Proceedings of the

3rd International Workshop on Intelligent Transportation
(WIT 2006)

Hamburg University of Technology
Department of Telecommunications
Prof. Dr. Hermann Rohling

Hamburg, Germany, March 14th and 15th, 2006
Contents

Session 1: Automotive Radar (1)

Side-Pre-Crash Sensing System for Automatic Vehicle Height Level Adaptation
Marc-Michael Meinecke, Raimond Holze, Mark Gonter, Thomas Wohlebe, Volkswagen AG, Germany
Ralph Mende, Rajko Petelka, Smart Microwave Sensors GmbH, Germany

24 GHz Automotive Lane Change Assist System
Ralph Mende, Smart Microwave Sensors GmbH, Germany

24 GHz Sequential Lobing Radar for Ultrawideband Automotive Applications
Hans Dominik, Tyco Electronics, Germany

Noise Technology for Future Automotive Radar
Krzystof Kulpa, Jacek Misiurewicz, Warsaw University of Technology, Poland

Session 2: Communication (1)

Unified Communication in Heterogenous Automotive Control Systems
Michael Dinkel, Daniel Fengler, BMW Group Forschung und Technik GmbH, Germany

System Design for Information Dissemination in VANETs
Marc Torrent-Moreno, University of Karlsruhe, Germany
Andreas Festag, NEC Europe Ltd. Network Laboratories, Germany
Hannes Hartenstein, University of Karlsruhe, Germany

Evaluation of Server Performance in VANETs in Single Hop Scenarios
Christian Bruns, Volkswagen AG, Germany
Klaus Jobmann, University of Hannover, Germany

Greedy Routing in Highway Scenarios: The Impact of Position Faking Nodes
Tim Leinmüller, DaimlerChrysler AG, Germany
Elmar Schoch, University of Ulm, Germany

Vehicular Ad-Hoc Networks: Single-Hop Broadcast is not enough
Sascha Schnaufer, Holger Füßler, Matthias Transier, Wolfgang Effelsberg, University of Mannheim, Germany

Session 3: Vision / Image processing

Full Speed Range ACC Using a Laserscanner
Winfried Justus, Volker Willhoeft, Holger Salow, Jörg Kibbel, Ibeo Automobile Sensor GmbH, Germany

Evaluation of vision based in-vehicle Applications
C. Koch, kochtec.com, Germany
J. Yoon, LG Elite Information Technology Lab, South Korea
N. Lii, University of Cambridge, United Kingdom

Radar-Vision Fusion for Vehicle Detection
Luca Bombini, Pietro Cerri, Paolo Medici, Università di Parma, Italy
Giancarlo Alessandretti, Centro Ricerche, FIAT, Italy
### Session 4: ITS Communication Applications

**OFDM for Multimedia Applications in High-Speed Trains: Channel Model Including Different Antenna Types**

*Sandra Knörzer, Michael Baldanf, Jürgen Maurer, Werner Wiesbeck, University of Karlsruhe, Germany*

**EuroMetropolis - Standards-based Implementation of Traffic Information Services**

*Thomas May, Robert Bosch GmbH, Germany*

**Security Levels of Bluetooth**

*Tobias Lohmann, Christoph Ruland, University of Siegen, Germany*

### Session 5: Applications (1)

**A WiFi Network for Surveillance of Airport Mobiles**

*David Bonacci, TeSA, France*

*Willy Vigneau, M3 Systems, France*

*Francis Castanié, TeSA / IRIT, France*

**Multi Sensor System for Automotive Pre-Crash Applications**

*Stephan Müller, Hermann Rohling, Hamburg University of Technology, Germany*

*Marc-Michael Meinecke, Volkswagen AG, Germany*

**Challenges of Gesture Recognition in Vehicles**

*Alexander Barke, Thorsten Kölzow, Audi Electronics Venture GmbH, Germany*

**The Making of a Real-Time Single Camera Occupant Detection System for Passenger Vehicles**

*Neal Lii, University of Cambridge, United Kingdom and BMW AG, Munich, Germany*

*Jason Jeong-Suk Yoon, LG Elite Information Technology Lab, Korea*

*Carsten Koch, kochtec.com, Germany*

**Silent Police Radar**

*Mateusz Malanowski, Krzysztof Kulpa, Jacek Misiurewicz, Magdalena Purchla, Warsaw University of Technology, Poland*

**Intersection Safety**

*Kay Fürstenberg, IBEO Automobile Sensor GmbH, Germany*

### Session 6: Applications (2)

**Automatic Maneuver Recognition in the Automobile: the Fusion of Uncertain Sensor Values using Bayesian Models**

*Arati Gerdes, German Aerospace Center, Germany*

**Advanced Driver Assistance for Trucks by Lane Observation**

*Malte Ahrholdt, Achim Beutner, Volvo Technology AB, Sweden*

**Experience with the on-board use of AIS**

*Volker Köhler, SAM Electronics GmbH, Germany*
Multisensor Data Fusion with PR-, SSR-, Mode-S-Radars and ADS-B for ATC Applications
Ralf Heidger, DFS Deutsche Flugsicherung GmbH, Germany

Laserscanners for Driver Assistance
Kay Fürstenberg, Roland Schulz, IBEO Automobile Sensor GmbH, Germany

Session 7: Automotive Radar (2)
Automotive Radar Target List Simulation Based on Reflection Center Representation of Objects
Marcus Bühren, Bin Yang, University of Stuttgart, Germany

Identification of Pedestrians with Radar Sensors
Henning Ritter, Florian Fölster, Hermann Rohling, Hamburg University of Technology, Germany

Intelligent Safety Systems for Side Impact Protection
Joachim Tandler, Siemens VDO Automotive AG, Germany

Digital 2D Imaging Techniques for SRR
Karin Schuler, Christian Sturm, Werner Wiesbeck, University of Karlsruhe, Germany

Parking Lot Detection with 24 GHz Radar Sensor
Stefan Görner, Hermann Rohling, Hamburg University of Technology, Germany

Session 8: Communication (2)
Attacks on Inter Vehicle Communication Systems – an Analysis
Amer Aijaz, Volkswagen AG, Germany
Bernd Bochow, Fraunhofer Institute for Open Communication Systems (FOKUS), Germany
Florian Dötzer, BMW Group Research and Technology, Germany
Andreas Festag, NEC Europe Ltd. Network Laboratories, Germany
Matthias Gerlach, Fraunhofer Institute for Open Communication Systems (FOKUS), Germany
Rainer Kroh, Tim Leinmüller, Daimler Chrysler AG, Germany

Wave Propagation inside and around Vehicles in Dynamic Time Variant Channels
Rene Wahl, Gerd Wölfle, AWE Communications GmbH, Germany

Dead-Reckoning for Position-Based Forwarding on Highways
Thomas King, Holger Füßler, Matthias Transier, Wolfgang Effelsberg, University of Mannheim, Germany

Architecture of a Vehicle Communication Gateway for Media Independent Handover
Guido Gehlen, Erik Weiß, Carl-Herbert Rokitansky, Sven Lukas, Bernhard Walke, RWTH Aachen University, Germany

Flexible Connectivity Management in Vehicular Communication Networks
Roberto Baldessari, Andreas Festag, NEC Europe Ltd. Network Laboratories, Germany
Alfredo Matos, Justino Santos, Rui Agular, Universidade de Aveiro, Portugal

Self-Generated Road Status Maps based on Vehicular Ad Hoc Communication
Lars Wieschof, Hermann Rohling, Hamburg University of Technology, Germany
André Ebner, Audi Electronics Venture GmbH, Germany
