................................................................................................................................ 827
S. Africk and C.K. Colton

Morphology effect dependent on the synthesis method of K\textsubscript{3}Ir\textsubscript{x}O\textsubscript{3} system ........................................................................................................................................ 830
E. Ramírez, E. Chavira, L. Baños, A.B. Soto Guzmán, J. Guzmán and C. Flores

Index of Authors ........................................................................................................................................ 835
Index of Keywords ........................................................................................................................................ 843
