37th Annual Reciprocal Meat Conference

of the American Meat Science Association

in cooperation with the National Live Stock and Meat Board

Texas Tech University
Lubbock, Texas

June 17-20, 1984
# Table of Contents

## GROWTH BIOLOGY

Meat Science and Growth Biology: Research for the 80's, S.B. Smith ......................... 1
Use of Repartitioning Agents to Improve Performance and Body Composition of Meat Animals, C.A. Ricks ................................................................. 5
Potential for Growth Hormones and Growth Hormone Releasing Factors to Improve Carcass Composition, R.F. Olsen ......................................................... 12

## RECIPROCATION SESSION 1

Water Activity in Muscle and Related Tissues, O.R. Fennema .................................. 19
Objective Measures of Meat Color, D.H. Krop ......................................................... 24
Meat Scientists Using Video Tapes to Work Smarter, Not Harder, G.W. Davis .................. 33

## FUNCTIONAL PROPERTIES OF COMMINUTED MEAT SYSTEMS

Protein-Protein Interaction in Processed Meats, J.C. Acton ..................................... 36
Protein-Water Interactions in Muscle Foods, J.M. Regenstein ..................................... 44
Protein-Lipid Interactions in Processed Meats, K.W. Jones ....................................... 52

## RECIPROCATION SESSION 2

Developing a New Meat Product, G.G. Suess ......................................................... 58
Using Microcomputers in Meat Science Programs, C.B. Ramsey .................................. 66

## RECIPROCATION SESSION 3

Educating the Public About Meat Nutrition, B. Hicks ............................................. 69
Cell Culturing Techniques, J. Novakofski ................................................................. 78
Rapid Methods of Proximate Analyses, K. Ono ...................................................... 85

## AUTOMATION APPLICATIONS

Automated Grading of Beef and Pork Carcasses, D.M. Allen ..................................... 94
Robotics in the Meat Industry, K.E. Mauser ............................................................ 105
UPDATE

Advances in Ultrasonic Imaging, J.R. Stouffer ........................................... 108
Contribution of Meat to the Diet, B.C. Breidenstein ........................................ 109

LIVESTOCK AND MEAT MARKETING

Price Discovery and Price Reporting in the Livestock and Meat Industry,
   J.P. Muchow ........................................... 120
Value Incentives Reflected Through the Meat Marketing System, R. Vesta ........ 123
Farm-to-Retail Price Spreads for Livestock, J.W. Ross ................................. 129
Live Versus Carcass Selling, B.C. Breidenstein ........................................... 134

UPDATE

Opportunities for Women Scientists in the Meat Industry —
   A National (USA) Survey, J.E. Fox .................................................. 141
Low-Dose Irradiation: A Promising Option for Trichina-Safe Pork Certification,
   R.K. Switzer ........................................... 144

ANNUAL BUSINESS MEETING

Minutes of Previous Meeting .................................................. 148

ANNUAL REPORTS

President ........................................... 148
Secretary-Treasurer ........................................... 149
Nominating Committee ........................................... 149
AMSA Representative to CAST — Germplasm Preservation ............................. 152
EMMRW Representatives ........................................... 153
Archivist ........................................... 153
Awards Sponsor Coordinator ........................................... 154
Placement Coordinator ........................................... 154
Budget and Planning Committee ........................................... 156
Publications Committee ........................................... 156
Extension/Industry Service Committee ........................................... 157
Parliamentarian ........................................... 157
Historian ........................................... 157
Auditing Committee ........................................... 157
Teaching Committee ........................................... 157
Career Brochure Committee ........................................... 159
CAST Representative ........................................... 159
FSAS Representative ........................................... 159
Intersociety Presidents Council Committees
   Drugs, Chemicals and Additives ........................................... 159
   Research ........................................... 160
ANNOUNCEMENTS

ADJOURNMENT

AWARD SELECTION COMMITTEE REPORTS

R.C. Pollock Award ................................................................. 167
Signal Service Award ............................................................... 168
Distinguished Teaching Award ................................................ 170
Distinguished Research Award ................................................ 172
Distinguished Extension/Industry Service Award ....................... 174
Meat Processing Award .......................................................... 176
Special Recognition Award ..................................................... 178
Outstanding Undergraduate Award .......................................... 178
Graduate Student Research Poster Award ................................ 179

GRADUATE STUDENT RESEARCH POSTER COMPETITION

Some Endocrine Levels Related to Performance and Carcass Traits
of Zeranol Implanted Bulls, D.G. Gray .................................... 180
Effect of Retail Lighting Conditions on Fresh Pork Color, S.J. Goll .... 180
Design of a Multivariable Tumbler and its Use to Study Effects
of Atmospheric Conditions on Various Characteristics of Meat, B. Ghavini .... 181
Effects of Prenatal Stunting on Growth and Development in Lambs,
D.J. Nordby ........................................................................ 181
Effects of Low Voltage Electrical Stimulation During Exsanguination on
Characteristics of Beef Longissimus and Semi-membranosus Muscles, J.A. Unruh .... 181
Inhibition on N-Nitrosamine Formation in Brine-Cured Bacon, P.H. Bernthal .... 182
Genetic Differences in Muscle Protein Turnover Rates in Broiler Chickens,
S.J. Jones ........................................................................ 182
Factors Associated with Tenderness Variation of Steaks from Hereford
and Brahman Cattle, R.R. Hawkins ........................................ 182
The Fine Structure of Intrafasciculary Terminating Fibers, Endomysium and Intermyofibrillar Connections in Muscle, M.W. Orcutt ........................................ 183
A Rapid Test for Newcastle Virus Inactivation in Processed Poultry, R.M. Davis .......... 183
Evaluation of Carcass Cutability Prediction Equations Among Several Cattle Breed Types, D.S. Hale ................................................................. 183
Degradation of Intramuscular Collagen During Postmortem Aging, E.W. Mills .............. 184
Carcass Composition of Three Frame Sizes of Hogs Fed to a Fat Constant Endpoint, S.A. Williamson ................................................................. 184
Growth and Muscle Development Characteristics of Purebred Angus and Brahman Bulls, M.B. Solomon ......................................................... 184
Reduction or Replacement of Sodium Chloride in a Tumbled Pork Product, C.B. Frye ................................................................. 185

AMSA COMMITTEE LISTING 1983-84

Business Affairs and Public Information .................................................. 186
Appointed Officers and Special Representatives .......................................... 186
Awards Selection Committees ................................................................. 187
Special Committees .............................................................................. 187

PAST OFFICERS .................................................................................... 188

PAST CONFERENCE CHAIRMEN, RMC AND MIRC .............................. 189

RESULTS – INTERCOLLEGIATE MEAT JUDGING CONTESTS

International ................................................................. 190
American Royal .............................................................. 193
Southwestern Exposition ......................................................... 195
Eastern ................................................................. 196
Pacific International .............................................................. 197
National Western ............................................................... 197
AK-SAR-BEN ................................................................. 198

LIST OF REGISTRANTS ........................................................................ 199
