DYNAMICS AND CONTROL of LARGE STRUCTURES

Proceedings of the Sixth VPI&SU/AIAA Symposium Held in Blacksburg, Virginia

June 29 - July 1, 1987

Edited by L. MEIROVITCH
TABLE OF CONTENTS

Some Recent Results on Robustness Optimization for Control of Flexible Structures

D. W. Rew and J. L. Junkins 1

Reduced-Order Control Design Via the Optimal Projection Approach: A Homotopy Algorithm for Global Optimality

S. Richter 17

Digital Robust Active Control Law Synthesis for Large Order Flexible Structure Using Parameter Optimization

V. Mukhopadhyay 31

Recursive Dynamics of Topological Trees of Rigid Bodies Via Kalman Filtering and Bryson-Frazier Smoothing

G. Rodriguez 45

Square Root Filtering for Continuous-Time Models of Large Space Structures

Y. Oshman and D. J. Inman 61

A Fourier-Based Method for the Suboptimal Control of Nonlinear Dynamical Systems

M. L. Nagurka, V. Yen and H. Benaroya 77

A Survey of Decentralized Control Techniques for Large Space Structures

D. K. Lindner and K. Reichard 89

Decentralized Control of Large-Scale Systems

F. M. Pitman and M. Ahmadian 103

Linear System Identification Using Matrix Exponential Sensitivities

F. M. Tsen and D. J. Mook 119

Evaluation of Two Identification Methods for Damage Detection in Large Space Trusses

S. Weaver Smith and S. L. Hendricks 127

System Identification Experiments for Flexible Structure Control

S. Yurkovich 143
Time-Variable Reduced Order Models: An Approach to Identification and Active Shape-Control of Large Space Structures

J. Marczyk 159

A Rayleigh-Ritz Approach to Structural Parameter Identification

L. Meirovitch, M. A. Norris and J. P. Williams 171

"Daisy" - A Laboratory Facility to Study the Control of Large Flexible Spacecraft

G. B. Sincarsin, W. G. Sincarsin, P. C. Hughes and A. H. Reynaud 185

The Control of Linear Proof-Mass Dampers

J. K. Haviland, H. Politansky, T. W. Lim and W. D. Pilkey 201

Optimum Vibration Control of Flexible Beams by Piezo-Electric Actuators

A. Baz, S. Poh and P. Studer 217

A Laboratory Facility for Flexible Structure Control Experiments

Ü. Özküner, S. Yurkovich, J. Martin and P. Kotnik 235

Attitude Control System Testing on SCOLE

J. Shenhar, D. Sparks, Jr., J. P. Williams and R. C. Montgomery 251

Practical Implementation Issues for Active Control of Large Flexible Structures

D. C. Zimmerman and H. H. Cudney 275

Efficiency of Structure-Control Systems

H. Öz, K. Farag and V. B. Venkayya 291

 Stability Analysis of Large Space Structure Control Systems with Delayed Input

A. S. S. R. Reddy and P. M. Bainum 313

Optimal Location of Actuators for Correcting Distortions Due to Manufacturing Errors in Large Truss Structures

R. Burdisso and R. T. Haftka 323

Adaptive Control Techniques for the SCOLE Configuration

K. Ossman, S. Yurkovich and Ü. Özküner 343
On the Active Vibration Control of Distributed Parameter Systems

P. Hagedorn and J. T. Schmidt 359

Observability of a Bernoulli-Euler Beam Using PVF$_2$ as a Distributed Sensor

S. Miller and J. Hubbard 375

An Investigation of the Time Required for Control of Structures

J. K. Bennighof and R. L. Boucher 391

Optimal Control of Large Flexible Space Structures Using Distributed Gyricity

C. J. Damaren and G. M. T. D'Eleuterio 407

The Effect of Time Delay and Placement of Actuators on Beam Flexure During Nonlinear Slew of SCOLE

S. Fisher 423

On a Modal Approach to the Control of Distributed Parameter Systems

H. H. E. Leipholz 439

Modal Observability and Controllability Measures for First and Second Order Linear Systems and Model Reduction

A. M. A. Hamdan and A. H. Nayfeh 453

Modified Independent Modal Space Control Method for Active Control of Flexible Systems

A. Baz, S. Poh and P. Studer 477

On the Nature of Natural Control

L. Silverberg and M. H. Morton 495

Robots for Manipulation in a Micro-Gravity Environment

R. D. Quinn and C. Lawrence 515

Dynamics and Control of Flexible Robot Manipulators

H. Baruh and S. Tadikonda 529

Equations of Motion of Systems of Variable-Mass Bodies for Space Structure Deployment Simulation

J. E. Keat and J. D. Turner 549
Dynamics and Control of the Tethered Satellite System in the Presence of Offsets

P. K. Lakshmanan, V. J. Modi and A. K. Misra

Optimal Vibration Control of a Flexible Spacecraft During a Minimum-Time Maneuver

L. Meirovitch and Y. Sharony

Modular Large Space Structures Dynamic Modeling with Nonperfect Junctions

F. B. Zazzera, A. E. Finzi and P. Mantegazza

Dynamics Modeling of Viscoelastic Structures

D. F. Golla

Dynamics of a Flexible Orbiting Platform with MRMS

Y. Morita, V. J. Modi and H. Yokota

Dynamics Simulation of Space Structures Subject to Configuration Change

Y. Ohkami, 0. Okamoto, T. Kida and I. Yamaguchi

Analysis of Limit Cycles in Control Systems for Joint Dominated Structures

M. Mercadal and W. E. Vander Velde

LQG Control for the Mini-Mast Experiment

R. C. Montgomery and D. Ghosh

Analysis and Test of a Space Truss Foldable Hinge

N. A. Nimmo, G. C. Horner and J. Laufer

Design of Ground Test Suspension Systems for Verification of Flexible Space Structures

V. M. Cooley, J. N. Juang and P. Ghaemmaghami
